best chance for a romantic setting and a spirit of joyous freedom. He was too busy for any more interludes.

The roof leaked, and had to be repaired. The trees had to be pruned. He had to make preparations for a possible frost. There was wood to chop and stack. The windbreak needed attention. The goat was sick. Tuerta lost a shoe, and had to be led all the way to Vaccatown to the only blacksmith in the country. The barn required cleaning. The well . . . the car . . .

The daily need of food, more food, to fill hungry mouths. A garden to be fertilized and planted. And Christmas only a few weeks away. The dawning wistfulness of things, incredible things, wanted. Roller skates. Dolls. Boats. Bicycles. No money. No money.

"I accept," he said to Beale. "If you'll meet me at Hansen's office to-morrow, we can conclude the deal. The land, or, rather, the oil, is yours." He added, to placate his own feeling of uneasiness, "If any!"

Again he deposited money in the Vaccatown bank, and recovered his lost balance, both financial and moral. He felt now that he could challenge Pelgram openly, and determine for once and for all whether the rancher was bluffing or whether, through some obscure twist of the law, he could claim all the water in the creek for his own purposes.

The pipes were ordered, and delivered just before the second hard rain made the ford temporarily impassable. A rush of water carried the planks away, cut deeply into the banks and, in places, overflowed the road. The children were excited and stimulated by the pounding roar on the roof, the gushing torrents that poured straight out from the eaves like tea from a kettle's spout. They relished the novelty of isolation, the mild danger of encroaching floods, the new, threatening voice of the creek that had become a river, foaming and roaring over the rocks.

When the sun came out, the great tumble of water receded. Soon the rocks emerged, and Gladden was able to jump across. Pete followed.

IN THE morning, Gladden carried the younger children to the bus; but Billoo, howling, refused the hazard.

An Italian came out from town to help, for a consideration of eight dollars a day, with the work of laying the pipes. His name was Calabri. Born, he said, in Prato, near Florence, forty years ago. But he had no memories of it; for him the old city had neither associations nor meaning. He preferred the New World.

Yet Gladden suspected that he remained at heart a Florentine. He had the Tuscan's gift of mockery and quick, cruel wit. And his lunch consisted of veal, romanello cheese, black bread and spaghetti! He washed it down with dark red wine from a milk bottle.

Gladden explained that they might meet opposition. He displayed Manuel's revolver.

"I carry this—in case—"

"Sure!" Calabri slapped his coat pocket. "I'm already ready. I don't shoot, if I don't have to. But sometimes I have to. Plenty bums. Even in Cal-i-forn-ia."

"Don't shoot unless you're shot at. That's a good rule. But I thought I'd warn you."

It was slow work. Day after day, the Italian drove out to the ranch in his battered car, that ran, apparently, from force of habit, since it had no care and stood unprotected in any weather, like a neglected horse.

They repaired the trestles, shifting them so that the pipe line would bridge the canyon at its most shallow point. Thereafter, the line was to cross the river, avoiding Pelgram's property, as far as the dam, where in the old days of the Sandow's tenancy both ranches had drawn their supply.

Snow had fallen in the mountains. Melting, it poured into the valleys, joining the swollen springs, the rivers, the rain-flooded gullies and canyons. Where no water had been for so long, now there were leaping, yellow torrents. Rain fell only to rise in vaporous clouds, and to fall again.

The gradual deepening of green crept across the earth. So slow it was, so sure, it was there before you knew! This curious spring in winter, when the soil flowers and the wind is cold. Soon grass and oats were ankle-deep. "Early, this year," Calabri said.

Mountain peaks had a pure, unearthly glow, translucent and pearly: they seemed to float like clouds.

PELGRAM kept out of the way; his absence was both gratifying and ominous. Nor was there, thank heaven, any sign of Mrs. Pelgram. Gladden heard that she had gone away—to Sacramento, perhaps, to flaunt her red hair and provocative loveliness.

Gladden wondered whether he would ever again live in a city. He tried to imagine himself a rapt habitué of the Manhattan or the Metropolitan. At his club. Elbowing his way along the crowded streets.

He tried to recapture the brazen poetry of the incredible city. Tubes and tunnels, bridges and ferries. Faces. Humanity pressing close. Stimulus and satiation. Rooms where he was always welcome: women of elegance, of a certain worldly, complicated fascination, in attitudes of languid attention: wit, analysis; the patter of their kind. Then, people he had known and liked: actresses, producers, and musicians. Faulty and generous.

He tried to see himself, intact, unchanged, as he had been in the first flush of experience before the war. He failed. He had changed beyond recognition. He doubted whether he could meet those people, any of them, on their own ground. Certainly, they would find him too different to be understandable.

He knew that some day he would go back and round out the broken circle. Not now. Some day. Now was enough.

He was engaged in a primitive struggle: it absorbed him. To pipe the water down. The orchards could not survive another drought. In January and February he would plow again. Early in the summer, he must irrigate.

An order from the court gave him a feeling of security and justification. He carried the pipes across the river without interference, and started toward the dam.

"Perhaps," he thought, "Pelgram's had a change of heart. Or perhaps he has ceased to covet. I don't much care which, so long as he leaves me alone. I have a right to the surplus; tradition says so; the court says so; nature itself says so."

It was on the fourth week of the work that trouble began.

Pelgram appeared at the trestle crossing, carrying a rifle. "I warn you," he said. "If you calculate on getting water at my dam, you're on the wrong track. I'll blow this pipe to hell. I did it once. I'll do it again." He added politely, "I'll blow you to hell at the same time."

"Go ahead," Gladden said.

"Is that an invitation?"

Calabri, who had hurried down from the dam, answered, "You bet your life!"

"Well, I advise you: Watch your step!"

Calabri whistled. "What you think of that? Boss, let me shoot!"

"You'd better not. He's probably bluffing."

The Italian's broad, rough hand relaxed. He shrugged his shoulders. Then, as Pelgram turned away, he made a gesture dear to his race, an insulting flip of the hand beneath the chin.

"We'll call his bluff," Gladden said. "We'll have the water coming through in a fortnight."

But he was uneasy. That night he sent the children to bed earlier than usual and, leaving Billoo on the porch, went himself to the canyon. Calabri, who was a skilled mason, had built a small aqueduct, strong, well-spaced and reliable, across this shallow gully. The pipes were already in place.

In a smother of darkness, Gladden crept on hands and knees to the rim. At first he could see nothing. He was ashamed of his anxiety. It was hardly possible that Pelgram would risk arrest for a mere matter of spite. When he heard a murmur of voices, he blamed his imagination. Then he saw a round spotlight, quick as a moth, flutter over the concrete supports, sweep along the ground and snap out.

"Tramps," he thought. "I don't dare to shoot. And if I speak, they might shoot me."

He was in full view, in case they turned the flash his way. He dropped cautiously, and wriggled forward until he could hear their voices: Pelgram, and, he judged, one other!

GLADDEN heard Pelgram say, "Be careful. He's likely to be watching at the river end. Better go over the hill and through the pasture. Go to bed, soon's you get home. I'm driving to town. I'll be at Freer's, if anyone wants me. I've been there all the evening, remember! Come on. We'd better set her off."

The men down in the canyon shuffled and coughed. "All right?"

"Sure. Only mind the wire. Better use your flash. We don't want to blow ourselves up."

They would be armed, of course.

The light showed again, and without waiting Gladden fired six feet above it. Manuel's gun was noisy and vituperative. A red flash stained the darkness, another and another.

Gladden rolled sideways, over and over, face down in the mud, face up to the sky, holding the revolver at arm's length.

A rattle of loose earth. A scramble and a sound of heavy breathing. Gladden

New CHRYSLER "52"

$725 to $795
F.O.B. DETROIT

52 Miles Per Hour
5 to 25 Miles in 8 Seconds
Full-sized bodies, for adult passengers

Greater Performance and Luxury and Still Lower Prices

HERE again in this new "52" is another one of those vivid Chrysler demonstrations of greater value which tell their own striking story at a glance.

You need do no more than stand and study the Chrysler "52"—contrasting it in your mind with everything offered in its field—to realize that once more Chrysler Standardized Quality has yielded more to the buyer than money has ever been able to buy before.

Here in the new Chrysler "52" is true beauty far above previous standards in its class.

Here is vigor of performance far greater than you have ever been able to buy before at this money—52 and more unvarying miles per hour, delivered with a smoothness no other low-priced car can even approach.

Here, in the new "52", are longer, roomier bodies—more space, more comfort, more luxury and beauty than ever provided before.

Any one of the 4700 Chrysler dealers is eager to show you the new "52".

See it—its very appearance will make you eager to take the wheel in a test drive.

And above all, drive it—for once you have experienced its performance we are confident that you, too, will agree that in the new "52" Chrysler has passed beyond all accepted limits of what $725 to $795 have been able to buy in motoring performance, comfort and luxury.

New Chrysler "Red-Head" Now Available for New "52"
The new Chrysler "Red-Head" engine, giving extra speed, pick-up and hill-climbing ability, assured by the use of high-compression fuels, is now made available for the new Chrysler "52". Any Chrysler dealer will gladly give you full particulars and an impressive demonstration of the "Red-Head" engine advantages.

Coupe $725; 2-door Sedan $735; Roadster (with rumble seat) $725; 4-door Sedan; $795. All prices f. o. b. Detroit, subject to current Federal excise tax. Chrysler dealers are in position to extend the convenience of time payments. Ask about Chrysler's attractive plan. All Chrysler cars have the additional protection against theft of the Fedco System of numbering.

CHRYSLER MODEL NUMBERS MEAN MILES PER HOUR

fired again at random. Rolled again. Doubled back. Rose to his knees. Stood and ran.

The explosion knocked him down. A small geyser of rock and concrete, broken pipe and dirt showered both sides of the canyon. The descending crash of splinters sounded like a particularly vicious fountain. . . . Gladden lay where he was.

"That's that," he said. "Now for a feud or a trial, or both. More work. More dynamite. And in the end a lot of dead trees. And failure."

Another explosion at the river startled him out of his weakness. And he got up, shook himself, and ran back to the house. They had dynamited the carry across the river.

THE children were awake. Gladden took Lily from Bertha and comforted her. Some of his own bitter anger seemed to have shaken the others. They knew without asking what had happened, and what the destruction of the pipes meant to Gladden. Pete stood at the window, staring into the darkness, his back turned, his hands clasped rigidly behind him.

Bertha touched Gladden's arm. This was a new, gentle Bertha. "I'm sorry, Jim!" she said. "What are we going to do now?"

He told her to put the children to bed again, and to blow out the lights.

"You won't go over to Pelgram's?"

Pete turned sharply. His face was white and his lips were drawn, puckered by a violent, transforming emotion. "You killed him, Jim?"

Gladden shook his head. "No. I didn't kill him, Pete. He got away."

"Then he'll kill *you*," Pete said bitterly. "He tried to kill my father. He ain't afraid of anything!"

Bertha turned on Pete. Her anger burned through her. "You shut up! Shut up, d'you hear! He dassn't!"

Lily, who had been holding her breath, let it go again.

"Here, take her," Gladden said. "I'm going up to the dam!"

"Can I come?" Pete asked. Resolve hardened behind his eyes and for a moment he looked old.

But Gladden shook his head.

Then, at the door, he looked back at them. He had not been thinking of the children during the last violent half-hour. Now, facing them from the threshold, he saw their bravery for what it was. They had been taught to believe in the rightness of the world; they were just beginning to find out the sort of world it is. Poor childhood, made of credulity and expectancy, faith and appetite! Strange state of dawning wisdom, of exquisite experience and vast, self-conscious importance!

He realized how far he, how far all men, are removed from children. A pat on the head, a promise, a lie, and dismissal. He was leaving them alone in the house, late at night, because of an adult malice, complicated, ugly, and threatening. It was his ridiculous need to avenge himself, not them.

Bertha held Lily awkwardly. The baby's head had fallen against her shoulder. The little hands, relaxed, hung limply. Bertha's eyes, grave, as he had never seen them, questioned him and held him. He had time, in that brief pause, to be thankful for her innocence. He said awkwardly, "Don't worry about me. I'll come back. Pete, hold Billoo."

He knew that Pelgram had not gone to Vaccatown. The four shots must have convinced him that he had been seen, and that it was useless to attempt an alibi. He would be at home, perhaps waiting.

Gladden crossed the ford easily: he knew by heart the distance between the stepping-stones; even in the dusk he found his way. He remembered the first time he had come to this place. How long ago? Five months. It might have been a lifetime. Already, the very contour of the earth was familiar. Did he love it? Something very close to love, beginning.

He turned along the road toward the Pelgram ranch. Unconsciously, as he walked he loaded the revolver, slipping in the charge with a vicious, angry thrust. He was moving without purpose. His mind hurt. He thought of everything except the thing he was going to do.

"What *am* I going to do?"

With a backward jerk of his arm, he tossed the revolver as far as he could into the brush at the side of the road. He felt better.

The ranch-house was dark. A wind had come up, bitter cold, from the north, and the windmill behind the barn squeaked and rattled. The dog flittered along the fence, cowering, in silence.

GLADDEN opened the gate, mounted the short flight of steps to the door and knocked. He made as much noise as he could.

At once, a light flashed on in the dining-room. He could see Pelgram, and, worse luck, Mrs. Pelgram. Her red hair, like little flames.

"That you, Freer?"

"Yes," Gladden said.

Pelgram opened the door.

"Oh," he said, when he saw Gladden. "It's you!"

Mrs. Pelgram was just behind him. Her eyes, dark and frightened, stared over his shoulder.

Then a new look came into them. She thrust her husband aside, and darted past Gladden, down the steps to the gate. He heard her running along the road.

(*To be concluded*)

Have You a Budding Genius in Your Home?

(*Continued from page 37*)

Jefferson, John Milton, and Daniel Webster rated at 145; Voltaire at 170; Pascal, the mathematician, and Macaulay, the historian, at 180; Goethe, the German poet, at 185; while the highest rating of all was that of John Stuart Mill, the economist, at 190.

"This does not mean we really believe that Charles Dickens and Daniel Webster were actually smarter boys than George Washington and General Sherman, or that they in turn were smarter than General Grant and Andrew Jackson. It simply means that the material we could find about each one of them would indicate the IQ score of each one of these boys to be at this level, provided this material were all that was ever known about him.

"But as a rule the more material we could find about a boy the higher was his estimated IQ. And we believe the reason why the average of sixteen to twenty-six IQ is higher than the first is because we had more and better material to work on for judging the later years of our geniuses.

"It is generally conceded that your IQ does not change much as you grow older. For instance, if we could have tested Abraham Lincoln as a boy and tested him again as President, his rating would probably not have shown much change.

"But we drew blanks on the childhood of a number of the greatest geniuses. We couldn't find enough material on Shakespeare, for instance, to give him a rating. What a bright light would have shone on the study of genius if his early traits had been recorded!

"From the evidence at hand we came to the conclusion that the scores of these three hundred young geniuses in an actual intelligence test would have averaged at least 165. A few, such as Goethe, Emerson, Franklin, Jefferson, Milton, and Coleridge, might have rated from 170 to 200 or even higher.

"THERE are undoubtedly many thousand children in the United States whose intelligence tests would rate above 140. And I believe that modern methods of psychological measurement make it possible to discover many of these peculiarly gifted children in their early school days.

"This means that the high-score children, who were formerly kept down by lack of training or by unsuitable training, will now, with the greater educational opportunities afforded them, be able to make the truly great achievements that we have a right to expect of them. It is quite possible that just as many geniuses have been suppressed and remained 'mute, inglorious Miltons' in the past as have actually come to light.

"But even intelligence, important as it is, isn't all," continued Doctor Cox. "And I came out of the investigation with the firm conviction that, while a child must score pretty well up on the intelligence scale to make great achievements in later life, personality is of prime importance in determining a man's worldly success.

"One of the very first things to notice about a child as a sign of real ability is how old he is when he says and does bright things. For example, many children write good school essays in the fourth or fifth grade; but the great statesman, Mirabeau, at the age of five years and six months, wrote the following composition addressed to himself:

MONSIEUR DE MIRABEAU: I beg you to pay attention to your writing and not to make blots on your copybook, to take notice of what is done, to obey your master, your father, your

Take the Straight, Sure Road to Greater Profits

With so simple a path before you, why remain one of those who scramble along, uncertain as to the proper route to take, and who never from day to day can tell where their business is going?

Thousands find the Burroughs Simplified Accounting Plan the straight, sure road to greater and easier profits.

It brings to them each day a clear picture of their progress. It enables them to plan and direct their buying, their selling and their collections. It eliminates the guessing, the mistakes and the worry of uncertainty.

Yet this plan costs less to adopt and maintain than your present methods. It saves while it earns.

Give the local Burroughs man an opportunity to prove these statements in your own business. There is no obligation. Call him now.

Men win with FACES that are FIT

BEGIN the day with Williams. Keep *your* face FIT! 87 years of research, three generations of intensive specialized study have gone into every tube of Williams. It will give a shave that's easy, smooth and sweet.

More—a daily treatment of Williams lather leaves your face *fit*. Williams Shaving Cream is ultra-pure; absolutely without trace of coloring matter; its major ingredients triple-distilled. It thoroughly cleanses the pores, tones up the delicate skin structure, helps toward a buoyant, youthful fitness.

The drug clerk doesn't know how it's made, but he knows what it does. *"Oh, yes . . . . . but they all come back to Williams!"*

Next time say

Williams Shaving Cream

mother; not to be obstinate; no evasions, honor above everything; attack nobody unless you are attacked yourself; defend your country; be not disagreeable to the servants, nor be familiar with them; conceal the faults of your neighbor, because that may happen to you yourself.

"Perhaps your boy or girl does not care for writing. Maybe he is interested in mathematics. Many children do well at figures; but how many can do what little Blaise Pascal did? He actually 'invented' geometry when he was twelve, and worked up to Euclid's thirty-second proposition before anyone knew what he was doing.

"Perhaps your boy likes to make things. How does he compare with Robert Fulton, inventor of the steamboat? Before young Robert was thirteen he pounded out lead for a pencil, performed experiments with quicksilver; drew designs for firearms, and became expert in determining the carrying distance of different rifle bores and balls.

"Perhaps your little girl is musical. Does she, like Mozart at three or four, begin to invent musical ideas? Does she sit at the piano and pick out thirds, and does she write out her own first compositions at seven?

"These are only a few of many outstanding examples," said Doctor Cox. "What I wish to get across to parents and all those who deal with children is the importance of noticing *at what age* these things are accomplished.

"We often hear it said that Johnny or Mary is slow; but will wake up later on. Many great men are reported to have been very dull as children. The poet Goldsmith's teacher said of him, 'There never was so dull a boy.' It was recently stated that Daniel Webster was also slow as a boy. Now, let's look at the real facts: Goldsmith had shown signs of genius at an age when he could scarcely write, and he was distinguished for his verse before he was ten years old. Webster was poorly prepared in Latin and Greek when, at fifteen, he started to Dartmouth College; but this merely indicated he had had poor schooling.

"I FOUND all through my investigation that poor schooling and poor home training, where they occurred, were undoubtedly a handicap to these geniuses. In some cases too, it seemed as though chance opportunities had played a major part in their success. The impressive thing was, however, that these boys and girls *took advantage of whatever opportunity occurred.* Their schoolmates, when offered the same opportunity, did not respond. Daniel Webster is a good example of this. His early schooling was often interrupted, because his father needed his help on the farm; he had one year only of actual college preparatory work; but when he did get to college he soon won a reputation for scholarship, and at eighteen was selected to deliver a Fourth of July oration. Webster's memory was always excellent. When he was only eight years old he read the Constitution of the United States, printed on a handkerchief which he bought at a county fair, and remembered it almost verbatim all his life.

"Things like that are significant in every boy as well as in Daniel Webster. They show not only a good memory but also a memory that *retains things of im-*

Why *changed* motoring conditions demand a new margin of safety

Galloping progress —but how about lubrication?

Change fills the air. The war of competition spurs automobile manufacturers to a gallop of progress. Many changes in engine design call for marked improvement in lubricating oils.

One car manufacturer employs 432 men for engineering and experimental work alone.

Every week another Detroit automobile manufacturer receives about 500 letters from inventors and others. The Gargoyle Mobiloil Engineering Board is in constant contact with practically every automobile manufacturer—working on the same problems of design and lubrication—conferring about new lubrication needs.

It is a rare relationship—one which could exist only between the automobile manufacturer and the recognized leader in scientific lubrication.

Recent changes in engine and chassis design have been especially numerous.

Changed engine designs have brought higher heat, swifter engine speed, and higher compression. A new margin of safety in your lubrication is imperative.

Congested traffic has multiplied starts and stops. Quicker and more frequent acceleration is demanded. Both conditions put heavier loads on your engine and your lubricating oil.

Improved highways have brought faster, longer driving. Many "good" oils of yesterday now fail to meet the new load which is thus imposed on lubrication.

Has your lubrication the new margin of safety necessary to meet these changed conditions? Yes; if you use the 1927 Gargoyle Mobiloil.

GARGOYLE

Mobiloil

Make the chart your guide

Mobiloil engineers have studied every one of these changes and their effect on lubrication. Steadily, steadily, step after step, Mobiloil has been improved to meet new problems as they arose.

During the past year alone, improvements of the utmost importance have been made in Mobiloil. To use the correct grade of Gargoyle Mobiloil is to protect your engine with an engineering margin of safety which can never be secured by asking merely for "a quart of oil."

Remember that when you need oil.

YOUR guide—If your car is not listed here, see the complete Mobiloil Chart at your dealer's and remember that . .

182 automobile and motor truck manufacturers approve it!

The correct grades of Gargoyle Mobiloil for engine lubrication of prominent passenger cars are specified below.

Do you use . . .

a dentifrice because you are *scared*

or because you want your teeth to be

CLEAN?

PICK up the package of dentifrice that is in your bathroom now and try to remember why you bought that particular kind.

Was it fear? Did you buy it to cure or prevent some ugly mouth disease that you had been frightened about?

Or did you buy it simply because you wanted your teeth to be *clean?*

It is a very wise thing to keep the teeth clean, and a very foolish thing not to. There is no doubt that neglect of the teeth is dangerous and that you ought to do all you can to protect the health of your teeth, mouth and gums.

But how much can you do?

You can get the best answer to that question from your dentist. He will tell you just this: "The most that we in the dental profession expect of a dentifrice is that it will *clean* the teeth safely and thoroughly. More than this, we feel, a dentifrice cannot be logically expected to do, nor can it actually do.

"Keep your teeth clean and don't be afraid, for in keeping them clean you are doing every possible thing that anyone except a dentist can do to avoid dangers of tooth decay and other dental troubles."

It is better to rely on *cleanliness* and be confident, for in using a dentifrice that *really* cleans, such as Colgate's, you are doing the utmost you can do to keep your teeth healthy and beautiful.

Colgate & Co. Est. 1806

portance. There are people of very moderate intelligence who can remember telephone or automobile numbers or all the cards played at bridge; but try them on remembering the Constitution, or a newspaper editorial, and they are lost.

"Charles Darwin is another boy who was labeled slow and dull. He himself said that his younger sister, Catherine, learned faster than he, and that his father and teachers considered him very ordinary. But what are the facts? When little Charles was only eight he made a large and very careful collection of coins, plants, shells, stones, and other natural objects, and at ten he had classified them. He did not care much for Latin, but spent many hours working with his brother Erasmus, who had a little chemical laboratory. And by the age of twenty-two Darwin was looked upon as a coming man in science.

"ANOTHER fact that my investigation brought out very clearly," continued Doctor Cox, "is that every step in a child's life explains the next. For instance, nearly all children make collections. Some collect the tops of milk bottles, some collect cigar wrappers and other insignificant objects. But if a child collects and classifies things of *real* importance, as little Charles Darwin did, there is scarcely any better sign of true mental power.

"It is this sort of thing that gives a child his background for later achievements. Whenever you hear of a man doing a great thing you may be sure that behind it somewhere is a great background. This background may be a mother's training, a father's example, a school-teacher's inspiration; but it has to be there, or else the great achievement does not come, no matter how favorable the opportunity.

"However, some boys are constantly developing their own background, even against obstacles. Parents should observe closely how their children meet obstacles. Obstacles give some people just the fighting stimulus they need, while others are discouraged by them. Liebig, the great German chemist, who is best known to us by his beef extract, is an example of the first kind. Liebig's teacher said to him: 'What do you think you will amount to if you don't study your Latin and Greek?' The boy replied, 'I'm going to be a chemist,' and the whole school laughed in derision. Even the teacher did not know what a chemist was. There was no such thing in those days.

"Liebig's father, however, was an apothecary, and the boy and his brother got some chemicals and began experimenting in the back of the shop. They blew the roof off one day; but even that obstacle did not deter young Liebig. He went on, and became the father of modern agricultural chemistry.

"Another point of extreme importance in every child's education I should like to bring to the attention of every present-day father. Liebig's father took the boy about to see all sorts of manufacturing operations. Benjamin Franklin's father did the same thing. This gave these boys an opportunity to see a variety of activities, and familiarize themselves with all sorts of interests and occupations. They also met mature people and saw them at

Try This At Home

© 1927 M. L. I. CO.

Can you touch the wall with the back of your head, shoulders, hips, calves of your legs and heels, and hold this position as you walk away from the wall?

Or grasp the two knobs of a door and make every inch of your spine touch the edge of the door?

Or touch the wall only with chest and toes, then step back and hold your body in the same position?

Now stand naturally and ask some candid member of the family whether or not you stand correctly with head up, chin in, back straight, shoulders flat, abdomen in, weight on the balls of your feet.

WHY stand straight? For better appearance? Yes, partly. For added poise and dignity?—That also. For the stimulating effect upon self-confidence and courage?—Still another valuable benefit. But—most of all—because erect posture is an immediate tonic with no bad after-effect. Good Posture makes one feel more buoyant, gives a physical sensation of freedom and ease in the body.

But there is more than that to be gained from good posture. A straight body, carried correctly, gives one better health and added strength—it frequently corrects physical troubles that no amount of medicine will cure.

Those headaches of yours, those spells of indigestion, that dreadful feeling of depression—that the world is against you—may easily have resulted from the way in which you are carrying yourself.

Much of your nervousness, your fatigue and your backaches, your "rheumatic" pains and the possible poisoning that comes from intestinal sluggishness, often may be traced to faulty posture.

Your heart, lungs, stomach, kidneys, liver—working machinery of the body—are meant to be free and uncrowded.

When you "stand tall" and hold your spine straight, these organs have sufficient room to carry on their work.

When you slump over with rounded shoulders or spine curved in at the waist, you squeeze the organs together. The free action of your heart is threatened. Your stomach and liver cannot do their work so well. The kidneys may be forced out of place. Your blood cannot circulate so freely—some parts of your body may get too little blood, others too much.

When your chest is contracted your lungs cannot expand. Shallow breathing starves your blood for the life-giving oxygen which every part of your body must have.

The first lesson in singing, in public speaking, and in athletics is correct posture to insure deep breathing. It is not necessary to have a perfect figure to stand or sit properly. But a perfect body can be ruined by bad posture.

Stand tall—stand correctly—stand straight.

Progressive Boards of Education, all over the country, recognize that pupils must sit properly during study hours. Curvature of the spine is sometimes caused by desks and chairs which do not permit the child to sit straight. Posture is taught in the daily calisthenics classes. Fatigue and malnutrition are guarded against, as frequent causes of bad posture.

Magazines and newspapers, more and more, are urging their readers to learn not only the advantages of correct posture, but also the dangers that attend bad posture.

In the Home Office of the Metropolitan Life Insurance Company striking physical improvement among our employees has been brought about by our Director of Posture. Bent bodies have been straightened. Headaches and other ailments of obscure origin have been made to disappear. Low spirits have been raised. Learning how to stand and sit correctly has added to health and happiness.

A valuable booklet on the subject of posture has been prepared and one copy will be mailed free to each person requesting it. Send for "The Importance of Posture".

ORDINARY LATHER
This lather-picture (greatly magnified) of ordinary shaving cream shows how large, air-filled bubbles fail to get down to the base of the beard; and how they hold air, instead of water, against whiskers.

COLGATE LATHER
This picture of Colgate lather shows how myriads of tiny, moisture-laden bubbles hold water, not air, in direct contact with the base of the beard, thus softening every whisker right where razor works.

"Small-bubble" lather *teems with water*

Softens each hair at base—whiskers come off easily

BUBBLES are "shells" of water. And water, science says, is what really softens beards. Therefore Colgate has made this "small-bubble" lather. It contains thousands more of these water-shells, hence holds more moisture, as the lather pictures above prove.

How "small-bubble" lather works. The moment Colgate lather forms on your beard, two things happen:

1. The soap in the lather breaks up and floats away the oil film that covers each hair.

2. With the oil film gone, millions of tiny, water-saturated bubbles bring and hold an abundance of water down to the base of the beard, right where the razor does its work.

Because your beard is properly softened at its base, your razor works easily and quickly. Every hair is cut close and clean. And your face remains cool and comfortable throughout the day.

A WEEK'S SHAVES—FREE. Try this unique "small-bubble" lather at our expense. The coupon below will bring a generous trial-size tube—free.

EXTRA DIVIDEND! We will also include a sample box of Colgate's Talc for Men—the new after-shave powder that *keeps* your face looking freshly shaved all day long.

SOFTENS THE BEARD AT THE BASE

work. It is a great mistake to look down on children and exclude them from adult interests."

"All that you have told me up to the present," I said to Doctor Cox, "seems to indicate that these children had a natural bent in some one direction. Are we all born with these natural bents, or at least a trend in a definite direction?"

"Well, in all these children whose lives we investigated," she replied, "our information indicates an early trend in the direction of their future achievement. The child in every case seemed to be father to the man. Lincoln as a child was always asking curious and important questions. Watt, inventor of the steam engine, stood for hours at a time holding a spoon in front of the teakettle spout, while his aunt scolded him for not doing something instructive. The poets wrote verses before they were ten; several composed before they could write. The artists, musicians, and inventors were drawing, extemporizing, or inventing before their teens. Ulysses S. Grant showed unusual organizing capacity even as a farm boy, and was a famous horseman. He was later the finest horseman at West Point. Andrew Jackson was an unconquerable fighter in school.

"William Herschel, the astronomer, was trained by his father as a musician; but when not much more than ten, he and his father would sit up far into the night discussing astronomy and mathematics, while an elder brother, who had had the same opportunity, was snoring in bed near by. Finally, William's passion for astronomy proved the stronger; he abandoned music, and at thirty-five was a famous observer of the stars.

"Some parents have tried to force their children into a special pattern, but there is a limit to their success. Karl Weber's father tried desperately to make him a second Mozart, who at the age of five was being exhibited as a pianist all over Europe. When little Karl was nine the father gave up the experiment. What happened? Some years later the boy, this time of his own accord, went back to music, and at eighteen was a distinguished composer.

"Parents should hold up models and heroes before their children, but should not try to make them into cheap imitations. The great thing is to bring out the *individuality* of each child.

"I WISH to emphasize one thing here: Parents cannot create talent or genius, but they can greatly discourage or even suppress it. A child may be another Lincoln or Longfellow, and yet be ruined for lack of opportunity. I don't suppose there is any one thing that acts as a complete obstruction; but adverse circumstances, especially lack of education, often act as a gradual hindrance all along the line, while education and opportunity continuously act as accelerators.

"Take the case of Victor Cousin, the French philosopher. He was a street urchin; his parents very poor and ignorant. His mother worked out by the day. One day little Victor rescued another boy from a dreadful street accident. The child's mother happened to be well-to-do, and as an expression of her gratitude she gave Victor an education. At eighteen, he was carrying off all the prizes in his

school in Paris. How could he have made a great philosopher without this education?"

"Would you say, then," I inquired, "that a great many famous men and women owe much of their success to their mothers or fathers or to some teacher or relative?"

"There can be no doubt of it," rejoined Doctor Cox with emphasis. "Take the story of Alexander von Humboldt and his brother William. There are probably more towns, rivers, and mountains in different parts of the world named in honor of Alexander Humboldt than of any other person in history. The father died early, and the mother, who was a noblewoman, supervised her boys' education. She secured the ablest instructors, twelve teachers in all, eleven of whom are still found in the German encyclopedias. Thus from childhood the boys were brought into touch with great men. The mother also sent them on journeys to meet distinguished persons in other countries. Moreover, very early in life they were given important responsible tasks to perform.

"NOW, here are three interesting things to note: The first is that, while these boys had the same instructors and education, yet William very early took to literature and Alexander to science. They both became eminent statesmen, but in different lines. William became the foremost literary critic of his day and was the father of the educational system of modern Germany. Alexander, although very frail as a child, later became a great mountain climber and explorer, and is famous in many fields of science.

"The second thing is that it was this wide education which made the vast range of their achievements possible. Had they had a meager early training, such as that of Bobbie Burns or Antonio Canova, I think they would have achieved success in some *one* line; but the enormous range of their achievements was doubtless largely due to the wide opportunity and education their mother gave them.

"Then comes a third thing which is of importance to every parent. The Humboldt boys early formed the habit of unhesitatingly undertaking important tasks and carrying responsibilities.

"I feel it is of the greatest importance to teach children very early—the earlier the better—the *habit* of undertaking difficult tasks and the habit of carrying them through to a satisfactory finish. Of course this thrusting of responsibility on children while still very young must be done with caution and judgment.

"Another fine example of a boy shouldering responsibility is Admiral David Farragut. A friend who was in the Navy said to the family that he would like to take one of the Farragut boys on his ship. David at once said, 'I'll be the one.' He was made a midshipman at nine and placed in command of a boat at eleven. During the war of 1812, although not quite thirteen, his captain placed him in command of a captured ship with the enemy captain and crew on board. The enemy captain tried to take the command away from the boy, but young Farragut enforced his own orders and brought the ship safely to port.

"Of one thing I'm quite certain, and

From days when the ancients conceived the sun as a chariot of fire sped by steeds of flame, men have dreamed and striven to harness heat to useful power.

A Great Companion Invention to the Super-Six Principle -

Turns waste heat to power

This new companion invention to the Super-Six principle converts heat wasted in all other types, into useful power.

Together they combine the highest efficiency in power generation, and the maximum efficiency in power transmission ever achieved within our knowledge. It makes Hudson the most economical car per pound weight in the world.

Steam Engine Smoothness and Power

The new Hudson motor delivers a flood of rugged power from standing start closely resembling the mighty and elastic power of the steam engine. It eliminates spark knock. It prevents oil dilution. Ordinary gasoline gives the results sought through special high-priced fuels.

And at all speeds this power is buoyant, vivacious and instantly answerable to the slightest throttle touch.

That MENNEN *touch!*

Every hair on your face offers a hurdle to the razor blade, an obstacle in the shape of a minute skin peak at the base of the hair which the razor ordinarily must jump or nick. But the Mennen process of *Dermutation* relaxes and levels these humps, softening and mollifying the toughest beard so that the blade glides fast, close and clean without a hitch or scrape. *Dermutation* starts the minute you touch the brush to your face. It works just as well in the hardest and most alkaline waters as in the softest that ever filled the old home rain barrel. The lather never dries or smarts on the face.

It's an all-day shave, too. Five agreeable emollients in Mennen lather prolong the comfort and smoothness of the Mennen shave. Twenty-four hours of knowing you look and feel your best. Everybody notices the difference.

Mennen Skin Balm—Try this brisk lotion that comes in a handy tube. There's a reviving tingle to it, like a rub-down after a cold shower.

Mennen Talcum for Men—For a non-shiny finish to top off the perfect shave, flesh-colored and doesn't show.

There's nothing to it, once you know the complete Mennen shave. I look for a million more happy faces by convention week in '28.

SHAVING CREAM

that is that the mother or father who tries to shield the child from all the hard things and holds him back from shouldering a fair share of responsibility in proportion to his strength is taking away one of the greatest educational opportunities."

"Can you think of any other parents or relatives of these remarkable children who exerted strong influences upon their careers?" I asked Doctor Cox.

"Well, take the Wesleys, John and Charles. In their case both parents did their utmost to give all their children an all-'round education. The fathers of John Stuart Mill, the economist; of Goethe, the poet; of Niebuhr, the German historian, and of John Adams, the statesman, are famous examples of fathers who gave an all-'round intensive training to their sons. John Adams took his son John Quincy abroad as his special secretary before he was twelve, and introduced him to the eminent men of Europe.

"Edward Jenner, who discovered vaccination, was reared by an older brother, who gave him every opportunity and inspiration. One day the boy heard a country woman say that she could not take smallpox because she had had cowpox. This simple remark is said to have led Jenner's mind to the discovery of vaccination. But without the scientific education provided by his elder brother it may well be doubted if Jenner's mind would have been led to his great discovery.

"In the case of Jacob Grimm, it was a maiden aunt who gave the boy and his brother their education. Without this careful training I doubt that we should ever have had Grimm's Fairy Tales. It was Abraham Lincoln's stepmother who perceived the boy's remarkable gifts and was his boyhood inspiration. You will nearly always find mothers and fathers, uncles and aunts and teachers, oldest brothers and sisters in that great background which is so important in the preparation of a genius."

AT THIS point I said to Doctor Cox, "I wish you would bring out for our AMERICAN MAGAZINE readers how much importance you attach to such personality qualities as will power, ambition, hard work, perseverance, self-confidence, and similar traits."

"Practically all the geniuses I classified," replied Doctor Cox, "displayed these traits early and very strongly. Of course they may be inborn qualities, just as unusual intelligence is inherent in some and not in others. However, we believe these personality qualities can be cultivated more readily than intellectual ability. And one thing is certain—that, without them, intellectual ability will never get very far.

"We found that in the case of statesmen, such as Burke, Jefferson, Peel, Webster, and among religious leaders, such as Calvin, Luther, Wesley, and Penn, force of character, desire to excel, and general balance and evenness, seem to have played a somewhat larger part than in the lives of artists and writers. Richard Cobbett is a fine example of what indomitable will, with only moderate mental brilliancy, can accomplish. He was a prodigy of hard work. As a boy of eight or nine, after working long hours as assistant to a gardener, he would study far into the night. Bobbie Burns did this

Where Franklin has pioneered and the motor world has followed

THE most perilous air plane achievements of recent history have all been made with *air-cooled* motors. Franklin pioneered air-cooling for the world. Such an endorsement of a Franklin principle is not unusual.

The first four-cylinder car was built by Franklin. Also the first six-cylinder car, the first valve-in-head cylinder and the first closed body. In a dozen such matters Franklin pioneered and the motor world followed.

Newly initiated Franklin owners tell us they had never imagined it possible to travel so far in one day *without fatigue*. Others say they had never known the real meaning of trouble-free motoring until they abandoned water-cooled cars. Any owner will tell you amazing facts on Franklin economy. And the reasons for Franklin's *different* performance are fundamental—scientific structural features built into the car—all as advanced and important as air-cooling.

A demonstration reveals a degree of motor car performance *ahead of the times*—an illuminating experience which you owe yourself today. You then appreciate why the Franklin owner's next car is so generally another Franklin.

***Another Exclusive Superiority Feature — light unsprung weight—the weight of all parts below** the springs. With scientific light weight construction, the pounding of the road is greatly reduced —the chassis absorbing part of the shocks, the springs taking care of the balance — and the body riding easily and smoothly.*

R. H. Reiss
Treasurer and General Manager, International Tailoring Company of New York and Chicago, says he could not tend to all his numerous duties without The Dictaphone in his office and one at home

"My Dictaphones *made* me—"

"And that's true for my Secretary, too."

See what The Dictaphone can do toward making you. Read coupon offer below.

"IT'S hardly too much to say that The Dictaphone has been my making. At any rate, I should be at a loss without its help to manage the four concerns which look to me for executive guidance."

The speaker is R. H. Reiss—and his chief position is that of Treasurer and General Manager of the International Tailoring Company, the world's largest producers of men's made-to-measure suits.

"I find The Dictaphone indispensable for memos and instructions. It is so much handier than shorthand. Often I dictate only outlines, leaving my Secretary to complete the job.

"Frequently I turn directly from telephone to Dictaphone and record oral agreements or orders needing prompt attention.

"At home my second Dictaphone records memos, or conclusions reached by study of business problems. Sometimes a department head spends an evening with me there and we agree on certain policies. My advertising manager, for example, came out last week and with The Dictaphone we crystallized a season's advertising policy.

"Only by Dictaphone can I maintain the intimate contact needed with some 30 department heads in our three plants making thousands of suits daily. I should be handicapped in other duties without my Dictaphones."

Helen Delahanty
Secretary to Mr. Reiss, avers she simply couldn't organize her work without her Dictaphone

Helen Delahanty, Secretary to Mr. Reiss, dictates to her dictating Dictaphone many letters and instructions for his signature. She oversees salesmen's letters, keeps contact between factories and Mr. Reiss, and handles most of his personal business.

Miss Delahanty says: "I could not organize my work without the dictating Dictaphone. It enables me to make every moment at my desk count."

Hundreds of other executives and secretaries say much the same thing. They never dreamed how much The Dictaphone could do for them. How long will you deny yourself its advantages? Use the coupon *now*.

DICTATE TO THE DICTAPHONE

too; but Burns read Shakespeare, while Cobbett studied only practical things. By developing his moderate abilities to the utmost Cobbett became a powerful English leader.

"It is difficult to state in a few words the relationship between the character and personality traits and the purely intellectual abilities in producing great achievement. I should say that you can cultivate, in a very well-balanced and capable youth, those characteristics that make a statesman more readily than you can those seemingly more distinctive things that make a great musician or an artist.

"Take George Washington as an example. Even as a boy, he was described as being 'level-headed.' He did not show extraordinary gifts in any one direction. He had what we might call general capacity, balance, and judgment. Are not these just the things that make a statesman? They make the people feel they can rely on them in an emergency. Young George Washington was hard-working, careful, accurate. No one would have made the mistake of thinking he was going to be a poet; but as you read about his childhood you find everywhere the portrait of the future man painted in the traits of the boy."

"WHAT would you say about the physical health of your famous children? A great many people think if a child is long on brain he's short on brawn."

"It is true," said Doctor Cox, "that there is a popular impression that precocious children are likely to be frail and sickly; but we found these boys averaged *better* in health and vitality than boys in general. There were a number out of the three hundred who had poor health. But that is also true in any group of three hundred children. And, remember, many geniuses probably went through life handicapped by some disease or defect which would nowadays be prevented or cured in childhood.

"Since five times as many of these geniuses were still living at the age of seventy as we find among people in general, it surely indicates that bright children are not lacking in physical stamina because of their high ability or intense mental activities. The amount of work they turned out in itself indicates that they must have had pretty powerful constitutions.

"And I'd like to break through another popular delusion. Many people imagine geniuses have usually been dissipated and dissolute. This is true only in rare cases."

"That brings me," I said, "to my final question: Did you make any effort to estimate the personality traits of these children of genius? What can you tell us about their temperaments? Were they self-willed or strong-willed? Were they the type of children that make an old bachelor glad or sorry he didn't marry?"

Doctor Cox smiled. "I took a long list of mental, moral, and volitional traits, worked out by Webb, an English psychologist, and rated my three hundred geniuses by it. Sixty-three of the traits on that list are those which we deem especially desirable in present-day children. They furnish a pretty complete picture of a girl or boy, and show what sort of stuff the children are made of. If parents would make accurate and careful

"I Was Never So Embarrassed!

Just when I wanted to be so proud of you, you sat there all evening without saying a single word"

"AREN'T you a bit harsh?"

"Not in the slightest. Couldn't you think of *anything* to say?"

"No, I couldn't. How was I to get in on that kind of conversation?"

"And what did you expect them to talk about—business?"

"Really, Ja——"

"Oh, I'm so ashamed! I wanted to be proud of you, Ted. You are cleverer and more successful than any man who was at that dinner tonight—but you acted as though you were afraid to open your mouth."

"I was, dear! What do I know about that philosopher they were talking about—what was his name?—Nietzsche. I couldn't even follow their conversation, half the time . . ."

"You should read more. It's pitiful! Why, you didn't contribute one idea or opinion all evening. I was never so embarrassed!"

"I'd like to read more, but you know how much time I have!" He helped her into the cab, then turned to her with a smile. "But you made up for both of us tonight, Jane! You were wonderful! How did you ever find out so many things to talk about?

Busy People Enjoy This Way of Becoming Well-Informed

Jane glowed, flattered by her husband's praise. "Do you really think I made a good impression on those people, Ted?"

"I should say you did!" he laughed. "You seemed to know about everything. Well, you have plenty of time to read."

"Is that so!" she retorted. "I have even less time to read than you. I found all that information in Elbert Hubbard's Scrap Book."

"What's that?"

"You must have heard about it. It's quite famous. Now don't tell me you don't know who Elbert Hubbard was! One of America's most versatile men—a writer, craftsman, orator, business man—a many-sided genius. Well, when he was quite young, he started reading the greatest thoughts of all the greatest men of all ages. He marked the passages which inspired him most—the *highlights* of literature."

Elbert Hubbard's Scrap Book Selections from 500 Great Writers

"Imagine, Ted! In that one great Scrap Book are all the ideas that helped Hubbard most, all the wonderful bits of wisdom that inspired him—the greatest thoughts of the last twenty-five hundred years! He did all your reading for you! You don't need to go through long, tiresome volumes—you can get at a glance what Hubbard had to read days and days to find. Promise me you'll read in it every day for five or ten minutes, dear! It will make you so well-informed—you'll never need to feel embarrassed or uncomfortable in company again."

"It sounds great," he said, as the cab drew up at their door. "Why didn't you tell me about it long ago!"

Sent FREE for Examination

The Elbert Hubbard Scrap Book is a unique volume made up of ideas, thoughts, passages, excerpts, poems, epigrams—selected from the master thinkers of all ages. Selected by *Elbert Hubbard*, himself a master thinker. There is not a commonplace sentence in the entire volume. Only the *best* of a lifetime of discriminating reading has been included.

This Scrap Book is a fine example of Roycroft bookmaking. The type is set Venetian style—a page within a page—printed in two colors on fine tinted book paper. Bound scrap-book style and tied with linen tape.

ratings of their children on these traits they would perhaps see where their training had been successful, and perhaps, too, where it had been misdirected.

"The inspiring thing is that the geniuses, even as children, passed this test with flying colors. Taking them as a group, they were certainly fine children. This does not mean that all of them were always obedient children, or easy to manage. But on the side of the *positive* moral and personality traits they scored distinctly above the ordinary.

"The scientists stood very high in force of character, balance, desire to excel, originality, tendency not to be changeable, quiet determination, and persistence of motive. Boys who achieved eminence as artists had, we noticed, several strong personality trends: Their degree of esthetic feeling and desire to excel were highly developed; they believed firmly in their own powers, and possessed a great deal of originality in their ideas. They were also very intelligent and persistent.

"Boys who later became poets, novelists, and dramatists, rated high on the following: A desire for leadership, originality of ideas, memory, keenness of observation, and the amount of mental work they bestowed upon pleasures. Moreover, they estimated their own special talents correctly. But they rated a little lower in persistence, balance, soundness of common sense, and where action and thought are dependent upon reason they fell short.

"The future essayists, historians, critics, and scholars, ranked high in desire to excel, memory, trustworthiness, conscientiousness, absence of conformity, profoundness of apprehension, and rating their own abilities correctly and working toward a distant goal.

"As was to be expected, the soldiers ranked high in desire to be leaders, in physical bravery, persistence in the face of obstacles, and quiet determination.

"SUMMING up the whole matter, it is evident that both heredity and environment play their parts in the lives and successes of geniuses just as they do among ordinary people. Young geniuses, however, do display in childhood superior intelligence, superior talents, and superior traits of character. I should say that if your child shows good general ability, combined with seriousness of purpose and indomitable persistence, you may well greet this as indicating a capacity for fine adult achievement. If these qualities are of the highest degree in your child, especially if coupled with some outstanding special talent, they indicate the possibility of those extraordinary achievements which mark the true genius.

"It is through education, determination, and persistence alone that the humblest or the greatest man can ever reach the highest development of his inborn worth."

EDITOR'S NOTE: From the comparisons given in this article, parents can get a good line on their children, and also, if they wish to analyze their own characteristics, a line on themselves. Unfortunately, space will not allow us to publish the list of sixty-three traits of character upon which Doctor Cox rated her young geniuses; but anyone interested in rating children, or themselves, on these traits may obtain a copy of the list, with scoring directions, by writing to THE AMERICAN MAGAZINE, and enclosing two cents for postage.

Mrs. Pauline Siegenthaler and her three lovely children enjoying a picnic lunch at a pleasant spot near San Francisco

IRVIN S. COBB, *famous author*

"'Just what you need'— my doctor said"

"IT HAD COME *almost to the point of a breakdown. Stubborn constipation and indigestion kept me continually wretched.*

"For some time I had not even been sleeping regularly. I was told I must watch my diet or I would never get well.

"Finally I asked a doctor what he thought of Fleischmann's Yeast. 'Eat all the yeast you want,' he said, 'It's what you need.'

"I began. To my surprise I felt a change for the better. Now my constipation has disappeared and with it all the other troubles. My appetite is good. I sleep well. And I have a wonderful new store of energy."

MRS. PAULINE SIEGENTHALER, Oakland, Calif.

"TWO YEARS AGO a severe case of influenza left me extremely run down. I suffered especially from indigestion. I was weak, nervous—tired all the time. Remembering the success I had had with Yeast once before, I began again, taking a cake in a glass of milk three times a day. Soon my energy and endurance were greatly increased. In five weeks I was entirely *well.*"

ELIZABETH M. CROW, Birmingham, Alabama

FLEISCHMANN'S YEAST keeps the whole digestive and intestinal tract clean.

The millions of tiny active yeast plants in every cake are grown in a rich extract of malt and grain. They counteract the poisons of putrefaction. They strengthen the intestinal muscles.

Then your skin clears, constipation and digestive troubles vanish, the energy that is your birthright is yours again!

Eat Fleischmann's Yeast regularly. You can get it at any grocer's. Buy two or three days' supply at a time and keep in a cool, dry place. Write for a free copy of the latest booklet on Yeast for Health. Health Research Dept. J-44, The Fleischmann Co., 701 Washington St., New York.

"IT WAS MY WIFE who converted me to yeast cakes. Before she successfully overcame my counter-arguments, she had convinced all the other members of the household.

"I insisted that there was nothing wrong with me. She insisted that no matter how well I felt I'd feel better if I tried yeast cakes. She pointed to her own case and to the cases of several about us as evidence. So, I decided that I might as well humor the woman.

"I promised to try yeast for a time regularly—dissolved in water. I kept the contract faithfully.

"Soon I had to confess that daily yeast—or something—was giving my system a desirable stimulation. It seemed to me that my head was clearer, that I had more zest for work, I had more zest for play, more zest for everything that entered into my life. So, on my own motion, I elected to continue the treatment.

"I have continued it ever since. I expect to keep on continuing it. I do not pretend to know just what desirable effects a yeast cake produces in the body but, so far as I am concerned, I know that it does produce them—that I have greater bodily vigor, greater capacity for working at my trade, greater enthusiasm for the job of living, greater fervor for enjoyments than I had before."

IRVIN S. COBB, New York City

This Easy Way to have your rightful health

Eat three cakes of Fleischmann's Yeast regularly every day, one cake before each meal. Eat it on crackers, in fruit juice, water or milk, or just plain in small pieces. For constipation physicians say it is best to dissolve one cake in hot water (not scalding) before meals and before going to bed. (Be sure that a regular time for evacuation is made habitual.) Dangerous cathartics will gradually become unnecessary.

A Pipe Smoker in Australia Speaks Up

It cannot help but give us a thrill to have someone on the other side of the world write to us in the same pipe-smoker's language that we hear at home.

Hear what the gentleman in South Australia says:

Mount Barker Road
or Crafers P. O.
Sterling West
South Australia
November 18, 1926

Larus & Bro. Co.
Richmond, Va.

Gentlemen:

Having been a smoker for the past twenty-six years, I have never come across any tobacco to compare with your Edgeworth. It is a pleasure to smoke, does not affect the health in any way whatsoever, and is most cooling and tasty to the palate.

Everyone I come in conversation with that is a smoker, I always introduce your Edgeworth and if possible offer them a pipeful.

Once more I say it is a tobacco fit for anyone to smoke.

Yours faithfully,
W. A. Jones.

Pipe smokers prefer Edgeworth for various reasons. Some like it because its quality never changes. Some like it because of its flavor. Others smoke it because they can buy it wherever and whenever they like. Perhaps after you try Edgeworth you will discover still another reason for the popularity of this tobacco.

To those who have never tried Edgeworth we make this offer:

Let us send you free samples of Edgeworth so that you may put it to the pipe test. If you like the samples, you'll like Edgeworth wherever and whenever you buy it, for it never changes in quality.

Write your name and address to Larus & Brother Company, 3 S. 21st Street, Richmond, Va.

We'll be grateful for the name and address of your tobacco dealer, too, if you care to add them.

Edgeworth is sold in various sizes to suit the needs and means of all purchasers. Both Edgeworth Plug Slice and Edgeworth Ready-Rubbed are packed in small, pocket-size packages, in handsome humidors holding a pound, and also in several handy in-between sizes.

To Retail Tobacco Merchants: If your jobber cannot supply you with Edgeworth, Larus & Brother Company will gladly send you prepaid by parcel post a one- or two-dozen carton of any size of Edgeworth Plug Slice or Edgeworth Ready-Rubbed for the same price you would pay the jobber.

On your radio—tune in on WRVA, Richmond, Va.—the Edgeworth Station. Wave length (254.1 meters) 1180 kilocycles.

Men and Women

(*Continued from page 15*)

a sublime mystery to her (and perhaps in this humble inability to understand she is closer to nature's secret than our mechanistic science). Instinctively, she worships where the man might seek scientifically to investigate. Physically dependent, she yearns for omnipotent protection; mentally bewildered by the world, she prays for heavenly guidance; fearing solitude and loving society, she thirsts for the Divine presence, and peoples the air with spirits that will befriend her in her loneliness and her need. She is the first to welcome new forms of belief, and the last to relinquish the old. Man, in despair, may kill himself; but woman, when every other hope is lost, finds strength and solace in God.

13. THESE, then, are the fundamental instincts of man and woman. But it must not be supposed that such elemental dispositions remain unchanged by experience and education. There is in both sexes a development of intellect upon the basis of these propensities. How does this intellectual superstructure differ in men and women?

It is wider and higher in men. For men have, through many generations, been drawn out of the traditional home into the varied world; they have had to meet new situations and new stimuli, to which the old instinctive reactions proved inadequate; of necessity they developed that flexible capacity for successful response which constitutes the intelligence of the intellect. But instinct too can be intelligent. Let the stimulus or situation be of a traditional kind, such as humanity has faced for many centuries, and instinct is likely to suffice, or even to prove more intelligent than the precarious processes of thought. Until recently, the central tasks in the life of woman were to find a mate and to rear a child; and this still holds true to a considerable extent. And these were ancient problems: every woman had faced them as far as memory could record; and for these situations nature had built up instinctive responses, occasionally disastrous, but normally beneficent and intelligent.

14. HENCE, woman, generally speaking, excels men in the unity, thoroughness, and precision of instinct. Man is more critical and skeptical, "more sicklied o'er with the pale cast of thought;" his instincts have been broken up for flexibility, and have lost immediacy and assurance. In the presence of woman, he is at a loss; she is always the more self-possessed and practical, the cleverer to plan and the quicker to execute, wherever the problem in hand has to do with snaring a mate, keeping a lover, or making a home. No man under thirty is a match for a woman of twenty in the gentle art of love. There are some things that woman knows before she is born, by the divine right of the chromosomes; but man can learn them only by hard experience and disillusionment. Woman sees more than she can formulate; man formulates more than he sees. Woman thinks without thought, and lies without premeditation; she far outdistances man in inventive mendacity; in any crisis of detection it is she who imperturbably explains.

15. BEING better equipped at birth for the normal tasks of life, woman matures more rapidly, and has a shorter adolescence. Some men have, therefore, classed her as a lower species; but this is to be precipitate—on such a basis the elephant and the turtle would be the masterpieces of God. Adolescence is of the mind as well as of the body, and admits of many variations; some men mature early, some late, some never. Visibly, our human adolescence lengthens; our helplessness grows against a world that becomes daily more involved and more uncongenial to our native aptitudes and arts. Few men in our time achieve mental maturity before the middle point of life.

By comparison, woman, whose life has the simplicity of profound and natural things, ripens in body and mind at an early age. She learns more readily the amenities of social behavior; she is cleverer in school than the boy of equal years; at Radcliffe College recently she showed herself superior, in intellectual tests, to the learned lads of Harvard.

But this rapid development tends to complete itself sooner than in the male; the woman does not grow so far from what she is at birth as the harassed and experimental male; she clings to heredity as he ventures into variation; she is the organ and seat of racial stability, as he is the agent and herald of change. She is the base and trunk of the human tree, tenaciously clinging to the soil in which it grows, and widening its roots securely as its branches adventure in the sky.

16. THE other side of this stability is a certain conservation of feeling and an inadequacy of thought. Woman's interests are familial, and normally her environment is the home; she is as deep as nature and as narrow as four walls. Instinct adapts her to the traditional, and she loves the traditional, as any expert loves the sphere which reveals his excellence. She is less experimental in mind and morals than man.

Even if, in younger years, she thrilled to the shibboleths of political reform, and spread her affection thin over all humanity, she withdraws these tentatives when she finds an honest mate; and gradually she weans him and herself from this universal devotion to the intense and limited loyalty of the family. "I would give the world for you," the youth had said in courtship's ecstasy; and when he marries she takes him at his word.

It is just as well. The woman knows, without needing to think of it, that the only sound reform begins at home; she serves as agent for the race when she transforms the wandering idealist into her children's devotee.

Nature cares little about laws and states; her passion is for the family and the child; if she can preserve these, she is indifferent to governments and dynasties,

Will You Be Clerk or Manager Ten Years from Now?

SURELY, this could never happen to *me*," you say—"that I should be sitting at the same desk—be doing the same work—*for ten straight years!*"

But wait a minute—

Exactly that same thing is happening to thousands upon thousands of men thru-out the country. It has probably happened to men right in the company you now are working for. *And—unless you deliberately fit yourself for a better job—there is a very good chance that it will happen to you!*

Unthinkable? That's what R. M. Whitney, of Rochester, N. Y., said to himself. Yet lack of training kept him slaving away at low wages for more than twenty years . . .

Trebled His Salary in Three Years

—For more than twenty years, till finally, at the age of 47, *and still receiving only thirty dollars a week*, R. M. Whitney resolved to be a bookkeeper no longer. He enrolled with LaSalle for training in Higher Accountancy, and completed the course. Almost immediately came the offer of a bigger job.

Less than three years later, the Davenport Machine Tool Company—*the very company he had worked for as a clerk*—invited him to come back. He returned as Auditor, at a salary-increase of better than 300 per cent.

Today, he is Treasurer of this great company; and in a letter to LaSalle, after commenting on the opportunities LaSalle affords to men in their forties or early fifties, he adds, "And for the *young* man, who is just getting a foothold in the business world, LaSalle Extension University training is the most profitable investment he could make."

Says Good-bye to Clerkship Now Heads Successful Firm

We have told you about a man who *waited*—at a cost to himself of probably not less than $100,000. Now consider the experience of a younger man—G. Roy Eshelman, of Decatur, Illinois—

Eshelman was occupying a subordinate position in the purchasing department of a manufacturing concern—salary $16 a week—

Visualizing the opportunities for skilled accountants, he enrolled with LaSalle for training in Higher Accountancy.

"Thru this training," writes Mr. Eshelman, "I became interested in the Auditing Department and often remained after working hours watching the Auditor at his work. Observing my interest, he soon placed me in his department at a 50% increase in pay, and as I progressed with my LaSalle work, I was shortly rewarded with an additional 40% increase.

"My studies rapidly equipped me to strike out for myself, and at present I have an extensive practice as a Public Accountant, employing four accountants. It is sufficient to say that my present income is *many, many times greater than when I enrolled.*"

Send For These Two Books and Start Toward Real Success

Need you hear more before you investigate the opportunities in Accountancy? Shall we tell you about Pentland—or Gray—or McDuffie—all of them commanding incomes better than $10,000 a year *and all of them still in their thirties?*

Or will you face the problem of your future NOW—and send to LaSalle and get further facts and particulars?

Without cost or obligation, the coupon will bring you two books—one a 64-page book entitled, "Accountancy, the Profession that Pays;" the other "Ten Years' Promotion in One." "Your book, 'Ten Years' Promotion in One,' gave me the inspiration that decided my future career," writes B. J. Mertz, Comptroller of the Buckeye Union Casualty Company, Jackson, Ohio. In the space of only seven years, LaSalle home-study training multiplied his income seven fold!

How about those next ten years—will you wait or will you START TODAY to realize the tremendous opportunities that lie ahead of you thru sound and practical home-study business training?

Measure your grit and ambition by what you do with this coupon—NOW.

Announcement to Executives

Introducing Ref-Ex

a scientifically-planned card-indexed, self-check reading, reference and consultation service for executives

LaSalle now offers to executives a new, unique and invaluable service known as Ref-Ex.

Ref-Ex is card-indexed, "brass tacks" business information built especially for the convenient use of the busy executive. It affords instant access to fundamental facts, analyses and principles that underlie all successful executive work. It is supplemented by current business surveys and carries the privilege of confidential consultation on specific business problems. Write on your business letterhead for full particulars.

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

"It's a wonder some of the insurance companies don't issue a policy against blowouts."

"What's the use, when you can buy Kelly-Springfield tires?"

and smiles at those who busy themselves with transforming constitutions. If Nature seems now to fail in this task of protecting the family and the child, it is because woman has for the while forgotten Nature. But Nature will not be long defeated; she can at any time fall back upon a hundred reserve expedients; there are other races and other peoples, greater in number and extent than ourselves, through whom she can maintain her resolute and indiscriminate perpetuity.

17. WOMEN are born with intelligence; some men achieve it, most men have it thrust upon them. Under the chaotic changes of the Industrial Revolution, life has been for the male a kaleidoscope of enlargening responsibilities, unchosen and unforeseen. Many men have broken under the strain; many others have developed a range and brilliance of mind which uses all the reserve energies of the nervous system; they produce geniuses and madmen, as never before. As industry sucks them in, women are being subjected in like manner to this forcing process of intellectual development; but, rapidly as they change, they still retain some mental differences from the male.

Woman seems to be less at home with abstract thought; she has a sharp eye for facts and a good memory for them, but she is not adept at generalization or original interpretation; and she may lose herself and her purpose in details. She is interested in persons rather than in processes or things; and argues always from the personal viewpoint. It is her lot to be occupied with persons—with husband and child; it is man's fate to be flung into the maelstrom of commerce and industry, and to deal with causes and processes and effects, as well as with women and men.

It is easier for a man to interest himself in a book which propounds an idea; whereas a woman's book must tell a story. She is still an animist, and sees divine personalities and heroic wills, where perhaps there is only an impersonal process of economic and social change.

IT HAS always comforted male students of the mental differences between the sexes to observe how little genius woman has given to the world. Even in art, which might be supposed to have some relation to beauty, and in music, which thrives on emotional sensitivity, woman has produced less than her efforts and opportunities would appear to warrant. More women play music than men, and more men compose music than women. Where men acknowledge intellectual or artistic genius in women, it is only to recapture it for the male by pronouncing these geniuses "masculine." Schopenhauer assures us that there is a war between genius and motherhood; if we believe him, we shall conclude that no woman can be mentally superior without being as dangerously abnormal as Schopenhauer. George Sand smoked a very masculine cigar, and Spencer found George Eliot too male to thaw his glacial soul.

The causes of this infrequency of genius in women are multiple and elusive. Perhaps we define the term with prejudice, and forget that there may be as much genius in motherhood as in politics, or literature, or war. Equality in genius

Ride with ETHYL

and get the benefits of *High Compression*

ETHYL
BRAND OF
ANTI-KNOCK
COMPOUND
ETHYL GASOLINE
CORPORATION
NEW YORK, U.S.A.

Knocks out that "knock"

MORE than a million motorists are now enjoying the benefits of high compression through Ethyl Gasoline. In two ways:

1 *Through high compression automobiles.* The advent of Ethyl Gasoline has at last given car manufacturers the opportunity mechanically to raise the compression of their engines. For cars now in use they can offer special high compression cylinder heads which greatly increase performance.

2 *Through carbon formation.* By letting carbon form in the cylinders of a car of ordinary compression, you automatically increase compression. And since Ethyl Gasoline is a high compression fuel, those deposits which heretofore have meant "knocking" and power loss become a source of *extra* power and driving satisfaction.

Ethyl Gasoline is motor gasoline containing Ethyl brand of anti-knock compound, the ingredient which eliminates the "knocking" characteristics of ordinary gasoline and makes it a high compression fuel.

In terms of you and your car, high compression and Ethyl Gasoline mean a more powerful and flexible car, less gear-shifting, faster pick-up, less vibration and lessened depreciation. In short, a performance and economy impossible with ordinary compression and ordinary gasoline.

Ethyl Gasoline is distributed in the United States and Canada by responsible oil companies. *It has absolutely no ill effect on the motor or its parts.*

The first tankful will prove every claim. On sale at pumps which bear the "ETHYL" trademark shown on this page. There's one near you.

If you get at the cause headaches will go

WE all know the woman who "always has a headache."

She can't make any plans. Time and again she has to disappoint her friends and family—for any minute the familiar ache is liable to start its dull throb.

Nothing is so enervating as a headache. Nothing is so aging—so nerve racking!

There are scores of ways of deadening a headache—but to really correct a headache you must get at the cause of the trouble. And the natural way to do this is by the use of Sal Hepatica, the standard effervescent saline.

Most headaches are due to congestion in the stomach or intestines. Congestion produces excessive blood pressure—and results in dizziness and headaches. *Sal Hepatica defeats a headache by promptly and effectively removing this congestion.*

Sal Hepatica combines the same health-giving salines that draw thousands to European Spas. It is efficacious not only in relieving headaches, but in the treatment of many other ills.

For Sal Hepatica flushes away the poisons set up by foods retained too long within us. These poisons affect different people in different ways, causing stomach disorders, bad complexions, hyper-acidity, rheumatism and even serious organic troubles.

Keep free of headaches—keep free of the poisons of waste. Take Sal Hepatica when you need it.

To help prevent chronic headaches, take a teaspoonful of Sal Hepatica in a large glass of water before breakfast. For an acute headache, due to congestion, take two teaspoonfuls of Sal Hepatica in water and repeat in 15 minutes if not relieved.

Send for our booklet that explains more fully how Sal Hepatica helps relieve headaches and other ills.

Please address BRISTOL-MYERS CO.
Dept. L-97, 71 West St., N. Y. C.

Sal Hepatica

© 1927

should be judged not by ability to do all things with equal skill but by the ability to perform with competence the tasks and functions natural to each age and sex. We are inclined to see less genius in our age than in some time to which distance lends enchantment; we tend to look for genius to-day in those same fields in which it flowered in the past; whereas, it may well be that some of the mental force that once made literature and art is now absorbed in the widened realm of industry. We are consumed at present in our effort to remake the physical world with our new knowledge and our new power; we have great inventors and scientists, executives of international business, and world-compelling financiers; we must not also expect, in the same age, Platos and Shakespeares, Leonardos and Beethovens.

18. PERHAPS men have surpassed women in genius because geniuses usually appear among the educated minority of each sex; so that comparisons will be unfair until the proportion of persons receiving higher education is equal in both sexes. Perhaps, too, women lack the sheer physical vitality which artistic work involves; and perhaps they are less gifted than men with that sense of beauty which lures the soul to spiritual reproduction. Woman forfeits something of the esthetic frenzy because she desires not to possess but to be possessed. Hence, she inspires art more than she produces it; perhaps she does not find in man, proud, ridiculous man, the beauty that stimulates creation. And why should she seek beauty when she embodies it?

19. THERE is but one thing more to ask. Are these mental differences hereditary or acquired? It is hard to say; for this is a field where science rivals philosophy in uncertainty of knowledge and fertility of hypothesis. One might hazard the presumption that though these differences are readily and intimately associated with native differences of structure and function, they are for the most part socially transmitted and individually acquired. They depend over a large area upon the ideals which men, for their own utility and satisfaction, have formed of women, and imposed upon them through a thousand environmental influences. As a woman professor protests: "Boys are encouraged to individuality. They are trained to be independent in thought and action. . . . They are encouraged to experiment and make things for themselves. Girls are taught obedience, dependence, and deference. They are made to feel that too much independence of opinion or action is a drawback to them—not becoming or womanly. A boy is made to feel that his success in life will depend upon his ability to accomplish something new."

IN a sense we are enabled, as the result of a vast experiment, to give a scientific answer to the question whether the mental and moral differences of men and women are innate. Economic circumstance has conducted the experiment, and life itself has been the laboratory. It is as if Nature had put to herself the problem which puzzles us, and had decided to solve it by an almost cosmic test.

Men were intellectually superior to women: Was it by birth or by environment? To settle the question, it was necessary to submit a large number of women to the varied and changing economic life which was forming men, and to observe how quickly and fundamentally these wider occupations transformed the mind and character of the women who were involved. England and America became the scenes of the great trial. Factories and offices and professions were opened to either sex; economic exigency drew millions of women out of the home and flung them into industrial and commercial rivalry with man. What was the result of the experiment?

The result was so rapid a transformation of woman that all the world stood agape. Within three generations, these new servitors of industry had made their way into every field where physical strength was not indispensable; and in every field they had acquired enough of the intellectual and moral qualities of the male to make every moralist in Christendom deplore the masculinization of the once gentler and weaker sex.

Women lawyers, physicians, governors, bandits, demonstrated the ability of women, within their still narrow opportunities, to rival the arts of the pre-established male. Colleges graduated women whom no man would marry, because their intellectual superiority excluded certain masculine pretensions to leadership which are among the prerequisites and casualties of marriage. The mental and moral gap between the sexes decreased as rapidly as shops and factories replaced farms and homes.

IT MAY be taken, then, as a reasonable conclusion that if women should choose to live in utter completeness the occupational life of the male, they would rival him and be assimilated indistinguishably with him in mental and moral traits.

But probably women will show better sense. Their present period of imitation will pass; they will discover that men do not deserve this flattery; they will perceive that intellect is not intelligence; and that happiness, like beauty and perfection, lies in the fulfillment of our natural selves. Those women who carry emancipation onward will seek not to be imperfect men but to become perfect women; they will make motherhood an art involving as much preparation and intelligence as the manipulation of levers and pulleys and throttles and wheels. Who knows but they may come to understand that it is the greatest art of all?

Women's new freedom has brought them problems as complex and crucial as those that lay in their old slavery. Men cannot help them here, for the intellect of man is too mechanical and crude to permit him to understand with delicacy and sympathy the critical changes which are disordering the life and mind of woman. Only her own new knowledge can cope with this new situation. Probably she will succeed. The energy which achieved her liberty will meet the issues which her liberty has raised. She will find a way to unite that radiant beauty and alert intelligence which distinguishes her to-day with that modest tenderness which flowers in loyal love and perfect motherhood.

Up Where the Blue Begins

(*Continued from page 55*)

emergency flask of oxygen, connected it with the tubing of his helmet, and soon was getting his full quota of the life-giving gas.

But the emergency flask was not large and would scarcely last the trip, so the major thought he would try to restore the feed of the large oxygen tank by making an adjustment. In the moment of lifting his begrimed goggles to see the adjustment, he lost connection with his oxygen flask, and breathed the thin air of the stratosphere. In a second he was unconscious. With no hand at its controls, the plane began to drop, and it fell through the blue nearly six miles with that unconscious man strapped in the seat.

It is doubtful if history records a more miraculous escape. When the falling plane was less than a mile above ground, the larger content of oxygen in the denser air partly revived Major Schroeder. He was only semi-conscious, but his hand somehow grasped the controls, and he was able to right the plane and make a safe landing. Icicles hung from his eyelashes and eyebrows, as he was lifted out of the plane. The exposure to cold during the long fall temporarily blinded him, and he was laid up in a hospital for weeks. But he survived, and, to the best of my knowledge, is the only man who has fallen from the second story of the atmosphere, and lived to report the experience.

However, the second story is by no means the top story.

"ABOVE the stratosphere," continued Professor McAdie, "is a third story, which we may call the region of meteors. It is in this area, which begins about thirty-six miles above the surface of the earth, that the so-called shooting stars make their appearance. These, of course, are not stars, but are fragments of matter from space which rush into our atmosphere at high velocities and burn up through friction with the air.

"Beyond the region of meteors we come to a very peculiar layer of thin air. It should be of special interest to those who use the radio, for this fourth floor of the atmosphere has the quality of reflecting radio waves. This reflecting layer of air seems to be elastic, for it rises at night to a height of about seventy-two miles, and at sunrise drops to about forty-two miles above our land level. This region is called the Kennelly-Heaviside layer, from the names of the two scientists who, working independently, discovered it at the same time."

Thus we have gone up through four stories of our atmosphere. There is still the fifth floor, the auroral region, which seems to be the attic or skylight apartment, according to Professor McAdie. "Its floor is about sixty or seventy miles above the earth, but as to the height of its ceiling we are not sure. It certainly extends upward another forty or fifty miles, and maybe twice that, making the roof of the atmosphere from one hundred to one hundred and fifty miles above sea level. Wherever the upper limit of the auroral region may be, we are safe in calling it the Empyrean—beyond it is empty space and the stars."

There has been much speculation as to the origin of the aurora, the brilliant, delicately-colored lights which are seen at times over the poles of the earth. Because they are illuminations in this topmost story of our atmosphere, they can occasionally be seen as far as two thousand miles from the poles. Thus, the spectacular aurora borealis of October 15th, 1926, was clearly seen in New York, Boston, Ottawa, and many other places in the same latitudes.

It has been observed that the aurora puts in an appearance at times of great sun-spot activity, when the sun apparently is in a tumult of solar outbursts. The aurora seems also to be related to electrical disturbances; for whenever the Northern Lights begin to arch the sky, fuses in telegraph and telephone stations burn out, wires go dead, and in some instances switchboards and instruments have been destroyed. The aurora of May, 1921, was blamed for setting fire to the Union Railroad Station in Albany. Precisely what the aurora is no one knows, but undoubtedly stupenduous currents of energy are loosened when it signals with its delicate greenish rays.

"The filmy, delicate clouds which float highest are accumulations of particles of frozen water vapor," said the aërographer, "and in fact may be called clouds of ice. The ice, of course, is of a microscopic fineness, many times smaller than snow particles. These high clouds sometimes scrape the ceiling of the troposphere, and the temperature at those heights is so cold that water cannot long exist as vapor—it freezes instantly into ice crystals. These ice clouds are known as cirrus clouds, meaning feathery. I have heard it said that they make rain, but that is not so. Our rain comes from lower layers of the air where the temperatures and other conditions are more favorable for liquefying clouds into water.

"STUDY of the clouds reveals that in addition to these major stratifications of the atmosphere which make our five-story structure of air, there are definite stratifications within the first story. In fact, our troposphere may be said to have a series of mezzanine floors or galleries.

"In the top gallery, five to six miles above us, near the ceiling of the troposphere, are the cirrus clouds.

"For the second gallery, we must drop to an intermediate level, about two miles above the ground. Here float the great, lumpy, cumulus clouds and the thunder clouds (known as cumulo-nimbus clouds). Some of these are mountainous in size; they may be two miles from base to peak, and even wider. It is in this second gallery that most of our rain, thunder and lightning, hail, sleet, and snow are manufactured.

"The bottom gallery is only a few hundred feet above us, and is the region of high fogs and layer-like clouds known as stratus clouds.

"Finally, we come to the ground floor

for the **LINDBERGHS** *and* **CHAMBERLINS** *of* **America**

To you young men of the type that gives to America its Lindberghs and its Chamberlins, the motorcycle has a special appeal. It appealed to Col. Charles Lindbergh, who is a motorcycle enthusiast, and Clarence Chamberlin, who was a Harley-Davidson dealer, because the motorcycle is a spirited mount. It has personality. It inspires clear thinking and clean living. It appeals to red blood, a love for action, and a healthy spirit of adventure.

A ride on a Harley-Davidson is recreation in one of its most healthful and pleasant forms. Ride a few miles and see!

Prices as low as $310 for the Twin—$235 for the "80 miles per gallon" Single, f. o. b. factory. See your dealer for demonstration.

Send coupon for catalogue.

Able employes and a lagging office - - - *frequently found together*

MANY an executive, confident in the ability of his employes, is at a loss to account for low office output. Even his assistants cannot give him the answer.

Gradually he comes to realize that there is something inherently wrong with the office itself—something which neither he nor his employes have been trained to cope with.

There often *is* something wrong, of course. And in many such cases, trained investigation has shown that "something" to be *inefficient office equipment.*

No office, however competent its employes, can move work faster than the office itself is equipped to move it.

As now developed in the new *Globe-Wernicke Service,* efficient office equipment combines three essentials: 1, the right kind of equipment for your particular business; 2, its convenient, space-conserving arrangement; and 3, a knowledge of how to use it efficiently and economically.

Globe-Wernicke Service brings *direct to you* all that is new and practical in office layout and equipment. Facts, figures, and plans—derived from exhaustive research in actual office conditions—are now ready to be conveyed to you by specially trained consultants in office equipment, wholly without obligation on your part.

GLOBE-WERNICKE EQUIPMENT

includes

Steel Filing Cabinets
Steel Shelving
Steel Safes and Storage Cabinets
Sectional Bookcases
***Safeguard* Filing System**
Visible Record Service
Miscellaneous Equipment

Descriptive literature on any of these items sent free on request. Use the coupon below.

Phone, write, or call on your nearest Globe-Wernicke Dealer—*today!* He will gladly send his consultant in office equipment, at your convenience. Or, if you prefer, just sign and mail us the coupon at the bottom of this page.

of the whole edifice, the surface of the earth. Even it is not free of clouds—for fog is a cloud.

"The winds as well as the clouds seem somewhat to follow this structural arrangement of the troposphere. The prevailing wind in the United States, and, in fact, in the Northern Hemisphere, is the west wind, called by the ancient Greeks Zephyrus. This strong wind, which is in reality a permanent river of air, is confined mostly to the second gallery of our lower story. The east wind is a shallow wind, very near the surface of the earth. Local changes in temperature cause many variations in our surface winds; but if you go up high enough you will find Zephyrus blowing steadily from the Pacific across to the Atlantic and on around the globe.

"Rainbows are confined to the troposphere, where they are formed by the action of sunlight falling on mist or rain. The moisture particles serve as minute prisms, and break the sunlight up into its constituent colors, ranging from red to blue. Airmen in flying through a cloud or a shower frequently see the rainbow as a complete circle."

BUT what actually is the air? The ancients thought the air was one of the four primary elements of which everything is made, the others being earth, water, and fire. Aristotle, however, pointed out that clouds and rain originated from the atmosphere, which seemed to indicate that the vapor of water must somehow be mixed with this other element, air. For more than two thousand years this was about all that was known of the composition of the atmospheric ocean in which man's life was lived.

Then, in 1757, a medical student at the University of Edinburgh isolated a peculiar gas from the atmosphere, which, because of its inert properties, he called "fixed air." We know it as carbon dioxide. In 1772, another student of the same university discovered nitrogen, and a year later oxygen was found. Thus, by the time of the American Revolutionary War the air was known to contain water vapor, carbon dioxide, nitrogen, and oxygen. The amount of water vapor varies, from almost nothing when the air is below freezing temperature to as high as five per cent by volume. By far the greatest portion of the air is nitrogen gas. Ignoring the water vapor, 78 per cent is nitrogen, and nearly 21 per cent is oxygen.

In 1894, more than a hundred years after the discovery of oxygen, two British physicists detected a new gas in the atmosphere, which they named argon. In total mass, argon exceeds all the other constituents of the air except nitrogen and oxygen. Shortly after this discovery, four other gases were found in slight proportions—neon, helium, krypton, and xenon. In late years hydrogen has been detected.

"In addition to the ten gases," said Professor McAdie, "the air teems with dust motes, spores, smoke particles, and other minute bodies. It has been calculated that at each puff a cigarette smoker releases four thousand million smoke particles. Volcanoes, forest fires, factory stacks, and domestic chimneys pour billions of particles into the atmosphere every day, and much of our fog and haze is caused by the suspension of these

Digitized by Google
Original from STATE UNIVERSITY SYSTEM OF FLORIDA

particles in the atmosphere. For every one of these motes becomes a nucleus, around which moisture condenses. Let me show you the influence of smoke on cloud-making."

And then Doctor McAdie performed this interesting experiment: He sealed a glass jar which was about one fourth full of water, then he compressed the air in the jar, and suddenly released the pressure. A very faint mist was seen to rise inside the jar, a delicate cloud.

"Now let us put a bit of smoke into the jar," said Professor McAdie. The jar was opened, and a wisp of smoke was blown into it. Then the jar was sealed again as before. It was impossible a second later to see the smoke, so small was its quantity. But the pressure was again put upon the air in the jar, and then suddenly released as before, and instantly a dense fog rose from the water and filled the jar. Every smoke particle had become a rallying point for vapor, and the result was most spectacular.

"MOST of London's fog is caused by smoke," said Professor McAdie. "Investigators of the Smoke Abatement League have demonstrated that. And the fogs of our American cities can be traced largely to the same cause. Smoke will create fog and produce clouds, but apparently it does not help to precipitate them. It is of no use in making rain artificially. Dust motes, however, are sometimes credited with adding splendor to a sunset."

"Have they anything to do with making the sky blue?" I asked.

"I don't think so," Professor McAdie replied. "The blue color of the sky is caused by the scattering of light. Sunlight is a blend of seven primary colors, the rainbow colors, ranging from red, which travels in long waves, through yellow to blue and violet, which travels in infinitesimally short waves.

"When sunlight reaches our atmosphere, and strikes upon the molecules of air, the long waves get by fairly successfully, but the short waves are not so successful. They are thrown to one side, tossed from one air molecule to the next one, and so reflected in every direction. Since the shortest of all light waves are the blue rays, these get mixed up more than any other rays, and thus our sky is given its characteristic color."

Thus, the blue sky is only an illusion. All the rays of light are in the air, but the bluish rays prevail because of their repeated reflection and re-reflection until they hit the eye from every direction. The blue begins where light enters the atmosphere.

Meanwhile, what has become of the larger rays of sunlight—the red rays and their companions? They are passing through the air, in straight lines. Thus, at sunset, when the sun is at or near the level of the eye, we see a red sky in the direction of the sun, and also in that portion of the sky opposite the setting sun. The thicker layer of air on the horizon line, with its greater volume of dust motes, aids this sunset effect and enriches the crimson by reflecting some of the long light waves.

Red sunsets are appropriate for horizon effects, but for the spacious dome itself who would choose anything but blue?

Mothers say this plan works wonders

All material free to mothers

Far better than "coaxing" the children to eat

HOW often the children say "not hungry" at the breakfast table! What coaxing it takes to get them to eat what they should! Here is a simple way out—a plan that thousands of mothers have used with wonderful results. It makes children *want* to eat the *hot* cereal breakfast which school authorities say they need so much.

We will send you these attractive breakfast posters in full colors and a supply of gold stars, free. You simply hang the posters in your children's room. Then let each one paste a gold star in the record form every morning a *hot* cereal breakfast is eaten.

The posters show your youngsters pictures of other boys and girls excelling at play and work because they have eaten the right kind of breakfast. Your children are given a *real* and *personal* reason for having a *hot* cereal themselves.

This Breakfast Poster Plan is a part of the Educational Health Service for mothers and teachers, maintained by the manufacturers of that good old cereal, Cream of Wheat. A service used today in over 50,000 schools.

In order that you may test this famous cereal itself, as well as the poster plan, we will also send you a free sample box of Cream of Wheat. It will interest you to have in mind these points which have led authorities for over thirty years to recommend Cream of Wheat as ideal for growing children:

1. It supplies in abundance just the energy-giving food elements most needed by young bodies and minds.
2. It is exceptionally easy to digest even for the most delicate stomach.
3. Children love its delicious creaminess.

Put this Breakfast Poster Plan to work *now* for your children and for yourself. Start them off to school really *prepared* for a day's work. Give them a steaming bowl of Cream of Wheat. Just mail coupon today.

What mothers say—

Over 35,000 mothers are using this Breakfast Poster Plan and already many requests are coming in for additional gold stars. Here is a typical letter:

"Your gold star idea is a huge success. Thanks to the Cream of Wheat Company my days of coaxing are over. Will you kindly send me two more packages of gold stars?" Mrs. M. H. J., Richmond Hill, L. I., N. Y.

The child keeps her own record by simply pasting in a gold star every morning she eats a hot cereal breakfast

FREE —the handsome colored Breakfast Posters (9 x 12 inches), package of gold stars, sample box Cream of Wheat and authoritative booklet, "The Important Business of Feeding Children"—*all free.* Just mail coupon today.

There's a joker in the "cheap" paint can

IN the last dozen years thousands of home owners have been fooled by "cheap" paint. But now the public is learning that "cheap" paint isn't cheap at all —for two reasons:

FIRST, "cheap" paint can't cover. It takes nearly twice as much to do a given surface as with fine old SWP House Paint.

SECOND, "cheap" paint can't stand the weather. You pay a costly penalty—in repainting expense.

You can't paint a house with "apple-sauce"!

If you want proof just compare the formula of any "cheap" paint that tempts you, with the "balanced" formula of SWP House Paint.

First look for *white lead* and *zinc oxide*, the recognized basis of all whites and light colors.

Note that in SWP Outside Gloss White the pigment content is 90 per cent white lead carbonate, white lead sulphate and zinc oxide . . . in a scientifically "balanced" formula.

These basic materials are mined and made by Sherwin-Williams exclusively for S-W paints.

We could purchase made-up materials in the open market at lower cost. But SWP standards call for extra fine quality.

Now note the "cheap" formula. Usually you will find that white lead and zinc oxide make up only 50 per cent or less of the pigment content. The other 50 per cent is made up of the cheaper materials—which in such large proportions become useless filler—mere bulk to fill the can.

Here you have the reason why "cheap" paint can be sold at a low price. Why it has no covering power —no hiding ability—no endurance. Why it often costs *two and one-half times* as much as fine old SWP.

The Master Touch

But quality of ingredients alone does not make a fine house paint.

Formula alone does not make a fine house paint.

Even formula and ingredients combined do not assure a fine house paint like SWP.

The SWP "balanced" formula is openly printed—and has been for years. Every paint manufacturer in the world, we imagine, has studied it.

Yet today there is only one SWP House Paint — the accepted leader throughout the world.

Why is this? Because there is an element in every can of fine old SWP House Paint that cannot be duplicated or imitated successfully.

It is the *Master Touch*—that inimitable touch of superiority with which the few great scientists of the world have been endowed.

Edison, the wizard of electricity, has it. Burbank, the great American horticulturist, was blessed with it. Marconi, discoverer of wireless, has it.

You can't paint a house with apple-sauce

Digitized by Google
Original from
STATE UNIVERSITY SYSTEM OF FLORIDA

Up-to-date painters everywhere are using SWP House Paint. They realize that its beautiful colors — creamy smoothness — brushing ease—covering ability—and wonderful durability—can only be produced by scientific processes and modern machinery.

And so, too, the scientific men at the head of Sherwin-Williams' laboratories add to the fine materials of SWP House Paint the Master Touch that has set it above and apart from *all* others — as the leading house paint of the world.

This Master Touch of science is evident in the quality of the raw materials made by Sherwin-Williams. In the delicate "balancing" of ingredients. In the wonderful power-driven machines which mix and grind SWP to its creamy-smooth texture. In the critical analyzing, testing and proving which daily guard and control each step in the SWP process.

This is the vital element of SWP which no "cheap" paint even *attempts* to have—and which no paint regardless of price can successfully imitate.

Naturally no individual can equal, by hand, the scientific skill and modern machinery that produce the creamy texture of SWP.

Price per gallon means nothing in cost

A gallon of SWP House Paint covers 360 square feet of surface — two coats. The average "cheap" paint poorly covers only 250 sq. ft. — two coats. SWP costs no more by the job —*because fewer gallons are needed.*

Once the "cheap" paint is applied, the real tragedy begins. Hardly have you paid the painter's bill when your "cheap" paint begins to fade and wash away.

According to thousands of tests both in the laboratory and on the house, SWP lasts from two to five times as long as "cheap" house paint.

The beautiful colors for which SWP House Paint is famous are wonderfully durable. Neither sun, rain, hail, sleet, snow nor cold affects them. They do not fade. That is because they are made with the Master Touch in the Sherwin-Williams Dry Color Works. Long after "cheap" colors are hopelessly faded — your SWP colors will be bright and cheerful as new.

And when repainting is necessary it is easily and quickly done because the surface is in proper condition to take the new paint at much lower labor cost.

Here is where the *big saving* is made by SWP House Paint.

Again, we say — "You can't paint a house with 'apple-sauce'."

See "Paint Headquarters" and save money

Before you permit "cheap" paint to get the *laugh* on you, see the Sherwin-Williams dealer. He is the recognized "Paint Headquarters" in your locality.

Get his advice. Have him estimate what it will cost to do your job in fine old SWP House Paint. Then compare the estimate with an estimate on any "cheap" paint. You'll find out that "There's a joker in the 'cheap' paint can."

And remember: Quality makes no difference in labor charges — it costs just as much to apply "cheap" paint as SWP.

If you want advice on color schemes or on any other phase of painting, or a copy of the famous Sherwin-Williams "Household Painting Guide," write us.

What! You Don't Know That? Then I'll Ask You Another

(*Continued from page 43*)

were listed alongside of "Who composed 'Cavalleria Rusticana'?" and, "Who succeeded Jess Willard as the world's heavyweight boxing champion?" They were of all degrees of difficulty and covered a wide scope of human knowledge. As I have said before, nobody made one hundred per cent on the general tests; but on the special Bible quiz, the Reverend Harry Emerson Fosdick, of the Park Avenue Baptist Church, New York, made a perfect grade. And on the sports test, Grantland Rice, the sports writer, received a hundred points.

Of the nine hundred odd who took the tests, only thirty-four were able to make a score of ninety or better. This imposing list is given below. It undoubtedly contains the names of a number of persons whom you hold in esteem. You may be pleasantly surprised to find that on your own quizzes you compare favorably with them:

Alice Duer Miller, writer	97
John Dewey, professor at Columbia University	97
Holland Thompson, professor at the College of the City of New York	96
George M. Whicher, professor at Hunter College (retired)	96
Louis Marshall, noted New York lawyer	96
Herbert Bayard Swope, executive editor, New York "World"	95
Raymond Walters, dean of Swarthmore	95
Bruce Barton, author, and president of an advertising firm	94
Frank Sullivan, journalist and humorist	94
Ray Stannard Baker, author	94
Albert G. Rau, dean of Moravian College	94
Deems Taylor, composer and musical critic	94
Henry Noble MacCracken, president of Vassar	94
Merle Crowell, editor "The American Magazine"	93
William Esty, head of Electrical Engineering Department, Lehigh University	93
William Allan Neilson, president of Smith College	92
William Lyon Phelps, professor at Yale	92
Lawrence F. Abbott, lecturer and editor of the "Outlook"	92
Irvin S. Cobb, humorist, author, and lecturer	92
W. E. Woodward, novelist	92
John V. A. Weaver, poet and critic	92
Rosamond Gilder, an editor of the "Theatre Arts Monthly"	91
H. Gordon Duval, editor "Park Avenue Review"	91
Alexander Woollcott, dramatic critic of the New York "World"	91
Franklin P. Adams, humorist, author, and editor	90
Henry Seidel Canby, editor of the Saturday Review of Literature and professor at Yale	90
Arthur Twining Hadley, president emeritus of Yale	90
Thos. D. O'Brien, professor at University of Delaware	90
F. J. E. Woodbridge, one of the deans at Columbia	90
Dr. Frank Crane, author	90
Neil Carothers, director College Business Administration, Lehigh University	90
Stephen S. Wise, rabbi of the Free Synagogue of New York	90
Sigmund Spaeth, musical critic and lecturer	90
Rupert Hughes, author	90

After interviewing hundreds of people, Spafford and Esty have reached the conclusion that if a person makes a score of fifty he may consider himself a well-read, generally knowledgeable person. But, no matter what percentage he makes, no matter how many gaps he has in his own mental equipment, the world's cleverest and most fascinating citizens also have blind spots, as the preliminary interrogation of well-known people brought out.

For instance, Alma Gluck, the great singer, made a score of seventy-seven, which is high. But when she was asked what line comes after "Maxwelton braes are bonnie," her memory seemed icebound. Undoubtedly she has heard or sung "Annie Laurie" a thousand times, but it was impossible for her to recall "Where early fa's the dew."

William Lyon Phelps, professor of English Literature at Yale, answered all of the most abstruse questions. But when it came to the simple interrogation: "From what is macaroni made?" he could not recall that the ingredients are flour and water.

Heywood Broun, columnist on the New York "Morning World," author of "Gandle Follows His Nose" and "The Boy Grew Older," presents another interesting paradox. Even with his well-known literary ability, when asked how many lines there are in a sonnet, he replied seven—instead of fourteen. Nor could he recall the simple household product which is advertised by the slogan, "Chases Dirt." Unquestionably he has seen many cans of Old Dutch Cleanser, but he couldn't bridge the gap in his memory.

RUPERT HUGHES the popular writer, took his test with great seriousness and made the excellent mark of ninety. But one question, extremely simple for a newspaper man or a writer, nearly stumped him. When asked: "What do journalists refer to as 'the masthead'?" he became confused and uncertain. And it was some time before he gave the correct answer—the standard text appearing at the top of the first column of an editorial page which gives the details of ownership, staff, subscription rates, and the like.

A certain stenographer in an advertising agency may have gaps in her knowledge, but she wins the laurel for resourcefulness. She was asked, "What is the name of the torpid state in which some animals spend the winter?"

"Florida," was her ready reply.

A taxi driver in taking his test was able to tell which two teeth a baby cuts first. True, he couldn't give the proper names of "central lower incisors," but he pointed them out. However, when it came to the question: "What do the following have in common: Browning, Lewis, Maxim, and Vickers?" it was beyond his ability to give the answer—inventors of machine guns. Here, evidently, was a man who had a baby at home but who was not interested in modern weapons of warfare.

Although men achieved far higher scores

In all the world there is no other food like this

NO other food like Grape-Nuts! . . . The golden brown, crisp-baked kernels, that come tumbling out of this yellow package, are unique among breakfast foods. Different in form—deliciously different in flavor. Nut-like, with a delicate suggestion of malt sugar! For nearly thirty years the fame of this flavor has spread. Millions now enjoy it every morning.

But Grape-Nuts is not merely tempting to appetite. It is a food scientifically planned to supply essential elements of nutrition—to correct certain dangerous deficiencies often found in modern diet. Made of wheat and malted barley, Grape-Nuts gives to the body dextrins, maltose and other carbohydrates, for heat and energy; iron for the blood; phosphorus for teeth and bones; proteins for muscle and body-building; and the essential vitamin-B, a builder of appetite. Eaten with milk or cream, Grape-Nuts is an admirably balanced ration.

Grape-Nuts is ready to serve. The special baking process that prepares it for your table makes it one of the easiest foods in the world to digest—and gives it its characteristic *crispness*. For here again Grape-Nuts is different from other foods. You will enjoy chewing it thoroughly. It will give to teeth and gums the exercise they must have to remain strong, healthy and beautiful.

Put Grape-Nuts on your breakfast menu. Remember, no other food can give you just this combination of flavor, food value, crispness! Your grocer sells Grape-Nuts—or you may wish to accept the following offer:

Two servings of Grape-Nuts and "A Book of Better Breakfasts"—free

Mail the coupon below. We will send you, free, two individual packages of Grape-Nuts and "A Book of Better Breakfasts," written by a famous physical director.

Pathé News

First on the Scene First on the Screen

China seethes and boils. Columns of cable despatches on the first pages of all the newspapers in the land. The biggest news of the day, coming from a country across the world!

Yet you go to your favorite motion picture theatre and there on the screen Pathe News *shows* you the news as it happens.

How can this be done?

Only by a world-wide organization, with cameramen so posted that wherever the news is breaking a Pathe News man is there.

Only by forethought which sees in advance that which is about to happen, and provides against the day it does.

Two Pathe News cameramen were already in China with the outbreak, and another on the way.

More than Luck enters into the making of the world's best-known motion picture. It is brain power, man power, the coordination that comes from sixteen years' experience as the pioneer news reel.

Unless you see the Rooster, you do not see the Pathe News.

Ask for the Pathe News at your favorite theatre

PATHE EXCHANGE, INC.

"Sees all—knows all"

than women as a general rule, Alice Duer Miller, the writer, made as high a grade as anybody on the general tests. Her mark was ninety-seven. The only other women who approached her average were both writers: Rosamond Gilder, an editor of the "Theatre Arts Monthly," made 91; and Fannie Hurst, 88.

The question book scores show that women do not have the competitive spirit as highly developed as men. They accept a good or a poor result equally philosophically. "This may be due," Spafford says, "to a feminine balance which prevents women from wasting too much nervous energy on things which they consider nonessentials. Men are more prodigal. They will fight for the sake of winning." Then, too, a man usually reads his newspapers and his magazines more thoroughly than the average woman does. It is his business to keep posted on affairs of the day.

On the other hand, the test proved that women, as a rule, have a far greater knowledge of literature and the other arts than men have. Again, women make up for their lack of knowledge on such themes as sports, science, and politics, when they are able to supply information in fields which appeal particularly to women.

Editors, journalists and writers, it was found, received the highest scores. A natural result, you might say. It is the business of these men and women to be informed broadly. But, in like manner, it is the business of educators to be widely informed. And yet the writers achieved a better grade than the teachers. On the face of these returns, the men and women of the writing profession would seem to be in a better state of general mental preparedness than the educators.

Specialists made excellent marks in their own fields. But in other branches they fell down surprisingly. The reason for this is obvious: The specialist consciously passes up general knowledge when he selects one field to master.

Older people answered the quizzes better than younger folks. This is one of the most comforting facts which these tests brought out. Perhaps Browning had this in mind when he wrote: "Grow old along with me! The best is yet to be,—The last of life, for which the first was made." The older you grow, the more knowledge life brings to you.

THE more general reading you do, the wider the range of your knowledge becomes. This point was illustrated when the preliminary test was given to some policemen. The interviewer happened to be at his favorite restaurant, a very old tavern where one gets a good meal for a minimum price. At a nearby table, he noticed four policemen. He joined these men and asked them to take a quiz—which they did, making disastrously low scores. The interview was about to be concluded when in came a picturesque old police sergeant, an Irishman. To everybody's amazement, he ran through the test easily, making a score of 90, which brought up his brother officers' lagging grades to fifty-four per cent. The sergeant explained his high average by the fact that he has traveled over nearly all the world, and during those years of loneliness in out-of-the-way places, had found companionship in any kind of book, paper, or almanac which fell into his hands.

Americans in general, so the test brought out, are backward on questions pertaining to the arts. Some might consider this a severe indictment. But it isn't really. For the three hundred years of our existence as a nation, we have been too busy conquering our country, fighting Indians, planting corn, settling internal disorders, building cities, manufacturies, skyscrapers, and automobiles, to sit down, fold our hands, and absorb the culture of the world.

As the tests brought out, an ability to do well on such quizzes is not related definitely to your formal education—or the lack of it. A person in one of the humblest walks of life who is largely self-tutored may be better able to make a satisfactory grade than the product of the finishing school, the college, or the university.

But all alike will be interested in the six new tests which appear in this article. Mr. Spafford and Mr. Esty have prepared these questions especially for the readers of this magazine, and they have devoted considerable thought and time to their construction. The questions will give you an opportunity to test your knowledge in competition with your friends and acquaintances, and will, I believe, provide you with a stimulating game which will, at the same time, help you bridge over some of the gaps in your knowledge.

A good average—fifty or so points—means a well-ordered mind. It means that you have trained yourself to put away in the filing cabinets of your brain facts which will be ready for use when needed. It indicates, furthermore, that you have that eagerness for knowledge which is sometimes described as a "divine discontent."

IN ORDER that you may have a fair chance, regardless of your background, the compilers have avoided questions on abstruse or technical points. A high score will be a tribute to the breadth rather than to the depth of your knowledge.

Here are some rules that will assist you in scoring:

1. Since there are twenty questions to each quiz, 5 points should be given for a correct answer.

2. When a question is in two parts, and the correct answer is given to one part only, allow 2.5 credits.

3. If a question in three parts is answered two thirds right, credit with the full 5 points.

4. If answered only a third satisfactorily, allow no credit at all.

In order that you may have a definite idea of the average percentage made in the tests given to people in various walks of life—and already published—a list is given below. Line yourself up with the profession nearest your own, and see if you can better the grade:

	Per Cent
5 University instructors	86
5 Reporters	82

don't fool yourself

Decency demands it

Don't fool yourself by thinking that you never have halitosis (unpleasant breath). The worst offenders are usually unaware of it. You, yourself, can never tell.

Therefore, common decency demands that before meeting people, you put yourself on the polite side by the use of Listerine. You simply rinse the mouth.

1/3 Had Halitosis

115 barbers say that about every third man that walks into the shop has halitosis. Who should know better than barbers?
Face to face evidence

Immediately and effectively, Listerine combats unpleasant odors arising from teeth and gums, the most common source of halitosis. And the antiseptic essential oils combat the action of bacteria in the mouth.

Better keep a bottle handy in home and office so that you may never offend.
Lambert Pharmacal Co., St. Louis, U.S.A.

LISTERINE

—the safe antiseptic

FALL IN LINE!
Millions are switching to Listerine Tooth Paste because it cleans teeth whiter and in quicker time than ever before. We'll wager you'll like it. Large tube 25c.

A housewife writes: "The hot grease spattered up, burning me terribly. I applied Unguentine and next morning there wasn't a trace of a burn."

Pain . . .

the lurking danger of scars *overcome*

with this dressing for burns

EACH week 140 people are burned to death in the United States. And all around us are thousands of living victims of burns, crucified with pain, infection, branded with scars for life.

Treat burns and scalds at once—with exactly the same dressing that hospitals and physicians use.

Unguentine eases the pain—instantly. And immediately, surely, it cleans the wound antiseptically—quick, normal healing begins. *Soon, almost invariably, not even a scar is left!*

Spread Unguentine on all burns and cuts, thick. In severe cases spread it on gauze and apply, bandaging lightly. Made by The Norwich Pharmacal Company, Norwich, N.Y. All druggists, 50c.

When you have finished the six tests given with this article, you may wish to make up some of your own. Making up your own questions sounds easy. But it really isn't. It takes a peculiar sort of genius—and several reference books—to ask questions properly. Mr. Esty and Mr. Spafford discovered this.

FIRST: Your queries should embrace the three main headings which Mr. Esty covered:

1. Things you know already.
2. Things you ought to know.
3. Things you would like to know.

SECOND: Your questions should be interrogations that can be answered incontrovertibly—not just by statements of opinion. For instance, the question might be asked: "Who is the greatest musical composer that ever lived?" Many would unhesitatingly answer "Beethoven." But another group might stand up for Bach. Still another sector might cling to Wagner. And all you would have on your hands would be trouble. Such questions should not be included in your list.

THIRD: Your queries should appeal to all members of your group. For instance, if you live in Detroit, and most of your friends are interested in the automobile industry, don't ask, "What modern artist painted 'Head of a Woman'?" They are not half so much concerned with the work of Henri Martisse as they would be in some question similar to: "Give five names of automobiles no longer manufactured."

FOURTH: Your queries should be fair. If your circle happens to be literary, and you are asking questions on books, don't quiz them about a novel that came off the press a week ago. Stick to volumes a year old, and to the classics.

FIFTH: Don't ask questions whose answers you haven't checked up yourself, no matter how well you think you know them. And check them up not only once but twice. For some reference books contain errors. For instance, take the question: "Who commanded the English fleet that opposed the Spanish Armada?" Most folks would answer "Sir Francis Drake." But it was not Sir Francis Drake, as Esty and Spafford found out, even though that answer was given in a standard encyclopedia. Sir Francis Drake was the vice admiral of the fleet. The supreme command was in the hands of Lord Howard.

ANOTHER question which could raise considerable controversy would be: "What state in the United States was named after a French king?" Many people would answer Louisiana. But some reference books say the Carolinas were so called after Charles IX of France. And still another encyclopedia gives an English Charles as the name father of the Carolinas.

SIXTH: The groups which seem to excite the most interest in the greatest number of people are: The Bible; American history; geography; current events; sports; quotations from well-known authors—Shakespeare and Longfellow are most favored; and the movies. Therefore, a large number of your questions should touch on these general themes.

SEVENTH: It is always interesting to bring in some figures purely local in character, either living notables in civic circles, or dead heroes of wars and mighty political issues.

EIGHTH: Advertising questions seem popular with everybody. Such questions as, "What product is advertised by the slogan 'The candy mint with the hole'?" give all a chance, as the answer, "Life-savers," is known to nearly everyone.

NINTH: Try to cover as many subjects as possible, so if a person has no interest in the first quiz or two, his attention will soon be caught by a question in which he is interested.

TENTH: If at all possible, try your questions out on several people before you use them at a party. Often a query you consider quite in order will be found incorrect. When Mr. Spafford gave the test to Donald B. MacMillan, the Arctic explorer and author, one of the questions was: "What formation do migrating bands of ducks and geese maintain while flying?" But after speaking with the explorer, Spafford omitted the word "ducks," since Mr. MacMillan said he was pretty sure ducks did not fly in that figure.

AND now it may be, after you have prepared these homemade tests, that you will be led on still further. Undoubtedly, a panorama of information will stretch invitingly before your eyes. You may be encouraged to round out your mental equipment; to strengthen the weak spots in your knowledge; and possibly to use this method of self-education to perform your present work better, or to make yourself ready for a better job.

The question mark is an apt teacher. And well-directed curiosity has proved an asset. Lawrence Barrett—one of the greatest of America's actors, who costarred with and later managed Edwin Booth, directing the latter to a fortune, educated himself by candle light over a dictionary. An eagerness for knowledge has heightened the light of many a guttering taper. Remember the flickering ends by which Lincoln studied.

Answers to Easy Questions

1. Woodpeckers
2. Molars.

INTERIOR PICTURES—*no easy to make. This interesting photograph was made with a Modern Kodak, by an amateur just like yourself.*

OUTDOOR PICTURES—*Children playing in the shade . . . picnics in the woods . . . favorite subjects once so difficult are simple "snap-shots" now.*

RAINY DAY SUBJECTS—*Now you can make snap-shots in the rain. It's no longer necessary to have your subject in direct sunlight*

New Facts About Amateur PHOTOGRAPHY

TODAY, photography for the amateur has been made easier, simpler, surer than ever before.

No necessity now to leave your camera home on "dull" days. If it's raining . . . don't let that change your plans.

If your subject is indoors . . . hard-to-take, according to your past ideas . . . forget these hazards entirely. For the modern Kodak is an all-day, all-weather camera. Ready to use in rain or shine. Indoors or out. Daylight to dusk.

Faster lenses the rule—better pictures the result

This wonderful new development in the art of taking pictures is made possible by faster lenses on cameras of moderate price.

Thus the photographic day is lengthened for those using the less expensive Kodaks.

For example, on the $18 1A Pocket Kodak is now supplied a lens that in 1925 was not available on any camera selling for less than $40. Now you can take "snap-shots" in cloudy weather that would have been impossible a short time ago.

You can even take them in the rain . . . or indoors under favorable light conditions. It's no longer necessary to have your subject in direct sunlight.

Children playing in the shade . . . traffic during the rain . . . picnics in the woods . . . favorite pictures once so difficult are simple "snap-shots" now.

Picture-Making Simplified

The modern Kodak is simplicity itself. Everything possible has been made automatic. Things to adjust have been reduced to a minimum.

The camera illustrated above is the 1A Pocket Kodak, which takes pictures 2½ x 4¼ inches. Equipped with an f.6.3 lens, it sells for $18. Other Kodak models $5 and up.

On many Kodaks you'll find a simple "Exposure Guide"—a wonderful feature, created by Eastman Scientists, which practically does your thinking for you. It instantly shows you the correct speed and lens opening to suit any light conditions. Helps avoid mistakes . . . takes the guesswork out of making pictures.

In addition, Kodak film in the famous yellow box is dependably uniform. It has wide latitude. Which simply means that it reduces the danger of under and over exposure. *It gets the picture.*

"Picture ahead—Kodak as you go"

Look around you! Everywhere you go you'll find picture-making opportunities. Friends, neighbors, children. Adventure, travel, romance. There's no need now to miss a single picture opportunity—no need to wait for sunny days, or summer suns, or "right" hours.

Step up to the nearest Kodak counter and see these modern cameras. Find out how modern science has simplified the making of pictures. You can start at once . . . today, tomorrow . . . making just the photographs you want, wherever and whenever they "happen."

If you would like to receive an interesting and informative booklet about these modern Kodak improvements, mail the coupon.

Eastman Kodak Co., Dept. AM-2, Rochester, N. Y.

Please send me, FREE and without obligation, the booklet telling me about the Modern Kodaks.

6. Gravity feed, pressure feed, and vacuum tank feed.
7. They are types of pitchers' deliveries in baseball.
8. The General Electric Company.
9. B. V. D. underwear.
10. In the spring.
11. (a) Non-commissioned or warrant officer, (b) commissioned officer, (c) non-commissioned or warrant officer.
12. (a) Artillery, (b) infantry, (c) cavalry.
13. An explosive shell, usually thrown by hand.
14. The Buick.
15. The American League.
16. "Parley-voo."
17. A meeting of the representatives or leaders of a political party to determine candidates or policies.
18. They are British golfers. (All of them have held the British open championship.)
19. The America's Cup.
20. Barbasol shaving cream.

Answers to Questions Women Should Answer

1. A trimming, as a ruffle on a shirt front or lace for a dress front.
2. Rugs and carpets (they are named for the English towns in which they are manufactured).
3. As a baby specialist and author of books on this subject.
4. They are all cotton cloth materials.
5. (a) Shortening, (b) glass cooking utensils, (c) soap.
6. An ingredient to make them rise, such as baking powder.
7. A famous French maker of perfumes and cosmetics.
8. They are all authors of famous cookbooks.
9. Congoleum-Nairn, Incorporated; Colgate and Company; The Oneida Community.
10. The Hoover Apron.
11. To baste.
12. A dressing gown; a negligee.
13. An inversion of stitches (in knitting).
14. An earthenware dish used for baking.
15. Embroidery.
16. A small triangular article of women's dress worn over the shoulders or on the neck.
17. Ornamental zigzag sewing.
18. A roast of pork.
19. Colanders.
20. A sale of white goods, such as towels, table and bed linen, etc.

Not a before-and-after picture —simply an artist's impression of a young man as he looks today, and as he would look without his hair.

Your youth and your hair!

Dandruff's warning and dandruff's treatment

TRUE enough you are only as old as you *feel*. But, after all, you *look* older or younger as you lack or have hair. These pictures show that.

To keep your youth, keep your hair! And to keep your hair, get rid of dandruff. For baldness, scalp specialists say, traces back to dandruff —9 times out of 10.

To correct dandruff, special care with a special soap is advisable—with a soap, like Packer's Tar Soap, made for the hair and scalp.

A luxury sensation

Until you feel the rich, velvety Packer lather pile up under your finger-tips, you cannot fully appreciate the luxury of a Packer shampoo.

Work the snow-white piney lather down into the pores of the scalp. Now rinse. How refreshed you feel —how your scalp glows with health!

Once you try Packer's Tar Soap, you will understand why Packer's is by far the leading seller among all tar soaps. You will understand why Packer's has been the favorite tar soap of three generations of healthy-haired Americans.

How pine tar helps

Every well-known authority recognizes the value of *pine tar* in the treatment of common hair and scalp ills—especially dandruff. So for over 50 years leading physicians have been prescribing Packer's Tar Soap in the care of the hair.

To correct dandruff, shampoo with Packer's regularly, at least once a week. (In severe cases, even oftener.)

Regular Packer shampoos give your scalp the benefits of the healing *pine tar* lather. The gland openings are cleared of dandruff—helped to perform all their normal duties. The scalp regains health and vigor —the hair, its youthful vitality.

Send 10c for Sample and Manual

For 10c (stamps or coin) we will send you a generous sample of Packer's Tar Soap and a copy of our new Manual, "The Care of the Hair." This profusely illustrated 28-page book has recently been re-edited to present the most scientific thought on the care of the hair. It contains dozens of authoritative suggestions for keeping your hair healthy and young-looking. Fill in the coupon, clip and mail today.

The Packer Mfg. Co., Inc., Dept. 6-I
Box 85, G. P. O., New York, N. Y.
I enclose 10c. Please send me sample half-cake of Packer's Tar Soap and your Manual, "The Care of the Hair."

A charming hostess

IF you dread guests because of your bathroom, the obvious remedy is to have it made so beautiful and so convenient that you need not be ashamed of it . . . a bathroom completely in keeping with the times and with your standards in other things.

With Mueller fittings—vital spots of plumbing—and *now Mueller vitreous ware*, there is immediate relief from the irritating consciousness that your bathroom may not be representative of you or your home.

It can be made fully modern. For a small cost—insignificant compared with the results—you can have a modern, luxurious, quiet bathroom . . . quick-draining lavatory and tub . . . faucets that work as faucets should . . . one that will be a source of pride and not a cause of embarrassment.

Ask your plumber to quote you on Mueller equipment that will make your bathroom what it ought to be. Mueller service includes vitreous ware, faucets and fittings for every outlet, residential or otherwise.

To the plumbing merchant everywhere The name Mueller on faucets, fittings and vitreous ware sold and installed by you is to your customers a mark of quality. It will increase their confidence in you. It will increase your business.

Every Mueller faucet is tested under 200 pounds pressure. All parts subjected to strain are reinforced. Nothing leaves the factory until it is worthy of Mueller's reputation for quality.

Through 300 plumbing jobbers in the principal centers in the United States and Canada, Mueller merchant plumbers can get Mueller fixtures and fittings promptly. These jobbers have invested thousands of dollars in complete stocks of merchandise, and they can offer you a service exactly adapted to your requirements, large or small.

MUELLER CO. *{Established 1857}* Decatur, Ill. *Branches:* New York, San Francisco, Los Angeles
Canadian Factory: MUELLER, Limited, Sarnia

Since 1857, when this institution was founded by Hieronymus Mueller, it has specialized in the manufacture of brass goods for plumbing service. Today, Mueller Co. is entering upon a career of extended activity. Vitreous ware has been added to the Mueller line and the same high quality which has characterized Mueller faucets and

fittings will distinguish it. Before accepting any selection of plumbing appurtenances as final, it should be worth every householder's while to inquire of architects, merchant plumbers, plumbing goods jobbers, waterworks executives and others who are familiar with Mueller craftsmanship as to the reality of Mueller quality.

who dreaded guests!

A PERFECT hostess—brilliant, cultured. And yet, when friends came she would be worried instead of happy. What would they think when they saw the bathroom in its dinginess, its antiquated fittings, its slow-draining, gurgling lavatory? Would they think she was a poor housekeeper? Would they talk about it . . . and her . . . to others?

One day she consulted her merchant plumber. In a short time he wrought a complete transformation. Gleaming new faucets and fittings. The bathroom is *now* a place of inviting beauty. She is proud of it . . . wants her friends to see it. Her whole home has taken on a new grace and tone. Now she is the charming hostess who *welcomes* guests!

This Haunted House Has Only Happy Ghosts

(*Continued from page 16*)

in torture; that a child had escaped and jumped from the roof, killing herself; that dead bodies were found in the cistern.

"All of these stories were fiction," said Mr. Warrington. "Nobody had been killed. But credulous people believed the stories, and soon it was common talk that a ghost inhabited the house. Thus, the old Remairie mansion became the Haunted House, deserted, shunned, accumulating dust, and falling into disrepair. The agent was unable to sell it, unable even to rent it to respectable people, and after a few years it became a hiding place for thieves, river pirates, and counterfeiters.

"These criminals found it to their interest to encourage belief in the ghost stories, and obliged the superstitious public by putting on frequent ghostly performances. Shrouded figures were seen through the shuttered windows, mysterious lights glowed and flitted about, blood-curdling shrieks were heard.

"Eventually, the Haunted House became one of the traditions of the city. Even to-day reputable guidebooks repeat the grewsome yarns in apparent seriousness. And the fictitious horrors of the old house have been preserved in literature by such well-known writers as Thomas Bailey Aldrich, Lafcadio Hearn, and George W. Cable."

WHILE the house of his ancestors was passing through these vicissitudes, Mr. Warrington was beginning his life. He was born in Atlanta, Georgia, in 1850; but when he was five years old his parents returned to New Orleans. His mother died during the Civil War, and his father just after its close. The youth was left with large properties, though depleted somewhat by the effects of the war. While on a visit to friends in Charleston, South Carolina, the young man entered Porter Military Academy, a new school that was just being opened there, and remained two years.

"When, in 1870, I came back to New Orleans," said Mr. Warrington, "the old Remairie mansion was the very picture of desolation. Not only the house but also the neighborhood had changed. I remembered what my mother had told me of the former glories of this fine old establishment that her great-grandfather had built, and I resolved to rescue it from ruin and decay. So I took the house, had it cleaned, swept, repaired, refurnished it, and moved in.

"Here was I with this big house of forty rooms on my hands. I had no family, no dependents, no particular career in view. Our city was still staggering under the effects of the Civil War, many of the finest families were impoverished, and it seemed that I ought to do something serviceable. Finally, it came to me that the thing I best could do was to establish a school in the old house. The war had wiped out many schools; young people were coming along, education was needed.

"A faculty of teachers was organized and a day school established. Its success was immediate. Parents were glad of the opportunity, and pupils flocked in. Our enrollment increased to the limit of our capacity, and the students were of the highest type, many of the best families being represented."

THEN, in 1873, this incident happened: A servant came to Mr. Warrington one morning and said, naming two prominent students in the school, "Paul and Louis are in jail, Mr. Will."

"In jail! What do you mean?"

"Yes, sir; they stole a horse and buggy yesterday, and the police arrested them, and now they're in the parish prison."

The parish prison was a gloomy jail in Congo Square, the former slave mart.

"I put on my hat and hurried as fast as my legs would carry me to Congo Square," said Mr. Warrington. "The boys were in prison, sure enough, and presented a melancholy sight, clothes bedraggled, eyes bleary from sleeplessness, their whole appearance one of defeat and humiliation. It was the first time I had visited a jail, and it was a shock to see two beloved friends behind the bars. I was twenty-three years old, and the two prisoners were only a little younger.

"They were willing and eager enough to tell their story. When they came out of school the day before, they saw a horse and buggy hitched in front of the house next door. A couple of care-free schoolboys, eager for fun, they thought it would be a great joke to take the horse and buggy for a ride. So they got in, picked up the reins, and drove off.

"A few minutes later the owner of the rig came out and was annoyed at finding his property gone. He looked around to see if the horse had wandered off, and the more he looked the madder he got. Finally, he called a policeman, and as they started down the street they met the boys driving back. Of course the boys were astonished to find themselves seized by the policeman. They explained that they meant no harm, they were only playing a prank. But the owner had no sense of humor; he was piping mad and insisted that the officer make the arrest.

"When the parents of these two youths were notified, they refused to have anything to do with them. This action may seem unbelievable to many people, but the old-time Creole was proud-spirited, and to have it said that a member of the family had been in prison charged with theft was regarded as a blot on the family honor. To the sensitive Creole it was not necessary to inquire into the truth of the charge, it was enough that so disgraceful an accusation had been made. In the case of these two young men, their parents were never reconciled to them, and, in fact, never saw them again.

"I was glad to put up the necessary bonds for my friends' release, and when they were free they lived with me until they got established and branched out for themselves.

"From my two friends, I learned of five

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

other young men who were languishing in prison awaiting trial for trivial offenses. So I helped them out, and brought them to my home to live until they could get on their feet again.

"And that was my beginning," said Mr. Warrington, with a smile. "It was, as you see, all very casual, very incidental, nothing premeditated. But that little experience started me on my real career, and I've kept at it now for fifty-three years."

FIFTY-THREE years! The school was continued only until other schools began to function. But this informal work of befriending young men has never ceased.

The Haunted House thus became the home not only of its generous young proprietor but also of many friendless young men in New Orleans. There was no red tape, no organization, no flourish of philanthropy. Policemen, magistrates, clergymen, social workers, and others, learning that the young gentleman in the Haunted House was willing to provide bed and board for young men in need, got into the habit of sending such young men to him. And soon the Haunted House—which was fast becoming known as Warrington House—needed all its forty rooms, and more, to care for its continuous stream of guests.

"What about your business interests?" I asked Mr. Warrington.

"Well, they pretty much had to take care of themselves," he answered. "This house gradually became my main interest, and in a few years I was devoting the greater part of my time to it. Endless details developed; for one thing, a large correspondence. As it got abroad in various parts of the country that I was interested in this sort of thing, parents who were looking for runaway boys wrote me for help in finding their sons. Employers turned to me for assistance in getting employees. Of course it was a slow development, but after a while all of my time was going into this work."

And all his money went into it too. At the beginning, Mr. Warrington had three country places. First the Georgia plantation was sold. In a few years it became necessary to sell the Arkansas farm. The last to go was the old home near Alexandria, Louisiana. Little of his estate is left now. A close friend of Mr. Warrington's said to me last winter, "Only recently he sold the last of his family silver to raise more funds for this work of friendship."

"In the fifty-three years more than one hundred thousand young men have passed through my home," said Mr. Warrington, "and only two of them do I regret helping. Those two turned out to be notorious criminals; the rest were simply young fellows down on their luck, and I am glad that I was at hand in their time of need. Many of these young men were from distant states and countries. Many returned to their homes or struck out to make new homes for themselves. Some have become leading citizens. One of my boys is now a prominent lawyer on the Pacific coast, another a leading business man in Colorado, another the head of the state department of agriculture in one of the Southern states.

"Occasionally a young man will come to the house, sent here by one of these former boys. And occasionally, when to get him away from bad associations I think it necessary for a young fellow to leave New Orleans, I send him with an introduction to one of my former boys, and he is assured of a friend and backer in the strange city. Thus we have gradually built up an interstate fellowship."

One day last winter a prosperous-looking stranger breezed into the Haunted House and asked for Mr. Warrington. It happened that Mr. Warrington was away for an hour. "I don't know that I can wait that long," said the stranger; "but tell him that Wild Bill of Kansas dropped in—he'll remember me then. I went through his mill fifteen years ago. Tell him I've got boys of my own now."

There are Wild Bills scattered all over this continent, fellows who went through Mr. Warrington's "mill" in a time of need, and who are established citizens now, with boys of their own.

"How do you find your young men?" I asked Mr. Warrington.

"I visit the parish prison every Sunday, and whenever I find a young man who has been taken up for vagrancy, loitering, or on some other trivial charge, I try to obtain his release. You would be surprised at the number of men who are imprisoned, and frequently held long periods, on these petty charges. I have known cases of innocent men who were held in prison ten months awaiting trial, and then released and the charge dismissed.

"The judges here know me, and are generally willing to release a prisoner in my care. In this way, many who are not criminals are removed from the degrading influences of prison and given a chance to get on their feet. I bring them here, provide them with a place to sleep and food to eat, and take care of them until they can get work. When they are self-supporting, they pass on and make room for others. Usually, a young man is here only a few days, though sometimes it is necessary to carry him for a week or longer.

"But only five per cent of our boys come from prison. The great majority of them are simply out of luck, stranded in a strange city, growing shabbier and hungrier every day as they look for the elusive job. Some fellow-miserable tells them to come here, or it may be that a friendly officer on the beat sends them here. In winter, we sometimes have so many applicants that I open the library and sitting-room, and let them sleep on the floor. I have had boys sleep in chairs."

When I repeated this to one of Mr. Warrington's friends, a big business man on Carondelet Street, he answered, "Yes, but I'll bet the old gentleman didn't tell you of the time he turned out of his own bed to provide sleeping room for two men, while he occupied a cot."

"THESE young men are not criminals, and they are not abnormal," continued Mr. Warrington, "but sometimes they are in mighty desperate straits. One cold winter day—and it can get cold here—a man knocked at my back door and asked if I could give him a job. His clothes were threadbare, and I could see his bare toes sticking out of the ragged slippers he was wearing. I didn't know just where I could put him for the night—I had sixty men in the house at that time—but I invited him to come in. He was very much embarrassed as I ushered him into

What Are YOUR Mistakes in English?

They may offend others as much as these offend you

IF some one you met for the first time made the mistakes in English shown above, what would you think of him? Would he inspire your respect? Would you be inclined to make a friend of him? Would you care to introduce him to others as a close friend of yours?

These errors are easy for you to see. Perhaps, however, you make other mistakes which offend other people as much as these would offend you. How do you know that you do not mispronounce certain words; are you always sure that the things you say and write are grammatically correct? To *you* they may seem correct, but others may know they are wrong.

Unfortunately, people will not correct you when you make mistakes; all they do is to make a mental reservation about you. "He is ignorant and uncultured," they think. So you really have no way of telling when your English offends others.

FREE Book on English

Sherwin Cody, perhaps the best known teacher of practical English, has perfected and patented a remarkable device which will quickly find and correct mistakes you unconsciously make. Correct English soon becomes a HABIT.

If you are efficient in English, it will give you greater confidence; if you are deficient, you surely want to know it, so that you can correct your mistakes.

Mr. Cody's remarkable new invention, the 100% Self-Correcting Method, has already improved the English of more than 50,000 people. No useless rules, no tedious copying, no hard study. Only 15 minutes a day required. You learn by creating the HABIT of using correct English. Nothing like Mr. Cody's method has ever been used before!

A new book, "How to Speak and Write Masterly English," is ready. It explains Mr. Cody's surprisingly easy method. Get a copy free and learn how to stop making embarrassing errors. You do not want others to judge you unfairly. Merely mail the coupon or a postal card.

The

This vast system serves the NORTHWEST

SHORTEST AND MOST MODERN ROUTE TO THE PACIFIC AND THE ORIENT

IN THE Northwest, reaching from the Great Lakes to the warm slopes of the Pacific, we have today the startling spectacle of Twentieth Century industry and civilization suddenly crowding upon virgin country and pioneer settlement.

Deep ruts of wagon trains still mark the prairieland that is being plowed and harrowed by multi-unit mechanical monsters. Enormous rivers wind for hundreds of miles through open reaches, though huge power plants are already harnessing their colossal might. Humming giant electric locomotives have conquered the mountains. Broad shining cities send the pinnacles of their skyscrapers high against mountain backgrounds of primeval forest.

The Northwest—roughly one-fourth the area of the United States!—is the roof of the continent. It is the birthplace of rivers whose waters reach the Japan Current, the Gulf of St. Lawrence, Hudson's Bay and the Gulf of Mexico. The Mississippi rises here amid green lush hills. The mighty Missouri is born in a broad sweet valley rimmed with mountains of jade and frosted silver. The brawling Columbia roars down from glacier-crowned mountain peaks.

Corn, the golden gauge of civilization, is sweeping far out upon the plains. Wheat is flooding the open prairie and the fertile benchland. The mountains are gorged with an inestimable wealth of minerals. Washington alone has enough coal to supply the Nation for 126 years. From one pocket in the Rockies two billion dollars' worth of copper and allied minerals have been extracted. The Northwest is a region of bewildering diversity whose resources have only been lightly touched.

MILWAUKEE ROAD

THE CHICAGO MILWAUKEE AND ST. PAUL RAILWAY
TO PUGET SOUND
ELECTRIFIED

THE DEVELOPMENT OF THE NORTHWEST has depended almost entirely upon the railroads, over which a ceaseless torrent of people and raw materials and manufactured commodities pour. They are the highways of this region.

The picture map gives only a sketchy idea of the vast extent of the Chicago, Milwaukee & St. Paul Railway. The pioneer of the Northwest has a system today of over 11,000 miles, forming a network that spreads from Chicago to Kansas City, Omaha and Sioux City; to Milwaukee, Upper Michigan Peninsula, Minneapolis-St. Paul; and to Spokane, Seattle, Tacoma, and the Olympics.

For 660 miles across four great ranges —the Belt, the Rockies, the Bitter Root and the Cascades—*The Milwaukee Road is electrified with power drawn from swift rivers*, the most modern achievement in railroading.

Milwaukee passenger cars are now being equipped with *roller bearings*—a revolutionary improvement first adopted by this road.

In rolling equipment, too, The Milwaukee Road keeps the lead. Its great limited trains are internationally famous. Among the most notable are *The Olympian* and *The Columbian* running between Chicago and Seattle and Tacoma; *The Pioneer Limited*, between Chicago, Milwaukee and the Twin Cities; *The Arrow*, between Chicago, Omaha and Sioux City; *The Southwest Limited*, between Chicago, Milwaukee and Kansas City; *The Pacific Limited*, between Chicago and San Francisco. An army of 60,000 trained employees operates The Milwaukee Road.

Most diversified of routes

This is the logical route for your trip to the Pacific. Most varied. Most beautiful. And here you see the restless genius of the American people in the last tremendous surge across the continent to the nearest point of contact with the Orient.

Chicago, Milwaukee & St. Paul Railway
Room 884, Union Station, Chicago, Ill.

How Good a Parent are You?

What do your children read? Are you as careful of their minds as you are of their bodies?

Send to-day for the free book that tells the secret of good reading for children.

The free book is worth a serious half-hour of YOUR time.

Read this letter from a mother:

"Why can't someone do for children what Dr. Eliot has done for adults in the Five-Foot Shelf of Books?" she writes. "My children are hungry for reading. Must they fall prey to foolish animal books and the Sunday comics? "Why can't ***someone*** gather together all that is best in children's literature and give it to us in one set of books?"

How many thousands of parents have been faced with the same problem. And now the problem is solved—wonderfully solved—by

THE YOUNG FOLKS' SHELF of BOOKS

THE JUNIOR CLASSICS
Introduction by Dr. Eliot
Reading Courses by President Neilson of Smith College

If you have children under 16 years of age, you owe it to yourself and them to know something about these wonderful "Junior Classics."

For here are the ***great*** stories and poems—from "Aladdin," "Robin Hood," and "The Man Without a Country" to "Barbara Frietchie," "The Pied Piper" and "The Eve of Waterloo." For your children they mean not only the finest entertainment. More than that, they are the sort of reading that develops a growing mind in the right direction.

"These," says Dr. Eliot in his splendid introduction, "are the real elements which should enter into the education of every English-speaking child." In these pages your boy and girl meet the great figures of history; here they learn courage from the courageous; truth from the truthful; heroism from the heroic.

You simply *must* find out all there is to know about these books that can mean so much to your children. An interesting booklet tells how they may be yours on the easiest of partial payments.

Send for this FREE "Junior Classics" booklet.

the dining-room. He hung his head over his plate, and said very little.

"After dinner I took him back to our storeroom and got him a pair of shoes and a pair of socks. 'Sir, you are very kind,' he said; 'but I am a stranger and have asked for nothing.' I told him I would be glad if he could use them, and that he was perfectly welcome, and no questions asked.

"Then he opened up, and talked a little. He said that on the day before he had sold his shoes for something to eat, and had picked the ragged slippers out of a trash can in an alley. He had tried everywhere for work, but there was much unemployment here that winter, and he had been able to get only an occasional job at the most menial labor. He was near the end of his tether, he finally confessed, when he stopped at my back door—on the way to the river, where so many desperate failures end it all. But he saw people moving about in our house and, without knowing its reputation at all, he stopped to inquire for a possible chance to work and earn another meal.

"We outfitted that young man with a suit of clothes. He lived here a few days until he was somewhat replenished in strength and spirit, and then he went out and found work. To-day he is the trusted employee of a large mercantile concern, one of its coming men. He is a graduate of a large New England college, comes from a fine family, and there was nothing in the world the matter with him except that he was down, and nobody seemed interested in helping him up. Many, many cases are like that.

"AND then I have strange experiences with parents. Much trouble is due to parental severity. Fathers are absorbed by business; they fail to chum with their sons, and when something happens to threaten a break they are totally unprepared, unable to understand the son, and disaster follows.

"There was another New England boy who came to us, the son of a wealthy manufacturer in one of the industrial cities. This boy was about twenty years old and had been a student in Johns Hopkins University, in Baltimore. Because of a drinking bout he was suspended from the university, and his father was so outraged that he refused to allow the son to come home.

"The young man, in his distress and immaturity, didn't know which way to turn. He went down to the Baltimore water front and bought a ticket on the first outgoing steamer. The steamer was bound for Savannah, Georgia, and when it landed there he telegraphed his father for forgiveness. The telegram received no answer, and in a few days the young man was without funds. He looked for work and finally hired as coal-heaver on a steamship bound for New Orleans.

"Some laborer on the ship told him about my place, so, as soon as the vessel docked, the boy started out to find it. I happened to be in the entry when he came up, and he was so black I thought he was a negro. After he had washed and eaten, he told me his story.

"I told him I would gladly write his father and explain everything, and advise the father as to the son's attitude. We waited two weeks for a reply to that letter and then I wrote again. The second letter came back unopened, marked "Refused." The Christmas season was now only a few weeks off, and the boy was eager to spend it at home. So I put in a telephone call for the father in his home in New England, got him on the long-distance wire, and let the boy talk with him. But the father was so harsh that his son soon hung up the receiver, his face flushed and quivering.

"He left me two days later. A month later he wrote from New York. Then some months later more news, sad news. The boy had fallen in with bad companions, he had forged a check, and was under arrest. Now he is in Sing Sing prison, serving out a sentence. That boy was driven to an irregular life by a hard-hearted father."

MR. WARRINGTON'S work is all very individual and very intimate. There are no catalogues, no case cards, no red tape, no intermediaries. He deals with each young man personally, and the only records are carried in his head. Frequently, I am told, he gets up in the night to answer the doorbell himself. "If it is some boy in trouble I want him to have as cordial a welcome as possible," he explained.

The work is so dependent on Mr. Warrington's personal ministration that a few years ago some of his friends got together with him and formed a corporation known as the "Warrington House." Their purpose was to provide an organization that would relieve him of some of the details and responsibility and insure the permanency of his work. Under corporate organization, the work has been considerably extended. Recently, a new center for boys under twenty was established as the Warrington Home for Boys. Another development is the Warrington Arts and Crafts Shop, which provides employment at rug-weaving, furniture repairing, and wood-working until the men can get permanent work outside. The shop is in a separate building, across Royal Street, from the Haunted House.

Meanwhile, some years ago, Mr. Warrington lost control of the Haunted House and had to move to other quarters. Like much other property in the South, its title had become considerably involved by tax sales during the Civil War period, and there was long litigation. During this interval the old house again lapsed from respectability, and became a saloon, a lodging-house, and a notorious dive. Its proprietors revived the ghost stories, and the place became known as the Haunted Exchange. People were charged admission to its upper floors, and treated to ghostly appearances, mysterious noises, and other make-believe horrors.

But finally the title was cleared, and Mr. Warrington moved back to the old house which had so large a part in influencing his career. His board of directors bought back the property, and is gradually paying off the mortgage.

Its reputation as a haunted house is still very much alive, however, and scarcely a day passes without many tourists calling to see what they can see. They are welcomed, shown over the place, up and down its three floors, but nary a spook has yet been found. Usually, before they leave they ask questions about the present use of the old house and are always surprised to learn what it is. But few of them ever

THAT'S THE BRAN I LIKE

A DAILY supply of bulk is important for healthful regularity, and bran is one of Nature's richest sources.

Most people have to be tempted into healthful eating habits. They demand delicious flavor in any food they eat regularly.

In Post's Bran Flakes millions have found a bulk food that is so good to eat that their appetites never tire of its delicious flavor. By eating it every day they help to establish healthful, regular habits.

Enjoy these crisp, brown flakes with milk or cream, just as they come from the package. Try them with fruits and berries, fresh or preserved. Learn how good muffins, cookies and bread can be when made with Post's Bran Flakes. In addition to flavor and bulk, Post's Bran Flakes provides valuable nourishment in the form of such essential food elements as iron and phosphorus, proteins and carbohydrates, and the essential vitamin-B.

Make this "Ounce of Prevention" Test!

Try Post's Bran Flakes with milk or cream every morning for two weeks as an "Ounce of Prevention". Each day you'll relish the flavor of the crisp, brown flakes.

In two weeks' time see how much better you feel. Then you'll be glad to make your health a good excuse for eating every day a food that tastes so good.

Don't put off starting this important health habit another day. Keep on the "Road to Wellville" by eating Post's Bran Flakes regularly.

Free! Send for the "Ounce of Prevention" Package. At your request we will send, free, the "Ounce of Prevention" package of Post's Bran Flakes—more than enough to let you discover how good this cereal is.

Postum Company, Inc., Dept. B-59, Battle Creek, Mich. Makers of Post Health Products: Post's Bran Flakes, Postum Cereal, Grape-Nuts, Post's Bran Chocolate, Instant Postum and Post Toasties. Canadian Address: Canadian Postum Company, Ltd., 812 Metropolitan Bldg., Toronto 2, Ont.

The Pennsylvania Railroad carries more passengers, hauls more freight than any other railroad in America

When the "Comet" roars by "Uncle Sam"

The hum grows loud along the rails . . . a flash of headlights . . . a wave of greeting exchanged between the crews . . . red rear lights dwindling into the morning mist.

THUS every night, just west of Terre Haute, two freight trains pass.

The "Comet" whirls its caravan of merchandise to the West. "Uncle Sam" spins east with a solid train load of green vegetables from the sunny farms of the South and West. Both are leaders of the Pennsylvania's fleet of named freights. Both are symbols of a new golden age of American commerce.

For now freight distances are measured in hours instead of days. The Pennsylvania's flying freights move with the precision of passenger trains. Freight movements are definitely scheduled.

This expeditious handling of freight has benefited all America. Factories can now count on scheduled deliveries of raw materials and keep inventories down. Retailers, sure of quick replenishment of supplies, can carry smaller stocks. Housewives can serve fresh wholesome vegetables and fruits all through the year. Business is better. Standards of living are higher.

Because of their importance and reliability, because of their part in this new era in transportation, sixty of the Pennsylvania's three thousand daily freights have won special names. They, like their cousins, the limited passenger trains, are of the aristocracy of the rails. And like them, these named freights are made possible by the fact that the loyal efforts of over two hundred thousand men — competent and trained—are united in a common aim.

4 of the 60 Pennsylvania freight trains whose regular, dependable performance has earned for them distinctive names:

"THE COMET"
Perishable—Merchandise
Seaboard Cities to St. Louis

"THE YANKEE"
Perishable—Merchandise
New England to Chicago

"UNCLE SAM"
Perishable Freight
E. St. Louis to Seaboard Cities

"GAS WAGON"
Merchandise
Detroit to Seaboard Cities

PENNSYLVANIA RAILROAD

hear the real story of Warrington House, the absorbing interest that has kept a man for fifty-three years at one task, that to most of us would soon become a cheerless, thankless humdrum.

"No, it isn't monotonous," answered Mr. Warrington. "Why, I am always abroad through my daily contacts with these boys: they hail from every land. Then there are the letters they write, and the correspondence with parents; why, every day is new, every friendship is a fresh point of interest. Oh no, don't imagine it's a dull life. Quite the contrary. Just the other day I had a Scotch lad, whose ship sailed and left him stranded here. And right after him came a brilliant young fellow, a graduate of Heidelberg University. Another boy told me of his life in Alaska, where he was born under the midnight sun."

Mr. Warrington's friends are continually protesting that they don't see enough of him—his whole time is absorbed in his work, practically seven days every week. The greater part of his Sundays is spent visiting the prisons, but on occasions he slips away to his church, St. George's, Episcopal. And what a reception he gets! If he accepted ten per cent of the invitations extended to him he would be booked up solid for a week.

"What is the driving power back of all this application, Mr. Warrington," I asked, "your sacrifices of yourself and your money and everything?"

"Don't call it sacrifice," he objected sharply. "A man must live his years and get the use of his property, must he not? That's all I'm doing. This interests me; the driving power is interest. I've been doing what I like to do here, and I'm happy at it."

SOMEBODY suggested that Mr. Warrington would have been wiser to invest his estate in securities and depend on the income to carry on his work. I mentioned this to him.

"Do you think so?" he answered. "Do you believe it would have been better to play safe, and limit my usefulness? I don't."

"Well, you believe in spirits anyhow, don't you?"

"Ghosts, you mean," he answered.

"Call them that if you like. This house is haunted."

"Well, I have lived in it many years. I've been all over it at all hours of the day and night, and I have yet to see the slightest evidence of anything supernatural. When we renovated the old place a few years ago, I found rods, speaking tubes, wires, and whistles in the walls and ceilings. And I know one man in this city who was hired to dress up in a sheet and play ghost, to satisfy the credulous. No, sir, that story is all nonsense. I want to scotch it. I want to give this old house such a character as will erase that absurd reputation from memory forever."

But it seems to me that it is not wrongly called the Haunted House. "There can be good spirits, you know," I suggested.

Mr. Warrington's eyes twinkled and his face broke into a broad grin.

"Oh, I see! Now you're trying to make out that I'm the ghost, are you?"

"Not the ghost but the good spirit," I thought, as we said good-by.

Grandfather

(*Continued from page 57*)

into contact with real molars and bicuspids, the teeth wouldn't stand a ghost of a show.

"Teeth aren't what they used to be, anyway. People brush them to pieces."

The last time he had any conversation with a dentist, the dentist told Granddad teeth ought to be brushed five times a day.

"The idea! No wonder everybody is running to the dentist all the time—just simply brush their teeth into dust and powder!

"No, teeth aren't what they used to be! Nor toothaches, for that matter. In the good old days, a toothache really *was* a toothache! But all these new-fangled contraptions have advanced to such a pernicious degree that they simply won't let you have a good old-fashioned toothache any more. And if your teeth don't ache properly, how are you going to know what diseases are down amongst the roots of them?

"The toothache they have now is a sly, insinuating, devilish sort of toothache that lulls you into a false sense of security," says Grandpap. "Men were men in the old days, and they just simply let her ache until they *had* to go to a dentist, and then she was yanked out by main force, and you wrapped her up in a small piece of newspaper and carried her around in your vest pocket for two or three months as a kind of trophy, and you knew you had been through something important."

But even if teeth were what they used to be, there is nothing, Grandfather asserts, worthy to use them on.

"SAUSAGE, for instance," says Granddad. "It's been twenty-five years since I've found a piece of good old-fashioned sausage meat—that could really be called *sausage*. In the old days, we used to look over a pen of pigs along in the spring, and a neighbor who did the sausage making—he was an expert who had specialized in sausage making—would give the benefit of his wisdom and advice in picking out the Sausage Pigs."

And the Sausage Pigs, destined for a kind of glorious immortality, would be specially fed and looked after all through the year until butchering time came, around about Thanksgiving Day. These particular choice pigs would be killed with a ritual varying from the usual method, and the meat would be cut up and prepared in a manner that is now a lost art forever, so Grandpap says. Sage, thyme, and coriander seed, and other strange, wonderful herbs would be craftily blended with the meat. It was not merely the flesh of pigs, it was an aromatic delicacy.

But there really isn't any sausage meat any more, anywhere, and if there were, there aren't any buckwheat cakes or corn cakes to eat with it. What in the world has come over buckwheat in the last quarter of a century? Of course, if you did get the buckwheat you couldn't find anybody in the world capable of making the cakes right any more. The art of baking griddle cakes has gone out forever.

SHAVE . . .

SHOWER . . .

RUB-DOWN . . .

Even *then*

this pink cream rolls pore-dirt free

Tomorrow morning, *after* you lather your face, *after* you shave, *after* you shower, let this cream prove that your face is still only half clean.

Pore-dirt hides in every face. It gives you a gray, lifeless tone instead of the ruddy glow you might well show the world.

Pompeian Massage Cream will remove pore-dirt from the clearest complexion. That's our *claim*. But the *test* that convinces thousands is this:

Send us the coupon for a FREE tube. Wash your face as clean as you know how. Then massage Pompeian into the pores. What happens?

***The cream rubs in* pink, *but* ROLLS OUT DINGY GREY!**

The picture below, taken under a powerful microscope, shows a section of skin before using Pompeian Massage Cream. The light area at the side shows the cream spread on the skin.

Compare it with the picture at the right. That's skin that is really clean! Those dark marks are the dried pellets of cream, black with the pore-dirt that has been rolled free. Dirty, aren't they? And remember, that embedded dirt could never have been washed out!

Give yourself a Pompeian Massage. Free your pores of sallow-toned dirt. Show the world a face alive with the athletic glow that clean skin boasts. A Pompeian massage is a great start for a busy, successful day!

FREE test convinces thousands

Test the benefits of Pompeian Massage Cream on your face FREE. Fill in the coupon and mail it to us—right now, while you are reading this magazine.

Photograph taken under the lens of powerful microscope showing section of skin before using Pompeian Massage Cream. The light area at the right shows the cream spread on the skin.

Photomicrograph of the same section of skin after using Pompeian Massage. Compare the skin tone. Note the dried pellets of cream, dark with the pore-dirt that has been rolled free.

POMPEIAN MASSAGE CREAM

The Pompeian Company, Dept. 300-I, 595 Fifth Ave., New York. Gentlemen: Please send me a generous trial tube of Pompeian Massage Cream . . . enough for three facial massages.

This is the Camera

that makes movies

easier to take than snapshots

Filmo
Automatic
MOTION PICTURE CAMERA

THIS is *Filmo*, the *original* automatic motion picture camera for the amateur. With it you can weave Autumn outings, football games and all other events into a scenario more fascinating than any you have ever seen on a movie screen. Because it will be *your very own* — every scene reproduced in action, just as in life.

Filmo is so simple, so easy to use, that anyone without previous photographic experience can make professional-quality movies right from the start. Simply look through the spyglass viewfinder, press the button, and the accurately governed spring-driven motor does the rest. What you see, you get, in two simple operations.

Eastman Safety Film [16mm]—in the yellow box—used in *Filmo* Camera, is obtained at practically all stores handling cameras and supplies. First cost covers developing and return postage to your door.

Then you are ready for the thrill of seeing your own movies on a wall or screen at home —easy to show with the *Filmo* automatic Projector. Write for descriptive booklet "What You See, You Get" and nearest dealer's name. Address

BELL & HOWELL CO.
1814 Larchmont Ave., Chicago, Ill.

And, as far as corn meal is concerned, there just isn't any corn meal. The trouble is that it is all ground in steam mills. Meal, to be right, should be water ground. When it is ground slowly in one of the old-fashioned water mills, Granddad says, it doesn't get too hot; it is not partially cooked, and therefore the most delicate part of it is not destroyed. But there isn't any meal any more, and there aren't any cooks any more. People try to cook on these confounded gas stoves and electrical contraptions. You've got to have your food somewhere near a real, honest coal or wood fire either in a stove or a fireplace, before you can get real cooking.

Even folks aren't what they used to be. There was individuality, there was character in people when Granddad was a younger man. Everybody wasn't just all alike, wearing the same clothes and the same collars; looking the same, and thinking the same thoughts. Every city, and town, and village, and country crossroads you visited had a few people unlike everybody else; but now, Granddad says, everything in the country is just a suburb. A suburb of Chicago, or Boston, or St. Louis, or New York. Just as much alike as the motor cars they use; and if there were horses any more, horses would be all alike too, probably. Even circus horses are not what they used to be.

"WHAT'S become of the old-fashioned circus, anyhow?" asks Granddad. "I mean the old wagon show that used to go across-country. It came to town early in the morning; and all of us kids went 'way out into the country to meet it and came in with it. And they had a real street parade in those days, with the brass band blaring, and the real animals in the real cages. At one of these new-fangled three-ringed circuses I kind of got the suspicion that there *isn't hardly anything real!* Anyhow, there's so much going on all the time you don't get a chance really to look at anything.

"And the clowns ain't funny any more like they used to be. I don't suppose you ever heard of Dan Rice, did you? Well, he was the funniest clown the world has ever seen. And for all the quantity they pile into their circuses nowadays they haven't got the *quality* they used to have. What the old-time circus had was splendor and magnificence and imagination! The last circus I went to— Why, there seemed to be people actually acting as if they were ashamed they were there! There aren't any modern showmen as great as P. T. Barnum!"

Amusements generally are not what they used to be, says Grandfather.

"It wasn't so long ago I went to see an Uncle Tom's Cabin show. You wouldn't think that a show like Uncle Tom's Cabin could have been changed and spoiled, would you? Well, it was! They had just simply plum *ruined* that grand old drama by not taking it seriously! Why, the actors themselves seemed to be sort of *kidding* the serious parts of it! And that was a show that helped Abraham Lincoln win the Civil War and free the slaves!"

One trouble with arguing with Grandfather as to the relative merits of the dear old vanished days and the present is this: Grandfather insists on taking *all* of the past for himself. Not merely the past of the past sixty or eighty years, but all of the past from the creation of the world down to thirty years ago belongs to Grandfather. *You* can have the last twenty-five years, and make the best of it! But Grandfather insists that everything, from the pyramids of Egypt down to a point somewhere this side of the Civil War, never definitely located, belongs to him.

"Take the art of hand painting—I mean oil painting and water-color painting," says Granddad. "Have you got anybody in this era of the world that can compare with Rembrandt and Gainsborough and Michelangelo and that fellow that painted Napoleon Bonaparte putting the crown on his own brow? For that matter, were there any generals in the late war that could compare with either Napoleon Bonaparte or Julius Cæsar? I guess you'll have to think a long time before you get any generals in the same class with George Washington or Julius Cæsar, or U. S. Grant, or Robert E. Lee, or Napoleon Bonaparte.

"And take science, for instance. Have you got any scientists that can come up to Charles Darwin, who was just publishing his books when I was quite a young lad? Have you got any scientists that can compare with Euclid or Copernicus, or Archimedes, or Aristotle, huh? I reckon if some of you young folks weren't so ignorant and uneducated, you wouldn't try to brag up all your modern methods as compared to the good old days that I knew and lived in."

"But, Grandfather," you may expostulate, "certainly you did not live in the days of Aristotle and Copernicus and Michelangelo!"

Grandfather does not deign to notice such interruptions as this. He sweeps on in his tirade against modernity and his eulogy of the good, old, vanished times.

"HAVE you got any actors to-day like David Garrick or Edwin Booth?" asks Grandfather. "No, you haven't. Or, if you have, I haven't seen 'em! You got nothing much but moving picture actors these days—not but what the movies are all right, or they may be all right when they get to the place where they don't fry your eye like an egg after you look at 'em fifteen minutes; but where are your great actors nowadays?"

There aren't any spelling bees, which combined amusement with education. There aren't any husking bees or quilting parties. There aren't any good old-fashioned revival meetings. The last revivalist that Granddad heard didn't seem to him to be at all *sincere*. The old-time revivalist used to take you up by the slack of the pants, says Granddad, and shake you right over hell-fire! People don't seem to believe in the good old-fashioned hell the way they used to; and that's one thing that's the matter with the country. There aren't any dances any more like the Virginia Reel, and you have to pay fifty cents these days for a cigar that isn't anywhere near so good to smoke as the old-fashioned stogies that used to come three for a nickel.

I have always felt that in sport and things athletic Grandfather took a very unfair advantage. He claims everybody from Samson and Goliath down to the

We've been pals for years

IT MUST be eighteen years or so since I smoked my first pipe-load of P. A. (When you're really *enjoying* yourself, you lose all idea of time.) But I'm sure of this—I smoked some of the first Prince Albert that hit our town. And I've never had occasion to change!

I'm not long on giving advice, but I *would* like to get over to some of you younger fellows what a really delightful smoke P. A. is. To my notion, a pipe without P. A. is like a pocketbook without money. To me, the word "pipe" *suggests* "P. A." and vice versa.

Why, the minute you open the tidy red tin and breathe that rich, natural fragrance, your mouth waters for a taste of such tobacco. Then you tamp in a load and light up. There's the big thrill, Fellows! There's the thing that has held me to this one brand all these years.

Cool as "Pull over to the curb!". Sweet as "I'll let you go *this* time." Mild as spring sunshine, with never a bit of bite or parch, yet with that full tobacco body that rounds out a wonderful smoke. Try some of this long-burning P. A. You'll make no mistake.

P. A. is sold everywhere in tidy red tins, pound and half-pound tin humidors, and pound crystal-glass humidors with sponge-moistener top. And always with every bit of bite and parch removed by the Prince Albert process.

PRINCE ALBERT

—the national joy smoke!

How dainty food makes frail gums

DENTISTS, almost unanimously, blame the foods we eat for our gum troubles—these soft and delicious foods, stripped, as they are, of the natural fibre and roughage which should stimulate and "rub" the gums.

For the gums need activity and exercise, to speed an energizing flow of blood within their walls. And unless this fresh blood nourishes and sustains them, gums grow flabby, tender and unhealthy. Then "pink tooth brush" comes—a warning and a sign that more troubles, more dangers, perhaps, are ahead.

How Ipana and massage tone weakened gums

The majority of dentists recommend massage—a simple means of supplying stimulation through a few minutes' brushing of the gums every time you brush your teeth.

And because of its ziratol content, thousands of dentists recommend that the gums as well as the teeth be brushed with Ipana Tooth Paste. For ziratol is a healing hemostatic and antiseptic well-known to the profession for many years.

Make a full-tube trial of Ipana

The coupon will bring you the ten-day tube—enough to prove Ipana's delicious taste and its power to clean and whiten your teeth. But it's better to start at once with a full-size tube from the drug store—for that is a fairer test of Ipana's good effects on your gums!

IPANA TOOTH PASTE

BRISTOL-MYERS CO., Dept. J-97

time of Heenan and Sayers. He even claims John L. Sullivan. The other day I called his attention to all the world's records that have been beaten recently.

"Did any of your old friends ever swim the English Channel?" I asked Grandfather.

He had to admit that none of them had; or if they had it had never become a matter of official record. Then he considered for some moments.

"I don't believe they're doin' it fair and square," said Grandfather. "It isn't on the level. There's a catch in it."

I DID score off Grandfather just once in my life. And that was last winter. He likes to take a heated brick or a hot-water bottle to bed with him in the winter sometimes.

"Can't find any of the old-fashioned warming-pans anywhere, nowadays," he complained.

"I'll get you an electric heater," I said. "They are great things; more comfortable than any of those antiquated make hifts."

"Wouldn't have one of 'em near me," said Grandfather, promptly. "In the first place, they're dangerous. In the second place, *the heat ain't the same!* I know it isn't! Wouldn't have one of them about the house!"

I scouted around then, and finally found in an antique shop one of the real, old-time, brass warming pans. It pleased me to think how it would delight the old gentleman. I took it to his room one night after he'd gone to bed, with the glowing coals in it, safely covered, and everything shipshape. But as I went into his room, I got an inspiration.

"Grandfather," I said, "here's a new electric contraption built so that it looks exactly like the old-fashioned warming pan. I want you to see if it isn't really just as good."

And I thrust it under the covers. He grunted, but he submitted. I waited for his verdict.

"No, sir; no, sir," he said, after a few minutes. "The heat ain't the same. May look like the real thing, but it isn't. A fake's a fake—isn't like the old-fashioned warming pan at all. Take it away."

I withdrew it from beneath the covers, and opened it, and showed him what it really was: the old-fashioned warming pan he had been craving.

He sat up in bed, and laughed at himself. He can always do that. "Funny about some of us old boys," he chuckled, "the way we carry on! You know, it isn't . . . it isn't . . . that we're *unappreciative*, really. It's just a way of reaching back . . . reaching back, and taking hold of youth again. We talk about . . . about *things* that used to be, instead of about . . . of about *people*. People we used to know . . . and . . . and love . . . people that aren't here any more.

And then he hummed his little song. It must be a song connected with something, or somebody, that he doesn't talk about. I never asked him what or who; and it goes like this, the first verse:

Come all ye Merry Sportsmen
  Who love to hunt the Fox,
Who love to hunt Bold Reynard
  Among the hills and rocks!
Come with a ran-tan-tan, and a tivvy-tivvy-tan!
And a ki-yi-yi, and a bow-wow-wow and a
  bugle horn!

The Vagabond Comes Home

(*Continued from page 61*)

the same, one or two of us are beginning to realize that he isn't sixteen any longer. Before he knows it, he'll be passing thirty, and all this adventure business won't look so handsome when a man of forty and fifty comes crawling back to town once or twice a year."

The good merchant himself looked rather wistfully over the dimly lit rear of the store. "I was just wondering," he began cautiously, "if Tenny makes good with your work this summer, whether you couldn't speak to some of your friends down in New York and—perhaps next fall—you could find him some sort of a job that he'd really stick to."

"Never!" exclaimed Emily Flayne sharply. "New York is the very last place on earth for a man of that kind. There are too many others just like him to sit around and applaud him. I've seen them by hundreds."

Lem Butler nodded sadly. "Yes," he agreed, "I suppose that's about so."

Emily Flayne gave a brisk nod of her head and turned toward the door.

"At any rate," she concluded, "if we can only make him stick to *this* job until September fifteenth, that will be *something* accomplished."

"Yes," agreed Lem, "that will be something."

If, however, either Lem Butler or Emily Flayne had become doubtful about their joint experiment, a deep surprise was in store for them both. A still deeper surprise was in store for the village of Shiloh, which had greeted Tenny Tragg's usual returns to town in about the same spirit in which it welcomed the circus.

Every morning at quarter past seven, clad in his blue denim shirt and brown khaki trousers, Tenny would leave the front gate of his father's white house and start on his walk to the old Porter place. In the earlier weeks he even carried a dinner pail, and ate his lunch solemnly under a tree, just like the road menders. Every Saturday night Emily would hand him an envelope containing twenty-four dollars. He would thank her solemnly, and return again, quietly, for work, on Monday morning.

ALL through late June and July and well into August this continued without a ripple and, in the meantime, the old Porter place itself had begun to blossom like a rose.

Two coats of white paint were applied to the cottage and a neat little pergola appeared at one side. The sagging picket fence was straightened, and also painted white, resuming, as if with surprise, its one-time aristocratic air. An irregular slant at the side of the house was graded into a terrace and, down in the sunken garden thus formed, a series of little

Roosevelt Dam
and Reservoir System

Great American Reservoirs

THE Roosevelt Dam stores up a huge reservoir of water which can be drawn upon as needed. The thirty-five Western Electric distributing houses store up reserves of telephone apparatus and supplies to be drawn on as needed by the telephone companies in constructing lines and maintaining service.

Western Electric with this outstanding national distribution system, does this work at substantial economies for the telephone companies and the telephone-using public.

In time of emergency this service, because of its flexibility, aids your telephone company in quickly repairing the ravages of storm, fire or flood.

Distribution thus plays an important part along with manufacturing and purchasing—the three Western Electric responsibilities—in supplying the needs of the Bell System.

After the storm Western Electric stocks enable telephone service to be restored promptly.

Western Electric quickly supplies everything needed inside the telephone exchange too.

A nationwide service of supply. Western Electric maintains stocks at 35 important points.

Does Your Mirror Say: "YELLOW MASK!"

WOULD you like your teeth to be white and dazzling as polished ivory? Free of that yellowish hue?

Here is dental science's new way. Thousands daily employ it. Leading dentists recommend it. It's absolutely safe . . . cannot harm the softest enamel. It's pleasant . . . actually delightful.

Get a tube of ORPHOS TOOTH PASTE. Your druggist has it. Roll an inch of the satiny-smooth white paste on a dry tooth-brush—remember, *dry*. Brush vigorously. Then rinse your mouth—and behold the effect.

Naturally, you're eager to know how ORPHOS accomplishes such a beauty miracle while previous brushings have repeatedly failed. We'll tell you. Foremost dentists use for cleaning teeth a peculiar substance known as "Tri-Calcium Phosphate." Not a pumice, which is harsh and gritty—but a material as fine and satiny as face powder.

The makers of ORPHOS TOOTH PASTE have succeeded in composing a dentifrice of this marvelous substance. And with this as its basic cleaning agent, you can visualize the teeth beauty awaiting you.

Don't retain that unbecoming "Yellow Mask" longer. Get the lovely whiteness that Nature bestowed on all tooth enamel, yours included. Buy a tube of ORPHOS today—or send for the ORPHOS 20-Time Tube.

white arbors carried out the note of the pergola by the dining-room door. A man and a team were required, of course, for this heavier work. Indeed, extra men were required for some weeks; but the very same crabbed characters who had refused to take orders from Emily worked with joyous enthusiasm under the leadership of Tenny Tragg.

This outside work had to be rushed ahead before the planting season was entirely over; but inside the house the same magic was soon in progress. Partitions were ripped out and new beams erected, until the whole lower floor, apart from the kitchen ell, consisted entirely of three rooms, two very small and one enormous.

With the cottage reduced to its shell, the extra men were dispensed with. Side by side Emily Flayne and Tenny Tragg got down on their knees, so to speak, and continued alone. The fine old ash floors were scraped and beeswaxed, the plaster torn away from the chimneys above the fireplaces, leaving only broad, comfortable slants of fat, drowsing red brick. In the bedrooms up-stairs, the walls were hastily papered with bright flowered patterns; but these were diversions. The big, low-ceilinged living-room was the one main, perpetual job of the house, the one to which, always, they eagerly returned. The night they finished the floor they scrubbed by lamplight until nearly three in the morning.

IN THIS enforced intimacy, of course the slightly burlesque formality with which Tenny Tragg had begun his work very soon disappeared. The "Yes, madam," and "No, madam," which, in spite of himself, he had always spoken with a faint twinkle in his downcast eyes, had not lasted through the first week. Very shortly after, Emily herself had begun openly to call him "Tenny." With his nature and appearance it was impossible to call him anything else; but for his own part Tenny had never gone beyond a most decorous and respectful "Miss Flayne."

It won Emily's respect, at first, this perfect restraint on Tenny's part. Later it amused her; but very shortly, in a queer, hidden way, it began to hurt her pride. Soon enough, indeed, came the time when the reason could no longer be hidden, not even from herself. Emily Flayne was a very wise and strong-willed young woman, who had always ruled perfectly her own emotions, but she was also wise enough and candid enough to recognize those emotions when they did appear.

Without caring to enter at all into the question of how far she would be willing to give it rein, she knew perfectly well, by this time, the danger into which, by daily intimate association with this handsome, happy-go-lucky young giant, she had allowed herself to be drawn. She had first been obliged to face the facts on a certain morning in July, when Tenny had not appeared for work until eleven o'clock. There had been a perfectly good reason, as it later developed; but for three pensive hours Emily Flayne had been forced to admit to herself that half the color would go out of her Shiloh adventure if Tenny did not appear at all.

Yet still it remained only a pleasurable, dangerous excitement, something to be guarded against, to be furtively approached with a cautious tingle, until one late afternoon in mid-August. Then suddenly came a change. By this time, the heavy work in the house had been completed, and together, as if in joint ownership, they were enjoying the interest of putting the furnishings into place. It was a shadowy, dull afternoon, with a lingering lemon-gold sun, and out on the lawn a single cricket was chirping with the vague melancholy of approaching autumn.

Tenny was lifting a heavy, old-fashioned mirror to a place of honor over the dining-room mantel while Emily was standing three inches behind him, ready to catch it if his hand should slip. As his arms went up she could feel, rather than see, the perfect muscles of his shoulders rising under his thin shirt. Instinctively her eyes followed the direction of her thoughts, and there suddenly came to her an almost irresistible desire to press her hand hard on that smooth rounded shoulder. To a girl like Emily Flayne it would have been, normally, almost an abominable thought. In her fine, cold capability, she had always been one of those girls who could not bear to have even another woman touch her.

By the faint brush of her own shoulder her thoughts must have telegraphed themselves to Tenny, for slowly he turned his head with mild astonishment in his eyes.

"Hello! What's the matter?" he asked. "Isn't it straight?"

With his huge, easy strength he still held the great mirror unmoving above his head, but Emily's eyes must have told him the truth. He stared into them for a moment with a queer, questioning look in his own, and when he spoke his voice was queerly thick.

"An inch or two higher?" he asked. "You think that would be better?"

"Oh, no," replied Emily stiffly. "But I'd better stand off and see how it looks from the room."

With no further sign Tenny turned back to his work and, the next morning, they were just as before. If anything, they had returned a little to their earlier formality. But, if one person in town, except themselves, had any real reason to guess what was going on under the surface, it was the person most naturally to be suspected. Lem Butler became aware of the undercurrent almost as soon as it appeared.

Daily, in her shopping trips, Emily had given the storekeeper hilarious news of their joint protégé. It had become almost a stock question with him to ask her, on her appearance, "Well, how's the hired man?" Invariably Emily had given the most enthusiastic reports, until, one morning, she evaded the question, and Lem Butler looked at her shrewdly. Standing behind his counter for thirty years, watching the human comedy, the village merchant had acquired a marvelous instinct for picking things out of the air—and after that he had inquired no more.

VERY soon, however, came a sharper reminder that still another person was deeply concerned. One Sunday afternoon in late August, when Emily was enjoying the rare luxury of a nap, the little kitchen maid, who had been secured by Tenny's efforts, came to her bedroom and announced that "Mr. Tragg" was down in the "reception-room" and wished to see her.

This was curious, for Tenny never came

The CROIX DE GUERRE *of American Achievement*

You will see this emblem only on jewelry stores of character

THE GRUEN PENTAGON

Why has it been called that? Study this list of a few of the many distinguished Americans to whom the Gruen Pentagon has been presented!

For service in war time: To General John J. Pershing, leader of the American Expeditionary Forces; to Admiral W. S. Benson, Chief of Naval Operations during the World War.

For political leadership: To John W. Davis, while candidate for the Presidency of the United States; to Martin Edwin Trapp, ex-Governor of Oklahoma; to Joseph W. Martin, Jr., Congressman from Massachusetts.

For eminence on the bench: To Samuel J. Harris, Justice, Supreme Court, State of New York; to F. C. Struckmeyer, Judge, Superior Court, State of Arizona.

For successful journalism: To James M. Cox, ex-Governor of Ohio, owner, Dayton News, Miami News; to G. B. Dealey, publisher, Dallas News.

For business achievement: To Claude H. Foster, chairman, board of directors, Gabriel Snubber Manufacturing Company; to Frederick T. Steinway, president, Steinway & Sons; to C. W. Nash, president, Nash Motors Company.

The Croix de Guerre of American Achievement! But why has the Gruen Pentagon so often been singled out as worthy to serve this special purpose?

The explanation lies in the watch itself. Unique by its patented shape, it is readily recognizable wherever it is worn.

But its five gracefully rounded sides give it more than distinctiveness. The Pentagon can not tip over in the pocket. Keeping the upright position at all times permits its finely finished parts to operate with greater uniformity, hence with more constant accuracy.

Its Gruen *Precision* movement, too, represents the Guild's highest standard of timekeeping excellence.

For the retiring official, for the fellow-worker who has won promotion, for the employe who is passing a milestone, for the son who has won academic honors, the Pentagon is now everywhere recognized as the logical tribute.

Any Gruen jeweler can show you a large variety of Gruen Pentagons, ranging in price from $2500 to $75—including the Paladin model at $250.

PRECISION
Trade Mark Reg.

Every Pentagon carries this GRUEN pledge mark, placed only upon watches of finer quality, accuracy and finish. Made only in the Precision workshop

on Sundays. And why should he go through all this ceremony? On the way down-stairs, Emily's perplexity was increased by a glimpse of a rather dusty coupé which stood by the roadside. At the foot of the stairs, she was brought up short by the realization that the caller was not Tenny at all but his father, old Justus Tragg. As she entered the room, the old gentleman was seated grimly erect in an old-fashioned chair, a smooth-shaven, tight-lipped man of nearly eighty, dressed in Sunday black, even to the little string tie which was crossed awkwardly over his stiff white shirt front. He rose to his feet.

"Good afternoon, ma'am," he said stiffly and, as Emily urged him back to his chair, he looked searchingly around the room. "You've made a good many changes here."

"Yes," replied Emily. But the caller gave her no chance to say more, for immediately he put one hand inside his coat and came straight to the point.

"Miss Flayne," he said, "it's not my habit to talk business on Sunday; but there's a sizable matter I think should be settled between us, and I didn't want to come up here when—er—when anyone else was around the place. You have been buying considerable material down at my yards and over at my hardware store. At least Tenny said it was for you, and I took his word for it."

A sudden distaste, unbelief, came over Emily Flayne. What the old gentleman said was true enough. It would have been hard to buy anything except food in Shiloh without buying it from Justus Tragg. But the sharp, carping littleness of the old man in worrying so about his money that he had come out furtively to look over the ground on a Sunday afternoon, when he knew that Tenny would not be present! Justus Tragg continued:

"The whole account's pretty considerable now. You'll be leaving town inside of a month, I suppose; and I thought we might as well get it settled before you go."

Taking his hand from his inside pocket he gave her half a dozen long folded sheets. "Please look those over and see if you ordered all of that."

WITH an eye well practiced in scanning long itemized bills, Emily glanced through the slips. Every smallest figure, even to a pound of nails, was carefully entered in the steel-pen handwriting of an old-fashioned bookkeeper but Emily paused only at the largest items and at the totals at the foot of each page. And as she passed from one sheet to another a cold horror crept through her. Had she actually purchased all this?

When her work had first been started she had tried to keep up a strict accounting; but in the fever of tearing out and building up again she had soon abandoned that. One change had suggested another, and in the passion of seeing it all grow, she had simply given gay orders to "go ahead." But now came the reckoning. There it all was, in black and white:

270 ft. white pine	Brushes, paint
One Eagle range	Brushes, kalsomine
One steel tape	5 bags cement
8 lbs. nails	3 bags cement
White lead	8 bags cement

And so on and so on. That beastly cement seemed to be the most maddening item. Almost every other line carried it—cement, cement, cement.

And how it grew! At the end of the third long page, the total was over four hundred dollars and, merely to know the worst at once, Emily flipped up the lower edge of the final sheet. Eleven hundred and sixty-eight dollars and thirty-two cents! Hoping against hope that her face did not express her real feelings, she drew herself up carelessly.

"I think, Mr. Tragg, that this is all right. As soon as I have compared it in detail I will send you my check."

"No, ma'am, I don't think you will," came the dry voice from opposite her.

Emily looked up with cold, narrowing eyes. "What do you mean, Mr. Tragg?"

The thin lips of Justus Tragg smiled faintly. "I don't think you looked very carefully at the last page!"

Still completely at sea, Emily turned to the last sheet and saw a rubber stamp mark in red ink: "Rec'd payment, Shiloh Lumber Co." Across its face was written in a cramped, wavering hand: "In full, J. Tragg."

With parted lips Emily looked back at her visitor. "Mr. Tragg, I don't understand. Who paid this bill?"

Again the thin lips smiled faintly. "Nobody paid that bill. That's a present—from Tenny's mother."

THE girl had risen to her feet when she had taken the slips and now, in dismay, she backed uncertainly against the little white mantel of the room.

"But, Mr. Tragg," she pleaded, "that's very—that's very sweet of you both but—I can't accept it."

The old gentleman rose also. "I don't see how you can help it," he replied dryly. "No check of yours will ever be cashed, and if you want to give back the goods you'll have to tear your whole house down."

Emily smiled woefully, and Justus Tragg moved to her side.

"Young lady," he said, "an old Yankee like me ain't much for sentiment; but do you know that you have done more for my boy in three months than I was ever able to do in twenty years? I don't know what your prescription is, but I can guess. And it's certainly worked!"

"But it's Tenny himself who's a wonder," remonstrated Emily.

The old man shook his head. "No; Tenny's no wonder, even yet. He'll probably give us all plenty more gray hairs before he gets through; but he's just about ten thousand per cent more of a man than he was last spring when you came. We used to call him our 'Benjamin,' his mother and I, because he was born so long after all the others. He had grown brothers and sisters when he was only a baby, and I've liked to think that that was what made him so different from the rest.

"I never lost a night's sleep about any of *them*, but Tenny—I don't know whether he worried me most when he was home or when he was off on his crazy-mad trips.

"This summer he's slept in the house every night in the week, and last night he came to me and said, 'Father,' he said, 'after Miss Flayne goes back to the city, I think I'd like to stay home for a while and have a good shot at the lumber business.' He said he'd begun to think there

***Says Frank Muehlbach . . .* one of Kansas City's most successful merchants:**

"National advertising serves us twice—in keeping old customers and getting new ones. And the Woman's Home Companion Window Display is one of the final links in forging sales.

"This display builds confidence in a store by linking it with Companion-advertised goods. What if people never heard of the store? When they see this window display, they are sure that the merchandise inside is of known high quality.

"I am not the only one who is pleased with the display. We have had many comments on it. Anything that people take the trouble to comment on must be getting across to them."

Now KANSAS CITY MERCHANTS *Approve this Plan—*

Their endorsement of the local value of national advertising is added to that of thousands of other retailers throughout America

The photograph above shows a recent window display in Muehlbach & Son's store in Kansas City. It is typical of the displays of nationally advertised products which the Woman's Home Companion has installed in the representative retail stores of Kansas City—and in practically every city of 50,000 and over throughout the country.

Mr. Muehlbach and other leading Kansas City merchants were quick to grasp the fact that manufacturers invested over eight and a half million dollars last year in Companion advertising. And that this was an increase of nearly a million dollars over the year before. Furthermore, they know that during the past year more than 400,000 new readers have come to the Companion—which means a total circulation today of over 2,200,000.

These Kansas City merchants felt that all this gave them a remarkable local sales opportunity to reach an increasing number of the best buyers in their city—to identify their stores directly with the advertising of America's most progressive manufacturers—and to cash in on the investment these manufacturers are making in the Companion.

So they adopted the Woman's Home Companion plan, the far-reaching effects of which can best be told from the comments of Mr. Muehlbach and other merchants shown in the column directly opposite.

Other Kansas City merchants tell why they find it pays to feature and display Companion advertised products

(Grocery Stores)

Mr. A. P. Grant, Grant's Market, 3438 Broadway: "The Woman's Home Companion display you have installed is by far the best co-operative idea that I have seen for the benefit of independent retail grocers. A display of this kind cannot help but increase the prestige and good will of the products advertised and in turn bring us more business."

Mr. Maloney, Porter & Maloney, 3847 Prospect: "This is an excellent 'tie up' featuring nationally advertised products. We have received many compliments on the display and will appreciate another window of this kind whenever possible."

(Drug Stores)

Mr. C. E. Reppert, Mgr., Baird & Klee, 59th & Main: "We find that carrying nationally advertised products reduces the number of lost sales. Our customers invariably order merchandise by name. That I consider proof of the value of carrying nationally advertised merchandise."

Mr. O. A. Robinson, Mgr., McNeals Drug Co.: "The Woman's Home Companion display is a great help to us all. It features the goods sold every day and it constitutes the bulk of our business. It is indeed representative of the stock carried in our store. We will be glad to co-operate with the Woman's Home Companion at any time in the future for a display of this kind."

Wanted Home Women *to Decorate* Giftwares

No Special Ability Needed

This is the wonderfully interesting occupation that it is now possible for you to enter through the instruction of Fireside Industries. The work pays exceptionally well. There is no canvassing, no monotonous drudgery. Many say they never dreamed that such a wonderful way of earning money at home existed. New system of instruction devised by M. Gabriel Andre Petit makes the work so easy that almost anyone can do it.

Fascinating Home Work

Can you imagine anything so fascinating as decorating Giftwares at home? Could any other kind of work be so pleasant as applying beautiful designs in colors to such artistic objects as candlesticks, wooden toys, parchment lamp shades, wall plaques, picture frames, sewing tables, gate-leg tables? Then there are greeting cards to be colored, and cushion tops and other textile articles to be decorated in Batik, and fascinating objects of copper and brass to be etched in beautiful designs.

Many women do this work solely for pleasure, but it also is a splendid way to make money at home for there is a tremendous demand for these giftwares.

Satisfaction Assured

Fireside Industries assures entire satisfaction to each of its members. If, after completing your instruction, you are not entirely pleased and satisfied, your money will be refunded in full. You have only to follow the directions and it is amazing to see what beautiful things one can make. Think of earning $2.00 in just one hour, for example, by decorating a French powder box! Do you wonder that members of Fireside Industries are so enthusiastic about the work?

M. Gabriel Andre Petit
Art Director

BEAUTIFUL BOOK SENT FREE

The beautiful Book of Fireside Industries, illustrated in color, which explains all about this new way to earn money at home, will be sent to you on request. Read how women earn money and beautify their homes and their lives. Just like a beautiful dream come true. Wonderful outfit furnished without extra charge. Simply mail coupon, or write, enclosing 2c stamp to help pay postage.

FIRESIDE INDUSTRIES

might be some fun, after all, in timber and nails. I told his mother, this morning, that it was worth eleven hundred and sixty-eight dollars and thirty-two cents just to hear him say that!"

EVEN in that rueful moment Emily Flayne could not help smiling at the fact that the old Yankee had remembered the exact amount. Her visitor had turned away from her, but now he turned back:

"I don't know, Miss Flayne, whether you and Tenny have been fixing up any ideas between you. I mean for the future."

It would have been impossible, in that crisis, for Emily to look indignant, but she did draw herself up in a manner that she hoped would seem surprised.

"Most certainly not!" she answered. "There has never been even a syllable of that kind!"

"Well," he explained, "all I meant to say was that, if you ever did have ideas of that kind, you might like to know that none of my children will be exactly on the town. There's more money to be made in a place like Shiloh than you city folks might suppose. And I've had my share. I've had my share. Before this summer, I had things fixed in my will so that Tenny would just about be kept out of the poor-house, and no more. But the way things are going now I don't see why he shouldn't be treated like all the rest."

The old gentleman held out his hand.

"Well, good-by, Miss Flayne. I've said my say and that's all I come for." As Emily took his hand, he added with twinkling eyes, "And if that bill ain't all right, you bring it back and we'll pay you the difference. Or perhaps you might want a couple more bags of cement!"

Emily walked beside him to his car; but as they tried to open the gate the newly painted latch stuck in its slide and they were obliged to lift the whole gate slightly on its hinges. The old gentleman looked at the offending hardware with professional contempt.

"That ought to be fixed at once," he commented. "If I see your hired man anywhere around town I'll send him right up here to do it."

"Don't you dare—on your life," ordered Emily. She added, laughing, "Do you think it will give him a proper idea of a permanent job if he has to work Sundays?"

Nevertheless, it seemed to be a trait of Justus Tragg's to do exactly what he planned to do. That evening, just after dark, Emily was sitting dreamily under a shaded lamp in her great, rambling living-room. Her mother had retired up-stairs with a fretful headache, and the little maid had gone to the village to prayer meeting. Suddenly Emily heard a creak of the front gate, a click of the offending latch, and then a cheery whistle out in the darkness. A moment later Tenny was in the open doorway.

Sitting back in her low chair under the shaded lamp, Emily was much less surprised than he had expected, and he paused in the doorway, rather at a loss.

"Come in, Tenny."

Still awkwardly, Tenny advanced into the dim room; then, as if with a single gesture, he threw off his usual manner—threw off the attitude and the tone of voice that he had carried all summer.

"Miss Flayne," he demanded abruptly, "what did my father say to you this afternoon?"

From her low chair Emily Flayne looked up at him fixedly. "Tenny Tragg, do you know that your father is one of the saints of this earth?"

Awkwardly, Tenny stared down at the floor. "Yes," he replied gruffly, "I am beginning to realize that myself. But what," he added, "did he say to you?"

For answer Emily took the long folded slips of her bill from under a book on the table and handed them to him, with the story of what had occurred. Tenny listened in silence, and then at the end burst forth almost with her own words. "The old peach!" he exclaimed. "The old peach!"

A moment later he asked, "But what did he mean when he said that you wanted to see me now?"

"I didn't *say*," replied Emily, "that I wanted to see you." But as Tenny rather stepped back, disappointed, she added with twinkling eyes, "At the same time, I didn't say that I *didn't!*"

For three or four seconds their eyes met, and the look within them was exactly the same that they had held on that afternoon when Tenny had hung the mirror over the dining-room mantel. Slowly, as if his movements were not his own, Tenny moved forward. Every minute expecting to be stopped, he knelt at Emily's side. Cautiously his arms went to the arms of her chair, then to her shoulders, but she did not move. She did not respond at first. That was the last sign of the old Emily Flayne. She still sat stiffly, as if trying to hold herself in restraint, but she trembled faintly, and Tenny could hear her breath coming fast. Then suddenly, as his arms met around her, she gave way with a little sob and leaned back.

A SLIGHT stirring up-stairs in her mother's room reminded them both that someone else might be listening and, with a quick, instinctive motion to arrange her hair, Emily rose.

"Suppose," she said, "that we go out in the garden."

But there, on a bench by the old well sweep, there was nothing for anyone to hear—except, perhaps at long intervals, as when Tenny asked, "But what about your business down in the city?"

"Oh, bother the business!" replied Emily's voice.

And a full hour later, when Tenny reluctantly consented to go, Emily might have been heard warning him, "Now, mind you, no one must hear about this for the present—absolutely nobody!"

Tenny solemnly agreed. But imagine keeping a thing like that a secret in a town like Shiloh! It was not three days before Lem Butler saw Emily in his store in the village, and greeted her with laughing eyes.

"Miss Flayne," he said, "I ought to warn you about that hired man of yours. He's slipping badly—getting very impertinent. He's always been so particular to call you 'Miss Flayne,' but yesterday he forgot himself twice."

"Oh, did he?" replied Emily, with complete nonchalance. "Well, it doesn't matter. Because *nobody* will be able to call me 'Miss Flayne' any more—after the fifteenth of September!"

Eight Downs—But Nine Ups!

(*Continued from page 51*)

ning a good deal more on a piece-work sis.

"So I said to the man, 'I wish you'd ure out how much work your best tter averages a week. You tell me how uch he does; and I'll agree to do *twice* as uch work, if you will give me twice his y.'

"You see, he already had told me that could use half a dozen more cutters, t that he had room for only one. So figured that he would be glad to get uble work out of one man and to pay fair price for it. This proved to be rrect; and by doing double work I rned double wages.

"The next year, 1873, one of my relaves, who was then living in Minneapolis, ame to New York on a business trip. By ere chance I met him; and I was completely carried away by his enthusiasm ver his home city.

"For several years I had been earning ood money and I had been saving all I uld. At that time I had about two ousand dollars laid by. A friend of ine, named Dexter, had a nest egg that atched mine. I repeated to him my elative's glowing accounts of Minnepolis, with the result that we went West ogether.

WE ARRIVED in Minneapolis in November, 1873, and promptly acuired an ice business, which happened to e for sale. It was just what it claimed to e—an ice business, not a gold mine! Dexer wasn't satisfied with it, so he sold his inerest to me and I ran the business alone.

"I did fairly well at it; at least well nough to risk getting married about two ears later. On January 15th, 1926, my wife and I celebrated our golden wedding; nd if any other couple has had more ups nd downs than we had in those fifty ears of married life, they certainly must ave been busy!

"Our downs commenced only a few weeks after our wedding, when I fell ill with appendicitis. They didn't call it appendicitis in those days and the doctors didn't know much about it. The result was that I went from bad to worse, until the verdict was that I couldn't live more than a few days longer.

"With this prospect before me, I decided it would be better for me to leave my wife some real money rather than an ice business. So, from my sick bed—which was supposed to be my death bed—I arranged the sale, and the deal went through.

"But instead of dying with neatness and dispatch as I was scheduled to do, I kept on living! By spring I was able to travel to Limerick, where my wife and my mother nursed me back to health.

"All this took time. It also took most of my money! When we finally were ready to return to the West, I managed to buy a cut-rate ticket to Minneapolis for my wife, and one to Chicago for myself. But I had to stop in Chicago to earn my fare for the rest of the trip. My wife wouldn't leave me there alone, so we both stayed.

"I rented one little room for us. It was described as 'furnished,' but it contained only a bed, a table, and a chair. I made some shelves out of a packing box, bought a few cheap dishes and an oil 'plate' for cooking, and we lived in that one room.

"I had found work at my old job of cutting clothing. Of course I couldn't pick and choose. I had to grab the first chance that was offered me; and the pay was so small that it took weeks for me to save the money for my ticket to Minneapolis. But I finally got it, and we arrived here—with only thirty-five cents between us.

"Again I rented a bare little room and started to look for work. I couldn't wait even twenty-four hours to get it, for I had to make a payment on the rent. So I hired out to shovel gravel for a contractor at a dollar a day.

"Two or three years before this, when I had my own ice business, I had got a team of mules from this same contracting firm, so I knew the men at the head of it. One of them, Mr. Moses, came to inspect the job where I was shoveling gravel, and recognized me.

"'Great Scott!' he exclaimed. 'I thought you were dead!'

"'Not yet!' I said. 'And if you pay me the dollar a day I bargained for, I expect to go on living for quite a while.'

"After I had explained the situation, he went off and got a book in which the timekeeper puts down the record of a gang of workmen.

"'Here!' he said; 'you're the timekeeper for this gang! Keep the job until you get something better—and I hope you get it soon.'

"His hope was realized," Nevens continued, "for it wasn't long before I got a good position in the manufacturing department of a wholesale clothing house.

"As soon as I had a little money ahead, I gave up this position, because I wanted to be in business for myself. I started by taking materials, on consignment, from the wholesale clothing dealers. I cut these materials in my own home and gave them out to women to make them up.

"AFTER a while I was able to open my own shop. It was a very small one at first; but the business grew and the shop was gradually enlarged, until I had a big factory with six hundred employees.

"That was a long period of steadily going up. I was prosperous. We had a fine home for those days—and a very happy one. I had the best wife in the whole world; and we had a son and three little girls. My mother was living with us; and that was another of my dreams come true.

"Then came the early nineties, when the fever of real estate speculation raged in Minneapolis. The city was growing. Property was increasing in value. It was a typical boom period, with prices going up and up.

"I caught the fever and invested heavily. If I had been content to buy only what I could pay for, the lesson I

The safe way *to end* dandruff

GET a bottle of Wildroot from your druggist and use it *regularly*. Dandruff will disappear . . we guarantee it . . for Wildroot has been the acknowledged special treatment for dandruff for 28 years. Your money back if it fails.

There may be other ways to get rid of dandruff temporarily, but Wildroot is sure—and safe. It does its work without irritating the tenderest scalp, nor does it leave your hair harsh, dry and brittle.

Your druggist and barber sell and recommend Wildroot.

You can easily have thick, strong hair

3 minutes a day will stop thinning hair!

THERE'S just this difference between the man who is going to become bald and the man who will keep thick, strong-growing hair—

three minutes a day of the right hair treatment!

Any man, even a young man, may have one or both of the two scalp troubles which lead to baldness.

These two troubles—dandruff and poor scalp circulation—usually begin before the age of 30, dermatologists say, and they especially attack men of indoor occupations. Without help, your hair can't combat these ills.

With this three-minute daily treatment you can give your hair just the help it needs—destroy dandruff, stimulate scalp circulation.

Thousands of men use the Pinaud treatment as regularly as they brush their teeth in the morning. It checks and prevents hair loss.

EVERY MORNING wet your hair and scalp thoroughly with Pinaud's Eau de Quinine. Then with your fingers pressed down firmly, move the scalp vigorously in every direction, working the tonic into every inch of the scalp. Move the scalp, not the fingers! Brush the hair while still moist. It will lie smoothly just the way you want it.

Buy Pinaud's Eau de Quinine at any drug or department store. The signature of Ed. Pinaud is on each bottle. Pinaud Incorporated, 220 East 21st Street, New York—sole distributors for Parfumerie Ed. Pinaud, Paris. In Canada, Parfumerie Ed. Pinaud, 204-206 King St. E., Toronto.

PINAUD'S

Eau de *Quinine*

learned wouldn't have been such a severe one. But I bought large amounts, made some payments down, and gave notes for the rest.

"Then, along about 1896 and 1897, the crash came. The boom collapsed, leaving me swamped with debts. For several years I struggled desperately to save myself. But I couldn't regain my foothold; and finally, in 1899, I had to give up the struggle. Everything was gone, including my factory and the business.

"So there I was; fifty years old—and broke! Counting myself, I had a family of ten to take care of: my wife, three daughters, my mother, my adopted sister, who was living with us; my twenty-year-old son and his wife and baby. He had been with me in business. So when I lost the factory he was as high and dry as I was.

"Leaving my family in Minneapolis, I went to Danville, Illinois, to manage a woolen mill. But I stayed there only six months.

"From what I've told you, you know that I always wanted a home! And I guess you can understand how I loved my home when I finally had one. I couldn't be happy away from it. I wanted to keep it in Minneapolis, so I went back to see if I couldn't get another start there. This time I arrived with thirty-five dollars instead of thirty-five cents.

"The very next morning I happened to meet a man who had a laundry which he wanted to get rid of. He had been compelled to take it in settling up some business, but he couldn't make it pay.

"I didn't know a thing about laundries, but I wanted a business in Minneapolis! So I paid ten dollars for a few days' option, and started out to see whether I could raise the rest of the money.

"I told you how proud I was when the street railway people in Boston showed that they believed in my energy and honesty. Well, when a friend agreed to go on my note for two thousand dollars, without any security except his belief in my energy and integrity, it was another proud day for me. That's the sort of thing that makes life worth living.

"WELL, I bought the laundry. At any rate, I owed the money for it! But it had been a losing proposition, and I knew it would take time to make it a profitable one. So I put my son in charge of it while I went to Nashville, Tennessee, as superintendent of a factory, in order to support the family until the laundry could be made to pay.

"I had tried to get a similar job in St. Joseph, Missouri; but I asked $5,000 a year and they wouldn't give that much. Later, they offered me $6,000—and I refused it. Then they made me an offer which amounted to $10,000 a year—and I refused that!

"'No!' I said to them. 'I have a business of my own. It isn't much of a business now, but I believe I can build it up; and I'm going to stick to it.'

"It took a lot of courage to turn down that offer," said Nevens; "especially as the business on which I was staking everything was entirely new to me. I was fifty years old. And most people seem to think that, at fifty, a man can't strike out on a new trail. But, in my opinion, it isn't the trail that counts. It is the spirit with which you set out on it.

Old Briar

TOBACCO

"THE BEST PIPE SMOKE EVER MADE!"

"It came, and is the best tobacco I ever smoked!" Justice——— *

Such convincing praise for Old Briar Tobacco from such a pipe smoker means far more to you than anything we can say. Old Briar is bringing back to pipe smokers all of the old peace, contentment, satisfaction and solid comfort of pipe smoking. Vast multitudes—men whose opinions may be divided on a thousand subjects—are united on this wonderful smoking tobacco.

Light up *your* pipe—filled with Old Briar Tobacco. Draw in its ripe fragrance, its full, pleasant aroma. Smoke it awhile. Enjoy its natural tobacco taste, its rich body. Notice how cool it is—and how extra smooth.

Years of scientific knowledge in the art of mellowing and blending and generations of tobacco culture have gone into the production of Old Briar Tobacco. Step by step Old Briar has been developed—step by step perfected.

Of all the pleasures man enjoys, pipe smoking costs about the least.

TO DEALERS: *Old Briar is sold in sealed Pocket Packages at 25c and sealed boxes at 50c, $1.00 and $2.00. If your jobber has not supplied you, write us and we will send you a supply by prepaid Parcel Post at regular Dealer's prices. Every box and package of Old Briar has our unlimited guarantee.*

UNITED STATES TOBACCO COMPANY, RICHMOND, VIRGINIA, U. S. A.

1001 CASH PRIZES *in* POSTUM'S $10,000 *prize contest*

MONEY prizes! $1000 prizes! $500 prizes! Money that will buy trips to Europe—motor cars!

Win some of this money! Your experience, in the form of a letter, is all that is wanted.

Write us about your thirty-day test of Postum. Hundreds of thousands have used Postum, in place of caffein beverages, for thirty days—and kept right on using it because of *results!* "No more headaches since changing to Postum." "I sleep like a baby." Typical comments. Now we want to hear from *you*—whether you have used Postum for twenty years, or are only a beginner. Hundreds of prizes for the best letters!

Or write about Instant Postum made with milk, for children. This drink has made wonderful strides. Mothers serve it, schools use it in the noon-day lunch. A hot drink, made from whole wheat and bran, plus the body-building nourishment of milk. Write a letter on this subject! Win $1000!

Lastly, hundreds of prizes for letters on "How I make Postum—and why I like it best made *my* way." Some people swear by Instant Postum, prepared instantly in the cup with boiling water or hot (not boiled) milk. Others prefer Postum Cereal, made by boiling, or in a percolator. Some like Postum strong, others weak, others "medium". As with other hot drinks, a little experimenting is needed to suit the individual taste. $1000 for the best letter on this subject! Other big prizes!

Read the rules, then prepare to enter Postum's $10,000 contest *today!*

◆ ◆ ◆

Subjects and Prizes

1. **"What the 30-day test of Postum has done for me."**
2. **"Why I think Instant Postum made with milk is the best hot drink for boys and girls."**
3. **"How I make Postum—and why I like it best made *my* way."**

(Letters on any subject not to exceed 300 words in length)

For the best letters on each subject: First prize, $1000; second, $500; third, $250; fourth, 3 prizes of $100 each; fifth, 4 prizes of $50 each; sixth, 5 prizes of $25 each; seventh, 10 prizes of $15 each; eighth, 25 prizes of $10 each; ninth, 35 prizes of $5 each; tenth, 35 prizes of $3 each; eleventh, 68 prizes of $2 each; twelfth, 146 prizes of $1 each.

◆ ◆ ◆

RULES

1 You may write on any one or all of the subjects, and submit as many entries as you care to.

2 Write the subject at the top of the first page of each manuscript you submit.

3 Write plainly on one side of the paper only. Neatness counts.

4 Write your name and address on each manuscript.

5 In case of ties, each tying contestant will be awarded the full amount of each prize tied for.

6 Contestants agree to accept the decisions of the judges as final.

7 No communications will be acknowledged, and no manuscripts will be returned.

8 Employes of the Postum Company, Inc., are not eligible.

9 Address envelopes to P. O. Box 574 F, Battle Creek, Michigan.

10 Manuscripts must be received before 5 p.m. December 31, 1927.

(Prizes will be awarded, and the names and addresses of prize winners announced as early as possible in 1928.)

THE JUDGES

U. S. Senator Royal S. Copeland, M. D., former Health Commissioner of New York City; Alice Bradley, Food Editor, Woman's Home Companion; Sarah Field Splint, Home Economics Editor, McCall's Magazine.

© 1927, P. Co., Inc.

Postum is one of the Post Health Products, which include also Grape-Nuts, Post Toasties, Post's Bran Flakes and Post's Bran Chocolate. Your grocer sells Postum in two forms—Instant Postum, made instantly in the cup, and Postum Cereal, the kind you boil. If you are not one of the millions who now purchase Postum, you may obtain a sample of either Instant Postum or Postum Cereal by addressing the manufacturer.

"In my case, the spirit was all right, but the flesh proved to be weak. After six months in Nashville I fell ill again, and had to come home.

"I decided then that I'd *stay* home. Our business was improving and I was needed here. I tackled the job in good earnest; and the next ten years was another period of steady climbing.

"Then, in 1911, following a surgical operation, I had another long illness. For ten months, I was 'out of my head' most of the time. My son was then with another concern, so this business was being run by a manager.

"When I became ill, I was a fairly rich man. I had been making money for ten years. I owned my business and had invested about $200,000 in real estate—this time on a sound basis. During my illness, the business got into bad shape. When I finally recovered, I found that, instead of owning $200,000 worth of real estate, it was all gone and I was $20,000 in debt!"

It was at this point that Mr. Nevens chuckled appreciatively and remarked, "I *have* had a heck of a time, haven't I?"

We agreed on that point; and I wondered how many men, finding themselves in his situation at sixty, would have had the courage to start the fight all over again and the ability to win it.

NEVENS was really sixty-one years old. He was weakened by his long illness. He owed $20,000. But he took the helm once more; and with the help of his son, who came back into the business, he again started on the up grade.

Then, in September, 1915, Fate dealt him the hardest blow of all. He had leased the building which he now occupies and his machinery was being moved into it. On the very day before this transfer was completed, his son, who was in charge at the new plant, was struck by a heavy iron door—and instantly killed.

At every other point in the story, Mr. Nevens, with unfailing humor, had smiled over his misfortunes. But when he told me of his son's death there were deep lines of suffering in his face. That was the one loss which never could be retrieved.

But even then he did not lose his courage. He was sixty-five years old, and he had to go on fighting alone. But he did it with the spirit of a man half his age; and Fate, apparently deciding that he couldn't be downed, gave up the attempt.

"After being in this building a while," he said, "I thought I'd like to own it. I had paid off my $20,000 of debts; but I hadn't been able to accumulate any money. The rest of the profits had gone to enlarge the plant. However, I mortgaged my home; and in that way I was able to make a first payment on the $125,000 which was the price of this property. In addition to that, I have bought $150,000 worth of machinery to go in it. At the present time the building and its contents are worth in excess of half a million dollars. And to-day I don't owe any man.

"Sometimes," he said musingly, "I wonder how I did it."

At seventy-seven, Frank Nevens has won his fight against Old Man Circumstances; and he has won it with clean hands.

In thousands of cultured American homes, Dr. Eliot's Five-Foot Shelf of Books has become the foundation of a substantial library. What these famous fifty volumes can mean to you is told in the free book offered below.

"The most patient of teachers"

SIX YEARS before he compiled his famous Five-Foot Shelf of Books, Dr. Charles W. Eliot of Harvard wrote an essay called "The Happy Life." "Books," he said, "are the most constant of friends, the wisest of counsellors and the most patient of teachers. It is a mistake to suppose that a great deal of leisure is necessary. A few minutes a day, devoted affectionately to good books, will make all the difference."

All the difference! The difference between the plodding clerk and the clear-thinking executive. The difference between the deadly bore and the interesting talker. The difference between success and failure—in business and in social life. Because he believed what he said, Dr. Eliot undertook the colossal labor of editing and arranging the 418 masterpieces which make up his greatest work,

DR. ELIOT'S FIVE-FOOT SHELF OF BOOKS

And today thousands of cultured families, in whose private libraries these fifty volumes have a place of honor, are ready to testify to the value of Dr. Eliot's guidance and the truth of his words.

Do you know Dr. Eliot's Five-Foot Shelf of Books? If not, send now for the interesting book called "Fifteen Minutes a Day." It is absolutely free to any reader of this page who wants it. Your name and address on the coupon will bring it by return mail. Do not delay. The time to act is NOW!

Send for this FREE booklet that gives Dr. Eliot's own plan of reading.

Reading is an essential part of every human life, and good books make the best reading. Since 1875, P. F. Collier & Son Company has not only published good books, but has brought them within reach of all by the Collier plan, which enables you to pay for them while you are enjoying them.

Since 1875 COLLIER Good Books

MAIL THE COUPON TODAY

P. F. Collier & Son Company
250 Park Avenue, New York City

By mail, free, send me the booklet that tells all about the most famous library in the world, describing Dr. Eliot's Five-Foot Shelf of Books (The Harvard Classics), and containing the plan of reading recommended by Dr. Eliot. Also please advise how I may secure the books by small monthly payments.

His Questions Were Hindside-'fore But He Got His Answers Straight

(*Continued from page 19*)

Nobody was surprised over in Camden, excepting possibly the man himself, when a few months ago Edward E. Shumaker was elected to the presidency of the Victor company. He had revived, not a company alone, but an industry; and in that industry he is the outstanding figure to-day.

Shumaker was born on a mountain farm in Somerset County, Pennsylvania, in 1882, but at ten years of age he snapped his jaw tight and decided that he would not be a farmer.

Nine children were in the family, among whom he was the oldest. Shumaker watched his father and his grandfather sweat over those stony hill acres, reap their crops and sell them at a profit; and then put every penny of the profit back again into the land in fertilizer. Unless the profit was spent for fertilizer, nothing would grow. Financially, each year ended a blank.

His parents, his grandparents, and his great-grandparents on both sides—of Pennsylvania-Dutch stock all—had also been born in that hill country. A hundred-odd years they had hauled stones, and stones were still left to be hauled.

He was taught the dialect of his people, Pennsylvania Dutch, which is neither German, Dutch, nor English, but a weird jumble of all three. A Pennsylvania-Dutch teacher taught him English in a Pennsylvania-Dutch country school, and the result was a marvel to hear.

STERN stock of iron character were these mountain folks of his. The whole of Sunday, so it seemed to him, was spent in church. Week days he was bound to work or go to school. Every cherry on a tree was gathered. Every splinter in the woodpile was burned. Every bit of fat on the meat was eaten. Jelly and butter combined on one piece of bread was extravagance. Of such stuff were those hill men made!

Shumaker learned lessons at ten that thirty years later were to become the ritual of his life. He was taught there is only one thing worse than a theft—a lie; that to leave work undone is only a shade less reprehensible than to leave it half done. "Nothing is so good that it can't be made better!" thundered his paternal grandfather, a giant of a man, and, "No man lives who has yet done his best!"

At seventeen, he was teaching school. His wages were twenty-eight dollars a month, out of which he paid ten dollars a month for room and board at a nearby farmhouse. Summer came, when, by every tradition, it was his duty to go home and help his father and grandfather farm. Shumaker hired a farm hand to take his place at less than one dollar a day; and he himself went to work in a stone quarry at two dollars a day.

He tried coal mining for a while; but his lungs could not stand the fumes generated by the black-powder blasts. So he resumed school-teaching and, in summer, the quarry work. Thus far he had not been beyond his native hills; he had never seen a city. And he was now nineteen.

Then a book agent "put up" at the farmhouse where he was a boarder. The agent was selling an analytical reference Bible, and was one of a crew of canvassers that had recently invaded that section. Additional agents were needed, especially men who had some Bible knowledge. Shumaker had read the Bible through thrice, and some parts of it a hundred times. He joined the crew.

He went to Johnstown and learned the set speech every Bible salesman had to know. He sat up in his room nights "training" his sample book until, at a flick of his wrist, it would open at any desired page. He was resolved to be the best Bible salesman of the crew.

THE patience of the man, his thoroughness—you must fix these traits in mind to understand him. Nobody would have described him as brilliant; he wasn't. Yet he possessed that which sometimes leads to results classified as the product of genius: the untiring persistence to do over and over, a thousand times if necessary, the tricks that made him a master of his calling.

He was as tall as the proverbial bean pole, and not much thicker. He wore country-store clothes, a celluloid collar, and carried a hideous carpet valise. He said "already yet," and in his English got the predicate where the subject should have been. But he *did* sell Bibles!

In the Mennonite and Dunkard sections of Pennsylvania, where the folks were intensely religious, Shumaker made more money in a day than he had previously made in a week. Here his Pennsylvania-Dutch speech was an asset. Presently, however, the crew moved into Altoona, a railroad-shop city. The shopmen, as a whole, weren't especially interested in buying Bibles. Moving farther eastward Shumaker found the interest even less. In one town, after a week or more of hard work, he had not sold a single Bible.

His capital had dwindled to a few dollars. His board bill was overdue. In desperation he began to make the rounds of the town, no longer trying to sell Bibles but to get work. Any kind of work, at any wage. He almost begged for it. But nobody wanted this gawky country-bred youth whose speech made the townsfolk laugh.

He remembered then, that while selling Bibles in Harrisburg the superintendent of the Pennsylvania Anti-Saloon League had offered him a position. If he could get to Harrisburg perhaps the position would still be open to him. He had enough money left to buy a railroad ticket; but not enough to pay his board bill.

Shumaker packed his old valise, left his sample Bible and case behind in his room as security for the unpaid board, spent his last cent for a ticket, and sat down to wait for a train. The train was late. A man with a silver badge on his vest grasped his arm.

"You'll have to come with me, young feller," said the man. "You're under

rrest for jumping your board bill."

Pale and protesting, Shumaker was marched down Main Street to the magistrate's office. The landlady was there, grim and indignant. She had looked into his room for his luggage, she said grimly, but had failed to find it.

The magistrate was kindly. If the Bible and case actually had been left in the room, he decided, Shumaker could go. He didn't believe that the boy meant to defraud. So back they went—Shumaker, the landlady, and the constable—to find them just where Shumaker had said they were.

"Go on to Harrisburg," the magistrate told Shumaker. And, to the landlady, "If this boy doesn't pay you I will. I'll vouch for him, even if he is a stranger."

Young Shumaker reached Harrisburg. It was night. He had not eaten all day. He walked by one restaurant, another, and a third. His stomach was as empty as his pockets. It was December, and he had no overcoat.

At last, hunger and the knowledge that he could not sleep in the streets overcame his native pride. He entered one of the restaurants, confronted the proprietor, and stammered out his story.

"All I have is my watch," he said. "You can keep it until I'm able to pay you."

The proprietor looked at the cheap, worn watch. It was doubtful if he could give it away. Then he looked at Shumaker's drawn face. "Sure; eat all you want," he invited. "There's a cot up in the attic you can sleep on to-night."

It is due to such incidents as this that Shumaker to-day is "warm" to people. Misfortune, instead of embittering, showed him the hearts of men.

NEXT morning, disappointment again awaited him. The Anti-Saloon League superintendent was out of the city and not expected back for a week or two. His secretary knew nothing of the job Shumaker had been offered, and had no authority to hire anybody.

"It's the Christmas season," the secretary reminded. "Why don't you try one of the big stores. They're hiring extra help."

This time he was in luck. A department store engaged him on the strength of his Bible-selling experience and put him in the book department. Shumaker, who loved books, could not have wished for a better assignment.

Christmas over, he stood high on the department sales list. He was sure his record would lead to his being retained. "Yes, you've done well," agreed the manager; "but we no longer need extra help. I'm sorry."

Back Shumaker went to the Anti-Saloon League offices. The superintendent had returned, and he had not forgotten the ex-salesman of Bibles.

"We need a detective," said the superintendent, "to obtain evidence against lawbreakers. It's risky work. You may get your head broken."

Just then Shumaker was ready to face old Demon Rum himself, if necessary to get regular employment. So he became a detective.

One thing is certain: he didn't look at all like a detective. There was no need for him to wear false whiskers and a wig to

Washable as tile

Ordinary Flat Finish White Paint

Barreled Sunlight Gloss Finish

The microscope shows the difference!

These photographs of paint surfaces were made through a powerful microscope. The astonishing contrast shows why Barreled Sunlight is so easy to keep clean. Smooth, unbroken and non-porous, it resists dirt and washes like tile.

DISCRIMINATING users of interior paint and enamel are often surprised to find that Barreled Sunlight will do the work of both —and do it *better*.

This free-flowing paint enamel "levels itself" into a lustrous surface free from brushmarks and so smooth it washes like tile.

Concedes nothing to the finest enamel in beauty—yet costs less and requires fewer coats!

Guaranteed to remain white longest.

Quantity for quantity, Barreled Sunlight covers a greater area. And the extreme ease of application with brush or spray saves many labor-hours.

In Gloss, Semi-Gloss and Flat finishes. Cans and drums. Easy to tint. Where more than one coat is required, apply Barreled Sunlight Undercoat first.

To find the dentifrice that best . . suits your needs

ASK YOUR DENTIST

YOUR dentist is familiar with the action of various dentifrices upon the teeth and gums. He knows the requirements in your individual case. He is the only one competent to tell you which dentifrice is best suited to *your* needs. So ask him—then follow his advice faithfully.

If he tells you to use Pyrozide Powder, there is a good reason for it. He knows that your mouth requires the more effective cleansing power of this sterilized powder.

PYROZIDE
POWDER
STERILIZED DENTIFRICE

CONTAINS Dentinol and other special ingredients which make it particularly effective for mouths requiring a high degree of cleanliness. Its value has been demonstrated to the dental profession by laboratory tests and clinical work since 1906.

ECONOMICAL—the dollar package contains six months' supply. At all drug stores.

BE A RAILWAY TRAFFIC INSPECTOR

Earn up to $250 per month SALARY

Many men are needed in this interesting, profitable profession where you are practically your own boss—see new faces and places each minute. Healthful work—promotion rapid. We train you in three months' spare time home study and upon completion, offer you a position paying $120 per month salary—or refund your money. Write today for free booklet. Division 1, giving details—don't delay. **Standard Business Training Institute, Buffalo, N. Y.**

Be a Dental Assistant

Study at Home

MEET patients, help dentists, keep records. Prepare in spare time for this newly opened profitable field for women and earn $20 – $35 a week. Practice outfit included. Money back agreement. *Free* large, fascinating booklet: "A Wonderful New Profession for Women."

hide his vocation. He still had the country-bred manner, and his accent was still something to inspire smiles. Not even the most suspiciously-minded bartender took this gawky Pennsylvania Dutchman for an Anti-Saloon League agent.

The result was that Shumaker became widely known in various sections of Pennsylvania for his exploits. Evidence which he got led to the closing of one saloon after another. He had to assume another name for purposes of hotel registry in a new town. And one dark night, after an unusually startling exposé of illegal conditions which involved a number of prominent men, he was set upon from behind by a gang of thugs and beaten into unconsciousness.

That adventure got into the newspapers. His father hurried to the town, entreated his son to give up the dangerous work, and return to the farm, for the sake of his worried mother. Shumaker compromised. He went back with his father, but not to farm. Instead, he got work as a clerk in the pay-roll department of the Somerset Coal Company.

He liked the work. Sitting behind the president's desk in the Victor company's offices the other day, he told me that he probably would be in the coal business today had not the coal company been forced to lay off men.

"I can't say honestly," Mr. Shumaker told me, "that I ever had any goal. Work was work, and I was ready to follow wherever it led. The secret of finding opportunity lies in keeping at work—in giving the job *at hand* the best that you have."

AT THE advice of the chief clerk of the coal company, Shumaker decided to get some more education. Borrowing six hundred dollars from his grandmother he enrolled in a business school at Norristown, Pennsylvania, near Philadelphia.

Here he studied shorthand and bookkeeping, and at the end of a year he was one of the most promising pupils in his class. He passed the examinations in bookkeeping and reported to take the required "speed test" for shorthand writing. To his dismay, he lacked the "nerve" to take the test.

"I knew that everything depended on that test," Shumaker confessed to me. "My borrowed money was almost exhausted. The school would not recommend me for a position unless I qualified. I knew that I could qualify. But I was rattled at the very thought of the trial. My hands trembled. My mind became like a blank."

He had to drive himself into the classroom. The test began, and Shumaker blundered like a novice. He failed utterly. Another month he studied, and took a second test. Again he failed. A third additional month, and a third test resulted only in a third failure. With no test on he could write a hundred words a minute easily. Under test, he couldn't write twenty!

Already handicapped by his speech and his imperfect education, lack of funds forced Shumaker to quit the school and face this greater handicap of "nerves." For two weeks he walked the streets of Philadelphia looking for work. A dozen times he heard of positions—and a dozen times he failed in the speed test employers exacted. It became so that as soon as the word "test" was mentioned he walked out of the office, beaten without a trial.

"I was licked," said the Victor president, "beaten by my own fear. I had fully made up my mind to give up and go home. Then shame at the prospect of telling the old folks I was beaten drove me to make one more effort.

"In the sales offices of one of the typewriter manufacturers I was told of an opening over in Camden, New Jersey.

"I set my jaw and went to Camden. That was on February 11th, 1904. The job was that of stenographer to the factory superintendent of the Victor Talking Machine Company. I told him the facts: that I had been unable to graduate at school, was without experience, and that as sure as he gave me a test I would fail in it.

"'But I can do your work,' I added. 'Let me work a few days for nothing to prove it. Let that be the test.'

"He hired me at eight dollars a week."

It was a disorderly, unkempt little office. The windows had not been washed in months. The superintendent's battered roll-top desk was so jammed full of castings, machine parts, unfiled papers and what-not that he had to sit on the cover to get it closed.

Shumaker's neat Pennsylvania-Dutch soul hated the disorder. The first Saturday, after all the others had gone home, he sorted the letters into orderly piles, and made a place for the castings and machine parts. He washed the desk out, then mopped the floor and cleaned the windows. The office was spick and span on Monday morning when the superintendent came in.

The factory boss took one look at his desk and emitted a roar. "Who's been monkeying with my desk?' he demanded angrily. He turned upon Shumaker. "You, eh? I hired you to be a stenographer, not a janitor. Hereafter, let my desk alone!"

He grumbled that he couldn't find things and that the glare of the clean window panes hurt his eyes. But Shumaker, watching anxiously, caught a twinkle in those eyes. Secretly, the gruff factory boss was pleased. Shumaker, saying nothing, made a resolve that if anything needed to be done, whether he was told to do it or not, he was going to do it.

HE WAS timid and of a nervous temperament. But ingrained in him was a sturdy belief in "right for right's sake." When Shumaker honestly believed an act was right, though the boss believed it wrong, he stood his ground and argued it out. If he failed to convince the boss, he would do the other's bidding to the best of his ability.

An old employee warned him: "You shouldn't argue over an order. You'll wind up by getting fired. My rule is to do what the boss says, and if he's wrong, that's his lookout, not mine."

Shumaker didn't agree with any such rule. He thought it a bad rule; and he still thinks so.

"No man can be right all the time," he said to me; "and no man can be wrong all the time. Any employee, no matter what his position, be it high or low, is not square with his employer when, purely for the sake of avoiding argument, he keeps his

Digitized by Google
Original from STATE UNIVERSITY SYSTEM OF FLORIDA

mouth shut and does what he knows to be a wrong thing.

"I don't like smart-alecks and know-it-alls. But when I am wrong, I like somebody to step up and say so. If an employee can save me a mistake he is doing me a favor. I feel it is his *duty* to try to save me from the mistake if he can! The fact that I am now the boss has only served to double the conviction I've always held—that the boss can and does make mistakes. The employee who sees one of these mistakes, and doesn't mention it isn't loyal to the man who has hired him!"

In the factory superintendent's office the office boy was dismissed. They were going to engage a new boy when Shumaker asked for the job. He had time, he said, to perform the work of both. Back of the request was the knowledge that the office boy was sent on errands all over the factory. Shumaker wanted to do those errands so that he could "learn" the factory; besides he needed the extra money.

A dollar was added to his weekly pay, and the duties of errand boy to those of stenographer. He thus became acquainted with the various foremen and department heads. The former liked to hear his "Dutchy" talk, and willingly answered all his questions. It wasn't long before Shumaker knew more about the growing factory than any one man there, except the factory superintendent himself. At the end of two years he was made manager of the office, at eighteen dollars a week. Two months later he was again promoted to assistant purchasing agent.

Now, observe the man's thoroughness. He saw everybody who called at the office. Every salesman, no matter what he had to sell, was granted an interview. He quizzed them on manufacturing processes, shipping problems of their respective companies, sources of raw materials, costs. He added personal study to this information, until his knowledge of steel began with the ore mines and his knowledge of woods with the trees. Simultaneously, he studied the men themselves. He analyzed their various "approaches," their ways of presenting arguments, the manners of those who impressed him favorably, and the faults of those who impressed him unfavorably.

Nights he sat up until midnight memorizing prices, schedules, invoices, so that next day he wouldn't have to refer to a single note, book, or paper. He tried to learn more about what he was buying than the man knew who was selling it. And around the Victor plant, when executives wanted to know something, it got to be a habit to "ask Shumaker." He was an encyclopedia on the business.

SUDDENLY the position of purchasing agent became vacant, and the directors summoned Shumaker.

"You're pretty young for this job," they told him. "Maybe you can handle it, and maybe you can't. We're going to give you a trial."

"You mean," exclaimed Shumaker, "I'm to undergo a six-months *test?*"

"Exactly," said the directors. "Call it a test."

Shumaker returned to his office and slumped, pale and shaken, into his desk chair. He had earned this promotion, he felt, if ever a man had. Yet he, who had

Algernon was goofy on oversleeping. Lazy Algie. Snoozed too long other morning. Had three oh-so-precious minutes to shave. Algie got excited. Grabbed wife's bottle Hinds Cream instead of soap. Rubbed it all over face *before* lathering up—and man! how it made that beard go limp! Wife forgave theft of Hinds. Because Algie now cuts shaving time in two *every* morning, and wife can loll in bathroom longer.

"Pretty soft!"—you'll say

That's what they *all* say about shaving when they've tried Hinds Cream *before* lathering up! Softens the beard? Well, just try it! The stiff old scrubble cries "Uncle" the minute the razor swishes through it. Not a bit of fight left in it.

And it's the simplest trick in the world. Simply apply Hinds Cream generously; rub it vigorously two or three seconds, then lather right over it, while the skin is still wet. No fuss; no bother. No time lost. Boy! What a comfortable shave!

And after the skin is dry, add a little more Hinds Cream; rub it in quickly till the fingers begin to cling. Then your skin is soft, and groomed for the day.

You'll find Hinds Cream right in the medicine closet or on your wife's dresser. Borrow it, snitch it or anything you will—but *try* this experiment tomorrow morning. If your wife hasn't a bottle, just clip the coupon.

failed in every previous test, was now to be tested for six months!

He was thin, emaciated from unreasoning application to his tasks. Day-in and day-out work at a desk and late hours spent under a study lamp had sapped his strength and worn his health pretty thin.

"I had made the mistake," he confessed, "of thinking that a man can live without air and sunlight and exercise. I had been burning up energy and putting none back. And there I was facing the old bugaboo that had always beaten me. My first impulse was to turn in my resignation."

"In my own mind," he told me, "I failed a hundred times a day.. I anticipated failure for every move I made. Nights I lay awake and counted up the next day's possible failures."

It was no easy task he faced. His predecessor had sought to make himself indispensable to the company by keeping many of the most important transactions of his office a secret to himself. The greatest and most carefully guarded of these was the methods he employed in the purchase of shellac, of which product the company was, and is, one of the world's greatest users.

Shumaker knew nothing of shellac; but he had always been given to understand that the purchase of it at a fair price was a most difficult and delicate feat. The same importance was attached to its purchase by all the executives of the company. A purchasing agent who could buy shellac advantageously was regarded as little less than a genius.

NEAR the end of his six months' probationary period, Shumaker was approached by one of the directors.

"So far," said the director, "you've done well. But your biggest test remains. We need shellac."

He stated what he believed was a fair price for shellac per pound, and gave Shumaker a list of shellac dealers.

Quaking in his shoes, Shumaker went to New York and sought out the biggest shellac dealer on his list. He was expecting to meet a shrewd, domineering, hard-boiled trader. Instead, he met a pleasant, quiet-voiced, square-looking business man, very much like hundreds of other business men Shumaker had met. Frankly, without concealing a fact, the man under test told his story.

"I am going to ask you and other dealers each to quote me a price," Shumaker explained. "My order will go to the lowest bidder. There is nothing complicated nor mysterious about that method of buying; but it's the only way I know."

The dealers, instead of being astonished, were delighted. The old purchasing agent had played price against price, dealer against dealer, and had haggled and argued. No one dealer had been given all of the order. Instead, it had been scattered among a number. With Shumaker giving the lowest bidder a chance not only for the entire order but also for the future business of the Victor company, each was eager to quote the lowest price he could.

"I returned to Camden," Mr. Shumaker related, "with a price that was two cents per pound under that paid by my predecessor. But that victory was small compared to the greater victory I had won over myself. I had undergone the test and beaten fear."

The company promoted him to purchasing agent. Two weeks later, in a physician's office in Camden, Shumaker was told that he was in the first stages of tuberculosis! Worry, and work without play had exacted its toll.

Another test, and this time, though far more than a job was at stake, Shumaker did not quail. Not satisfied with the first diagnosis he went to a famous Philadelphia specialist. The diagnosis was confirmed.

"What must I do?" the sick man asked.

"Sit down," invited the specialist. "Sit there and let me do the talking."

One hour the famous man talked and Shumaker listened. For the first time he heard a lecture on self-care, on the part that air and sunshine should play in the life of every man, and on the value of health as well as brains in business.

"You don't need to quit work," said the physician; "but work within reason. Play within reason. Find yourself a hobby. Eat what you should eat. Keep regular hours—and sleep. Sleep is as important to success as work."

Shumaker went home to his wife, smiling.

"The verdict is that I've caught this trouble in time, and can beat it," he said. "I'm not going to die!"

They moved to a house in the pine woods, south of Camden. Instead of going to bed at midnight, Shumaker turned in at nine. He got to work an hour later. Reversing the policy of his predecessor, he began to train his assistants how to do his work. What the years had taught him, he taught them. He held back no secrets.

In five months, under the new life, he had gained twenty pounds and was something like his old self again. A year after his visit to the specialist a big life insurance company examined and pronounced him a well man!

Shumaker's policy of making himself dispensable in the office of purchasing agent, as opposed to indispensable, began to bear fruit. He took a five-weeks leave of absence. His department functioned as smoothly as if he had been there.

The directors decided they needed a man like Shumaker on some of the company's bigger problems. He was elevated to the board, and asked to reorganize the legal department. Shumaker knew nothing of law, but he saw no reason why the company's legal problems should not be handled like any other—on common-sense lines. He instituted the policy of taking special cases to specialists, instead of to lawyers retained by the year to handle everything. The result was that litigation decreased to a minimum.

IT WAS late in 1924 that the company, after a high tide of prosperity, ran into the slump that almost ended its existence. Shortly before Christmas of that year, with the warehouses filled with unsold goods, the unheard-of necessity arose of shutting down the factory. Eldridge R. Johnson, founder and president of the company, was ill, too ill to attend to its management. A committee of three managers was named to act for him, and one of the three was Shumaker!

By this time Shumaker's position was unique! The Victor organization was essentially self-contained. Department heads transacted business with other department heads, directors with directors.

"Breaking in"
New Shoes
with old shoe comfort

If you dread wearing new shoes because they make your feet sore and tender, apply Dr. Scholl's Zino-pads wherever you feel discomfort. You will get instant relief. New shoes will feel as comfortable as old ones. Dr. Scholl's Zino-pads remove the *cause*—friction and pressure of shoes, and positively prevent corns, callouses, bunions and blisters. Zino-pads are thin, medicated, antiseptic, protective, healing. Cost but a trifle. Sold everywhere.

1. *For Tender Toes and Corns*
For tender toes (the first sign of corns), apply Dr. Scholl's Zino-pads (Corn size). Pain stops instantly and corns are positively prevented.

2. *Burning Soles—Callouses*
For Callouses here or burning sensation or soreness—apply Dr. Scholl's Zino-pads (Callous size). They stop the cause, and end the pain at once

3. *For Sore, Tender Heels*
Blisters and tender spots on the heels prevented and all soreness removed, by applying Dr. Scholl's Zino-pads (Callous or Bunion size).

4. *Preventing Bunions*
Apply Dr. Scholl's Zino-pads (Bunion size). They stop the pressure of the shoe, and prevent and relieve bunions and enlarged joints.

5. *For Tortured Instep*
For painful ridges on the instep, caused by tight shoes, use Dr. Scholl's Zino-pads (Callous or Bunion size). They prevent blisters and quickly heal.

Dr Scholl's Zino-pads
Put one on—the pain is gone

It is the simplest, most satisfactory and most economical way for you to make a diamond purchase. Write for this Free Book.

1-4 carat	$31.00
3-8 carat	50.00
1-2 carat	73.00
1 carat	145.00
2 carats	290.00
3 carats	435.00

How To Buy DIAMONDS
JASON WEILER & SONS
1 Carat $145.00

JASON WEILER & SONS
Diamond Importers since 1876
352 Washington St., Boston, Mass.

The one important executive in actual touch with the outside world was Shumaker. He was looking in; but also he was looking out.

He knew the salesman's viewpoint—for he had studied hundreds of salesmen. He knew the buyer's viewpoint—because had he not bought for Victor tens of millions of dollars in materials? By his persistent, sweeping study of a hundred business fields, made in his capacity as a buyer, he had learned the secret of countless business failures: failure to improve what once had been a good product, but which progress, never pausing, had left behind.

When Shumaker stated that the phonograph was not doomed by radio, he gave a conclusion based on carefully compiled facts. Not for nothing had he been seeing every visitor who came to his office; not for nothing had he been quizzing them on their opinions, reactions, and general knowledge. These people, most of whom were trying to sell him goods, were a cross-section of the public to whom his own company was selling phonographs! He *knew* they would buy a better phonograph, if such an instrument could be made!

Likewise, with the memory of his old grandfather still fresh, Shumaker *knew* that "nothing is so good that it can't be made better." That old aphorism had a literal application in his life. It was truth that needed no proving.

"The phonograph is a machine that reproduces sound," he pondered. "What other great industry also has to do with sound?"

His telephone stared at him, a foot distant from his hand; and in the telephone he found the answer and solution. But had there been a *thousand* possible sources for his discovery instead of one, his investigation would have embraced the whole of them. He would not have stopped until the last cherry had been plucked from the tree! That's Shumaker.

IRVING BACHELLER makes the astounding statement that at sixty-seven years of age he feels younger than he did at twenty-one. How and where did he discover the fountain of eternal youth? The answer is contained in next month's article, "I Feel as Young as I Ever Did."

Rosie Merton Takes a Brace

(*Continued from page 49*)

It meant, too, I realized shortly after I had hung up the telephone, that I should have to give some kind of a party for Vera myself. All the other girls would, and I wasn't going to have any of them say that the reason I didn't was because Vera was an old girl of Will's.

It was frightfully inconvenient for me just at this time, because it meant I'd have to have the davenport covered over first.

"I don't see what's the rush on the davenport," Will said, when I broached the subject to him. "It's looked just like this for the last year. What's the special hurry?"

"Just because it *has* been let go for a year," I said. "That's long enough." There was no use trying to explain anything more subtle than that to a man.

That evening there was a rap at our door, and to our surprise who should come in but Howard and Rosie! They hadn't been out anywhere for ages together, and we were surprised and delighted.

"Well, hello!" Will exclaimed, slapping Howard on the back. "Hello, this is a peach of a surprise!" And then, "What's happened?" he asked. "Have you sold the kids, or how do you happen to be issuing forth into the night life of Montrose?"

Howard grinned.

"We've got a mother's helper," he said; "and she stays till ten o'clock one night a week."

HE WAS fairly beaming, and his being so tickled over just getting over to play five hundred with us for a while showed how much he'd felt not having any fun at all.

"I simply had to have some help," Rosie explained to me. "Howard's been after me to for ages, but I've been putting it off. Then I had a chance to get this little Niccolletta, who is very good, and I thought I'd better take her. We've got to get back to having a little bit of social life again." A pause and then, very casually, "I thought I might give a little bridge while Vera's here."

"Oh," I said.

And when Rosie took off her coat and hat Howard's grin spread from ear to ear till he looked like Harold Lloyd. Rosie had on her new black dress, and her hair had taken the permanent the best of any I've seen. She'd had it set in a big soft wave, and the little short locks curled around her face. She looked ten years younger, and so pretty. For the first time since Betty was born, she looked as though she might be the same girl who had cut out Vera Yost back in high school.

"Meet the wife," said Howard proudly. "Some girl I've got, eh, Will?"

Howard was just tickled to death with her.

"Why, where's your davenport?" Rosie exclaimed, looking around our empty living-room.

"I'm having it covered over," I said carelessly. "You know the moths got into it last spring, and I've just got around to having it fixed."

"Oh," said Rosie comprehendingly.

There was a little pause.

"It's just remarkable," said Rosie, "how much some one thing will improve a whole room. Sometimes, quite a little thing, at that. Why, I've been putting new rings on the portières to-day in our living-room, and you'd be surprised at how much difference it makes in the whole room. Even Howard noticed it."

"I'll say I noticed it," said Howard, continuing to beam on his wife. And though I confess I didn't think anything special about it, at this time, I began to very shortly afterward.

It was a good thing that Howard Merton beamed while the beaming was good.

For Vera Yost's arrival was put off again.

To the naked eye it might be hard to see what this could have to do with Howard Merton. I imagine that I'm the only human being in all Montrose who really does see. But, as I said before, suffering broadens you and makes you more understanding. I can understand, as perhaps nobody else in the whole world can, the real connection between Vera's sister-in-law's oldest child's measles and Howard Merton's future life.

It was Bee Duncan who told us about this oldest child's getting the measles. She'd had a long-distance from Vera. Dulcie was quite put out about it. She said that it really did seem as though when both the sister-in-law and the youngest child had had them, that ought to do for the family.

Bee was inclined to think that the measles couldn't be Vera's fault, but I didn't pay much attention to what they were saying. I was laying out my own plans: Vera had decided to stay up in Tanhasset through March. Through March! A whole month before she would arrive! A month—why I could get the living-room floor done over and new curtains for the babies' room, and get the piano tuned. Would March be too early to set out the flowering quince we'd decided to have beside the garage?

Naturally, that afternoon when I stopped in at Rosie's and found her calling up the paper hanger, I knew that she had heard the news.

"It's awful the way the dining-room paper looks," said Rosie. "I've been meaning to have it done over for ages, and I'd positively decided not to let it go later than this spring. It occurred to me today that I'd have a better chance to get Mr. Ackerson to do it if I had it done in March. Get in ahead of his spring rush of work, you know."

"Yes, indeed," I said understandingly. "I want to get our living-room floor scraped and finished over, and I thought I'd get at it early. It's so hard to get Mr. Ackerson if you wait till April when everybody's cleaning house."

We chatted some little time then about the advantages of getting your spring work done early. Oh, Rosie and I understood each other perfectly!

But Will and Howard didn't understand at all. When I couldn't get Mr. Ackerson right away, and sent for a man to come clear over from Verblen to do the floor, in order to get it done immediately, Will said, "But I thought you were having it done now so you could have Mr. Ackerson do it?"

I couldn't think of anything to say, except that I'd changed my mind! And when I wanted to borrow out of the budget, to get my new spring coat early, he said women were beyond him.

"WHAT on earth do you want of a spring coat now?" he demanded. "March is usually as cold a month as we have, and you know, as well as I do, that you can't wear a light coat before the middle or last of April."

"I can wear my winter coat over it, if necessary," I said, "and take it off and leave it in the flivver when I get there."

"When you get where?" Will demanded.

"Oh, wherever I happen to be going."

He just looked at me as if he thought I couldn't be quite bright. But of course, I didn't pay any attention to that.

Howard, however, took it much harder.

WE SELL THE EARTH

GLOVER WATSON ORGANIZATION INC.

WASHINGTON BLVD. BLDG., DETROIT, U. S. A.

Not at first, though. At first, he was just delighted. He was tickled to get out to the movies or over to somebody's house one evening a week; he was proud of the way Rosie was looking and pleased to get the dining-room papered over. But the biggest change of all was in the way Rosie was running the house. Of course having Niccolletta helped, but just having her alone would never have made such a change. It was as though Rosie had suddenly summoned superhuman energy, and turned right-about-face.

Dulcie and Roger and Will and I stopped in there a few minutes of a Sunday afternoon, and actually it was staggering. The living-room looked as slick as a new marcel. Not a toy or a milk bottle in sight. And quiet! . . . It was so uncanny that we all lowered our voices, the way you do in church.

"Where are the kids?" Will asked in a hushed tone.

"Oh, the baby's asleep," said Rosie; "and the others are in their new playroom."

"Their new playroom!" I exclaimed. "Where's that?"

"Up in the attic," said Rosie. "We decided to run the heating pipes up there, and Howard has finished off one end with plaster board. They have all their playthings up there, and there's nothing they can hurt."

The three children, hearing our voices, came clattering down the stairs, all ready to start a game of blind man's buff or football or something else rough and noisy in among our chairs. And the perfectly pleasant, yet brisk and firm way in which Rosie shooed them right back up-stairs again caused Dulcie and me to exchange glances of bewildered amazement. Could this really be Rosie? Ministers and hymns and things like that are constantly talking about a Great Purpose, but I always take anything moral with a grain of salt. Rosemary, however, has convinced me that it is absolutely true. I just simply couldn't doubt *anything* after having seen the way Rosie reorganized her life during those six weeks that she was getting ready for Vera Yost.

AND, as I say, Howard was delighted. He thought, of course, that I had taken his suggestion to drop a hint to Rosie, and he intimated to Will that he was very grateful to me for having got her started. He didn't stop to consider, though, that it was one thing to get a woman started, and something else again to get her stopped!

Papering the dining-room was all to the good, and Howard agreed, though a bit dubiously, that while Mr. Ackerson was there it might be a good idea to have their bedroom done too. They had put up some pictures of girls' heads when they were first married and now, though styles had changed so that the psyche knots and bushy bobs looked perfectly grotesque, the Mertons couldn't take the pictures down because the wall paper had faded so that the marks would all show.

Howard agreed that it would be worth the price of repapering to get rid of one particular picture of a girl with a snowball. But when Rosie decided that, Mr. Ackerson being right there, they'd better have the living-room papered too, and picked out landscape paper that costs

Your Art Ability ANALYZED FREE

Here is your opportunity to find out how much talent you have. This simple, scientific test shows your natural sense of design, proportion, color, perspective, etc. It may show you the way to a bigger future—a real career.

Federal Students are Successful

Many Federal School students are making $3,500, $4,000, $5,000 and $6,000 yearly. The Federal Schools is recognized everywhere by employers of artists and by buyers of art work. Big prices are paid for drawings.

Learn Commercial Art at Home

If you like to draw, an almost sure indication of talent, the Federal Course will quickly develop your ability to earn money. Some students earn more than the cost of the course while studying. Many nationally known artists have contributed exclusive, illustrated lessons to the Federal Course. No previous training is needed. You will receive personal, individual criticism on your work.

heaven knows what a roll, Howard balked.

Much good it did him. Rosie was like a ten-ton truck. A little hard to get started but, once started, practically impossible to stop. Of course the fresh paper made the living-room woodwork look shabby, and Rosie painted it over herself. This didn't cost much, it's true; but with the walls looking so fresh and pretty, she said the rugs were a sight. It was about then that Howard began to get anxious.

First, he tried gentle hints and a sort of silent attitude meant to suggest lack of sympathy. This was just so much time wasted. It was like trying to stop a bullet with a tennis racket. Rosie didn't even hear the hints. Then Howard tried protest. This didn't get him any further. He made a perfectly violent objection against having their old-fashioned electric dome over the dining table changed for candle fixtures around the walls; but when he got home from work one night he found the dome gone and one of the candle fixtures already in.

I happened to be there at the time. Rosie, looking so young and pretty with her fluffy, curly hair, was all lit up with excitement. She switched on the one candle-light that was in.

"Isn't that stunning?" she said, excitedly. "There, Howard, now you'll have to admit that's an improvement!"

"Oh, it's an improvement all right," Howard admitted kind of surly.

I could see that Howard wasn't just trying to be disagreeable. He was really worried. And well he might be. Rosie had her eye on the day Vera was due to arrive, and she was like a racer who couldn't see anything but the goal.

I'LL say for Rosie that she didn't spend any money for anything that she could possibly do herself, or tease Howard into doing. Work! I have never seen anything like that girl. Seeing the house all lit, we stopped one night at nearly midnight when we were on our way home from supper at Mother Horton's to see if anybody was sick.

The down-stairs was lit up, because Rosie had Howard shellacking the living-room and dining-room floors, and upstairs because Rosie was enameling their bedroom set. She had been up since the baby's six-o'clock bottle that morning, working every minute, but instead of looking dead she looked fresh as a girl on a calendar.

I shall never understand it, remembering how tired and pepless she had used to be after an ordinary day. It was seeing Rosie these days that convinced me that anything can be done if you just have a great enough Purpose.

But in spite of the wonders Rosie was doing herself, you can't revolutionize an entire family without spending some cash. And I began to be worried about the way Rosie was spending. I suppose I felt kind of personally responsible for it, on account of Howard's thinking that I had got her started. And I couldn't very well explain to Howard that I hadn't, without telling him what had. Which for personal reasons—Howard and Will being such intimate friends—I thought it best not to go into.

So all through March, Rosie went on her mad way, improving their life. And the nicer their house looked and the prettier and dressier and more excited Rosie got, the gloomier Howard became. His birthday came in March, and Rosie gave him an écru lace luncheon set and half a dozen salad forks. It nearly killed him. Bumper's third birthday came early in April, and Rosie said she thought she'd get his present a little ahead. She was giving him a bridge lamp!

The way Rosie was acting reminded me of the way I had felt just after the twins were born. Every woman who has ever had a baby knows how it affects you right afterward. You feel so young and slim and peppy again—you're crazy to get a lot of new clothes and step out a little. If you can do so, you do it, and it doesn't seem to take long to get it out of your system.

But Rosie had never had the chance to do so. . . . By the time Betty was off the ten P. M. feeding, Junior was already on the way. Then, while Rosie was wrestling with the two of them, along came Bumper. And now the baby. Rosie had had to be old for her age and responsible and far-sighted and sensible and self-sacrificing for a longer time than a human organism could stand the strain. And now, she had just blown off the lid!

A BLOW-OFF that had been accumulating through four babies is too large to be healthy. I didn't blame Howard for being worried. In fact, as March wore on, I began to be worried myself.

Rosie and Howard had always seemed almost like a sister and brother of ours. We'd been proud of them. Till after the fourth baby came, and Rosie had let go, nobody had had anything but praise for them both. They had met their difficulties squarely and been so game about them and kept so fond of each other through them.

But this wild burst of speed of Rosie's seemed in a queer way to be coming between them. Why, even Will and I could see how truly troubled Howard was getting; but Rosie didn't see it at all. She just laughed and teased him about being Daddy Tight-Wad when he'd beg her to watch her step a little. She didn't seem to realize that a sort of wall was rising up between them.

But there was. Will and I could see it if Rosie couldn't. Old Doctor Horne's office in the Prescott Building was going to be vacant the first of May, and Howard had a chance to get most of the equipment he'd need, cheap, from a dentist who was leaving Verblen. It was up-to-the-minute equipment and scarcely used at all. And Howard decided not to take the chance—without even discussing it with Rosie.

"This isn't the time," he told Will gloomily, "for me to take any chances!"

It was the fact that I knew Howard had made the decision without talking it over with Rosie that gave me the strongest cold sense of the wall between them. Could a wall rise like that, over some silly thing, and rise and rise till two people couldn't touch each other across it? And finally become so solid there was no smashing it down—ever?

It took every bit of satisfaction out of the preparations I'd been making for Vera Yost's visit. I only wished she'd hurry up and get here. Why, if she were delayed once more, it might ruin the Mertons' life forever.

CITY ..... *STATE* .....

And she *was* delayed. It seemed like the hand of fate. Rosie had done everything that could possibly be done in six weeks. She was ready for the visit. I could see her fairly taking a long breath of satisfaction and relief. And then Dulcie announced that Vera was going to stay in Tanhasset through April. Dulcie was furious.

"I wish her sister-in-law's family would either die or get well," she said blasphemously. "I do hate their shillyshallying."

Rosie said nothing. But I could see the relief and relaxation fading right out of her face. The look of purpose came back. She was like a person who has laid down his burden too soon, but picks it up again bravely.

"Through April," she said, as though to herself. "We might be able to get the outside of the house painted. And get a new car."

I WENT on home alone, getting more worried with every step. Rosie was going too far. And there was nobody but me to warn her. I understood, as nobody else in Montrose did. I couldn't stand by, and say nothing. It might make Rosie hate me forever; but I'd have to do it just the same.

Mother and Father were coming to our house for supper that night and, Mother arriving at half past five, I could leave the twins with her while I ran down to the Mertons'. I had been making up my mind and screwing up my courage all day. I knew, as well as anybody else, the danger of interfering in a husband-and-wife matter; and if I had been just one faint shade less fond of both Howard and Rosie I'd never have done it.

We had had our regular March blizzard, and the streets were piled deep on each side with snow. I had on my galoshes and I plodded along toward the Mertons, keeping in the wheel tracks in the center of the road. It was terribly hard going. A flivver had skidded into one of the banks down the street and somebody was trying to shovel it out. I began rehearsing to myself just what I would say to Rosie. I was so absorbed in my thoughts that I was fairly upon the flivver without looking at it. Then I stopped short.

There, frantically shoveling snow away from the front wheels, and crying as she shoveled, was Rosie.

"Oh, Dot, do you suppose you can help me get out? I'm stuck fast and not a living soul's come past. I've *got* to get out!"

She didn't seem surprised to see me, and she didn't try to hide the fact that she was crying. She seemed suddenly past all such things. What on earth had happened to Rosie!

I caught from her such a feeling of desperate importance that I didn't waste a word asking what it was all about. I just fell to and tried to help her. I got into the car and started the engine, so that as soon as Rosie had shoveled a little, I could put it into low and try to get a little ahead.

But the back wheels just spun around and didn't move an inch. One front wheel was in the ditch where the snow was four feet deep. You couldn't get a sack or anything under the wheels; you couldn't do anything but shovel. I climbed out, and in grim silence Rosie and I took turns shoveling.

The street was deserted. Not a living

Down with scalp-locks and cow-licks!

KEEP them down, keep every hair of your head neatly in place all day long, with—

The new Glo-Co, now on sale at drug stores, barber shops and department stores everywhere. There's nothing else like it. It isn't a messy, sticky cream which mats down the hair. It isn't over-scented. It is a refreshing, healthful, *liquid* preparation which keeps the hair lustrous, and fights dandruff too.

Glo-Co Shampoo is as good as Glo-Co Liquid Hair Dressing — your doctor would recommend it. If you can't get Glo-Co products at your dealer's, send $1 for full-size package of each preparation. Address Glo-Co Company, Dept. E-9, 6511 McKinley Avenue, Los Angeles, Calif.

soul came along to help. We pushed and shoveled and raced the engine and groaned and pushed and shoveled again. I didn't know what it was all about, but I was swept along by Rosie's tenseness into a sense of frantic, desperate haste.

"I'VE got to get down to Howard's office before six," Rosie gasped finally, between shovelfuls. "The telephone's out of order there—I've been trying to get him all the afternoon."

"What for?"

"I've got to get him before six. I just heard this afternoon that Mr. Silcox is going right over after closing time to sign a lease for that office in the Prescott Building. You know how hard it is to get an office there—Howard's just been waiting to get one—and Mrs. Silcox said Howard said this didn't seem to be a good time for him to make the change."

Rosie grabbed one of the front wheels and tried to tug it back toward the cleared road. Of course the car didn't budge an inch. Then she brushed the hair away from her eyes, and the black from the wheel mingled with her tears, and smeared her face in great black blobs.

"But why—" I began, completely bewildered by it all and yet feeling the tenseness so that I didn't dare stop shoveling.

"Howard never even told me the office was going to be vacant," Rosie said. "He's said for years, when he could get an office in the Prescott Block he'd feel that the time had come to make the jump. He could get his equipment cheap now, too. And he never even told me. Just turned it down. Just b-because I said our old flivver was a disgrace! As though I wouldn't ride in a wheelbarrow if it was best for Howard!"

And she snatched the snow-shovel away from me and began digging frantically again.

"I must have been crazy!" she gasped between struggles. "I don't know what's been the matter with me—I must have been crazy! If Howard doesn't make the change now with a chance like this, he may never do it. Just go on year after year, keeping his nose to the grindstone—a dentist never gets anywhere working for another man. Howard must have been afraid I wouldn't stand by if it was slow going for a while. Just because— Why, I'll let Niccolletta go, I'll sell the new rug, I'd scrape the landscape paper right off the wall if I could!"

She was panting with weariness, and I tried to take the shovel, but she wouldn't let me.

"What time is it? If Mr. Silcox gets that office, Howard will start putting it off all over again. And when he can get all that equipment cheap, too—it's his chance. Oh, he mustn't give it up!

"I won't let Howard lose the chance he wants to take," Rosie was gasping frantically. "What do I care for a new car, compared with Howard? What difference does it make if the house is never painted over? What difference does anything make compared with Howard—"

Suddenly, even through our frantic struggling, I felt somebody looking at us. I turned around, and there stood Howard.

We hadn't heard his steps in the deep snow. It was half dark and, anyway, we had been too preoccupied to see anybody.

Rosie turned at my exclamation, her face all black and streaked with tears.

"Oh, Howard, how did you get here? Oh, thank goodness! Howard, you must hurry right back down to the Prescott Block, and—"

"I've just come from the Prescott Block," said Howard. "My last appointment was canceled."

"You've just come from the Prescott Block?" Rosie gasped. "Then you've taken the office?"

Howard must have been standing beside us for some little time. He must have heard a lot of what Rosie had been saying. There was no mistaking the expression on his face. He grabbed the snow shovel from her and threw it into the drift, grabbed her, and kissed her all over her black-streaked, teary face.

"Yes," he said, "It's all done—signed on the dotted line. I got to thinking this morning, and I said to myself that anybody with as peppy and expensive a wife as I've got had better take a brace on himself and look ahead a little."

"Oh, Howard," Rosie wailed, "I'm not going to be an expensive wife, I—"

"When you can put as much into life as you're doing, I guess I can hump myself a little too," Howard interrupted.

"I'll help," Rosie promised breathlessly. "We'll let Niccolletta go and we'll sell that new rug. We'll—"

Howard dragged Rosie down beside him on the car step.

"You crazy kid!" he said.

AND with that I simply faded out of the picture, stepping high and quiet in my galoshes. That was no place for me. Business can fail or succeed, rugs be bought or sold, there can be no babies or ten. As long as a husband can call his wife "You crazy kid!" in that tone, everything is going to be all right.

And, as a matter of fact, I might as well not have given myself a lame back shoveling that snow. Howard in his own business is working out fine, just as Will has been telling him for the last six years that he would. He's getting more regular patients all the time and paying off the debt a little every month. And too, he's made Rosie keep Niccolletta and she's managing beautifully. The burst of speed she put on has died down; but it seems to have been like priming the engine in cold weather. Their marriage has quit limping along on one cylinder and is hitting again on all six.

And, after all the trouble she made, Vera Yost has never come at all! She stayed right in Tanhasset until she had to go on back to Chicago, owing to her sister-in-law's youngest boy's coming down with the measles just as all the rest were finished up. Dulcie said, "Isn't that just like Vera Yost?" But neither Rosie nor I said a word. We understood each other perfectly.

When the flowering quince Will set out beside our garage died on account of my having made him put it in too early and Will was complaining bitterly about it, Rosie just said:

"Well, it seems to have been all for the best," which puzzled Will.

And that is as near as Rosie and I ever came to mentioning Vera Yost's name.

My Favorite Song

FIRST PRIZE

"After the Ball" Made Me a Social Success

I WAS a country boy and lived on a farm in what may be termed the "Bootjack Age." Until I was twelve years old, I had done nothing to lift me out of obscurity. Just an overgrown, awkward, bashful country boy.

The Reynolds boys could climb up the smooth trunk of a tree and scramble over on the corner of the schoolhouse roof. Ben Leyda could "skin the cat," Walter McCormick could wiggle his ears, and Fred Barnes could knock a baseball farther than anyone else. I could do none of these things, and worshiped these heroes in silence from afar.

I had a wealthy cousin living in town, and the summer that I was twelve years old, she invited me to visit her family for a week. She played the piano skillfully and sang sweetly.

After we had sung "May, Dearest May," "Nellie Gray," and "Old Kentucky Home," she said, "Now, Earle, I am going to teach you the latest song, 'After the Ball.'

A little maiden climbed an old man's knee,
Begged for a story, "Do, Uncle, please.
Why are you single, why live alone?
Have you no babies? Have you no home?"

Over and over we sang it. Aunt Ann came in to hear us. Cousin Ada and Cousin Elizabeth listened and commented favorably, and I am quite sure some of the neighbors commented—unfavorably.

Then school began, and on the second Friday afternoon we had a "Literary." My sister Mary, ever loyal to the family, told the teacher I could sing "After the Ball," and for the first time in all those lonesome country years I found that I had joined the ranks of the fellows who could do something of note.

That was many years ago; but now, when we Rotarians entertain the ladies, and Fred asks me to sing "After the Ball," my mind goes back to the old Reynolds Schoolhouse at that Friday afternoon Literary, where "After the Ball" put me in a class with the boy who could skin the cat, the boy who could climb to the roof of the schoolhouse, and the boy who could knock a baseball the farthest, and almost made me the equal of the boy who could wiggle his ears. E. D. B.

SECOND PRIZE

The Song That Brought Me to My Senses

THAT old song "The Girl I Left Behind Me" means more to me than any other. It brought me to my senses, and made a man out of a hot-headed fool.

My wedding day was approaching, and dissatisfaction was brewing in my family. I was an only child, a spoiled one. Father wanted me to live with him and Mother. But Mother sniffed, "Two families in one house?" I wanted to go to Kansas or Oklahoma, where I could plow the rolling prairie, and breathe the Western air.

My intended bride's family was so large that they could easily spare her, and that was part of the reason why harmony always prevailed in that house. But at my house it was a fight to the finish—the secret was, my mother grieved over the choice I was making, and my father approved of it. What was a headstrong boy to do? I pondered over the question, and finally decided on the bold venture of running away from my intended wife, my family, everything; I couldn't stand my mother's tears.

Just before the train pulled in that was to carry me away forever, out stepped a blind fiddler upon the platform at the station, and began to play, and sing:

"The vows we've registered above,
Shall ever cheer and bind me,
In constancy to her I love,
The girl I left behind me."

That song changed my plans. I went back and married Sally Brown on schedule time, and everything was lovely, and the goose hung high. But before the new wore off the honeymoon, Sally and I gathered our belongings into two trunks, and made a clean get-away to the land of the buffalo, where we built our home and raised our family, unhampered by too much relations. And whenever I hear that old song, I take off my hat and thank God that I took the advice of that poor blind fiddler. J. P. K.

THIRD PRIZE

"Hinky Dinky, Parleyvoo!"

TO ME, and to thousands of the boys who were overseas, "Mademoiselle from Armentières" means more than any other song that was ever written. It was our never-failing standby during the war, for it appealed to us under any and all circumstances. We could sing it with our stomachs full, when the sun was shining, and it made us feel that God was in His heaven. We could sing it when our stomachs were empty and we were trudging along through mud and rain, with hell straight ahead of us.

Oh, the general got the croix de guerre,
Parleyvoo!
Oh, the general got the croix de guerre,
Parleyvoo!
Oh, the general got the croix de guerre
But the son of a gun wasn't even there!
Hinky Dinky, Paa-r-l-e-y-voo-o!

Everybody sang it. It fitted the captain's needs as well as the buck private's. The tune was easy to sing, and the words could be improvised to suit the passing fancy, and often were. They might be about anything whatever, but they usually concerned the amazing adventures of this mademoiselle.

It could express either joy or sorrow. It served equally well for love words or cursing. It was a joke to those who could speak French, and to those who could not.

Then, here's to "Mademoiselle from Armentières," the vocal outcome of the World War, parleyvoo. B. S. S.

Suit $12.50
Uniform $19

(Suit, $13.50; Cap, $2.75; leather puttees, $2.75)

Two popular styles of NOGAR Utility Clothes—unequalled for service and economy. A million pleased wearers.

The style on the left, for $12.50, is primarily a work suit but thousands wear it for business, it is so good looking.

Heat

(*Continued from page 31*)

The dust of Broadway blew upon them, and several flies sat meditatively on a nearby wall. But Percival Anthony was now beyond mere matters of hygiene.

"Sure!" said he, and, as Dempsey snuffled at his bare legs, "let's have four!"

When Percival Anthony left the orange-drink stand, he seemed to be conscious of a noise as of rippling waves somewhere in his stomach. There also appeared to be a large lump of something solid, which might have been the frankfurter. For one moment, Percival Anthony longed for the precise little row of medicine bottles on his bathroom shelf.

"Heat wave! Heat wave! Allabout de heat wave! Read it! Read it! Read it!" roared a newsboy. And with horns and bells and back-firing motors, Broadway roared back at him.

"Say, dis noise makes me deef!" suggested Spike. "Let's go down by the river. It's cooler, maybe!"

The river lay torpid, a sheet of brass from shore to shore. Black tugboats flecked its surface, and as they watched an advertising sign began to wink on the Jersey side. People lay on the greensward of the Drive, their faces turned to a grim and glaring sky. The heat beat down like a flail.

"Huh!" said Spike. "Bet it's hotter in the country!"

They moved slowly, seeking the cooler heights of Claremont, and a weary horde moved with them. There were dogs, at which Dempsey barked defiantly; there were babies in carriages; fat foreign women with strings of greasy children; bank clerks in shirts and trousers; puffing old gentlemen; tittering girls, and tall, dark sailors from the Argentine.

Presently the lower slopes of the park beguiled them, and they walked listlessly over heat-burned grass dotted with dingy newspapers. Dempsey disappeared behind a pine tree. A roaring chorus of snarls smote the air. Percival Anthony, turning, saw two dogs rolling in battle royal. A dirty-faced urchin was kicking the smaller contestant. The dog he kicked was Dempsey.

RED rage possessed Percival Anthony. He shot forward like a catapult, screaming defiance. And all the while something cold and sinister whispered inside him, "Look out! You're going to get hurt! You're going to get hurt!"

A twisted face loomed before him, fists flashed, and Percival Anthony sat down suddenly, his hand to his eye.

"Y' Eas' Side bum!" said the twisted face.

A small black hurricane hit Twisted Face amidships. Shadowy figures flickered before Percival Anthony; one of them fell over his feet. And above all the clamor came Spike's clarion call. "Eas' Side! Eas' Side!"

A slightly less enthusiastic voice roared, "Wes' Side," and then suddenly was still.

As Percival Anthony got shakily to his feet, there was nothing to be seen but Battling Kid Robinson gleefully inspecting his knuckles, and Spike, sitting astride

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

ragged bundle and pounding it. Presntly the bundle wriggled free and fled. it a convenient distance, it stopped and owled defiance through a damaged mouth.

"Wait till we get youse guys again!"

Even Dempsey grinned.

"Say, Perce," said Spike admiringly, you got a swell shiner!"

Percival Anthony felt of his eye. It eemed half shut and most remarkably wollen. Now that the first shock was ver, he was exceedingly proud of it.

"Ain't Perce the hellion, though?" said pike. "That guy musta been twicet his ize, an' he steps right up to him!"

"He sho' did," agreed the Battling Kid. But he don't put up his hands right!"

The black bulk of Grant's Tomb loomed bove them, stark against a spattered fire f stars. A noisy horde perched on its hot tones, but Spike led the way to the closehaven greensward and flung himself lown.

"Gee!" said he. "This sure feels good!"

Percival Anthony said nothing. He vas painfully adjusting himself to the uts and hummocks in the ground. The Battling Kid was silent; he was already hree quarters asleep.

Near by, a Syrian family had brought blankets and quilts, and were raucously ettling down for the night. Beyond hem, the buses rattled past, their tops nassed with humanity. Still beyond the iver lay, a black mirror stippled with ed and green lights and the great glare of an amusement park set high on the Palisades. A freight engine, spouting heets of smoke, roared by at the river's brink, and Percival Anthony coughed as he acrid fumes drifted on the air.

BUT he must have fallen asleep almost at once, for the next thing he knew was a sudden shriek of wind and a newspaper blown across his face. He sat up and his clothes billowed about him; his bare legs stung as a cold blast struck them. Dark clouds drifted down the sky, and all about him was a confused noise of shouting and running. Thunder rolled from the Jersey shore, and the Syrian family fled, screaming.

Lightning flashed in a green fury; newspapers rushed through the air, were carried clean over the Tomb's top; the wind whistled; the Drive was dark with people hurrying back to the hot houses they had fled a few hours before. The river was a ribbon of tossing water.

The Battling Kid slept serenely on.

"Wake him up, Perce!" shouted Spike. "It's gonna rain, an' I'm freezin' to death! Let's drift!"

The Battling Kid rose limply and began to shiver. As a peal of thunder split the skies overhead, he burst into a furious run.

"Where you goin', Battling?"

"S-subway!"

The subway was a thunderous cavern, and Percival Anthony, who had never before descended into its depths, was a bit stunned by it. Just as it seemed to him that they would never cease getting on and off trains, he found himself mounting an iron stairway to a rain-flooded street.

"C'mon over to my house, Battling!" suggested Spike.

"No, suh! Goin' home!" For one instant, the Battling Kid was a dot in the wet darkness: then he was gone.

All for One

An Advertisement of the American Telephone and Telegraph Company

A SLEET storm descends, carrying down trees and wires. A wind turns outlaw and blows down a pole line. Or some swollen river rampages through a circuit of destruction.

But wherever angry nature attacks the Bell Telephone System there are repairmen trained to meet the emergency, and everywhere trained in the same schools to the use of the same efficient tools. Supplies of surplus equipment and materials are kept at strategic points whence they may be rushed by train or truck to the devastated area.

Throughout the Bell System, all construction and practice are standard, so that men and supplies, when necessary, may be sent from one state or company to another.

There are twenty-five Bell Companies, but only one Bell System—and but one Bell aim and ideal; stated by President Walter S. Gifford as:

"A telephone service for this nation, so far as humanly possible free from imperfections, errors and delays, and enabling anyone anywhere at any time to pick up a telephone and talk to anyone else anywhere else in this country, clearly, quickly and at a reasonable cost."

Complete line of highest quality staple and fancy groceries—direct to consumer at wholesale prices—is making big money for live-wire salesmen. Trade established more than thirty years. Profitable territories open east of the Mississippi River and north of the Mason-Dixon Line.
Citizens' Wholesale Supply Co., Box 1392, Columbus, Ohio.

"C'mon, Perce. Nobody's home but Gran'pop. C'mon, Dempsey!"

Spike's apartment was still slightly warm, and Spike's grandfather was sonorously asleep with his head beneath a newspaper. All the windows were open, and there were pools of rain on the floor.

"Ma says Gran'pop's shif'less," explained Spike; "but he ain't. He's just a gentleman. Hey, Gran'pop, the heat wave's bust, and the place's afloat!"

A large body moved porpoise fashion beneath the newspaper, a moonlike face, unshaven for several days, emerged. "The mop's prob'ly on the fire escape. If so, it's wetter than the floor. Leave her dry, lad!"

SPIKE'S grandfather's almost bald head was surrounded by a fringe of jet-black hair, but his eyebrows were so light they were nearly invisible. They fascinated Percival Anthony.

"Gran'pop, this is Perce. We slep' out on the Drive till the storm hit us."

Spike's grandfather twitched at pink suspenders. "It might be," he said, "that a bite of food would be desirable. See what's in the kitchen, Spike!"

He nodded politely to Percival Anthony and apparently prepared to go back to sleep. From the back yard arose a crescendo of wails.

"Cats!" said Spike's grandfather, without opening his eyes. "There's a bottle on the left-hand side of the window sill. Chuck it at 'em!"

Percival Anthony timidly took up the bottle and flung it far out into the night. There was a resounding crash.

"You didn't hit 'em," said Spike's grandfather. "Nobody ever does. Neighbor of ours?"

"No—no, sir!" stammered Percival Anthony, turning pale.

Spike's grandfather's eyebrows arose slightly on his face. "Your name is probably Percival and it's likely you've run away from home. Have you?"

"Y-yes, sir!"

"The next time you skip out," mused Spike's grandfather, "you should choose your clothes better. The stuff you've got on screams Park Avenue. Who gave you the eye?"

"A Wes' Side bum!" said Spike, reappearing. "Say, Gran'pop, Perce's a regular guy. He won the freckle prize at Paddy Dever's picnic, an' his pitcher's in all the papers."

A fat hand toyed with the pink suspenders. "It seems he ran away from home."

Spike grinned admiringly. "Ain't Gran'pop the wise guy? He ain't been ward boss thirty-five years for nothin'. Gee, I remember, at first I did think you looked sort o' funny, Perce. How'd you tell, Gran'pop?"

"I kind of thought so," said Spike's grandfather, "so I asked the lad. There's those cats again. Chuck another bottle at 'em!"

Percival Anthony suddenly felt very small and shaken and tearful. Up to now he had been too much absorbed in the delicious adventure of living to think much of the inevitable end of his escapade. Now he trembled.

"Don't fuss, lad," said Spike's grandfather, lifting himself out of the chair. "I ran away myself in '73. Spike's father,

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

here, ran away. 'Most everybody does sometime. Let's have food!"

Sitting at the long table with Dempsey's moist muzzle against his knee, Percival Anthony felt somewhat better. Also, he was fascinated by Spike's grandfather's conversation.

"So your name's Wayne," said the old man, sitting back and puffing at a vile-smelling pipe. "There used to be a bunch of Waynes over by the big gas tank on West Sixty-six Street. Regular little toughs, they were. If there was any trouble in the district, they were it! Gus was 'bout my age, and we used to raise considerable sin together. You live on the East Side, don't you?"

"Y-yes, sir, an' all my ancestors were great men. Rebecca is always talking about 'em, and so's my family."

"Who's Rebecca?"

"She's my governess. You see, I can't go to private school 'cause my ancestors were so distinguished. An' I can't play with anyone who hasn't got a family as good as mine. I—I don't want to go home!"

"There! There!" said Spike's grandfather, and stroked Percival Anthony's head. "Maybe, sometimes, you get tired of living up to these ancestors, so to speak?"

"Y-yes, sir!" sniffed Percival Anthony drowsily.

The eyebrows elevated themselves once more. "You go to bed with Spike. It's most four o'clock—and don't worry!"

Spike's bed was wide enough for six small boys, and a cool breeze blew in through the window. Percival Anthony's head had scarcely struck the pillow before he was sound asleep.

MR. ALEXANDER WAYNE was eating a dismal breakfast, and trying to read the newspaper. He disliked the gloominess of his brother's house, he disliked being annoyed by an hysterical governess and being rung up by reporters. His temper always suffered in hot spells, and it had not been improved by a series of frantic telegrams which had brought him in from the comparative coolness of his country place at White Plains to search for a small nephew he had very rarely seen.

"Little sissified brat," said Mr. Wayne irritably, and ruffled the pages of his paper.

It fell open at a picture, labeled

East Side Boy Wins Freckle Championship

and Mr. Wayne gasped.

He had not completed gasping when the maid entered. "Master Percival is in the parlor, sir!"

Mr. Wayne pushed aside his unfinished grapefruit. "Go up and tell Rebecca that the prodigal's returned. Did the police bring him?"

"No, sir. It's Mr. Mike Sweeney, Mr. Spike Sweeney, and a dog."

Spike's grandfather was standing in front of the portrait of Grandfather Desmond Augustus. Beside him, very chastened and apprehensive, Percival Anthony shifted nervously from foot to foot. Dempsey was chewing a corner of the rug.

Spike's grandfather seemed fascinated by Desmond Augustus. His eyes were fixed on the firm nose, the rolling jowls, the gardenia blazing from the buttonhole.

1000 Hotel Positions Open!

Hotels, Restaurants, Clubs, Apartments, Institutions, Schools, Colleges, Hospitals, etc., Everywhere, Need Trained Men and Women. Over 70,000 High-class Positions Paying $2,500 to $10,000 a Year Are Open Each Year in the Hotels of the United States. Attractive Feet

Lose their charm by crooked heels

THE shapeliest foot and trimmest ankle lose their charm, and your whole appearance suffers, when your heels are crooked or your shoes "run-over".

They spoil the grace of your walk by throwing your body out of balance, causing the ankles to wobble and thicken. This unnatural strain on the ligaments is often the cause of weak ankles, tender heels and leg pains.

To correct this fault, wear Dr. Scholl's Walk-Strate Heel Pads. They make you walk straight by equalizing the body's weight, remove all strain and make walking a pleasure. You save more than their cost in heel repairs alone, and preserve the shape of your shoes.

Dr. Scholl's Walk-Strate Heel Pads are soft, comfortable, and quickly attached inside any shoe. Sizes for men and women. At all shoe and dept. stores and leading drug stores. 35 cents per pair.

Dr Scholl's

Walk-Strate Heel Pads

Made by the Scholl Mfg. Co., Chicago, World's Largest Manufacturers of Arch Supports, Foot Comfort Appliances and Foot Remedies.

LEARN TO WRITE WRITE TO EARN

"Genius itself must learn the machinery of expression."

Rupert Hughes

"SINCE authorship is essentially a matter of home work," says Rupert Hughes, biographer of *George Washington: The Human Being and the Hero,* "it is one of the few arts that can be taught by correspondence. The Palmer Institute, under the presidency of so eminent a literary artist as Clayton Hamilton, and as conducted by Frederick Palmer and his associates, is qualified to render invaluable aid in the art and business of authorship."

Palmer training is uniquely personal. It can develop that talent of yours until you, too, can write the kind of stories that tug at heart strings . . . that grip the imagination . . . that editors buy.

PALMER INSTITUTE OF AUTHORSHIP
Dept. 122-W, Palmer Building, Hollywood, Calif.

"Well, if it ain't Bathhouse Gus!" said he.

Percival Anthony corrected him. "That's my grandfather," he said. "He was a great man."

"To be sure he was," agreed Mr. Sweeney. "Well do I remember when he smashed the window with a baseball and all the cops were after him. Those were the days when he had but the one pair of pants to his name, and they had holes in the seat of them!"

Mr. Alexander Wayne came through the doorway, mentally considering a speech of anger and reproof. "Percival—" he began.

"Say, mister," said Spike, suddenly ceasing a contemplation of General Zachary Wayne, "is Perce's pitcher in that paper you got?"

Percival Anthony's knees shook beneath him. "Uncle Alexander—" he quavered.

"Is it Alec Wayne, then?" cried Mr. Sweeney, with ascending eyebrows. "D' you mind the time you and Jim Sweeney ran away to play Injuns in the Bronx?"

Even to Percival Anthony's apprehensive eyes, his Uncle Alexander suddenly looked exceedingly sheepish.

"Is that the guy that Pop run off with?" asked Spike, examining Mr. Alexander Wayne with covert hostility.

SURPRISINGLY, Uncle Alexander began to smile. "Haven't had such a good time since!" said he. "What's Jim doing now, Mr. Sweeney?"

"Contractin' business," said Spike's grandfather, looking slowly at Anthony Wayne, then Zachary Wayne, and finally Betsy Wayne. "Where'd you get this bunch of tough customers, Alec? A more disagreeable set of mugs I never did see!"

Uncle Alec regarded the pictures with immense disapproval. "W-e-e-ll, they're not mine. My brother and his wife wanted some ancestors, so they set those up beside Grandfather Wayne. When they got into society they couldn't very well go around telling people that the family used to live next the gas works, with never an extra shirt to its name, could they? Of course the pictures are silly; but there's no harm in them."

"Uncle Alexander," piped Percival Anthony, "did they really call my grandfather 'Bathhouse Gus'?"

All Uncle Alexander contributed to the conversation was a brief gurgle, and Mr. Sweeney took him by the arm. "Spike, you and Perce stay in here till we get back," said he. "We're going into the next room to debate on hanging the both of you!"

PERCIVAL ANTHONY sat down on a hard chair and looked at the ancestors. Even if they were not his, they seemed singularly malignant. And he could hear the shrill voice of Rebecca declaiming from one of the upper floors. Retribution was at hand, even if Grandfather Desmond Augustus's trousers had not been all they should. As for that matter, neither were Percival Anthony's.

"Wh-what do you s'pose they're going to do to me?" he asked in an agonized whisper.

"Gran'pop'll fix it," said Spike, ruminating over Mad Anthony's portrait. "He's a great guy. Gee, you're lucky you ain't related to none of these sour-looking boids. They gimme the creeps."

"And now, Percival," said Mr. Alexander Wayne, appearing in the door and speaking with severity, "you're to pack up your stuff and come with me to the Adirondacks. I've got a nice camp up there by a lake, and I've decided, er-er, that, as you're my nephew, I should, er-er, share the responsibility of looking after you."

Percival Anthony's head swam. "Gosh!" said he ecstatically. "Uncle Alec, can't we take Spike too?"

"Take him?" said Uncle Alexander. "I should say we will. Somebody's got to keep you out of mischief. Bring along the dog. We need one!"

Percival Anthony felt so happy he thought he would probably cry. So he turned to look at his grandfather's portrait instead.

"The trouble is," whispered Uncle Alexander to Mr. Sweeney, "that now he knows about his ancestors, he'll probably spend the rest of his days thumbing his nose at them!"

He was quite wrong. For the first time in his life, Percival Anthony was regarding Grandfather Desmond Augustus with something akin to respect.

"WHENEVER I see an odd companionship," says Archibald Rutledge, "I think here is a faint glimpse of what shall be the way of the world when the millennium comes." Next month, in "Strange Comrades," Mr. Rutledge describes some of the most amazing companionships that he has witnessed between utterly dissimilar animals, birds and reptiles—companionships just as amazing as the lion and the lamb attraction of Biblical allegory.

"Love's a Lie!"

(*Continued from page 41*)

fair and calm, full of a comforting strength. How well Lars had done, after all! Yes, she was glad she had helped him. You didn't need love, that was plain—just friendliness and common sense.

"I'm so glad you're here!" Helga found herself saying warmly. "Lars has been lonesome here alone. Here's a little present I wanted you to have."

"For me? Well, that's good, Miss Lind! That's good for you to do that! Look, Mr. Larsen—a tablecloth and napkins—all hemstitched! Ain't it beautiful? Now, that *is* good for you to do that!"

"Oh, I wanted to!" Helga said.

Selma had on the blue silk, and Helga saw Lars keep looking at it often, as if it were very beautiful. And, queerly enough, it did look beautiful. It was the raiment of a woman about to come into her place as a home-maker. It brought out th

"Mum" is the word!

"Mum" is the effective deodorant cream for neutralizing the unpleasant odor of perspiration.

"Mum" is an essential part of the daily toilette. Particular women insist upon their personal daintiness being above reproach.

In the morning a touch of "Mum" to the underarm, and wherever perspiration is closely confined, is a positive guarantee of freedom from body odors—for all day and evening.

The widespread use of "Mum" with the sanitary napkin is proof not only of its effectiveness but also of its entire safety.

"Mum" is 25c and 50c at all stores. Or from us postpaid. Also special size of "Mum"—10c postpaid.

Mum Mfg. Co. 1121 Chestnut St., Phila. Pa.

"Mum" *prevents all body odors*

BOYS!

blue of her eyes, and gave her a "dressed-up" look that was obviously not often hers. No, it was better not to have love, Helga thought again. Love, or the hunting after it, was a painful thing; this was right and sensible.

Then the Reverend Mr. Fields and his wife came, and Lars and Selma stood up beside the big heater and were married.

IT WAS just before Selma's first response that Helga was suddenly startled by the look in the face of the big woman in the blue silk. It was a look of terror, lostness. And something said, inside Helga, "You've done wrong! You've done wrong! Stop them! *They don't love each other! You've done wrong!*" And she opened her lips to call out to the minister; but no words came.

And then the voices went on, and they were married, and Helga had not spoken.

"I know you'll be very happy," Helga said, when she went.

"Ay guess so, Helga!" said Lars. His face worked a little as he spoke.

"It was good that you come," said Selma. "Mr. Larsen say you make the curtains. I can't tell you how good that is for you to do! I never thought I would have such a home of my own!"

But Helga could not look at her. Back of that pathetic eagerness for a home, Helga could hear that feeling of lostness still beating. She felt as if she had betrayed someone dear to her.

Outside, the wind had come up, and a fine biting snow was sweeping up the Hollow. Helga drove into it as into a storm of memories. She tried not to think of the look in Selma's eyes. But it crowded through the snow and pressed against her vision. The wind began to say things to her: "You've done wrong—done wrong! You've made a mock of love!" "There isn't any love!" her heart shouted back.

Her father was still waiting up when she came in.

"Well, how was it?" he asked her.

"Oh, all right. Selma's really nice." But her voice was dull.

Even after she was in bed, with the quilts tight up under her chin, the wind kept shrieking against the walls of the house—"*You've done wrong—done wrong! You've made a mock of love!*"

But *love!* What should two middle-aged folks like Lars and Selma have to do with love, anyway, even if there was such a thing? Wasn't she getting a home? Wasn't he getting a housekeeper? But the wind kept shouting.

In the morning she felt numb, as if her body and soul had been in one cramped position all night. The blizzard was there. Helga's father thought she would be foolish to go down after the mail. But at the table they one and all began to ask questions about Lars's wedding, and she got up and went out after the horse to get away from them.

At the office, 'Dolph Bennet tried to dissuade her from going. "It's drifted bad past the bridge—no use your trying it, Helga!"

For an instant Helga wondered why she had been foolish enough to come this far. Then her eyes fell upon a letter with a foreign stamp: "*Mrs. Lars Larsen*"—from Sweden!

Without stopping to analyze the feeling

Brighten

dull, heavy Eyes *safely!*

Are You Ever Ashamed of Your English?

DO YOU say "who" when you should say "whom"? Do you say "between you and I" instead of "between you and me"? Do you mispronounce common words in your speech or use them incorrectly when you write?

Many a man has been held down all his life and suffered untold embarrassment because of mistakes in English.

You do not need to make these mistakes any longer. Right at home, in the privacy of your own room, you can make up the education you missed in the days that you should have been at school.

The International Correspondence Schools will teach you, just as they have taught thousands of other men and women, by a simple new method which shows you instinctively which word to use and how to use it.

Keep Him Healthy and Happy!

A dog well-fed and well-housed is a dog well satisfied with life! But do not make the mistake of feeding *your* dog too liberally on the left-overs from your own table. Remember his constitution is radically different and requires a different diet from yours!

To provide the essential bone and-body-building elements which your dog needs, to cleanse his teeth, sweeten his breath and keep his digestive organs in good condition, you can safely rely upon Spratt's. Because it contains *meat and wheat* in correct proportions, Spratt's is far better for your dog than a steady fare of table scraps or meat alone.

Your grocer, druggist, pet shop or sporting goods dealer can supply Spratt's or get it for you on request. *Insist on the genuine.*

Send 2c stamp for pamphlet No. 97. It contains valuable advice on care, feeding and diseases of the dog.

of necessity, that swept her, she found herself saying, "Well, I'll go as far as I can!"

After the turn past Overhiser's, she could scarcely see the comforting red of Net's blanket. The wind came full in her face, and the snow cut like a million knives.

"Keep in the road, Net! Keep in the road!" she began to say. Once Net stopped dead still, and Helga got out and found a great branch blown across the road. She pulled it out of the way. When she got back into the cutter, the seat was full of snow. Oh, she had been foolish to try it!

But she plowed on through the storm. There were places in the Sweden Hollow Route where the road was bare to the stones, and others where huge drifts piled up like small white hills. Helga began to talk to her horse, gently, persuasively:

"There, Net, got over that drift, didn't we? We'll make it! Only a couple of miles more! Steady there, Net, steady!"

Just beyond the bridge, she came upon a drift so high and so icy that she could not urge Net into it. She had to turn around, though it took a long time, and head for the Mannings. She called out as she drove in, and Len came to the door.

"Can I put my horse in your barn, Len? Can't get past the bridge, and there's mail for the Larsens."

"Sure, Helga. Wait. I'll get another blanket for your horse. Some day! Better let me take the mail up."

But now she had come this far Helga somehow wanted to take the letter up herself. So she went on, the letter in the pocket of her sheepskin jacket.

IT WAS around the first bend past the bridge that she saw Selma. She had fallen in the snow, in a queerly lifeless huddle, and Helga struggled to her across the ditch. She had known at once that it was Selma. There was no other big woman like that up this road.

"Mrs. Larsen! Selma!" she shouted at her. But Selma did not answer. Helga shook her, with numb fingers. She tried to lift her, but could not. It was nearer back to the Mannings', so she turned, went stumbling through the drifts. She was tired now and it seemed a long way. What had happened? What *had* happened? She crossed the bridge, tried to shout for Len, but her throat was raw and useless. So she kept on.

Together, she and Len half carried, half dragged the big figure of Selma to Len's house, into his warm kitchen. Beside the fire, Selma roused almost at once.

"You go get Lars!" Helga commanded Len.

Len's folks were away for the day, and so Selma and Helga were left alone in the Manning kitchen.

"Now, what is it?" demanded Helga.

"I missed the way," said Selma weakly, as Helga rubbed her hands.

"Yes," said Helga. "But wherever were you going—on a day like this?"

"I was going back to Yamestown," said Selma.

"To Jamestown!" echoed Helga.

Selma closed her eyes tiredly.

"I ain't no business to come here—mebbe you know, Miss Lind! But I guess you ain't ever been away from your own folks like me. I got awful lonesome, Miss Lind!"

"Yes—I know!" said Helga.

"The doctor, where I worked at, he did it for a joke-like on me, to put that in the paper—and then it got so it seemed kind of real. Lars come from Smaland, Miss Lind; so I make up my mind. You do for others so long, you get so you want your own place!"

"Yes," said Helga again. She had taken off Selma's wet, icy skirt, and her heart caught at the knee-deep flounce of crochet about the bottom of her petticoat.

"But I didn't count on its being like it was, Miss Lind! I think it yust be for a housekeeper-like—only it would seem like mine more. But it wasn't that way. The doctor's girl write for me—such silly letters, Miss Lind! And I think Mr. Larsen get somebody to do it for him, too; but Mr. Larsen, he write himself, and he mean all them silly things! He wanting more than a housekeeper—and I feel yust like cheat, Miss Lind. He—he so good—an' so pleased—I can't stand it! It's like it ain't honest between us; so I come away. And I go wrong way, I guess, and get all mixed up and I get frightened and terrible cold. And when I get out in that storm, it yust seem like it break my heart to leave that house—only I like evenness in a bargain! It was yust luck you come on me, Miss Lind!"

HELGA, for all her youth, gave Selma the smile of a mother as she bent above her.

"No, it was something more than luck," she said gently. "But, Mrs. Larsen, don't you see, when you said that about its breaking your heart to leave, that that makes it all different? It looks to me, no matter how things began, that now it would be right to stay. It'll hurt Lars terribly if you go—he's been counting so on having his own home at last. And I—*I* hope you'll stay; we need folks like you up the Hollow! And you *do* like Lars, don't you?" she demanded.

"He seem yust like my own people!" Selma said, as if she could say no more. "Miss Lind, he know the Bjorkmans back home. Peter Bjorkman was as my own brothers! And he speak of the gooseberry bushes and the poplars—yust like my own!"

"Well, he couldn't want more than that—to have you think him like your own!" said Helga. "That—that *is* love, isn't it?" Her own voice groped.

The big face lighted strangely from within.

"You think that, Miss Lind? You think yust that be love? It *did* seem like that to me when I lay in the snow!" Wistfulness sat strangely on that big woman, but Helga did not think her funny.

"Yes, I think that's love!" said Helga. "And I think if you tell him—just like you told me— Oh, here he comes now!"

Then the men were in the house, and Helga had a swift fear of the moment. But, after all, it was not hard.

"I think Mrs. Larsen can get back now, Lars," she said. Then, to satisfy the curiosity in Len's eyes, "Funny thing, to get lost going to the mail box, wasn't it?"

Into Lars's eyes, that had been bewildered and frightened, relief and gratitude came flooding.

"You bane rested all right?" he asked Selma, with such relief from hurt in his

Puts New Life Into Your Feet

If you can't indulge in long walks, stand on your feet for hours, or enjoy an afternoon of golf or an evening of dancing without being punished by your feet, you are suffering a needless handicap.

To quickly rid yourself of all distress, massage your feet with Dr. Scholl's Foot Balm. It will put new life, strength and endurance in them and give you real foot comfort.

Dr. Scholl's Foot Balm is delightfully soothing, cooling, healing. It stimulates the skin, opens the pores, removes impurities, tones up the muscles. Stops burning sensations, quickly relieves all aches and pains, quiets corns, callouses and bunions, dispels foot odors.

At all drug, shoe and dept. stores—35c per jar.

Dr Scholl's Foot Balm

Write for free sample to The Scholl Mfg. Co., Chicago, World's Largest Manufacturers of Arch Supports, Foot Comfort Appliances and Foot Remedies

Floor with OAK

for beauty, economy, and permanent value. If you are building, specify Oak for all principal rooms. If you live in a home with worn floors, lay Oak over the old floors, modernizing the rooms as no other single improvement will do.

OAK lends beauty and dignity, harmonizing with furnishings of whatever period.

OAK makes a permanent floor, and the surface is easily kept in perfect condition, promoting health and saving housework.

Oak floors add value to property for rental or sale, at a negligible expense compared with temporary perishable floor coverings.

voice that Helga knew suddenly that Lars *had* meant those letters, paper girl or no!

"Yes," said Selma. "I'd like to get home!"

"Oh," said Helga, her throat hurting strangely. "And here's a letter for you, Mrs. Larsen! I almost forgot!"

As Selma looked down at the unfamiliar address, a deep flush reddened her fair, broad face. Then she lifted her head with a quick, sure pride. *She* was *Mrs. Lars Larsen!*

"My mother's written," she said.

So the Larsens went home. *Home!* The word drummed in Helga's head as she got Net out and headed for town.

IT WAS when she came to the little stretch of woods past the schoolhouse that the storm lulled suddenly, and all the world about her was white, weighted with snow, everywhere a hush and a peace. Helga stopped the horse for a moment, with something new and blessed crowding into her heart. Why, there *was* a love—a good, sweet thing built on understanding and honesty! *There had never been honesty between her and Rell Stannard!*

And that admission was like precious healing ointment, for Helga Lind was honest. She turned her back upon the memory of Rell Stannard as if he had never been.

The next morning she came down early, earlier than anyone, she thought. But her father had the fire already roaring in the frosty kitchen and was standing before the stove as she came in—her hands filled with her little store of notes from Rell Stannard, his picture. She hesitated, and as she paused her father spoke.

"That Mr. Sloan called up last night," he said slowly. "He's in town again—wants to paint some pictures of the Hollow. Would you mind if he should board here a couple of weeks, Helga?"

Helga had an instant's feeling of fright at the vividness with which the quiet kindness of Rush Sloan's eyes came to her.

"Why, no, I don't mind!" she said easily.

Then she lifted the stove lid, and the notes and the picture dropped.

Emanuel Lind's eyes came to hers in quick, demanding question. She only smiled, but her eyes were clear and young, and they met his squarely. And it was quite as if she had said aloud: "You were right, Father, quite right! Love's no lie—*no lie!*"

"I MADE a Million Dollars, but I Haven't Got a Cent" is the confession of an advertising man who had a hard time learning the lesson of thrift. Ninety per cent of the money he spent he does not regret—it's the ten per cent that he could easily have saved, and which, safely invested, would have given him a good, sizable income to-day, that he is sore about. However, this isn't an article about a prodigal son and fast living. It is the financial experience, on a somewhat larger scale, of many a man with an "easy come, easy go" habit. Next month you will read how this man was induced to change his ways and what his plans for his future financial security are.

"I'm Having a Great Time Playing Dead!"

(*Continued from page 45*)

from job to job. For two years he filled positions as office boy and junior clerk with publishing houses. In 1909, the particular publishing house with which he was associated was undergoing a slack period, so he set out to find a new position.

He obtained one with the Indiana Quartered Oak Company. There he did general office work. The company handled some flooring; but this was a small part of the business, and gradually Von Bremen began to take care of it. He solicited orders and was sent out to supervise the laying of the floors. He was moderately successful at his job. But the firm did not care for the floor-laying business and decided to give it up. Von Bremen was nineteen. He had an idea that this floor laying might be worthwhile. Whereupon, he went to the head of the firm and asked if he might use the same name if he went into business for himself. He wanted to start the Indiana Flooring Company. As there would be no competition with the established business, which was selling finished lumber, his boss consented.

Von Bremen had no money. His earnings had been very small. He put the matter up to his father, who lent him two thousand dollars. Thus the Indiana Flooring Company came into being in a room twelve by twelve, in which there were two desks and a typewriter. Back of the office was a shed which would hold just one car of flooring. As soon as he had his first orders, Von Bremen induced one of his school friends to come with him. In a few months four young men were working in that little room. They were all friends who knew each other well.

"We all belonged to the same fraternity in the Commercial High School of Brooklyn," said Von Bremen. "We were all very much in earnest and desirous to get somewhere. I had gained some knowledge of the business, which I passed on to the others."

HERE one of his four associates took up the story. "D. W.," he said, "seemed to have inexhaustible strength. As soon as we got well started, he made the buying his main end of the work. He avoided selling whenever he could. He did not like to mix with people in general. He is fond of his personal friends; but he avoids contacts whenever possible."

This unusual trait in a man who has built a business that depends so greatly upon selling was commented on again and again as I talked with the men. Von Bremen is not what is termed a "good mixer."

"He does well enough when he has to," confided one of his associates; "but I never saw a man get out of it so steadily and consistently. It has always been hard to get him to meet anyone. He could sell over the 'phone, though, better than any other man I ever knew. But he left the *personal* selling to us.

"We worked as any four young men who knew and liked each other would work—*together*. We started in business by *selling flooring*, not by laying floors. At

Digitized by Google
Original from STATE UNIVERSITY SYSTEM OF FLORIDA

hat time contractors usually did their wn laying, buying the flooring and emloying day labor to do the work. D. W. anted us to do the laying. He felt it was he only way to insure satisfaction to the wner of the building. It was hard work o convince a contractor that ours was the etter plan; but we all hammered away at , and I personally give D. W. all the redit for changing the attitude of New ork contractors toward floor laying. o-day it is the custom for contractors to ire expert floor layers to put in floors nd furnish the lumber for the job.

"We worked hard. But we all think D. W. worked harder than any of us, and e know that he kept the longest hours. His mail was off his desk before anyone se arrived. Snow, hail, rain made no ifference. One morning when there was a lizzard, and the snow was two feet deep, lmost everyone else was late. The first an coming in asked:

"How on earth did you manage to get ere from Brooklyn?"

"Well," said D. W., "I woke up about our. It was snowing hard, so I got up and eared our sidewalk and made my coffee" he usually did this, as he would not have nyone get up that early to wait on him), and came on to the office. I thought I ould make it on time."

For four years the history of the busiess was one of long hours and hard work, ith a moderate amount of success that iffered in no particular from that of any oung firm working intelligently and with iligence. During those four years the olicies of the company were developed nd established.

NO JOB *is too small to be worth while,*" was the first, a policy that is often dopted by a firm just starting and needing rders, but which is frequently dropped in avor of bigger things as the firm succeeds. The managers of the Indiana Flooring ompany stoutly affirm that this is a gross rror. To-day they will cheerfully engage pon any commission, from the laying of a now window floor ten by ten feet—the nallest job likely to come to them—to a ontract for the floors of the tallest skyraper.

The young men all studied the building ermits, and as they walked the streets atched for any sign of building. They ent after every possible order, and when hey obtained one carried it out to the etter. This giving of one hundred per ent of what was promised may not seem xtraordinary; but in the building trade at hat time substitution was not exactly rowned upon. Customers were not lways intelligent about lumber, and a clear oak floor" sometimes contained oards that no lumber man would pass as clear." Von Bremen decided that his lear oak floors would always be clear to he last board; and this established the econd policy of the firm. Through hard imes, as well as good, the company stuck o this policy.

The third policy developed was, *See very job that was lost, and find out why it ad been lost.*

"In actual practice this was not ossible," confided one of the men; "but ve came as near to it as time permitted, nd it filled every odd moment. We lid manage to see fully sixty per cent f the jobs we failed to get contracts for,

Young outdoor men wanted

Interesting, vigorous outdoor work in a growing organization where merit wins advancement. Good starting wages. Permanent positions and a real future for men who make good. Our present field force of Davey Tree Experts cannot meet the increasing demand. So we are selecting now, to enter our employ, a few sturdy, clean young men, thorough Americans, single, between 20 and 30 years old, free to travel, industrious, with good practical education, and able to give good references. Write for qualification blank to serve in place of personal interview. The Davey Tree Expert Co., Inc., 855 Federal Bldg., Kent, Ohio

and we found out why we lost them!"

So did some of the people who had handed the jobs to other floor layers, and in many cases a lost order proved in the end a customer gained.

From its incorporation to the period immediately following the World War, the business was a modest success. It had paid no dividends, because Von Bremen and the other officers decided that every penny of profit should go back into the business. When the slack time came, in 1918, the company was in good shape financially; but it had little business. Von Bremen and his associates agreed that to keep the finances in good shape they would retrench in every possible way. They reduced their working force. Von Bremen became bookkeeper, and typed his own letters. He looked about for some way to keep things moving.

It was a year of coal shortage. He persuaded the owner of a tract of timber on Long Island to sell it, in face of the dire need for fuel. Then the young men of the company journeyed to the tract in trucks, supervised the cutting, and delivered it to eagerly waiting customers.

By filling in with one odd job after another, the company not only lived through the slack time but kept its financial standing unimpaired.

IN 1919 things began to pick up a little. Von Bremen had kept a watchful eye upon the building situation, and he felt confident that before long there would be a rapid expansion in all lines of building. Using the excellent credit of his company he was able to buy a large amount of lumber. Hardly had this been secured when building began. Von Bremen's was one of the few firms that was ready for it. He had bought when the market was dull. The company now reaped the reward of his foresight. Prices advanced rapidly, and the Indiana Flooring Company entered upon three wonderful years, years in which business expanded and profits increased at a rate it had not before known. These profits still went back into the business, so that at the end of the three years it was recognized as one of the most important in its field.

In 1922, Von Bremen heard of an opportunity to buy one of the oldest parquetry-floor plants in the country. The owner was getting on; he had no sons; he wished to sell. Von Bremen was interested, so was another parquetry company. He faced a difficult situation. The company that he wished to buy had a very high-class clientele and did only the finest kind of work; the Indiana Flooring Company, on the other hand, did all kinds of work.

Von Bremen feared that this fact might be detrimental to the parquetry company if the two were amalgamated. However, he decided to try, and buy, and at the same time induce the rival parquetry company, which was also interested, to come over with him as well, so that it would be eliminated as a competitor. Without revealing his identity, he proposed through his lawyer that he purchase their business and good will and make a merger of the two parquetry companies.

When the negotiations were completed the competing company had gone out of business and its executives were working with the old parquetry company, which

Digitized by Google
Original from STATE UNIVERSITY SYSTEM OF FLORIDA

was now secretly owned by the Indiana Flooring Company. Von Bremen worked the two companies independently until he felt that the news of the purchase would not affect the clientele of the purchased company.

When, a year and a half later, the Indiana Flooring Company had openly admitted its purchase, it stepped into the rank of major importance. Its operations continued to increase, its success became more and more marked. Von Bremen's steadfast determination to touch no penny of the profits except to enlarge the company made two additional purchases possible.

In 1923, one of the supply mills from which hard maple was purchased went into the hands of a receiver. Von Bremen, who was its chief customer, bought the mill. The year following, there was another opportunity for the favorable purchase of a mill at Coal Grove, Ohio. After it had passed into Von Bremen's hands, he decided that it would be worth while to try to bring the lumber needed for its operation up the Ohio River. River transportation would be cheaper than rail; he could pay the lumbermen in the South more, and still make a fair profit. But there was no transportation available that was satisfactory, and the project of running barges for the mill alone was too expensive.

Von Bremen visited about the neighborhood and found a steel company that would also benefit by river transportation in place of rail. He proposed to the steel company that they combine to take care of the needs of both. The steel company could ship its nails and iron down the river, Von Bremen could carry his lumber up the river. The steel company agreed, and the Indiana Bellfont Company was formed. It tows barges loaded with steel and iron south on the Ohio and Mississippi, and returns these barges, loaded with lumber.

In 1926, with the affairs of the company running at the highest peak they had yet reached, Daniel W. von Bremen sprung his great surprise on his associates, and we get back to the beginning of this article.

BUT from this point the story takes two roads, one traveled by the Indiana Flooring Company, the other by Daniel von Bremen.

"What are you doing?" I asked bluntly. "You can't possibly retire at thirty-five."

"No," he replied. "I am still in business; but it is a new business. I bear the title of vice president and treasurer of the Appalachian Lumber Company, and we are building a huge hard-wood sawmill near Pickens, South Carolina, and running a thirty-five-mile railroad spur to it. I don't know much about constructing lumber mills, but I am having a good time learning."

If there is any doubt in your mind that Daniel von Bremen is having a royal good time learning, you should have heard his tone when he made that simple statement. Nor is there, I think, any doubt that the potential owners of the Indiana Flooring Company are having a royal good time demonstrating their ability to run the company.

Putting Your Best Foot Forward

(*Continued from page 34*)

most balls is always the most skillful man in the game.

Now, it must be admitted frankly that in this somewhat helter-skelter world there exist other elements of success than ability and industry. There is good fortune; there is plain luck; there is the happy circumstance of being on the spot at the exact moment when a man like yourself is indispensable, and there is influence—pull.

But not all the luck nor all the pull in the world can do more than give you your opportunity to show what you can do. They can give you a shove forward; but you must keep up your own speed after the momentum given by the shove has died. Something may give you a chance to display your wares; but nothing and nobody but yourself can actually put them to practical account.

Not everybody can start shooting at his pet mark in the beginning, nor can everyone select what mark he wants to hit. Experience must come to bear. We must work, and when we are at the commencement of our careers we cannot be too "choosy." We must accept what employment offers. Sometimes it will require years of actual experience in labor before we even become aware of a particular adaptability, a peculiar adeptness in some line. I'm afraid in many instances it must be a matter of fumbling around. It was with me.

But, as soon as you can, pick out what you want to do all your life and work toward it. And while you are working toward it, keep on day after day putting your best foot forward.

MAYBE we never can get into the exact line of work we like or toward which our ambitions lie; but that does not bar us from a satisfying degree of achievement. It is a great deal better to be moderately successful as a salesman, when we desire to be an actor, than it is to lay down on our job of selling soap and refuse to put forward our best foot until we can put it forward on the stage. Keep your ambition, and work toward it; but meantime give all you have to the job in hand.

Mankind is peculiarly adaptable. We can do many things well. I believe each of us can do some one thing superlatively well; but it is not always possible to find at first—or ever, perhaps—exactly what that is. We are plastic. We fit into circumstances which surround us. Fortunately, we can do moderately well in many diverse lines. For instance, I know an actor who was successful in his work to a degree, but who ran into a period of ill fortune, when every play he appeared in was a failure, and for a couple of years he was out of work. But during that period he busied himself. He became a temporary real estate man. That was five years ago. He discovered he could do so well handling real estate that he never has gone back to the stage. The qualities which made him a fair actor made of him a first-class real-estate salesman.

I remember my own beginnings. I was a fumbler, feeling around blindly. I had very little idea what I ought to take up as my life work. I have been a stock clerk in a book store, a shipping clerk, assistant to an Armenian vender of cheap jewelry, driver of a grocery wagon. I even sang a humorous baritone in church choirs and thought of making that a profession. I studied art with the idea of becoming an artist. I used to amuse myself writing things. It was a game with me; but it was indicative. If only somebody had recognized it as such and encouraged me or, rather, guided me, I might not have been an octagonal peg in a triangular hole so long.

But when it came to going to work, I took an opening—one of those openings. A friend got me a job as office boy in a chair factory. That certainly wasn't putting my best foot forward. The chair factory got rid of me about as soon as it found I was around. We were mutually antagonistic.

Then I had to do something and, still fumbling, I got a job in a law office as clerk. The first thing I knew I was studying law and going to law school nights. In three years I was graduated and was admitted to the bar. But I never wanted to succeed in law. I didn't like it. There wasn't anything about it that appealed to me. Believe me, my best foot was still to the rear.

Pretty soon the law business played out, or, rather, my funds for paying overhead played out, and I became a reporter. That was squeezing that best foot toward the front, anyhow. I was a good reporter, because I loved the work, and it was, as the saying goes, up my street. But still my best foot lagged some. I wasn't writing the sort of thing I could write best. The stories I wrote for the fiction market didn't sell. I fumbled around, and, I must admit, more by good luck than by good judgment I hit upon what I could write best—and things began to move.

I SET a mark in the beginning. This mark was to get a story published in a certain great and historic magazine. I aimed and tried and waited, and pretty soon, in five or six years, I sold them a story, and then a dozen others. So I had to look for a new target.

Next, I wanted to write a novel and have it published by a certain publishing house. I wrote one, and threw it away because it was so very bad. I wrote another, aiming for my target, and this time I hit. I sold that whole novel to a magazine to run as a serial, for twenty-five per cent less than that same magazine will pay me for a short story to-day. But I was rich and happy over it—and my wife and I took our wedding trip. This was five years after the wedding.

My best foot was right out leading the procession at last. But, sad to say, I was thirty before I really found myself at all. Now I am forty-five. I've worked at my trade in a proper manner for fifteen years, and have got as far as I have.

And so on and so on. Always aiming, and then always having to aim a little

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

beyond. If you ever become satisfied, you are finished. The Bible specifies a number of things you must not covet; but it issues no command against coveting another and higher degree of achievement.

The whole business sifts down to this: First, discover which is your best foot. Sort yourself out. And when you have found which foot is the salubrious foot, spend your time in putting it forward.

There is some line of work which each of us is more fitted to do than any other line of work. We are peculiar machines. Unfortunately, we seem to be so arranged that we can do almost everything if we make enough effort, and that makes it a bit difficult to decide what it is we can do best. But in every one of us resides particular capabilities. Every individual can do some one thing better than he can do anything else; and we should take every care and bend every effort to discovering what that is.

But—and here's the pity—if I had set myself at twenty and worked with one end in view, plugged to get that best foot out, I would now have been working at my trade for twenty-five years, and probably would now be ten years further ahead than I am.

AFTER all, the way to sell a thing is to exhibit it. The way to sell yourself is to exhibit yourself. Any country store can put goods in the window; but in New York men make large salaries by raising window dressing to the height of an art. A well-dressed window sells to the public the goods exhibited. Putting your best foot forward means just this. It means showing the world what you have to sell.

And again; if you are a grocer, you surely wouldn't dress your window with dry goods. If you are a born musician, you don't try to exhibit an insurance broker. I'm thinking of a case now, a most regrettable case.

I am thinking of a man of my own age who has just found himself. For several years he has been what we would term a successful man. In college he was extremely popular, a good athlete, a skillful musician, a pleasing personality. When he was graduated he took the first good opening which offered, and that was in a manufacturing concern. With his equipment, he forged ahead. Using his best foot. But always he remained on the manufacturing side. He knew that wasn't what he wanted to do or what he could do best, but he did it and did well at it.

Then a tremendous misfortune came to him. The concern by which he was employed got into post-war difficulties, and in middle life he found himself without a job. That was something over a year ago. He sat down to sort himself out, and to find if he had a best foot. What had he wanted to do all these years? What line? What kind of work?

Friends—for he always had a host of friends—offered him openings of one kind or another. But he selected one. This time he *selected*. It was to take a position in a stock-brokerage office. It was a spot where his personality would tell, where his individual make-up would show to advantage. So he went into that firm, and now, after a little more than twelve months, he is a partner, making three times as much money as he ever made before, and he is a dozen times as happy.

Now You Can Write SHORTHAND in the plain A-B-C's

WHY have you never learned shorthand? You know it would help you every day. But ordinary shorthand requires months and months of study—at great expense.

Now comes a remarkable new system that can be learned in an astonishingly short time. You use the ordinary letters of the alphabet. Speedwriting is so simple that you can master its basic principles in your own home in a single hour of study. So compact that in three to six weeks, at home, you can acquire a speed of 80 to 100 words a minute with pen or pencil—200 words a minute on the typewriter.

Speedwriting
The NATURAL SHORTHAND

Everywhere this new shorthand has been greeted with enthusiastic approval. High salaried executives, sales managers, ministers, reporters, lawyers, engineers, teachers, men and women in all the professions and all lines of business, as well as those just preparing to enter the business world—all unite in their praises of Speedwriting.

Miss Emma B. Dearborn, eminent authority on shorthand, is the originator of this wonderful new system. It is built out of eighteen years' experience in teaching practically all systems in such leading educational institutions as Columbia University, the University of California, Simmons College, Boston, etc.

Mail Coupon for FREE Booklet

This booklet will tell you just how Speedwriting can save time, eliminate drudgery and increase efficiency in your particular line of work, why it is so easy to learn, so accurate and practical. Mail the coupon NOW.

At noon—each day

JAPAN TEA

Brightens your afternoons

For just ten minutes—at noon today—take it easy over a cup or two of Japan Green Tea after luncheon.

Drink it slowly. *Linger* over every mouthful.

Then, when you've quite finished, note the magical result.

Fresh and rested, you're ready for a better afternoon. And the feeling keeps.

Japan Tea is tea at its best—tea in its *natural* state, uncolored and unfermented, with all the flavor-laden juices of the fresh leaves preserved by immediate sterilization.

Specify Japan Green Tea when you buy. Packaged for the home under various well-known brands. Several grades and prices. The best you can buy will cost you only a fraction of a cent a cup

But it took years to get to it, and a business cataclysm to jar him away from his old work. And, mark you, he had been making a good average all the time. What he needed was to find the right place to set down his best foot.

On the other hand, there is a youngish man who took the other way about it. From early boyhood he knew what he wanted to be and do: he wanted to be an artist. His every act bore upon his future as an artist, everything had to give way to his ambitions for himself. He worked day and night. He studied; he took jobs on newspapers as an artist and at sadly small wages, when he might have earned twice the money in some other line. But he knew where he was going. He aimed at a definite target; he always kept his best foot forward. His life was planned as definitely as the schedule of a fast express train. . . . And he arrived. Today he is one of the six or eight greatest artists in America. Because he worked for it single-mindedly; because he sorted himself over, understood his capabilities.

I am thinking of a very old man in a very little town. He is not a rich old man; indeed, you might call him a poor old man. All he has is a pension from the Government earned as a soldier in the Civil War. But, though he hasn't two dollars to clink together, and though his name has never been heard fifty miles from home, I consider him one of the most successful men I ever met. I have known him forty years, and in that forty years he always has had his best foot forward.

In the first place, he was born with a talent for kindliness. He was born with a talent for common sense, and he was born with a great love for his fellow men. His success consists in the great accumulation of love he has made. And in the enormous stores of respect he has piled up.

I believe he is very happy, and I do not think he would swap his life for that of any other man alive. His "window" always has been "dressed" with a rare sweetness, a wonderful consideration for others. Those were his wares, his stock in trade, and he has sold them to the best advantage, getting a maximum of return on his investment. I should be disappointed in no son of mine if he aimed at and achieved the same sort of success.

THEN there are the folks who envy other folks' success. They do pretty well in their own lines, but see some fellow doing well in his line, so they tuck their best foot behind them and go after laurels in a foreign field. I know a man who threw away a notable success as a novelist to become a playwright. Why? Well, the glamour attracted him. He had visions of sudden wealth. He failed miserably. Where he could have been comfortable and prosperous, he is soured and living a hand-to-mouth existence. He sold his birthright for a mess of pottage—and didn't get the pottage.

We have to be careful about that. Pottage is all about us; but, after all, is too much pottage good for our digestions? Enough money is fine; but why go in for too much, at the expense of something fine and beautiful? We measure success by money standards. Justifiably in this commercial age, perhaps. But too frequently in the pursuit of money we throw away prosperity and satisfaction in worthy achievement. I think I can say honestly that I would rather write a novel which the people—the people, mind you, and not the critics—would love and remember and revere than to write another novel which would make me a million dollars. I believe I would rather write the first kind for nothing. But then, we writing people are a bit queer sometimes.

SUCCESS isn't having more than our neighbors. What our neighbors have is none of our business. Let them keep three cars, while we have nothing but a flivver. What of it? Maybe we have two children and they have none. Maybe we have love and peace in the family, while they have dissension and unhappiness. Maybe they would be glad to trade their three cars for our peace of mind and our flivver. With all his money, our neighbor may never have his best foot forward at all, and with our modest competency we may have it ahead all of the time. Keeping up with the Joneses is a mighty unprofitable occupation.

Nobody ever truly loved anybody else on account of a dollar, but millions of people have loved a man because of something in his heart which showed through and became visible to them. Who, for instance, ever cared if Theodore Roosevelt was rich?

Mr. Roosevelt was a great practitioner of the best foot forward; but he had so many best feet that one almost thought of him as a centipede. If I were to write an article about Theodore Roosevelt I think I would pick that as the salient feature of his life—a genius for putting forward his best foot.

So it goes. Every man and every woman is made up of complex qualities and capabilities and emotions. The blend is never the same. Each of us is strangely like everybody else, and at the same time marvelously distinct and individual. There is some one thing each of us can do better than we can do anything else. There is some one line of work which will bring us success and happiness. Everybody is entitled to both. Both are within the reach of every human being—given health and sanity.

Why, then, do we leave this most important of all decisions to chance? Or to rule of thumb? Education is a fine thing to have; but I would back an uneducated man who knew his destination more readily than I would back a man with a dozen degrees who had no idea what he wants to shoot at.

CAPTAIN JIM GILLETT, Texas Ranger and cattle rancher, knew the Southwestern frontier in the good old days when a man pulled a gun first and argued afterward. Next month, in "Quick on the Draw," Gillett relates some of his most dangerous adventures, taming wild Indians and capturing wilder white men who had gone bad. His article is full of the zest and glamour of stirring pioneer days, when life was full of drama and a man's record was told by the notches on his gun.

The Troubles of a Humorist

(*Continued from page 63*)

me, when I try to do any writing after nine P. M. I fall asleep in my chair. And there is no better way to ruin an evening. I am a firm believer in the adage that the early bird catches the most half-holidays. Although my time is my own, I get up at seven and am at the office every day by eight or eight-fifteen.

Energy? Enthusiasm? Ambition? No, Horatio Alger. The low-down is that I'd rather work from eight-thirty to twelve-thirty or one o'clock than come in at ten, take an hour or two for lunch, and get through my job at three-thirty or four. That hour leaves you between the devil and the deep sea: It's too late to go to the baseball game and too early to go home.

I don't believe in taking a given amount of work and seeing how long I can make it last. That's a good idea only when a man is superintendent of a fireworks display, a demonstrator of corn plasters in a drug-store window, or a laborer working for so much an hour. I may not be the first man to reach the office but I'm the first to leave it. The trouble with some men is that a little work goes too far with them.

TO THE question, "It's awfully hard to write a column every day, isn't it?" the honest answer is, "Yes and no." It all depends on whether you have a lock on your office door and, if not, whether you are speedy at repelling insurance solicitors, bond salesmen, clipping-bureau agents, golf-club promoters, people who want their eight cents in stamps back, and advertising wizards who want you to endorse cigars, socks, chewing gums, undershirts, and breakfast cereals.

No columnist is any stronger than his defense.

He can't follow his interference; he must avoid it.

And I'm less sensitive to interference than many writers. In fact, I don't mind noise if it isn't addressed to me personally. One of the best columns I ever wrote (I'm quoting my friends) was written in an office which the carpenters were in the act of tearing down. They had removed the east wall when I reached my desk. The idea for a column came to me when a piece of plaster fell from the ceiling and landed in my lap. I finished the article just as the west partition fell in.

I've had to write stuff under all kinds of handicaps, not the least of which was a story of the Dempsey-Tunney fight. The rain came down in buckets, and my assignment was to write a funny story of the battle at the ringside. As fast as I wrote a paragraph the rain washed it out. Finally, I crawled under the ring, and sitting in a puddle with my typewriter on a mudpile I managed to do the job in the dark and to the thump-thump-thump overhead of a bout between two prize-fighters put on as an added attraction. I don't know whether I wrote a funny story or not. But it was a good trick, even if I didn't.

"Where do you get all your ideas?"

You'd be surprised. And so should I if I stopped to think too much about it. I get most of them out of the news columns of the newspapers. A scientist in Berlin announces that cabbages have feelings. That's good for a poem or an article. An old sea captain on one of the big liners complains that modern skippers send out S O S calls for accidents like the breaking of a watch crystal. I can go a long way on that one. A report from Boston says that the chief of police is to recommend walking licenses for pedestrians.

An item like that will help me begin the day right. The first thing I do when I reach my desk is to go through the newspapers in search of some news that can be burlesqued. In everything that I write some of the press services are entitled to credit for an assist.

Then, after the "lead" for the column has been written, there comes the short stuff—the jingles and the paragraphs. The classified advertisements and personal notices bring a lot of grist to the mill. There is frequently to be found some offspring of the old one:

For Sale: Ford automobile, practically new. owner has no use for it.

All you have to do is stick a heading, "The Candid Motorist" on it.

Another old standby is this one:

For Sale: Newfoundland dog; will eat anything; very fond of children.

That has been used in every column in the country at sometime and was probably in the ship news on Noah's Ark. But every now and again some dog owner will insert a similar advertisement in all seriousness; and it is a strong column conductor who can resist the urge to give it another chance.

ONE of the first amusing advertisements sent to me eight years ago was that of a big steam laundry. It read:

Do not kill your wife
With laundry
Let us do the dirty work

It still arrives in my mail on an average of once a month. I never used it twice, but I have seen it in other columns dozens of times, and only last week I saw it in another New York newspaper as fresh picked.

Another one that never seems to die is:

Woman wants washing. Phone Calaban 2546.

You can't keep a good joke down. It has a way of popping up over and over again more or less revised. Every column writer has had the experience of firing the "gag" that went 'round the world, or at least the newspaper world. A particularly clever line, a bit of verse, or observation in one column will be copied by many newspapers. Credit is usually given in the early days of its career, but after a time it takes on new twists and loses its identity. I have seen many paragraphs from my column go on a two-or three-year voyage, and then come back to roost in some other column in my own city as an original effort. And every columnist has had a similar experience. The one about the man who called it

HAVE YOU A DOG?

THEN you should have a copy of Dr. H. Clay Glover's book, "Your Dog." Tells how to feed and care for dogs—explains diseases and proper treatment. *Mailed free* if you write to: H. Clay Glover Co., Inc., Dept. A, 119 Fifth Ave., New York, N. Y.

Blue Ribbon Dog and Mongrel—Both Need This Medical Care

WHEN it's *your* dog, breeding doesn't count. He's worth his weight in friendship, and then some.

But he needs more than your kindness and food. Especially in warm weather. For then, more than at any other time, he needs to be treated for worms. Practically all dogs, unknown to their owners, are infested with these dangerous stomach parasites. They weaken the dog's system, spoil his temper and appearance and lead to fits, distemper and other fatal diseases.

For remedy and prevention leading dog fanciers, breeders and kennel men use Glover's Worm Capsules or, the liquid, Glover's Vermifuge. Safe for all breeds and easy to give. *Puppies need this treatment monthly and older dogs regularly four times a year.*

Sold By Drug Stores, Pet Shops And Kennels

Dog authorities advise Glover's Medicines because of their known high standards in quality and safety. Their formulas have been proved most effective by fine breeders of all classes of dogs. Substitutes may endanger your dog's life.

GLOVER'S
IMPERIAL
DOG MEDICINES

Glover's Worm Capsules	65c
Glover's Vermifuge	65c
Glover's Distemper Medicine	$1.25
Glover's Mange Medicine	65c
Glover's Condition Pills	65c
Glover's Digestive Pills	65c
Glover's Laxative Pills	65c
Glover's Fit Medicine	65c

for fleas

Dogs and their owners alike will welcome this new improved flea soap. It not only does away with fleas, but keeps the dog's coat and skin in the finest condition. 25 cents a cake.

GLOVER'S KENNEL & FLEA SOAP

A. B. C. B., 865 Bond Bldg., Washington, D. C.

There's a BOTTLER *in your town*

Bottled Carbonated Beverages

These taste-tempting drinks also are known by less formal names . . . *tonics* in New England . . . *soda water* in Dixie . . . *soda pop* in the Mid West . . . *soft drinks* in the Far West . . . and we all know the *ginger ales*. Call them what you will, but drink your fill—they're good and good for you!

near-beer being a poor judge of distance has had a particularly long life. The story of the Philadelphia watchman who shot two letter carriers two or three years ago because he mistook them for Confederate soldiers is still going strong in vaudeville and musical shows; it pops up in some newspaper now and then without credit being given to Bugs Baer, who fathered it. Will Rogers's observation of a decade ago that "New York will be a great city when they get it finished" appears in one form or another in the funny columns of press and magazines very frequently. Within the past month I have seen in three newspapers a slight variation of a paragraph I wrote five years ago, to the effect that the King and Queen of England's purpose in installing a radio set at Buckingham Palace was to pick the Prince of Wales out of the air. In fact it is so long since I used it that I almost used it again, with credit to a Western newspaper."

CONTRIBUTIONS are a great help to a columnist, and the one who resolves early in life that he will be independent of them has his work cut out. He will never know many prolonged rest periods. My original idea was to write the leading article or poem myself, letting it take up at least half of the column, write such other timely paragraphs as might occur to me, and then let the contributors do the rest. I have stuck to that plan, but it has been at the cost of much outside help in the punches. The average contributor does not want to play second fiddle. He wants to see his own stuff occasionally lead the column. Now, the advantage of having good contributors is that when a columnist wants to go away on a vacation for a few weeks, or when he has a day when he doesn't feel like exerting himself, he can let them do his work for him. This makes it decidedly soft, and there are days when I wish I had let my contributors pitch instead of making them play in the outfield.

Doing a column a day every day in the year except on holidays and Sundays is no picnic; and I don't even get holidays off from the syndicate.

And then there is the matter of a column-conductor's mail. Every time I look upon a round-shouldered letter carrier I have a horrible guilty feeling. I must get a ton of mail a year that represents just so much waste effort all around. And I'm not referring to contributions. I mean press notices, propaganda and letters requesting everything, from a good name for a baby girl to five tickets to the world series "right behind the catcher's box."

As I write this article there is a letter before me asking that I give to a breathless world the name of my favorite salad!

"We are securing the favorite salads of well-known persons," says the letter, "and in this group we hope to include your own special predilections. Will you let us have your favorite salad, its name, biography, and ingredients?

"We plan to publish your contribution in a symposium which will be given to the press of the country for the greater glory of salads and the salad eater," it concludes.

Can you beat it?

Old Jupe

(*Continued from page 23*)

after were in old Jupe's cabin, evi-
y, for no sooner were his friends out
ht than he went straight there.
Hello, Aunt Lucy!" he called, and
, busy with her housework, turned to
e young man standing in the door.
De Lord bless my soul!" she shouted.
e's Marse William! How you been,
y?" And without waiting for him to
, she turned to the back of the house
e the lean-to kitchen stood.
upe!" she called. "Come here, man,
see who done come! I knowed you'd
ack!" she added, again addressing
am.
Who dat?" asked Old Jupe, peering
igh the kitchen door.
Gosh! Don't you know me, Uncle
?" asked the boy.
De Lord be praised!" said the old ne-
"Ef it ain't young Marse William!"
ure it is," said the boy. "I've got
friends at the house with me, Uncle
, and I want you to come up in the
ing and make a fire for us. Wake us,
of course. You can cook for us while
re here, can't you, Aunt Lucy? We
ght some food in the car."
hore I can, honey," she replied. "And
needn't worry about Jupe wakin' you
He's been gwine up dere ever' mornin'
kin' at dem doors. Now dey'll be
sense in hit!"
What you been doing that for, Uncle
?" asked William.
De Ole Marster tole me to," answered
ter simply; "and you tole me to keep
ke I been doin'."
Well, suppose you go ahead now and
ome firewood. It'll be cold to-night."
Yassir, I shore will. I dat glad you
I'll mek a fire in ever' room!"
d Jupe went out of the cabin to get
x, but William remained to talk with
.
What's the matter with Uncle Jupe?"
d the young man. "Sam Morgan told
e had gone crazy."
No, sir, he ain't 'zackly crazy, but
s somethin' ailin' in his haid. I
't mek him quit knockin' at dem
s, and doin' a lot of other things dey
no sense in. Seems like he wants to
n like he allus did."
illiam left the cabin and wandered
essly around the old place, memories
s childhood fairly rushing through his
n. Up at the family burying ground
ound the graves neat as could be.
ter had seen to that. "I knew he
ld," said William to himself. "Trust
le Jupe to take care of the Prestons,
l or alive!"

HE holidays sped past. William and
is friends had some great hunts. Lucy
ed for them in glorious fashion. Old
made their fires, woke them up, and
ed like himself again. William told
Morgan to supply Jupiter and
with all the food and clothes they
ed, and to deduct the cost from the
paid him by the other Preston
nts. He went to see the old family
or, and asked what could be done for
ter.

"Nothing much," replied the doctor. "The shock of the old folks' death was too much for him, and now the habits of a lifetime are saving him from complete insanity. When there isn't but one big thing in a man's life, and you take that thing away, he hasn't got much left, has he? Well, that's Jupiter's trouble. He didn't have much sense either, I reckon, to start with."

Finally, William decided to see the negro preacher who in the old days had essayed to be the spiritual guide for the plantation. He was the same preacher who had once tried to argue with Jupiter about his faithful habits.

"Uncle Jupe," explained the preacher when William had asked him to try to help the old negro, "Uncle Jupe, he's a good man. But de Lord done single him out and give him over to de debbil, 'cause he keep on at his foolishness, and won't listen to no reason. De Bible it say dat a fool returneth to his folly. Solomon never had no use for a fool, and I reckon de Lord ain't got none, neither."

"Uncle Jupe is not any fool!" William said hotly.

"Nor, sur, I never meant quite dat. I was usin' de word in de Biblical meaning."

"But what can you do for him?" persisted William.

"I'm feared dey ain't nothin' nobody can do," answered the preacher. "De Lord moves in a mysterious way his wonders to perform. Blessed be de name of de Lord!"

William turned away in disgust.

The last day of the young man's stay arrived, and he went to tell Lucy and Uncle Jupe good-by.

"Come here, Uncle Jupe, you and Aunt Lucy. I've got something to tell you."

"Wat 'tis, Marster?" asked the woman eagerly.

"I'm going to get married soon, and move to Chicago, where I've got a big job. I won't be able to see you again for a long time. But I'll write to Mr. Morgan and find out how you are getting on. If you need anything, tell him, and he'll supply it. If he can't, he'll write to me, and I'll see that you get it."

"When you comin' back?" asked Jupiter, as if that were more important than the mere matter of getting enough to wear and to eat.

"I don't know," said William. "Maybe it will be several years. But I'll see you again."

He hastened out, unwilling to let his feelings keep on mounting as they had been doing since he came to tell the old couple good-by.

"Did you tell Uncle Jupe not to keep knocking at those doors?" asked one of his friends as they drove along the road to town.

"Deuce take it, no!" answered William. "I forgot to tell him; but I suppose he will stop now. He seems to be all right again."

THE years came and went. They wrought their effect upon Preston Hall but not upon Old Jupe. It is often so with a negro. He becomes old sooner than he should, and then remains that way indefinitely. The keen scythe of Father Time is merely blunted in its useless hacking at him. The faithful Preston servant had been old so long that no one thought anything of it. The neighbors just

accepted the fact that his age was stationary, and let it go at that.

Up at the Great House, though, time was getting in its lusty blows. One of the white columns, now dingy gray, had leaned outward, and finally fallen to the ground. The climbing rose vines had spread all over the porch floor, and even into the windows. The front yard had grown thick with new long-leaf pines. A maple had come up by the dining-room and sent one of its limbs on an excursion into the room. The ancient wall paper hung in strips from ceilings and walls.

The old house was definitely abandoned, and even more definitely spooky. The negroes, and the white folks too, had an eerie feeling when near it—all except Old Jupe. To him it was still the Great House, and to it he still went each morning on his crazy mission. "Tryin' to wake the dead," the neighbors said.

But the dead slept on, and the gravestones seemed to grow sleepy too, for they began to sag and lean this way or that in the family burying ground. Old Jupe kept the earth here fairly free from undergrowth; but he did not know how to reset the stones; or perhaps he did not notice their leaning, so gradually had it come about.

Down in the cabin, Lucy took good care of him, with the help that William provided through Sam Morgan. She no longer protested against his daily visits to Preston Hall. He seemed happier if left alone.

ONE summer morning Old Jupe went to the house. As usual he was going through the halls, when he was startled by hearing some movement in the Colonel's room. He quickened his pace, and knocked. No answer came. Hastily he entered, just in time to see a tramp jump through the window to the ground and run into the thicket.

"Git away fum here, you po' white trash!" shouted the old negro. "Whut you mean sleepin' in white folks' house?" But the tramp gave no answer. He had not stopped to see what was after him, for he had heard from fellow knights of the cross-ties that the house was haunted, and now he believed it, though he had been a scoffer until a few minutes before.

"In de mornin'," Old Jupe mused, as he went back to his cabin, "in de mornin' I gwine fetch my ax, and ef dey's any trash in de Gre't House, I'll bust his haid wide open!"

Lucy noticed the old man's excitement when he returned.

"Whut de matter, Jupe?" she asked,

"Whut de matter?" he replied. "Po' buckra done sleep in Marster's house, dat's whut de matter. Name o' Gawd, I'd 'a' kilt him ef he'd stayed. And he sleepin' in de Marster's room, same as ef he was real folks! I been tellin' you, Lucy, I'd have to look after dat house. Fust thing you know, some triflin' man'll set fire to hit, den' what'll Marster say?"

"I reckon he won't say much, Jupe. De Marster done gone where folks don't bother dey mind 'bout fire!"

"You mean you want me to leave de Gre't House to po' white trash?"

"No, Jupe. I ain't mean dat. You done right to skeer him off. Some of dese days you'll git your reward. De Ole Marster'll see to dat, don't you fret your haid about hit, neither," she soothed.

When you go to bed
Do your Nerves stay up?

How to get the sound, restful sleep that gives you all day energy. We offer a 3-day test

When you go to bed do your nerves stay up? Leaving you dragged out in the morning—nervous, irritable, unable to concentrate—your energy drained by afternoon?

This, authorities say, is what keeps men below par. Never capable of their best.

For modern medical science has found a natural way (a way without drugs) that usually brings *instant*, restful sleep that quickly restores your tired mind and body.

Morning finds you a new man. Fresh, clear-eyed, buoyant. You have the energy to carry you right through the day and into the evening. *That is the experience of most Ovaltine users.*

A 3-day test will show you. We urge you to make this test. It is well worth while.

Why Ovaltine brings restoring sleep

FIRST—It digests very quickly. Even in cases of impaired digestion.

SECOND—It supplies your system with certain health-building essentials which are often missing from your daily fare. One cup of Ovaltine has actually more food value than 12 cups of beef extract.

THIRD—Ovaltine has the unusual power of digesting 4 or 5 times its own weight of other foods you eat. Hence digestion goes on speedily and efficiently. As a result frayed nerves are soothed because digestive unrest, *the main cause of sleeplessness*, is overcome.

This is why, when taken at night, a cup of Ovaltine brings sound, restoring sleep in a natural way. And as you sleep the quick assimilation of nourishment is also restoring to the entire body. Thus you gather new strength and energy for the next day.

Hospitals and Doctors recommend it

Ovaltine is a delightful pure food-drink. It contains no drugs. It is the special food properties of Ovaltine—*and absolutely nothing else*—that bring its wonderful results and popularity. In use in Switzerland for 30 years. Now in universal use in England and her colonies. During the great war it was served as a standard ration to invalid soldiers. A few years ago Ovaltine was introduced into this country. Today hundreds of hospitals use it. More than 20,000 doctors recommend it. Not only for sleeplessness, but because of its special dietetic properties, they also recommend it for nerve-strain, malnutrition, backward children and the aged.

Just make a 3-day test of Ovaltine. Note the difference, not only in your sleep, but in your next day's energy. You tackle your work with greater vigor. You "carry through" for the whole day. You aren't too tired to go out for the evening. There's a new zest to your work; to all your daily activities, it's truly a "pick-up" drink—for any time of day.

Now more than 20,000 doctors recommend Ovaltine

A 3-day test

All druggists sell Ovaltine in 4 sizes for home use. Or they can mix it for you at the soda fountain. But to let you try it we will send a 3-day introductory package for 10c to cover cost of packing and mailing. Just send in coupon with 10 cents.

A photograph of a Cleveland, Ohio, home painted with 40-40-20

40-40-20

The Magic White Paint

IF you want a truly white house like the house in the above photograph—a house that will stay white for years—use 40-40-20, the white paint that does not darken. Its chemical composition insures this.

In addition to its brilliant and lasting whiteness 40-40-20 possesses all the qualities to be expected in a high grade paint. Yet it costs no more.

The New Jersey Zinc Company does not manufacture 40-40-20 paint. This paint is made by more than 125 paint manufacturers from XX Zinc Oxide and Albalith (the super lithopone) which The New Jersey Zinc Company produces and supplies to these manufacturers.

40-40-20 is made in ready mixed form in beautiful tints as well as in white, and in paste form for the professional painter's use.

Write for our free booklet and list of manufacturers.

Genuine 40-40-20 is made from The New Jersey Zinc Company's specified products according to its specially developed formula, and the manufacturers are authorized to use its registered trade-mark on their labels for paint so made.

THE NEW JERSEY ZINC COMPANY
160 FRONT STREET, NEW YORK CITY

"I don't want no reward," he said, "less'n it be a leetle house in de back yard of Marster's manshun in de sky. But whut else I gwine do, Lucy? Whut else I gwine do? O Jesus, he'p me, de Marster done gone!"

Lucy knew that this familiar sing-song was a forerunner to a moody spell, out of which the old man would emerge in a day or two. "De sperrits fightin' inside him," one of her neighbors had suggested. "De debbil tryin' to get him, and a angel wraslin' wid de debbil. Hit's time for us to pray to de Lord to he'p de angel."

"I reckon dey ain't no sense in a prayer like dat," Lucy had answered. "Suttinly, de Lord won't take sides wid de debbil, prayer or no prayer. Anyway, I'm gettin' sort of tired of you folks thinkin' Jupe is ha'nted and all dat. He's a good man, Jupe is, and some of dese days we'll understan' what de Lord got in His mind dat makes Jupe do like he's doin'."

And so time went on, Old Jupe remaining faithful to his age-long habits, Lucy remaining faithful to Old Jupe.

BUT Lucy was growing lonely. Her children had all moved away, and many of her friends had died. She began to turn over in her mind the possibility of moving to town, where her daughters lived. "Hit'll make me a sight happier," she mused, "ef I can see my chilluns; and I reckon hit'll do Jupe good to git away fum here."

Gradually she began urging the move on him. At first he protested vigorously that he would never leave. "Why, de Marster, he's countin' on me!" he said in some astonishment, when his wife first brought up the subject.

"De Marster willin' for you to have a leetle ress, Jupe. He wuz always willin' for dat. Ef you don't like hit in town, we can come right back."

Old Jupe still protested, while Lucy made her plans, and finally took him away. But he did not go until Lige Whaley, another negro who had lived always on the Preston estate, agreed to look after the Great House for him. Lige was a kindly old man, and a wise one, so he promised faithfully that he would take care of the place.

Sam Morgan wrote to William that the old couple had gone to town to live. A few months later he wrote again, saying that he had heard Uncle Jupe was sick, and could not recover. "I reckon the old man will be off your hands soon," Sam said, "for one of his boys came by here and told me he was mighty low." Sam didn't hear anything more for a month, so he again wrote to William, and said he guessed it was all over. "He's gone where the good niggers go," wrote Sam.

But Sam was mistaken. Uncle Jupe recovered from his sickness, and when the winter broke, and plowing time came 'round again, he and Lucy drove back in their rickety old wagon to the little cabin on the Preston place.

"I couldn't keep him in town," she exp ained to Morgan. "Naw, suh, when time come to plant cotton, he wuz dat miserable to get back, he 'most run me 'stracted. I 'lowed hit would do him good to g t away fum here, but it ain't done no good at all. 'Pears like, he's bound to be close where de Old Marster wuz."

"Well, I'm glad he got well," said Sam. "I'll write to Mr. Preston and tell him."

Digitized by Google
Original from STATE UNIVERSITY SYSTEM OF FLORIDA

Sam was the kind of a man who intended doing a great deal more than he ever did do, and this letter to William took its place among his innumerable good intentions that came to nothing.

Old Jupe planted his fields in cotton, cultivated his pathetic little vegetable garden, and returned again to his old routine. He seemed like a child who, after a long absence, is back once more in familiar places. There was almost a lilt in his voice when he called "haw" and "gee" to his ancient mule, as the two of them went back and forth, back and forth, plowing in his fields.

For him, life had been resumed; his absence had been an interlude during which he did not live, and about which he was very hazy in his mind. Going up again to the Great House every morning was something to be looked forward to with pleasure.

Autumn came, and with it cotton-picking time. The trees were turning into brilliant colors. The last flowers were blooming, and Preston Hall, almost invisible in summer because of the dense growth around it, could again be seen from a distance.

THEN came a Sunday morning in late October. Old Jupe woke, as he had done on countless other Sunday mornings in other Octobers, and slipping on his scanty clothes, set out for the Great House. Into the back door he walked, and down the wide hall. Without any consciousness of what he was doing he knocked at the door that ages before had been William's—knocked, and started on down the hall.

"Just a minute," a voice said. "I didn't hear you drive up, and haven't quite finished dressing."

Old Jupe stopped short. "Whut dat I hear!" he mused softly to himself. "Is my ears projeckin' wid me?" A moment he stood transfixed, his amazement too great to find expression either in movements or words. And then the door of William's room opened.

"Marse William!" exclaimed the old servant. "Marse William! 'Fore Gawd, whar you come fum?"

The color was heightening in William's face. He fingered nervously with the buttons of his vest, but he said nothing.

"Whut de matter?" asked old Jupe. "You sick, Marster?"

"No," answered William weakly. "I'm not sick!"

The venerable old negro stared with astonished eyes upon the younger white man. At last, William broke the spell.

"What are you doing here, Uncle Jupe?" he asked. "I thought you were . . . Mr. Morgan wrote me you were . . . I mean, who told you to come up here this morning, anyway?"

"Dey ain't nobody tole me, Marster. Dat is, dey ain't nobody tole me to-day to come. But I allus come, like you and de Ole Marster said, long time ago."

Again there was an embarrassed silence on the part of the young man, an amazed silence on the part of the other. And again it was William who broke it.

"*A long time ago,*" he said, speaking to himself and not to his faithful servant. "*A long time ago!*" He was looking intently at the negro, and yet he seemed to see not the old frame of bone and wrinkled skin, but something beyond them, behind

"Hot water or cold—it works swell with either!"

"Hasn't scratched yet!"

Smoothest, creamiest beard-tamer you ever laid cheek-by-jowl with a razor is this Barbasol.

Why, the good old blade just hones to meet it, and the toughest whiskers fall with never a jolt or pull.

So easy, swift and gentle is this Modern Way of Shaving. Here's the whole story, mates:

1. Wash the face (but leave it wet)
2. Spread on Barbasol (but don't rub in)
3. Shave!

No brush. No rub-in. No after-sting or smart, because Barbasol leaves the natural oils right in the skin—takes nothing away but the whiskers. Quick relief from ingrowing hairs, sunburn, windburn, chap. Like to meet Barbasol?

"Mister, you're next!" Try Barbasol three times, according to directions.

"I Was So Happy It Hurt"

THREE years ago I received a letter I have always remembered.

"Dear Margaret Clarke," it said, "I am coming to you to be shown the way to make money. I have never done anything for money in my life. I don't know how to do anything except housework, and of course the care of my home fills most of my time. But somehow I am going to earn the money to send my daughter on when she has finished the school here. It is the dearest desire of my heart and I know that where there's a will there must be a way. Is it in the Pin Money Club?"

LAST fall I had another letter from this same mother, now a busy P. M. C. member. I've only room for an extract from it here, but that extract tells the story.

"Last night I started Marjorie off for school. She was so radiant and excited at the prospect of her year there, and I—dear Miss Clarke, I was so happy it hurt! To think that I had done it myself, just by making up my mind that I could do it and by using the spare moments that used to mean so little."

MARJORIE'S mother is only one of the many mothers who are finding in the Pin Money Club the means of giving their children the opportunities they long to give them. Mrs. W-K—of Michigan wrote to me last winter:

"I received the check for $20 this morning and I want to thank you for it. That will be a big help for those two who are upstate at school. The last check bought a suit and overcoat for my college boy and gifts for the children. I have so little time, I only wish I had more to spend at this work."

ARE you cherishing some pet dream for that curly-headed youngster of yours? Or is it perhaps a dream for yourself—of a long-needed vacation, or that greatest of luxuries, a dress you don't really need?

Here in the Pin Money Club are dollars and dollars for you. Twenty to one hundred dollars extra each month—could you use that amount? Then send today for the Pin Money Club's new booklet "A Way to Make Your Own Money." Address your letter to

Margaret Clarke

Secretary, Pin Money Club,
The American Magazine,
Department N,
250 Park Avenue, New York City.

them; something that was passing now before the eyes of his memory, the eyes of his soul.

"Uncle Jupe," he said at length. "Uncle Jupe, I thought you were—dead!"

"Naw, sur, Marster, I ain't daid!" And Old Jupe laughed more merrily than he had in many years. "Dat whut make you act so 'spicious like when you fust see me? You think you seein' a ha'nt? Lawsy, Marster, you needn't be skeered uv me, I ain't no sperrit, not yit!"

WILLIAM laughed a little at this outburst from the old man; but immediately his face became grave again, and once more the color rose in his cheeks.

"I want you to do something for me."

"Yassir, suttinly, Marster."

"I want you to go out to the road; and when a young woman drives up, tell her I'm not here. Tell her I left word that I was called away suddenly."

"Your wife comin', Marse William? De young Missis comin'?"

"No, Uncle Jupe, she's not my wife; and I'm asking you to do this for me because I'm too yellow to do it myself."

"Yaller? Dey ain't no Preston dat ever wuz yaller, Marster."

"You're wrong, Uncle Jupe. There's one Preston who is yellow."

"De lady comin' to buy de place? I heered some talk you wuz gwine sell," said Old Jupe fearfully.

"No, she's not coming for that."

The sound of a car in the front drive startled William.

"There she is now," he said. "And I guess I'll face the music. You go tell Aunt Lucy I'm here, and that I'll be down to the cabin after a while."

Old Jupe went out the back door, and William the front. Standing in the drive, almost hidden by the rank growth of bushes and pines, was a blue roadster. William went slowly up to it.

"Hello, Margaret," he said.

"Oh, hello, Bill!" she answered eagerly. "I thought I would never get here. Got lost three times. You surely told the truth when you said this place was secluded!"

William said nothing, and the young woman looked at him in surprise.

"Aren't you glad to see me? Aren't you going to ask me to come in?"

"Yes, certainly," he said, trying to get himself in hand.

"Well, act like it," the girl said, rather sharply.

Lightly, she stepped from the car. She was thirty. Her eyes were blue, and her becomingly bobbed hair was curly black. She wore a small sports hat which matched the blue of her eyes, and a sports dress. Together they started toward the house.

"What a tumbled-down old barn that is!" exclaimed the young woman as they drew near to the front steps.

William started, a frown showing on his face as though a sudden twitch of pain had struck him.

"It was not always like this," he explained, gazing absently at the wide veranda, with its double door and fanlight over it. "One of my grandfather Prestons built the house just before the Revolution, and the family had always lived in it until Father's death. Since then, we've let it go to pieces."

There was no eagerness in his voice. He spoke as one who was merely pronouncing words, without heed to their meaning, spoke as one whose tongue was saying one thing, and his brain thinking another.

They walked on up the cluttered driveway, stepping carefully so as to avoid the leaves, still wet with dew. At length they mounted the front steps. Margaret was looking at him curiously, an expression of displeasure on her pretty features.

"Want to explore the inside?" asked William.

"Of course I do. Think I slipped away from our party and drove all the way out here merely to stand on a porch? I had an awful time getting away. Most of them wanted to strike out early this morning and try to make four hundred miles to-day, but I told them I had a friend out here and wanted to visit her!"

Margaret laughed a little at the ingenuity of her escape from the friends with whom she was motoring North. But William did not laugh, and she turned on him almost fiercely.

"What's the matter with you, Bill?"

"Nothing," he answered hastily. "I'll feel better after a while. Guess I couldn't sleep last night. So many creaky noises in an old house, you know."

"Creaky noises or no creaky noises," she said, "you'll find yourself all alone pretty soon unless you cheer up. Now, come on, show me the house, and then let's sit out here under the trees a while and talk."

INSIDE the house they walked through the wide hall, looked into the dining room, and into the array of other rooms that once had been bed-chambers.

"Let's go in here," said Margaret, turning into the parlor. She cast casual glances at a few pieces of old furniture, its once high polish obscured by dust, and then, humming a tune to herself, she walked over to a table.

"Who is this?" she asked, picking up a small daguerreotype.

"That's my father," answered William.

"I might have known it," she said. "You look exactly like him. Are you like him in other ways too?"

"I'm afraid not!"

Margaret turned squarely upon him. "Bill," she said, "come out of it! Snap out of it! What's got into you, anyway? You suggested that we meet out here, and I slipped away and came. Now you treat me like a tiresome aunt!"

William ran his hand through his hair, looked wildly about, but finally mastered his voice.

"Let's go out on the porch," he said. "I think we'll find it more pleasant out there. These rooms are stuffy."

"All right," she said, "I'll go; but there is something more than stuffy air the matter with you!"

Outside they sat down on the top step and gazed off through the lane of water oaks and across a broad field to the winding river that now was glimmering in the October sun:

"Well?" Margaret turned to him. "Out with it!"

"Margaret," he said, his voice husky, but firm, "Margaret, when we met down in Cuba, I'd just about forgotten there was such a place as Preston Hall. The

You Can't Find "13" Anywhere In This Successful Store

PRANGE'S big department store in Sheboygan, Wisconsin, is a human store. In fact it's such a human organization that it sticks to the old superstition about the unluckiness of number "13". You can't find "13" displayed anywhere in the store. Even the 28 big show windows are numbered from 1 to 29—"13" is simply omitted.

But here is a store that has made a wonderful success of retail selling—much of which success is due to the methods these merchants have used to build up their farm business. That's why Farm & Fireside went out to get the story of Prange's business methods. Other dealers will want this story—so they can profit by this big store's successful experience.

60-Mile Trading Radius

Prange's is located in a fair-size city. Sheboygan has more than 35,000 people in it. And you'd think that the big bulk of such a store's business would be city trade. But the fact is—it attracts a whale of a volume of farm trade. From a big circle of surrounding country, 60 miles in radius, the farmers and their families stream into Prange's to do their buying.

If You're a Dealer—

If you're a dealer—it will be interesting and valuable to you to know some of the merchandising secrets back of Prange's big success. And you can get these—for Farm & Fireside's interview with the head of Prange's is now published in a folder. You can get the whole story by just mailing in the attached coupon.

Farm & Fireside's Service to Small-City Retailers

This is another of Farm & Fireside's successful-dealer interviews. Others will follow throughout the year. And thus, in making available the business methods which successful merchants have used in building up farm trade, Farm & Fireside is simply meeting an obligation to retailers and advertisers which its leadership confers.

But—getting these interviews and publishing them is only a part of Farm & Fireside's service to retailers.

Close Tie-Up

The biggest benefit comes when the dealer ties up closely to the products that are offered in Farm & Fireside's advertising pages, and specially displays and features them.

As every dealer knows, Farm & Fireside is a real force for influencing farm people to buy. And the yearly growth of advertising in Farm & Fireside proves that manufacturers recognize this fact.

And a glance through a copy of Farm & Fireside tells *why* its advertising pages register in more than 1,200,000 farm homes. For here is a 100-per-cent personal magazine—edited straight to the individual—and read with *warmer interest* than any other farm magazine.

your dog

SERGEANT MAJOR "JIGGS" OF THE U. S. MARINES

One of the most carefully tended of dogs was "Jiggs," rated as full Sergeant Major in the U. S. Marines. The whole Corps was at his service. He had his uniforms, his quarters and attendants. Thanks to Sergeant's Dog Medicines, his "active service" was prolonged to the ripe old age of eighteen years, an example of what good care and proper treatment will do.

KEEP YOUR DOG WELL

Your dog can have as expert care as "Jiggs." In "Jiggs'" kit was a famous book on dog diseases and their treatment. A copy will be sent to you on request. Moreover, it is an easy matter for you to get the same safe and effective remedies that were used on this famous dog.

All dogs, puppies especially, should be wormed. Reasons are given on page 15 of Polk Miller's Dog Book.

FAMOUS DOG BOOK FREE

Polk Miller's Dog Book is the result of fifty years experience in caring for dogs and treating their diseases. Each year the book is revised by our staff of veterinarians and kept up-to-date. In clear, non-technical language, it tells the symptoms of dog diseases and explains the best treatments for each. It explains proper methods of feeding and breeding. A unique symptom Chart makes it easy to diagnose your dog's ailments. This book has saved the lives of countless valuable animals. You are urged to write for a copy. Mailed free to any address.

Fleas make dogs miserable and may cause serious skin troubles. Kill Fleas with Sergeant's Skip Flea Soap or Powder as directed on page 42 of the Dog Book.

EXPERT ADVICE FREE

If your dog develops a condition that puzzles you, write to us at once. State fully age, breed, sex and all symptoms. Our own skilled veterinarian and his staff will answer personally. Complete instructions for care and treatment will be sent you promptly without charge.

Sergeant's Dog Medicines, standard for over fifty years, are sold by dealers everywhere. If you cannot obtain them, write us direct. Address, Polk Miller Products Corporation, 1565 W. Broad St., Richmond, Va.

Mange is highly contagious among dogs. Proper treatment is given on page 27 of the Dog Book. Use Sergeant's Mange Medicine and Sergeant's Arsenic and Iron pills.

Write for your free copy of Polk Miller's Dog Book.

Sergeant's DOG MEDICINES

"A medicine for every dog ailment"

Write for FREE Sample of our No-Tar-Odor Mange Medicine for Human Hair and Scalp.

fact that I suggested meeting you here shows how completely the old place had passed out of my life. But I had been drifting into fast company. You know how it is down in those jazzy resorts. A man can promise a lot of things, plan a lot of things, and say a lot of things that somehow don't seem to go so well in a place like this. Bright lights, crowds of people, money, drinks, fast cars—they make certain things seem old-fashioned. But when you come back to a house such as this, the old-fashioned things begin to count again. . . ."

"The boy orator is making a fine speech," jeered Margaret, "please go on."

"I can't expect you to understand," William continued, ignoring her gibe, "for this place means nothing to you. It couldn't mean anything, of course, for you have never seen it before. But it is an honest old house, Margaret, and it sheltered a long line of honest men. My father was born here. He and my mother lived here. I was born here. Don't you see why it is impossible for me to do anything—here—out of keeping with the memories of my old home?"

"Impossible?"

"Yes, impossible. I'm sorry. You'll think I'm a bum sport, and I am. But something has come between us. The house has come between us, these fine old water oaks, the river out there, my memories, the look I saw in the eyes of my father when you picked up that daguerreotype—all of these things are now between us. All of these, and old Jupiter."

"Old who?"

"Old Jupiter, our house servant when I was a boy and young man."

"So you are throwing *me* over for an old negro, and a lot of musty memories!"

"They are not musty memories; they are alive. And Jupiter is more than an old negro. He's a symbol!"

For a time they sat, saying nothing, each looking off to the river. William's face was stern and sad; Margaret's a little puzzled, a little angry, a little hurt.

"OH, WELL," she said at last, "maybe you are right! But, whether you are or not, I'll not argue with you. Far be it from me to argue with any man who doesn't want me. I don't have to, you know." And she flashed at him a look of pride, a look that showed how well she knew her power over men. "That is," she added, "I don't have to argue with them in *town*. This is my first experience with the country and, if you ask me, I don't care for it, thank you. It gives me a sort of funny feeling. It's too silent, Bill. It's too lonely. And it seems to have eyes—everything seems to be looking at me and disapproving of me. So, I guess I'll be leaving it—and you. I can't stand these invisible eyes!" She shuddered as she arose and started down the steps.

"You can't leave now," William said hastily. "Wait until I can have Aunt Lucy get you some lunch."

"No, thank you, I'll be on my way!"

"But you can't go off before I've done something to show you that I didn't mean to deceive you. Honestly, I was sincere in our talks on the boat coming over from Cuba—or I thought I was. But this morning—"

"Oh, please don't go over all that again," Margaret broke in hastily. "You've made your speech. I've eaten hot-dogs and taken my soda-pop out of a bottle before this, and I can do it again. Besides, if I hurry, I'll get back in time for the party to keep on their schedule to New York."

William joined her at the foot of the steps, and together they walked to her car.

"Just one more thing, *Mr. Preston*—I guess you are not Bill any more, to me—" said Margaret as she sat behind the wheel of her car. "You told me one time that your wife said you didn't belong in a fast-trotting crowd. She was right! And if you will take some advice from a woman who doesn't care whether you take it or not, you'll fix up this old house of yours and have your winter home right here. You are a countryman, not a Don Juan of the Night Clubs!"

"I'm afraid—I mean, I hope you are right. But I do wish—"

"Oh, good-by," she said hastily, starting the engine. "I can't stand the way this place hates me any longer!" And her car shot out through the bushes and onto the main road.

"God in heaven forgive me!" exclaimed William as he turned back toward the old house.

SLOWLY he mounted the steps, and for a long time he sat on the porch, his head in his hands. Then he got up and walked off toward the river. The familiar paths he had known years before were nearly all grown up, but he pushed his way through the undergrowth, down to the bend in the river where he used to fish. He stood looking far away, looking farther away than he had looked at any time since his father died.

Then he walked back toward the house, but turned from the road and went to the family burying ground. On a fallen log he sat and gazed intently at the gravestones, at the inscription which he himself had insisted should be on the marker at his father's grave!

He Was a Man Loyal to His God, His Traditions, and His Family

For an hour he sat, deep in thought and memories. At length he went through the house, out of the back door and across the field to Old Jupe's cabin. Lucy was expecting him, for Jupe had told her of his presence. She greeted him with loud affection, but William seemed to have no words.

"You ain't talkative, like you use to be," she scolded.

"I've been doing more remembering than talking this morning," he replied soberly. Turning to her husband, he gazed intently at the old slave, and then to himself, rather than to the negroes, he muttered, "If it hadn't been for you, Uncle Jupe, I should have done the thing no Preston has ever done—I should have betrayed my wife and children."

"I ain't quite hear whut dat you said, Marse William. I'se gettin' a leetle deef," the old negro apologized.

"I was just saying, Uncle Jupe, that your preacher told me once the Lord moves in a mysterious way His wonders to perform, and that I'm beginning to believe he was right!"

"Yassir," said the negro, "dat's right. But how come you think 'bout dat now?"

"Oh, no special reason. See here,

"In front of him something white was standing . . . At first he thought it was another man . . . but the creature obviously had a charm of its own . . . 'Are you a companion?' said Adam. 'No, but I might be, if occasion offered. Are you?'"

Eve Wasn't Adam's First Love

A new novel has just come from the pen of John Erskine. And it will appear *in Collier's!* ¶ For the first time, the author of "The Private Life of Helen of Troy" and "Galahad" has permitted a novel of his to be published serially *before* it appears in book form.

ADAM & EVE

By JOHN ERSKINE

Starts in Collier's *for* September 24th

Read this intimate history of Adam's adventures in Eden—his trouble with the animals—what Eve did to him—and how he learned about women from Lillith, who after all, the poets say, was his first love.

Here is a book that will live in the annals of literature for its keen wit, sparkling repartee and amusing revelations. If you liked "Helen of Troy" and "Galahad" you will find Erskine at his best in "Adam & Eve"—

The first chapter appears in Collier's for September 24th—on the newsstands September 19th. Be sure to place an order with your newsdealer immediately.

LISTEN IN!
On the Radio

John Erskine will speak to you in your home September 18th at 8:15 P. M., Eastern Daylight Saving Time.

Invite your friends to hear one of America's most famous authors through "Collier's Radio Hour" broadcast through stations:

KSD	WLW
WDAF	WJZ
WCCO	WBZA
WJR	WBZ
KYW	KDKA

From September 18th on, "Collier's Radio Hour" will be on the air regularly every Sunday evening at 8:15 P. M., Eastern Daylight Saving Time. The most unusual program on the air—drama—music—humor—*and every week a famous speaker.*

But be sure to hear John Erskine—then read his new and greatest novel "Adam & Eve" in Collier's.

A 900% Increase is what N. S. T. A Training meant to G. W. Birmingham of Dayton, O. Raised his pay from $15 a week to $7500 a year.

Record Earnings of $525 in a week for Wm. Shore, former cow-puncher of Neenach, Cal. Earned $3000 first 5 months after finishing training.

Raised His Pay from $1200 to over $7200 a year, says F. G. Walsh, Springfield, Mass., who gives N. S. T. A. full credit.

~and They Started By Reading This Amazing Book!

Now—For a Limited Time Only. This Remarkable Man-Building. Salary-Raising Volume is Offered FREE to Every Ambitious Man. Read It Without Fail!

Where Shall We Send Your Copy FREE?

A Book! Just seven ounces of paper and printer's ink—but it contains the most vivid and inspiring message any ambitious man can ever read! It reveals facts and secrets that have led hundreds of men to success beyond their fondest expectations! No wonder a famous business genius has called it "The Most Amazing Book Ever Printed!"

This vital book—"Modern Salesmanship"—contains some surprising and little-known facts about the highest paid profession in the world. It blasts dozens of old theories, and explains the science of selling in simple terms. And not only that—it outlines a simple plan that will enable almost any man to master scientific salesmanship without spending years on the road—without losing a day or dollar from his present position.

What This Astonishing Book Has Done!

The achievements of this remarkable book have already won world-wide recognition. The men who have increased their earning capacities as a direct result of reading it are numbered in the thousands. For example, there is E. G. Kinzie of Michigan. "Modern Salesmanship" opened his eyes and he quickly raised his salary from $8 to $100 a week. L. A. Tinnes of Minneapolis made over $600 his first month after he had mastered Salesmanship. And F. L. Real of West Virginia, a former cigar maker, stepped into a position that pays him $4600 a year drawing account alone.

A Few Weeks—Then Bigger Pay

There was nothing "different" about these men when they started. Any man of average intelligence can duplicate the success they have achieved—for their experience proves that salesmen are *made*—not born, as some people have foolishly believed.

Salesmanship is just like any other profession. It has certain fundamental rules and laws—laws that you can master as easily as you learned the alphabet. And through an exclusive feature of the N. S. T. A. System of SALESMANSHIP training—you can acquire the equivalent of actual experience while studying.

Free to Every Man

If we were asking two or three dollars a copy for "Modern Salesmanship" you might hesitate. But it is now FREE. We can not urge you too strongly to see for yourself what it can do for you too. No matter what your opinion is now, "Modern Salesmanship" will give you a new insight into this fascinating and highly-paid profession. Mail the coupon now!

Uncle Jupe," he continued, his voice betraying a new enthusiasm, "I want you to take your ax up to the house and cut away all that wild growth. I have been down in Cuba looking for a winter home. On my way back, I drove out here late last night. I've decided to fix up the old place and bring my family to Preston Hall instead."

"Yassir, oh, yassir!" shouted Old Jupe, stumbling forward to grasp the young man's hand. "I'se dat glad, I jest ain't got no words to tell you! . . . Lucy," he said, turning suddenly to his wife, "Lucy, de young Marster comin' home to live! You hear dat, Lucy?" And then out of the dry hollows that sheltered his clouded old eyes, the tears began to come. They trickled down the rusty furrows in his face, and dropped unheeded to the floor.

"De Lord," Old Jupe said, at last. "De Lord, He sho' do move in a curious way, and sometimes He's mighty slow, too, but He do move and His wonders He do perform!"

"He sho' do!" said Lucy, gazing with knowing eyes at the young white man who stood in the door of her cabin.

What to Do with Your Dollars After You Get 'Em

(*Continued from page 33*)

good investments will always wait on investigation. "To-day or never" is a favorite argument of confidence men, and that argument of itself, if urged in favor of a security, should serve as a warning of danger.

Another point I should like to emphasize is this: Never buy a security from a friend, merely because he is a friend. Investigate thoroughly. Sometimes, sky-rocket promoters rope in the most steady and reliable people for their sales force.

For example, a couple of fast-shooting security sharpers set up shop in a city of about fifteen thousand. They looked around for local talent for their sales force, and lighted on the sheriff's brother. This man had himself served as deputy sheriff for years and was known in every part of the country as a solid, reliable citizen. The sharpers somehow convinced him that their proposition promised fancy returns for investors, and induced him to turn in his star and become chief luminary on their sales force.

He promptly invested several thousand dollars of his own and of his wife's money. His friends and neighbors knew he was as honest as the day, and on his say-so many of them also invested.

In due time, the reckoning came. The law caught up with the principals of the firm, and they were indicted for selling fraudulent securities. That, however, did not bring back the money to the ex-deputy sheriff, nor to his friends who had believed in him.

BANKERS have to be cautious when discussing with their customers the financial standing of particular concerns. The head of an investment firm got on the "sucker list" of a firm he knew was a bucket shop, and curiosity led him to ask for references.

"Call up our bank," they told him.

What could be more disarming?

The broker did call up the bank, and I want you to note carefully the reply he received. The chances are, if you were to call up a bank and ask about some company, particularly a customer of that bank, you would receive the same answer, in almost the same words.

"Their business with us," the cashier reported, "is very satisfactory. As far as we know, they are all right."

That sounds like a recommendation, yet it is nothing of the sort. Even the investment sharpshooter deals straight with his own banker. And the banker, on the other hand, is bound, by the risk of spreading a libel, not to express doubt about a concern's reliability, unless he knows his facts backward and forward.

I have given one instance of fakers daringly assuming firm names almost (but not quite) identical with the names of reliable houses. We had a good deal of trouble with another crowd operating a bucket shop that went under a name which, when spoken hastily over the telephone, sounded very much like the name of a reliable brokerage house.

THE company specialized in a particularly deadly form of bucket-shop piracy. They concentrated on those speculators who believe they can foretell what is going to happen on the stock market, and bet on their hunches by buying stock on margin; that is, by paying down only a small part of the purchase price. Reliable brokerage houses discourage buying on very narrow margin, because a single day's trading may wipe out such a margin, and the brokerage house may have to sell the customer's stock to protect itself from loss, a thing no legitimate broker likes to do.

But this firm did not care how narrow the margins were. In fact, the narrower they were, the better for them, for they *meant to sell out the customers anyway*, and a narrow margin made it all the simpler.

The smooth-talking salesmen would call up the people who were on their lists, and their spiel usually ran something like this:

"We're in on the ground floor with a group next to Standard Oil. Here's the 'inside' situation: They are going to cut a melon—a one-hundred-per-cent stock dividend. This isn't out yet, but it won't keep long. As soon as it is known, the stock will hit the sky. The bankers are picking up all they can get hold of, without exciting suspicion. How many shares shall we buy for *you?*"

This, remember, was a message from an apparently reliable house, because the salesman usually managed to mumble the name of the company in introducing himself, and the stock chosen to lead on the victim was always a highly reputable, well-known issue. Many investors were induced to make the plunge.

The promoter promptly banked all the

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

ıoney that came in. He never actually ought any stock with it. If, within a :w days the stock went down a few oints, that suited him to a "T." He romptly "sold out" the victim. If, how-ver, the stock was perverse enough to dvance, his fast talkers got busy on ıe telephones again, informed customers ıat the insiders had decided, after all, ot to cut the melon just yet, and if the ustomer wanted to make some *quick* ıoney, all he had to do was switch his oldings to—some other stock on which ıis alleged company had imaginary but lausible "inside information."

If the second stock also failed to go own promptly, the fake promoter had is men keep switching customers to still ther stocks, and eventually they were ure to strike one that performed the way e desired.

A curious trait in human nature came ut while we were trying to get evidence nough to convict this promoter of fraud. Ve knew perfectly well what was going n; but grand juries require evidence. I alked with forty-eight victims, who ad-ıitted in confidence to me that they had ost sums ranging from three hundred to hirty-five hundred dollars, before I suc-eeded in finding three who were willing o go on the witness stand and testify to heir losses. People have an intense aver-ion to admitting their gullibility in a ame of this sort. It is a trait the sharpers epend upon.

OFTEN it is the simplest things that catch the most suckers. One scheme ery widely employed for a while (and still ıracticed with immunity in at least one tate, as I write this) consisted of the uestionable use of an otherwise legiti-nate device known as "fractional shares," r "bankers' shares" in very well-known tocks. The schemers traded on the well-nown name, and also on the undeniable act that people have invested fortunately n great industrial enterprises, and later eceived thousands of dollars back as the usiness grew. Everybody, for instance, s aware that some of the early partners f Henry Ford put in thousands and took ut millions. Because of this, a favorite tock misused in perpetrating this fraud vas Ford Motor Company of Canada.

This stock is fairly widely held, but is a igh-priced stock, and one share sells, as a eneral thing, for several hundred dollars. t the time the sharpers started this ame, we will say they could buy a share or five hundred dollars. They bought it n the open market, which anyone can lo, and immediately put it in a legal trust o be held for a period of years. Then they ssued *shares in the trust*—one hundred ractional shares for every actual share of tock.

At the cost price of the actual share, ach fractional share was worth five dol-ars. Did the sharpers sell them for that? Not they! Seven-fifty was their price, nd when they found an abundance of uyers at that price they boosted it to ine and even ten dollars, and continued o sell them just as fast. This scheme was irtually the same thing as locking up a en-dollar bill where nobody could get at t, and selling "shares" in it to ten people t the rate of two dollars per share.

As a general rule, shares in gold mines nd oil wells are very good securities for untrained investors to keep away from, and yet probably as many lambs have been fleeced in these fields as in nearly all other fields put together. Money has been made, is made, and will be made, in gold mines and oil wells. But for the ordinary man, the task of telling the good from the bad is almost too difficult. In even the biggest and most successful oil companies, it is a fact that on the average only *one* well out of four or five drilled, pays out. Yet the small "wild-cat" companies usually operate on the prospect of striking a gusher on a single drilling. How slender investors' chances are may be gathered from the fact that only one well in *three hundred* of those drilled by the honest amateurs and the fakers pays out.

I REMEMBER another instance that shows the absurdity of some of the schemes proposed. Everybody, I should imagine, knows that oil wells are drilled straight down into the ground for several hundred and sometimes several thousand feet. But one "oil geologist" I came across got it into his head that there was oil in a certain mountain, and instead of drilling *down*, he proposed starting at the base of the mountain, tunneling under, and *letting the oil flow out!* Absurd as the idea was, he was actually able to sell some stock in a company to exploit it before we made him stop.

Another promoter, who dealt in gold, thought he would get around the legal risks of selling highly watered gold-mine stock by selling gold by the ounce. He succeeded in making a number of pretended sales, but at last was brought into court on a charge of fraud. Becoming somewhat excited and frightened, he blurted out the truth.

"The gold is there," he said; "they can go and get it if they want to!"

So far as we could find out, the gold really was there. But in order to get it, it was necessary to go to Alaska and tunnel under a river! The promoter had taken care not to say that he would deliver the gold, nor did he offer to help obtain it; he merely sold it as and where it lay.

Any industry in which some concerns have been conspicuously successful is likely to invite spurious imitations of the successful companies. Indeed, it may be taken as a bad sign whenever a security salesman begins to dwell on how successful *other* companies in the same field have been. Ability in management, not the fact that it is launched in a popular industry, makes an enterprise successful.

At Springfield, when I was working for the Government of Illinois, I had to pass on many applications of promoters who desired to organize automobile companies. Some were legitimate, and were granted permission to sell stock. A few became very successful. However, figures from the automobile industry as a whole show the risk a person ran when he bought stock in one of these new companies. The automobile industry is about twenty-five years old. Since it came into being, about three hundred and fifty companies have undertaken to make cars. A majority had honest intentions and high hopes of success. But the fact remains that only *twenty* companies make ninety-two per cent of all the automobiles sold to-day. Many of the others, for lack of ability in management, or for some other reason, have failed to

The Julia

Why not go back to

FOOT YOUTH

days?

WOULDN'T it be wonderful if you could go back to the days when your feet were young and vigorous and always eager to run and play? Think how happy it would make you if you could have those youthful feet right now — to help you in your work, to take you through your 18,908 steps every day! More than a million women have found their foot youth again in

THE ARCH PRESERVER SHOE

It makes your feet young again, because it stops foot abuse — the straining, sagging and pinching of ordinary shoes that cause all the trouble.

The Arch Preserver Shoe gives support where support is needed, yet bends freely with the foot at the "ball," the only place the foot bends. The concealed, built-in arch bridge supports the long arch of the foot. The special modeling of the sole supports the metatarsal arch. The flat inner sole, crosswise, prevents pinching. Not one feature, but many exclusive patented superiorities are found only in the Arch Preserver Shoe.

And yet, there is no sacrifice of style. You enjoy all this foot health and vigor in the smartest New York-Paris models. Comfort concealed — beauty revealed.

Send the coupon for booklet and name of dealer. He has Arch Preserver Shoes for you and your children.

MARK TWAIN

wanted to be your friend

Let Mark Twain be your companion as he wanted to be. The coupon below, without expense or obligation, will bring his entertaining, lovable personality to brighten your leisure hours.

Here are the books he planned for you

Everybody has read *some* of Mark Twain. The whole world has chuckled with him over the antics of Tom Sawyer, and Huck Finn, and Pudd'n-head Wilson. But do you realize that these are only a tiny *sample* of the delightful world he opens up to you? How much of Mark Twain do you really know—have you read all the witty short stories, the brilliant fighting essays, the side-splitting comments on men and events, the great novels, the attacks on fraud?

Why not let Mark Twain be your friend as he wished to be? To his publishers he said, "Let's make an inexpensive edition of my books so that everybody can have them." This wish is now fulfilled by the publication of the splendid

Author's National Edition MARK TWAIN in 25 Volumes

Among the multitude of shoddily bound and carelessly edited sets of books now flooding the market, this superb edition of Mark Twain comes as a blessed relief. The gift book tells all about it. Simply mail the coupon. There's not the slightest obligation. Don't deny yourself the friendship of Mark Twain any longer.

When you clip and mail the coupon at the bottom of this page, two things will happen:

1 You will receive, *free*, a desirable booklet called "Your Friend, Mark Twain." This booklet describes Mark Twain's matchless writings, and contains a little collection of his wittiest sayings. It is a gift to you.

2 At the same time there will come into your life something much bigger and more valuable than this—something you cannot see but will cherish for the rest of your days—*the priceless friendship of Mark Twain.*

MAIL THIS COUPON NOW

P. F. COLLIER & SON COMPANY

make a big or even a little success in this golden industry.

Another common notion is that if you can get in on the ground floor of a new invention you're lucky. "The ground floor," by the way, is an expression much in vogue among a certain class of security buyers. Personally I have never been there and never knew anybody else who had been. A friend of mine says:

"Whenever anybody talks 'ground floor' to me, I begin to look for the son-of-a-gun in the basement!"

At Springfield, I was constantly being besought by promoters who wanted to organize and sell stock in companies, to promulgate what was usually described as "one of the greatest inventions of the age." Here again, I repeat that it is management that makes a good business, not merely a good invention; and highly skilled management is not the commonest thing in the world.

Over a ten-year period there have been more than *three hundred thousand* new inventions and designs patented in the United States. But you could probably count on the fingers of two hands, if not of one, the number of big, successful businesses that have been founded on any of them.

ONCE a security has been well bought, it is usually a good rule to avoid selling it at the first drop in market price. Most people remember how the prices of Liberty bonds, bought during the war from the Government at the rate of one hundred dollars, at one time dropped as low as eighty-two dollars. Millions of dollars were lost by frightened investors who sold when the prices were lowest. And yet the rock-bound promises of the United States Government were behind these securities, and they were as nearly absolutely safe as any promise to pay can be. To-day, those same bonds are worth more than one hundred dollars.

Price and value, in other words, are often two different things. Huge losses are suffered yearly by people who, lacking a studied investment program, rush to sell when others are selling and prices are consequently low, and rush to buy when others are buying and prices, for that very reason, are high. Here is a case that shows what may be done wisely at such times:

A much troubled merchant asked my opinion about an investment he had made in the stock of a mail-order house. The market price had declined sharply, and he was thinking of selling.

"What had I better do?" he asked.

"I do not know," I replied. "But," I added, "I can tell you what kind of investigation I should make before selling, if the securities belonged to me. First, I'd find out what the prospects are for the farmers of this country to stage a comeback."

"What have *farmers* to do with it?" he said, in amazement.

"Nearly everything. Mail-order houses don't sell much to city people; their big customers are folks on farms and in small towns. Farmers haven't been having a happy time lately, and that's probably why your mail-order house is in the doldrums. If I were you, I would make some inquiries, and satisfy myself whether farmers are going to have more money to spend before long.

"If they are, I feel pretty sure I should hesitate to sell my stock at a loss. On the other hand, if the situation of the farmers is permanently bad, then I might consider selling, even at a severe loss."

When I saw that man again he said, "Mr. Davis, that little talk I had with you made me about twenty-five thousand dollars. I *kept* my mail-order stock."

The company had not merely sailed out of the doldrums, but had become even more prosperous than before.

IN SPITE of all that has been written and said on the point, it is brought home to me repeatedly that many people still firmly believe that if they can "strike it right," they can get rich in a hurry. My comment on that usually takes the form of a question:

"How many people do you know, comfortably well-to-do or wealthy, who made their money overnight? How many of your friends have got rich quick, and kept it?"

I never knew but two or three, out of thousands who tried it. The experience of a friend of mine throws light on this question. In one day, between breakfast and bedtime, he had five chances to get rich quick. This was over two years ago, long enough so he can tell what would have been the outcome if he had snapped up any of the offers, and I am going to tell briefly the details and results of each.

The first was a proposition received in the mails, that he buy "pure gold." It was a fraudulent scheme, and the man behind it was later convicted.

The second was an opportunity to buy shares in a company to exploit a new invention. In less than a year the inventor had proved himself honest, but hopelessly incompetent. The company could not meet expenses and is now in process of liquidation.

The third "golden chance" was a venture suggested by a wealthy business man, who believed that the end of the underground oil supplies was within sight. He recommended buying the stock of a certain oil company which was particularly well fixed with reference to reserve fields, on the theory that the stock of that company would have to advance greatly in price in a short time. In the next two years, however, more oil than ever before in history was produced by oil companies, and the market price of the stock in question has not advanced, but has declined.

The fourth opportunity was suggested by a financial writer on a newspaper. He had learned that a wealthy man, the head of a great business, was contemplating consolidating his company with two smaller companies. In preparation for the consolidation, if it went through, agreements had been reached as to the prices to be paid for the stock of the two smaller companies. At current market prices, it made the stock of these two companies very desirable. The newspaper writer had seen the wealthy man and confirmed his facts. The deal was straight. As a chance to make money, it hinged on whether or not the merger went through. The wealthy man had said he *hoped* it would go through, but could not promise. Well, it did *not* go through. The stock of the two companies is lower to-day by several points than at the time of the "tip."

20 Years of Growth~

HOLLAND
Vaporized Warm Air-Circulating Systems Now Available Thru 522 Branches

"Every Holland customer must be pleased," said Mr. A. H. Landwehr twenty years ago. One way to make sure that every Holland System was right was to do the whole job, manufacturing, engineering, planning and installing, to leave nothing to chance.

So the first Holland Branch was established. It was one dot on the map, a local institution, as every one of the Holland Branches is today. At this branch, heating plans were made by trained Holland men for each individual home, just as they are made today under factory engineering standards. Every customer *was* pleased—his satisfaction was guaranteed by the Holland bond. The guarantee was the direct obligation of the Holland Furnace Company then as it is now—on every job installed through any Holland Branch.

The principles established in that first branch have caused the Holland Furnace Company to become the Largest Installers of Furnaces in the World, operating a uniform heating service from coast to coast through 522 Factory Branches. The business doubled every second year for eighteen years and is now growing faster than ever, as shown by the chart.

Phone the local Holland Furnace Company. Let the Holland man explain to you how the Holland Vaporized Warm Air Circulating System warms the air, tempers it with moisture to the right humidity and circulates it throughout the house. Local Holland men can be depended upon for sound advice and correct plans and installation. Let them show you how to plan a heating system that will protect the health of your whole family. This service is free and without obligation. Send the Coupon for FREE Book on Home-Heating.

HOLLAND FURNACE COMPANY, Home Office: HOLLAND, MICH.
World's Largest Installers of Furnaces
3 Factories: Holland, Mich.; Cedar Rapids, Iowa; Bethlehem, Pa.

Millions know the advantage of Holland Heating.

Coupon below will bring you full information. Mail it today.

How I Make A Week's Pay in One Day

Make this test and find out whether you can earn $5,000 to $10,000 a year. To make sure of $400 to $600 a month may be far easier than you think. Many of our representatives are making $500 and more a month. Probably more men are making $5,000 a year—or more—with the Fyr-Fyter Company than with any other direct selling company in the world. And it is easier now than it has ever been before!

Fyr-Fyter is one of the most perfect fire prevention devices ever invented. It bears the label of the Underwriters Laboratories. Fire Chiefs everywhere urge and endorse it. Hundreds of America's largest factories use it. After exhaustive tests, the U. S. Government purchased over 250,000 Fyr-Fyters. There is a size and type for every building in America.

Every month, by hundreds and by thousands, American factories and homes are turning to this new way to fight fire. The field is enormous. Only 5% of the possible market has been supplied. Practically every factory, home, store, garage, school, church, hotel, theatre and public building is in need of fire prevention equipment. That's why Fry-Fyter men find it easy to earn $100 to $300 a week. That's why any number of men report earnings of $50 in one day That's why you, too, can make this your lifetime opportunity.

Your Earning Possibilities

T. S. Gill, of Louisiana, pictured above, who made over $600 in one month and who has made as high as $122.50 in a day, says: "I am firmly convinced that any man joining the Fyr-Fyter force and working 8 hours a day will soon show a profit of $5,000 a year."

Send For This FREE Book

We give you an opportunity to join one of the highest-paid sales organizations in America. See how easy it is to start in almost any way that is convenient to you. Send for this free book, "Building a Permanent Income." See how W. E. Saal, Ohio, made $100 in six hours. How Hickey, Ont., made $148 in one day. How Payne, Iowa, made $159 his first 3 days. We do not ask you to do a day's work that will not pay you well. We give you a 90-page manual that covers every point. It tells you exactly what to say and what to do. Don't make the mistake of trying to judge how much you can make, before you read these full facts on this unparalleled opportunity. Mail the coupon now for the full detailed plan.

City.....State.....

The fifth opportunity was offered at a fraternity banquet by two men holding fairly important business positions. Both were excited over a rumor they had heard, to the effect that Henry Ford was going to buy a certain railroad. The bonds of that railroad were at a low figure. *If* Henry Ford bought the road, they argued, surely the bonds would have a great rise. Henry Ford did *not* buy the railroad.

Of these five chances to get rich quick, one was fraudulent, one was a case of honest intentions coupled with incompetence in management; the other three had to do with unconfirmed rumors, or hinged on contingencies which did not come to pass. Not one of them turned out the way the tipsters predicted.

IN CONCLUDING, I want to give my idea of a sound typical investment program. I know perfectly well that it is hopeless to try to prepare such a program to fit everybody. Therefore, I am imagining a young married man whose income is modest, who works for a salary, and does not require his capital for a business of his own, who never inherited a fortune and has no expectations of one, who has no estate to speak of as yet, but wants one, and who is willing to build it with a fair degree of patience and perseverance provided he has some idea where he is headed.

There is no doubt at all in my mind what his first investment must be. He will start a savings account, and make it grow.

Let me say one word about saving. In Harrisburg, one trouble we encountered was with people who at the beginning wanted to save too much. I have advised many a chap to start with less than he planned, for I found that those who were too ambitious at the beginning nearly always got discouraged before long, and quit trying to save.

My young man's second investment is equally certain. He will buy life insurance. For anybody with dependents and no estate, as well as for many others, it is indispensable.

Being married, my young man's third investment will be a home. I admit that, from the point of view of safety and return, real estate does not rate as one of the very best investments. But from the point of view of pride and self-respect, no investment could be better at this stage for a young family man than a well-chosen home.

For his fourth investment my young man will plan definitely to accumulate five thousand dollars in the best bonds that money can buy, before he makes any other investments whatsoever.

The bond unit, as most people know, is one thousand dollars. In many issues, bonds may also be bought in denominations of one hundred and five hundred dollars. But thousand-dollar bonds are most easily marketable, therefore he will buy five one-thousand-dollar bonds.

Each of the five will be a different kind of bond. Not merely will each be issued by a different organization, but also by *different kinds* of organizations. For instance, his selection might include the following:

A well-selected European Government bond—because it can perhaps be bought for less than par, may appreciate in value in the course of time, and is considered sound.

A United States Government bond—because, while the yield is low, and it may cost more than par, nothing could be safer—if he has to borrow sometime, the bank will consider it the best kind of security—and if he has to sell, there is always a ready market.

A bond of some industrial company—such as a light and power company.

A good real-estate first mortgage bond, after making doubly sure of the high character of the investment house selling it, and of the soundness of the appraisal of the property on which the bond is issued.

THAT gives my young man a savings account, life insurance, a home, and five thousand dollars invested in excellent bonds. I shall not lay out his program for him any further, but will simply hand over to him the list of investment axioms (which, by the way, summarize most of the points printed in the box on the second page of this article.

The Most Foolish Investment I Ever Made or Heard Of

Prize Contest Announcement

IN THE article above, Mr. Davis has told you of a number of ways people lose money. Now, we want you to tell us about the most foolish investment you ever made; or, if you are one of the lucky few who have never been stung, you can give the experiences of someone you know. The experience does not necessarily have to deal with confidence men or sharpers or bogus stock. There are hundreds of ways folks can lose money legitimately—by unwise real estate deals, by endorsing notes, by putting money into harum-scarum business schemes. Be brief and frank. Remember that what you have to say may prevent the other fellow from suffering a loss.

For the best letter of not more than four hundred words we offer the following prizes: $30, first prize; $20, second prize; $10, third prize. Competition closes September 20th. Winning letters will appear in the December, 1927, issue.

Address Investment Contest Editor, THE AMERICAN MAGAZINE, 250 Park Avenue, New York City.

Contributions to this contest, and any enclosures, cannot be returned, so you must make a copy of your contest letter and of any enclosures, if you want to preserve them. Manuscripts and inquiries not connected with the contest must be sent under separate cover to the Editor of THE AMERICAN MAGAZINE.

Spots of Color
that Given up the Home

Bright bits of color in the home radiate warmth and hospitality, inspiring a feeling of happiness and well-being.

In nearly every home there is some object grown shabby from long usage—a favorite chair, a graceful table, a flower stand, or perhaps a toy—which is elected for consignment to the attic.

But a coat of *Luco-Lac*—in Jade Green or Mongolian Red, with touches of Dover Gray or Mandarin Blue, will so transform its appearance that you will be surprised and delighted with its smartness and beauty.

The ease and speed with which *Luco-Lac* is applied is astonishing, and the color effects are most gratifying. This way of refinishing is new and different—you'll enjoy it immensely.

Write today for Color Card showing the twenty beautiful shades available with *Luco-Lac.*

Ask, also, for our booklet, "The Way to Luco-Lac," which gives information as to the most satisfactory way to use *Luco-Lac.* Address our Dept. A-9, the nearest branch, for these or any other booklets offered below.

John Lucas & Co., Inc.
Paint and Varnish Makers Since 1849

Science is Leading Us Closer to God

(*Continued from page 25*)

messages from the external physical world to the internal world of the human soul, so these electronic pulses set going the nerves of the eye which carry their messages to the brain. There, the soul deciphers and interprets their meaning. All these vibrations receive their true meaning only when the soul deciphers the messages which these light waves are carrying. And, the more I think of it as a scientist, the more do I feel that those gleams of light from the quiet stars which fell upon my eyes as a boy, with the oxen grazing about me in the silent night, were really messages from God. Just as the telephone bell responds to the clapper, so my soul, responding like a bell to the tiny clappers of the luminous stars, felt the thrill of the celestial hymn which declared the glory of God.

"Now, since science has discovered that the physical universe, with all its electrons in motion, receives its true interpretation only as its messages reach the soul; and since science finds that the soul can decipher these messages, even those from the farthest star—which is millions of light-years away—does it not lead logically to the belief that the soul of man is the greatest thing in the whole universe? Indeed, does it not lead to the belief that the human soul is the highest purpose of God's creative energy?

"THERE is also another line of argument which seems to me to lead toward the conclusion that the soul of man is the expression of God's highest purpose. For example, we have been sneering for a long time at our puny earth, and saying, 'It is such a tiny speck of dust in the universe that it cannot amount to much.' But, we say, 'a star like Betelguese—that's the big thing.'

"But is bigness the true standard of measure?

"True, Betelguese is an enormous thing, nearly three hundred million miles in diameter. Our whole solar system could swing around inside of it. But what is Betelguese? Nothing but a big gas bag—that's all. With all its size, it has no soul. It cannot hear the call which I heard as a little ignorant boy—and am still hearing to-day as an educated scientist—to worship at the altar of Amighty God.

"These big hot stars are only the beginning of God's creative energy, the beginning of cosmic history. But the human soul, in so far as science can penetrate, is the last chapter of this history as far as it has been written.

"And, furthermore, it is in the soul of man, in that great world within us, that Divinity resides. And when we think of that, we are not so small. Nay, we are very important. Science has found nothing in the universe which even compares in importance with the life of man. Compared to the human soul, everything else sinks into insignificance.

"The stars had to condense and become fluid, and then solidify, and cool to a low temperature, before a planet such as our earth was possible, upon which life could exist. Of course there may be other planets like ours. If there are, there may be other souls, other organic lives. But science has forced us to believe that wherever the soul of man exists, that soul represents the highest product of cosmic creation.

"We have felt all this intuitively. Even the savage feels that he is the most important thing in the universe. But to this faith science has added *knowledge*, which means a higher faith. Science shows us more clearly the meaning of it all, and what is our relationship to the Creator.

"Wherever science has explored the universe, it has found it to be a manifestation of a coördinating principle. It leaves us no escape from the conclusion that back of everything there is a definite guiding principle, which leads from chaos to cosmos. We are faced with two alternatives: We can either believe that cosmos, the beautiful law and order, is simply the result of haphazard happenings, or that it is the result of a definite Intelligence. Now, which are you, as an intelligent being, going to choose?

"Personally, I choose to believe in the coördinating principle, the Divine Intelligence. Why? Because it is simpler. It is more intelligible. It harmonizes with my whole experience.

"The theory that intelligent beings like ourselves, or intelligent processes like the movements of the stars, are the outcome of unintelligent haphazard happenings, is beyond my understanding. And why should I accept such a theory when I observe the evidence of a directing Intelligence every day?

"When you see the stars, each moving in its own pathway, or see a seed grow after a definite plan into a tree, or see a baby develop into a full-grown, self-directing human individuality, can you conceive of all that taking place as the result of haphazard happenings? Well, I cannot. It seems obvious that there is some directing Intelligence behind all things.

"OF COURSE, you cannot produce a mathematical demonstration about the Divine Being, in the same sense that you can demonstrate the laws that govern the motions of physical bodies. The Divine Being is far too complex to permit of that kind of proof. But from time immemorial we have felt that our own intelligence is part of something higher. And we have not discovered in the material universe anything higher than the human soul, which manifests itself through our intelligence. And as the soul of man has developed, this intuition of Divine Intelligence has grown stronger. And now, in our day, have come most of our scientific discoveries about the universe. And not a single discovery that science has made tends in the least to contradict this innate feeling that a definite Intelligence is back of everything. Indeed, the more deeply science penetrates into the laws of the universe, the more it leads us to a belief in an Intelligent Divinity.

"So, you see that science, instead of taking God out of the world, as some have feared, brings men into a closer spiritual relationship with Him.

"To-day the average man understands the structure of the universe incomparably better than did the prophets of three thousand years ago. We scientists, therefore, ought to be able to teach him more about the Divinity which, to a spiritually-developed scientist, seems so obviously present everywhere in the universe.

"I believe I can illustrate what I think science has revealed for man's higher spiritual and religious life by taking a text from St. Paul. You remember the apostle said: 'We all, with open face beholding as in a glass the glory of the Lord, are changed into the same image from glory to glory. . . .'

"DURING the past three hundred years, since the Pilgrim Fathers landed at Plymouth Rock, science has revealed four distinct physical realities of the universe. Before that time men did not dream that these four realities existed. And these four realities, these four discoveries about the structure and nature of the universe, are, in my judgment, true Glories of the Lord. Each one has brought man's soul just that much closer to beholding with open face the final Divine Glory behind everything.

"The first physical reality, the first Glory, revealed by science was when Galileo discovered the meaning of *Matter in Motion*. He was the first to formulate the law of the acceleration in the motion of material bodies. This was the beginning of modern physical science.

"A hundred years later, Newton crowned Galileo's discovery with his discovery of the Law of Gravitation. Nothing exhibits the beauty of this physical reality so well as the motion of the planets around the sun. Here we have a cosmic system of bodies in which each part moves along its own prescribed path with a precision impossible to attain in any mechanism constructed by the hand of man. Yet the only guiding force is gravitation. All matter everywhere is ceaseless motion, yet everything reduced down to a simple law—a simplicity such as the world never saw before.

"Then came the second revelation of a physical reality—a new Glory. This was the discovery of Electricity in Motion. Benjamin Franklin and Michael Faraday must be mentioned first among the founders of this physical reality. Franklin discovered that lightning is electricity in motion. This revealed to mankind a new source of power. Then later Volta and Faraday and Clerk-Maxwell explained the laws in accordance with which electricity moves.

"These proved to be just as simple as the laws which Newton and Galileo discovered, which govern the motion of material bodies on the earth or of the celestial bodies in the heavens.

"Then came the revelation of a third physical reality, a third Glory, namely, Radiant Energy in Motion. By that I mean that the whole universe is filled with the radiation of light and heat.

"Of course men always knew intuitively that light seemed to be everywhere. The

ancients worshiped the sun, but did not have a clear knowledge of the laws of light. They did not know that radiant energy extends through the whole universe. But we find that the radiation from one star resembles the radiation from another star, just as one leaf resembles another.

"And, sixty years ago, Clerk-Maxwell, the great electrical mathematician, spoke like a prophet when he made the startling announcement that this radiation of light is a manifestation of moving electricity. The most precious among the fruits of this discovery of Maxwell is that the origin of all light radiation is in the motion of the tiny electrons, which are, as far as we know to-day, the unchangeable, primordial building stones of the material universe.

"Everything that moves seems to be deriving its breath of existence from the electrical forces which have their origin in these tiny electrons. These little workers, infinitely small but infinitely numerous, by their combined activities make up the larger activities of that stupendous thing we call the Universe.

"And this busy little worker, the electron, is the most law-abiding creature in the universe. It loves, honors, and obeys the laws, and its eternal mission is to serve. God employed the heavenly host of electronic workers to build the atoms, the molecules, and the galaxies of burning stars. These celestial furnaces, throbbing with the blazing energy of the electronic host, are molding all kinds of planetary castings, and tempering them so as to be just right for organic life.

"One of these planetary castings is our Mother Earth: it is a mere dust speck in the universe, but this dust speck is the home of the soul of man, and this lifts our tiny earth to a place of honor near the throne of God. The soul's very breath of life is the beautiful electronic music, and to be thrilled by the melody of that cosmic song is the highest aim in our study of electrical science.

"And now the biologists are revealing a fourth reality—a fourth Glory of the Lord. This Glory is the Science of Organic Life. It is the latest reality of the universe which science has given us. And, again, this living reality is found to be so very simple, so beautiful, so inspiring, so intelligent!

"THE spiritually inspiring thing which the biologists have shown us is that all life has progressed from the lowest toward the highest. If one does not believe that life has been a progressive development, step by step, under the guidance of a coördinating principle, then he has a very poor idea of Divinity. For, if life has progressed from small beginnings up to man in, say, ten million years, where will it be ten million years from now? Man is revealed by science as a being who is constantly progressing from glory to glory, changing more and more toward the spiritual image of his Creator.

"You see that the realities of both physical science and organic science reveal a God, a Divine Intelligence that we, as intelligent beings, can depend on. We cannot place our faith in haphazard happenings, but we can place the utmost faith in Divine Intelligence. There is dependability, continuity, everywhere. Science finds that everything is a continuously-developing and intelligent process. It reveals man as a being with a soul which is progressing more and more toward Divinity in a universe of unbroken continuity."

AT THIS point, I said to Doctor Pupin: "You say the law of the universe is continuity, that there is no break anywhere. Do you believe that death itself does not break the continuity of the life of the soul?"

"In order to answer that question," replied Doctor Pupin, "we shall have to look back just a moment, and ask another question: What is the only mystery to-day in electrical science? It is this: Where, when, and how did the electron come into existence?

"The sensible man will answer, God created the electron, and, therefore, only God knows, where, when, and how. This eliminates the mystery at once. The rest we can see for ourselves. God created a host of electrons to be his assistants in building the universe. And when science discovered the electrons and learned to use them in man's service, it was our first glimpse of the Divine Method of creative operation. Consequently, when we light our houses or send a telegram, we are using the electrons—we are merely imitating the creative method of God.

"Let us see what happened after God had made the stars out of electrons: One of the celestial bodies, the earth, for example, got denser, gradually cooled, and became habitable for living things. Life began. We do not know where, when, or how. St. John said: 'In the beginning was the Word and the Word was with God. . . .' To-day a spiritual scientist's translation of the phrase would be: 'In the beginning was the Guiding Intelligence, and the Guiding Intelligence was with God.'

"Let us follow the story a little further through the infinite years, until finally we have man—the soul of man—as far as we know the highest product of God's creative handiwork.

"Now, after God has spent untold time in creating man and endowing him with a soul—which is a reflection of His image, is it reasonable to suppose that man lives here on earth a short span of life—and then is quite extinguished by death? Is the soul going to perish when the physical body dies? Is the soul going to have existed in vain?

"It does not seem reasonable to me that a creation which has been going on for billions and billions of years, in so far as we can tell, for the very purpose of producing that wonderful soul, should cause the soul—your soul and my soul—to exist only as long as our physical bodies exist. Although science does not offer mathematical proof of the immortality of the soul, it gives us plenty of food for thought and belief, plenty of grounds for intelligent hope. And it adds to our conviction that our physical life is only a stage in the existence of the soul.

"You can certainly say that, in my opinion, all scientific evidence tends to show—not to prove, but to point toward the belief—that it is very unlikely the soul of man is going to cease its existence when the body perishes. The law of continuity and the general scientific view of the universe tend, I think, to strengthen our belief that the human soul goes on existing, and *developing*, after death.

"You see science is constantly revealing Divinity and man's relationship to Divinity. Science is, therefore, the highest form of human theology, the highest form of reasoning about God. Science leads us straight to a belief in God, and this is the foundation of religion.

"Science does not prevent a man from being a Christian; but makes him a better Christian. It has made me a better Christian. For the next year I am going to talk to the students of various colleges on this higher spiritual meaning of science. My personal belief is that everything that happens in this great universe is for a purpose; and that purpose is the development of the human soul. That is where science and religion touch. Science adds immeasurably to the foundations of religious faith. Science will strengthen religion. It has strengthened mine—strengthened it very greatly.

"AND these revelations of science, these Glories of the Lord, are coming faster and faster all the time. I have spoken of only four Glories; but there may be three or four, or three or four thousand, more Glories yet to come. The next revelation may come very quickly. We may not have to wait hundreds of years for new revelations. We are speeding up in regard to the meaning of the universe. This is the view of scientific men.

"And, if only three hundred years of scientific revelations have brought us so much nearer to Divinity, it may be that science will go on from Glory to Glory until even earthly men may with open face behold the glory of the Lord, and be changed spiritually more and more into the same image. It is reasonable to believe that it will continue to reveal Divinity and bring men closer to God. This view has led me on to a better and higher religion.

"But my religion does not contradict a single element of the religion which my mother and the people of my native village held when I was a boy. Science has simply brought to me a higher, broader view of the Creator.

"That is the real pleasure of scientific work. The purpose of science is not merely to make material things, inventions to increase wealth and comfort. These things are certainly a blessing, but not the greatest blessing. If science does not assist me to give myself and others a better religion, a better understanding of the Creator, and a closer personal relationship with him; if science does not assist me in carrying out the Divine purpose, then I am a failure as a scientist. But science has made me a better Christian; I believe it will make better Christians of all men and women who try to understand its simple and beautiful laws, because they are the laws of God."

IF YOU want to get that "grand and glorious feeling" of not being afraid of anything, don't fail to read, next month, Albert Edward Wiggam's interview with Dr. David Mitchell, "What Are You Afraid Of?"

150 Pounds Pressure **CRANE VALVES** 2500 Pounds Pressure

Raw juice heaters. GREAT WESTERN SUGAR CO., *Loveland, Colorado. Equipped throughout with* CRANE *valves, fittings, and piping.*

$132,000,000 industry started in a test tube

Far into the night, a patient Berlin apothecary toiled in 1747. The flame beneath the retort highlighted his intent face curiously, and threw a monstrous shadow on the ceiling and wall behind. At last the stooped figure arose. With pride he viewed his test tubes, reflecting that he, Andreas Sigismund Marggraf, had that night proved conclusively that sugar was a natural product of the common beet-root.

Almost 150 years elapsed before this discovery affected the sugar production of the United States. Yet in 1925, beet sugar products in this country reached a value of more than $132,000,000.

Since the principal factor in the making of beet sugar is heat, utilized through the medium of water at various temperatures, it is natural that Crane valves, fittings, and piping should serve ably in the process. For the impressive roll call of Crane installations includes practically every human activity; all variety of manufacturing plants, power development, rail and water transportation, oil production, farming, home comfort.

To all of these, Crane piping materials have made signal contributions. Whatever your need, for industry or for the home, there are types and sizes of Crane valves and fittings to assure utmost safety, dependability, and economy.

The Program Must Go On!

(*Continued from page 27*)

complete failures. Put a man in front of the microphone—even a man who can give a rattling good impromptu talk anywhere else—and he will act like an embarrassed schoolboy, unless he has his written speech right in his hand. I have seen only two or three exceptions to this.

"But when I asked the senator to prepare his talk in advance, he replied with some condescension:

"'Look here, son! I've been making speeches since before you were born! And I don't write them out on paper, either! Don't you try to tell me how to make a speech.'

"Nevertheless, I did try to explain things; but it was no use. So I thought, 'All right! If you find yourself in trouble, you can't blame me.'

"When the time came for him to begin, his cocksureness had already begun to dwindle. He managed to talk for the prescribed length of time; but when he finished, the perspiration stood in great drops on his forehead and his collar had wilted to a rag. I don't think he knew what he had been saying.

"Clare Briggs, the famous cartoonist, was a shining exception. He just leaned up comfortably against the stand and talked to the microphone for fifteen minutes as if they had been pals for life.

"Some people never overcome their nervousness, no matter how often they broadcast. There is one portly tenor, for instance, who fairly seethes with excitement. First, he takes off his collar; then his coat; then his waistcoat. If his program is long enough, he gets down practically to his B. V. D.'s. It's a wonder to me how that man manages to sing in public! But I suppose he isn't so nervous then.

"In the early days of broadcasting, we were required to stop the program every thirty minutes and listen in, for two minutes, for a possible SOS; a 'distress signal,' as it is called.

"ONE evening, a very haughty soprano made her radio début at the studio. We didn't have as good artists then as we have now; and when this soprano got busy in her upper register, your ears ached for cotton.

"Her last number, which wound up with a series of blood-curdling high notes, happened to come at the end of the half-hour period. Consequently, her final shriek had barely died away, when the announcer said:

"'We will now stand by, to listen for distress signals!'

"The lady applied the remark to herself and indignantly demanded an apology. I don't believe she ever really believed our explanation.

"The manager of another studio had his troubles one time with a very distinguished violinist. According to the story as it was told to me, the violinist came to the studio at the appointed time; but after much fretting and fuming, he refused to play.

"Of course his number had been announced and given wide publicity. It was a big feature.

"The manager explained all this. He tried diplomacy, persuasion, flattery. Nothing had any effect! The artistic soul of the violinist had somehow been rubbed the wrong way and he refused to play a note.

"Finally, when only a few minutes remained before the time for announcing the number, the manager said politely, but with unmistakable determination: 'Mr. So-and-so, you agreed to play for our listeners. We have promised them that you will and they are expecting to hear you.

"'Now, I never have played a violin. I've never even had a bow in my hands. But there's a violin somewhere around this studio; and if you do not play, I shall take that violin, stand up before the microphone, get some kind of sounds out of it, and let the audience think you are doing it! You can imagine the sort of performance mine will be. If you want people to think it is *yours*—all right!'

"Whether the manager would have carried out his threat I don't know. But he sounded so convincing that the violinist didn't dare take a chance. He played his numbers as he had agreed to do.

"IF ALL artists were as temperamental as that, I suppose we'd be more philosophical about it. We would think it was 'the nature of the animal;' something inevitable. But we have dealt with many great musicians, and most of them are courteous and charming—not at all inclined to put on airs.

"More often it is the smaller fry who try to be 'high hat.' I heard of one woman who refused to sing because the fabric on the walls deadened the sound of her voice. The necessity for this was explained to her, but she insisted that she couldn't sing under those conditions.

"Finally she asked for a board to stand on. Whereupon, everybody ran around the building, madly searching for a board. By some lucky chance, one was discovered and lugged up to the studio. The lady stood on it, warbled a few experimental notes, and exclaimed:

"'Ah! That's better! Now I can feel the vibrations in my soul!'

"Sometimes there is a hitch over a technical point. The artist is probably justified, from his point of view, although it may seem to us commoner mortals that he is making much ado about nothing.

"For instance, a singer from the Metropolitan Opera House was on our program one evening. While they were waiting, she and her accompanist looked through the score of an aria which was one of her numbers. When she saw that it called for a certain very high note, she protested that this was contrary to the way she had expected to sing it.

"'But, Madame,' the accompanist said, 'that is the way you sang it when you made the record of this aria.'

"'Oh no! I didn't sing that high note for the record!' she declared.

"They discussed the matter, until it began to seem as if the point had to be settled, one way or the other. It occurred to someone that if we could get access to the stock of records on the ground floor of the building, the point *could* be settled. So we hunted up the watchman, had him let us in with his key, found the record and played it; proving to the lady that she really had sung that particular high note. Whereupon, she was quite willing to sing it again.

"Broadcasting a program from a studio is like giving an entertainment literally behind the scenes, instead of out on the stage. We see all the preliminary preparations.

"A few years ago one of the most famous interpreters of Wagnerian Opera was to be on our program one evening. I wasn't at the station that night, but those of the staff who were present described one of these preliminary details.

"With the artist, when she arrived, was a man carrying a small paper bag, which he guarded as jealously as if it contained the singer's jewels. The first thing he did was to ask for an empty glass. This was rather surprising; but the studio people were more puzzled when he kept coming to them, the paper bag clutched in one hand and the glass in the other, anxiously inquiring how soon Madame was to sing.

"The mystery was explained when the time came for her first number. As the announcer stepped to the microphone, he heard the rustle of the paper bag. The man opened it, took out an egg, broke it, carefully ran the white of the egg into the glass, and handed it to the singer, who proceeded to gargle her throat.

"If I could sing as beautifully as Madame," laughed Mr. Popenoe, "I'd buy a poultry farm to-morrow and gargle eggs for the rest of my life.

"You probably have noticed," he went on, "that there has been a change in the method of broadcasting plays. When it was first attempted, the broadcasting was done directly from the stage of a theatre during a regular public performance. But this wasn't satisfactory.

"PLAYS need to be written specifically for broadcasting. That is now being done; and they go on the air from the studio itself. But before this became the custom we had some interesting experiences with the old method.

"It usually fell to the lot of my assistant, Miss Brainard, to take charge of an evening's broadcasting from a regular theatre; and this took her behind the scenes in more ways than one.

"For example, we broadcast a certain play in which Ethel Barrymore was the star. Another, but much less distinguished actress—I'll call her Miss Smith—was also in the cast.

"Apparently the members of the company hadn't been told that the performance was to go on the air; and Miss Smith was one of the first to discover the microphone, which was placed in the center of the footlights.

"When she found out what it was, she mounted her high horse and started all kinds of ructions. She wanted 'that thing' removed; because, as she said, it

STOP, *Start and Steer* BETTER

FOUR small points of contact where tires and pavement meet, four little areas of only a few square inches each —yet how important they are to the safety of motor travel! You cannot stop, start or steer your car efficiently without perfect contact of tires and pavement. *Good traction* is the first requirement of modern streets.

Portland cement concrete pavement provides the ideal surface for rubber tire contact. While always smooth and even-surfaced for riding comfort, the gritty finish affords gripping, non-skid traction even to tread-worn tires. Concrete streets are *safest*—wet or dry!

Your city needs more streets of clean, smooth, lasting, *safe* concrete.

PORTLAND CEMENT

CONCRETE

for permanence

Motorists everywhere prefer concrete roads. They have learned that concrete means safety, on mountain grade or level highway, comfortable travel and arrival on schedule, rain or shine. There are now more than 47,000 miles of concrete road in the United States. And concrete streets now insure safe travel in more than 3,500 American cities. Write for the illustrated booklet which tells of their satisfaction. Portland Cement Association, Chicago.

'spoiled her comedy.' If it affected her comedy as it did her temper, I think she didn't overstate the matter.

"I dare say it *was* an unwelcome distraction to the actors. But here is the little lesson in human nature: While Miss Smith was showing her capacity for being disagreeable, Miss Barrymore came out of her dressing-room, surveyed the scene of discord for a moment, then turned to Miss Brainard with her most charming manner; and when it is a question of being charming, no woman on earth can surpass Ethel Barrymore.

"In that fascinating voice of hers, she asked: 'What is this all about?'

"Miss Brainard told her.

"'How interesting!' she exclaimed. 'Are we really going to be heard by an audience outside of the theatre? That's wonderful, isn't it? Can I do anything to help make it a success?'

"There," said Mr. Popenoe, "you have an example of two types of human beings with which we studio people have become familiar. The small person who thinks he is big, and the *really* big person, who is unassuming, interested in things outside himself, considerate and appreciative of others.

"I suppose everybody comes into contact occasionally with each of these types; but in radio broadcasting we have a constant succession of them. And I think all studio managers will agree that most of our troubles come from the little people, not from the big ones.

"One particular group consists of persons who are seeking publicity for themselves, or for someone they are interested in. Their commonest form of approach is to claim that they are personal friends of some official in the company.

"I was responsible for the quality and character of our programs. When a person asked me to put on a certain feature, I had to decide the question on its own merits, according to my best judgment. But in a surprising number of cases the applicant tried to influence me by assuring me that he was an intimate 'personal friend' of such and such an official of the radio corporation—knowing that I was responsible to that company.

"More than half the time, I found that the official barely recognized the name of his alleged intimate friend! I finally reached a point," he smiled, "where I issued a sort of office edict, as follows: 'When it comes to making programs, nobody in this organization has any personal friends!'"

"TO GO back to the unexpected happenings during a program, we had one unforgettable experience with a decidedly stout soprano. I'll tell you, in advance, what we discovered only through a curious mishap; namely, that the lady's excessive avoirdupois was 'cabined, cribbed, confined' by a rubber corset.

"Before beginning to broadcast, she did a little vocalizing; ran up and down a few scales in order to limber up her vocal cords. All went well, so the announcer threw the switch, made his little speech to the audience, and signified to the lady that it was time for her to begin.

"Perhaps she was thinking of the distance between her and her audience. A good many people can't get that idea out of their minds. They have a feeling that they ought to sing or talk as loud as they can. At any rate, she took a deep breath—a prodigiously deep breath—and the rubber corset exploded with a loud report and disastrous effects! The announcer added a few remarks to his formal speech while the soprano's coat was brought from the dressing-room and draped decorously around her; for she was a good sport and went on with her program without waiting for repairs.

"Speaking of announcers, we sometimes have a laugh at their expense, no matter how familiar they are with the routine of broadcasting. Occasionally, for instance, one of them will make an announcement in his choicest tones and his very best style. But just as he settles back, quite pleased with himself, he hears a disgusted voice from the control-room:

"'You poor fish! You forgot to throw your switch! You weren't on the air at all!'

"BY THE way, the announcers could tell you a story as long as your arm about their experiences with artists. Listeners-in rarely hear any of this byplay; but I recall one instance when the audience was *meant* to get it, and probably did.

"It was during an author's reading of some of her poems. While she was at the microphone, the announcer sat at his table near her, looking over the typewritten sheets of the evening's program.

"Suddenly the lady stopped, right in the middle of her 'Ode to a Dead Pussy Cat,' or whatever it was; and without turning from the microphone—in fact, speaking directly into it—she said sharply:

"'If the young man in this room does not stop rattling those papers, I sha'n't read another line!'

"The announcer became as quiet as the Dead Pussy Cat itself, and the poetess proceeded.

"One of our announcers was decidedly disturbed himself, when a woman pianist suddenly fainted in the middle of a number, and fell off the piano bench. While someone carried her out, the announcer had to do some quick thinking. He decided to let the audience believe that the break was due to some trouble with the reception, and that they had missed the end of the piano selection on that account. So, after a very brief pause, during which he summoned a 'pinch-hit' performer, he said over the microphone:

"'You have been hearing a piano solo by Madame ——. The next number on the program—' and so on.

"These unexpected happenings force us to have a settled policy in meeting them. It seems wiser not to interrupt the smooth flow of entertainment by attempting explanations to the audience. So, when listeners-in are surprised by hearing an unscheduled number in place of the one they have been expecting, I hope they will realize that the most careful program plans we can possibly make will sometimes go wrong.

"One case of this kind was unique in my experience. We had engaged an Hawaiian singer for our program one evening; and just about five minutes before time for him to go on the air a policeman and a court officer came to the studio with a warrant for his arrest!

"It seems that he hadn't been paying his ex-wife the alimony which was due her. She had happened to read the radio programs in the daily paper and so learned where to find him. But the audience didn't have to miss out on that number, for we persuaded the officers to let the singer go on the air before going to jail! They sat right in the studio with him, however; which must have rather cramped his style.

"Sometimes I am thankful that the audience can't see the artists. Beautiful violin music, for instance, wouldn't be half so beautiful if one saw the violinist playing in his shirt sleeves! This is sometimes done, the studio often being very warm, because no doors or windows can be open.

"There are other times, however, when it seems a great pity that the audience cannot look at, as well as listen to, the artists. You would think that operatic stars, for example, wouldn't bother to dress up elaborately to sing before an *invisible* audience. But I assure you that they are as beautifully gowned, and often as carefully made up, as if they were to appear on the stage of the Metropolitan Opera House.

"The audience misses all this. And it misses something else too. Some of the artists do as much acting in front of the microphone as if they were in a packed theatre. Franklyn Bauer, of the Shannon Quartet, is one man you ought to see as well as hear. When he sings a love song, you'd think the microphone was the girl herself, and that he was actually making impassioned love to her.

"Some of the artists simply can't keep still. They are almost like Lloyd George. When he was in this country a few years ago, we broadcast a dinner at which he was the guest of honor. But when it came to his speech we were in despair. First, he would turn and talk directly toward the people at his right; then to the people at his left; and so on, turning in every direction, without paying any more attention to the position of the microphone than if it had been a salt cellar on the table! The only way to broadcast Lloyd George would be to have a whole battery of microphones ranged in a semicircle around him.

"THERE is one striking exception among artists in regard to this tendency to act before the microphone. Marion Talley, the young Kansas City girl who had but recently made her début at the Metropolitan Opera House, stood perfectly still while broadcasting. She didn't move even her hands; just let them hang at her sides. Another singer, who was on the same program, was literally on her toes most of the time. She gave almost as dramatic a rendition of her songs as if she were acting in an opera, with a crowded auditorium in front of her.

"As I said before, a broadcasting studio is a great place to study human nature. We see all kinds of people. A few of them are temperamental and give us an occasional bad quarter of an hour. But the vast majority of them are sensible, deeply interested in pleasing the radio audience, and help to make a manager's job pleasant as well as always intensely interesting."

"I was fired twice before I woke up"

Liked Mechanical Things Even as a Boy

As a boy it was always Edward T. Adams' great ambition to study engineering at a technical school. But the prospect wasn't very bright. It was difficult enough to make both ends meet in the Adams household without laying money aside to send a boy to college.

Worked as Waiter to Get Education

As Edward T. Adams grew older his desire for a good education became stronger, and by working in the afternoons and at nights he finally saved enough money to enter college. Once there he worked as a dish-washer, waiter and tutor to pay his way through.

Finds It Hard to Hold a Job

After graduation, he started out confidently to get a position and was somewhat surprised when employers did not seem any too eager to put him on the payroll. As a matter of fact, he lost two jobs in less than a year before he saw the need of special training.

Asks His Friends About I. C. S.

"Just about that time," writes Mr. Adams, "I heard about the International Correspondence Schools and I asked some of my friends about it. I was surprised to find how many college men had taken a course with this school to get practical training. So I decided to enroll too.

Finds Just the Help He Needed

"The minute I started on the course I could see that it was the very thing I needed. It gave me a practical knowledge of engineering that I could otherwise have obtained only by long and tedious years of shop work. It really marked the turning point in my life."

Now Mechanical Engineer With Big Concern

Today Edward T. Adams is the Mechanical Engineer in charge of mechanical supervision for the Fairbanks Company at Binghamton, N. Y., and a member of the American Society of Mechanical Engineers. He has also patented a number of inventions.

Every mail brings letters from students and graduates of the International Correspondence Schools telling of promotions and increases in salary due directly to spare-time study. We offer you today the same sincere service and the same specialized training that have meant so much to so many other men in the last thirty-five years. Just mark and mail this coupon and full particulars telling how you can prepare for success in the work of your choice will come to you by return mail.

INTERNATIONAL CORRESPONDENCE SCHOOLS, Box 7474-E, Scranton, Pa.

When the Days Grow Shorter

WHEN you have passed forty, then the days begin growing a trifle shorter. Then it is comforting to know that the afternoon of life has been provided for.

Investments made during the heyday of your best earning years insure your future comfort and happiness. But you owe it to yourself to safeguard those declining years by choosing only safe investments.

For more than 45 years, we have aided the public in the selection of safe investments. Because we specialize in securities which stand the test of time, investors now may be found in every state of the Union and most foreign countries, who look with satisfaction on securities purchased from us.

Our special letter and booklet have helped thousands of others invest safely. Why don't you send for them, too? You will incur no obligation by doing so. Just ask for

THE FAMILY'S PROBLEMS

"Where is It?" Was the Question Most Often Asked in My House

I FIGURED up recently that my family was spending five per cent of its time in looking for things. That was bad enough; but we had made matters worse by losing our tempers while trying to find lost household articles. My wife and I have been married for twenty years, and in the course of all those years she had never, so far as I could recall, located the can opener, the tape measure, her "darning egg," or her thimble, without a search. And the rest of us were equally as good, by which, of course, I mean as bad, about losing things.

The question most frequently asked in my house was "Where is it?" And close behind that, came "Who had it last?"

Take my boy, Arthur; he could lose his cap, schoolbooks, jack-knife, baseball bat, and his temper all in one afternoon; and his sister, Juliet, had never gone out of the front door without coming right back and looking for her handkerchief, vanity case, purse, or something else.

I was no improvement over the others. I lost a night-latch key every month or so; no fountain pen ever remained with me for more than six months; my favorite pipe disappeared from the living-room table; an old hat I liked better than any other article of clothing in my closet got itself permanently mislaid.

The four of us had succeeded, at one time or another, in losing every portable object in the house, and once I thought we had lost the piano! My wife had moved it from the living-room to the alcove, and blamed if I didn't think, when I came home that afternoon, it had been mislaid.

Obviously, it was foolish for us to keep on in such a slovenly fashion, wasting time, nervous energy, jazzing the family's temper, and making spectacles of ourselves before the neighbors. I had been thinking for a long time that we should do something about our bad habit of carelessness, but never got 'round to any solution until one night when my wife and I were to go out to dinner at a hotel.

I bathed, shaved, and started to dress in a dinner suit. Everything was there except the studs for my hard shirt. I looked for them. My wife looked for them. The children came in and looked for them. They were nowhere to be found. I decided that night that the fellow who invented the saying, "It's neither here nor there," was referring to a shirt stud. The upshot of the turmoil was that we had dinner at home, and in that incident I found the means for curing us of carelessness.

"HEREAFTER," I announced when all of us had eaten a miserable meal, and had contracted four cases of indigestion because we ate while upset, "this household will live on a different basis."

"What do you mean?" asked my wife.

"The next time we start anywhere," I explained, "and have to look for something before leaving the yard, the trip is off! And, furthermore, no one of us will ever help another one find anything."

A hard rule, but it worked. Believe me, it worked! But it hit me first of all. A night or two after I had issued my imperial ukase, we were all going to a motion picture—one I had suggested, and that I was crazy to see. My wife, Arthur, and Juliet were ready and waiting on the porch when I came out and started to slam the door.

"Have you the night-latch key?" asked my wife, as a matter of custom. I felt in my pockets, but no key was there.

"Wait a minute," I said; "I must have left it on the dresser when I changed my clothes." And with that I started back into the house. The key wasn't on the dresser; I hunted everywhere for it, and finally found it on top of my pocketbook on the bathroom shelf, where I had put it so as to be sure not to overlook it. But I had forgotten to put the pocketbook in my pocket, so, of course, had forgotten the key also. I took the pesky key and hurried down-stairs and out onto the porch. No one was there. I went back into the house, wondering what the thunder—There sat my wife with her hat off, reading a book. Arthur was monkeying with the radio, and Juliet was fixing at the curtains.

"What's the idea?" I asked.

"WE ARE applying your rule," said my wife. And so we stayed at home that night. But next time, the joke was not on me. The children and my wife were eager to go for a ride one Sunday afternoon, and I consented to go. I got into the car and waited for them. All three came along and climbed in.

"Oh, Will, wait just a minute, please," suggested my wife, "I forgot to bring the vacuum bottle of lemonade I made, and we'll want something cold when we get out into the country, for the sun is dreadfully hot."

She hopped out of the car, and I hopped out too. It was a mean, dirty trick to play on her and the kids, but they took it like pretty fair sports. Anyway, it wasn't long before they got even with me by letting me suffer all of one night with lumbago or something because I couldn't find the hot-water bag, which I had previously mislaid. That rule again: No one was to help anyone else look for anything. Another night we missed a strawberry festival when Juliet could not find the string of beads she particularly wanted to wear, and Arthur couldn't find his cap.

These incidents will give you an idea of what a stern disciplinarian that rule of mine turned out to be. But, secretly if not openly, every one of us is glad of the reformation it is bringing about. We had got into the dangerous habit of irritability, all because of the slovenly habit of misplacing objects that should generally be in their rightful places. We are now on the way to becoming a fairly efficient family, and we are happier because of the change!

Beginning

War Drums

A stirring romance of the early American wilderness

By HERBERT RAVENEL SASS

"What are you, boy?" Almayne demanded fiercely. "Are you Lachlan McDonald of Talasé, Prince of the Muskogee Confederacy? Or are you Lachlan McDonald, Gentleman, of Charles Town, with time to waste on every pretty girl who crosses your path?"

TWO songs floated over a garden wall—the song of a bird and the song of a woman. Lachlan McDonald stopped in the lane outside and listened; and for as much as a minute the woman's song went unheeded and he was aware only of the song of the bird.

It was the first sanguilla of the spring, and in an instant its music caught him up and whirled him far from Charles Town, which for five years had been his home. For a little while his thoughts lingered in a distant green country where, long ago, he had first heard the sanguillas sing. Then the woman's voice, richer and sweeter even than that of the black and russet oriole, brought him reluctantly back to the narrow street where he stood beside a high-walled garden.

Slowly that voice won its way into his consciousness. He had listened to the Muskogee girls, daughters of the Wind and of the White Deer, singing in the moonlight beside the clear, rippling waters of Talasé; but they had not sung as this woman was singing. He was aware suddenly that there was a kinship between the woman's song and that of the sanguilla, that somehow this singing woman had caught the very spirit of the singing bird. Yet he was aware too, that while the bird's song was wholly joyous, in the woman's there was a note of yearning and of sadness.

The rich tones stirred him strangely. It was dusk of an April evening, and the air was heavy with the breath of wild blossoms. There must have been some strange prophetic magic in that moment. Somehow Lachlan McDonald knew that he stood at the threshold of a rare adventure.

His black eyes shone with an intenser light, his keen, dark face relaxed in a smile.

"Lady of the divine voice," he murmured, "the Lady Sanguilla, till I know your name: I think—"

Original from
STATE UNIVERSITY SYSTEM OF FLORIDA

A new sound startled him into silence. The song ceased in a little frightened cry. Lachlan heard a man's voice spit forth an oath, then in a moment heard the rasp of swords. Almost at once a deeper voice cried out an exclamation of triumph. There came another cry from the woman—a short, loud cry of terror; and Lachlan, crouching an instant like a poised panther, leaped upward with outstretched hands, and drew his spare, supple body to the top of the wall.

What he saw sent the blood leaping in his veins. It seemed to him that this shadowy garden was a stage set for the fulfilment of his dreams. Of late in those dreams two men had figured often; and now before him he saw those two—a slim, periwigged dandy, recently arrived from London, whom he had seen that morning mincing along the street toward the Governor's Mansion; and the tall, arrogant sea-wanderer, Captain Lance Falcon, whose brig, the "Good Fortune," lay in Charles Town harbor and of whose exploits on many seas and in many lands strange tales were told in the water-front taverns. There was one other also—a woman, slim, graceful, richly dressed in filmy white.

At a glance Lachlan knew what had happened. The gallant from London lay upon his face in the grass, and close to his hand lay his slender sword. Ten paces from him, erect, aloof, insolent even in its stillness and silence, loomed Falcon's powerful form. Plainly, the foppish Londoner had gone down at the first onset; yet Lachlan could detect no blood on Falcon's blade.

FOR a fraction of a second Lachlan's eyes scanned the steel for a telltale sign; then the slight figure of the girl, moving forward slowly as though in a daze, fixed his attention. He watched her stoop beside the prostrate man and bend low above him; and as she bowed her head Lachlan dropped lightly to the ground within the garden.

A low hedge of evergreen cassena skirted the wall, forming an admirable screen. His footfalls made no sound as he ran swiftly parallel with the wall, bending forward to keep his head below the level of the young cassenas. Only a man trained in the woods could have stolen so silently through the clump of stiff-leafed canes close behind Captain Lance Falcon. When Lachlan leaped from the cover of the canes, he leaped upon an antagonist to whose ears no faintest warning had come.

Yet almost at once Lachlan knew that all the skill of his approach had not assured him the victory. His onset all but hurled Falcon to the ground; his long, sinewy arms pinioned those of his opponent; but the surge and heave of that wide-shouldered, long-muscled frame brought instant revelation of such strength as Lachlan had never before encountered.

Lachlan was strong as the catamount is strong; but the tall man with whom he grappled—older, bulkier, heavier—seemed as strong as a mountain bear. The struggle was short. Presently Lachlan was reeling backward toward the cane thicket, hurled thither by a mighty heave of his foeman's arms as Falcon tore himself free.

Panting, disheveled, bleeding from a scratch on his forehead, Lachlan steadied himself at the thicket's edge and stood there, half-dazed, awaiting the onslaught that must come. Falcon, his sun-tanned face a flaming red, his teeth gleaming under his thick brown mustache, ran to the spot where his sword had fallen. Snatching up the weapon, he started furiously forward. But the woman, rising quickly from beside the fallen man, gripped his arm.

He halted and stood breathing hard, while she spoke rapidly, peremptorily, in tones so low that Lachlan could distinguish only a few disconnected words. At last Falcon nodded and answered her briefly in a deep voice which had in it the rumble of thunder or the surf. Deliberately he raised her hand to his lips and kissed it, despite her effort to draw it away. Then, without another glance at Lachlan, he strode off along a winding pathway of the garden.

Lachlan watched him go; then turned to face a worse ordeal

When Lachlan leaped from the cover of the canes, he leaped upon an antagonist to whose ears no faintest warning had come

than his struggle with Lance Falcon. He knew that, acting upon a sudden inexplicable impulse, he had done an amazingly foolish thing. He had hoped—he did not know why—to play the hero before this girl; but now he stood before her, beaten, outdone, humbled. He saw, or thought he saw, scorn and anger in her eyes as she began to speak. Yet chance gave him a brief respite. The man lying on the grass behind her moaned, stirred, and almost instantly sat upright, looking about him with blinking, uncomprehending eyes. She paused to address him.

"YOU are not hurt, Richard," she said, and it seemed to Lachlan that her tone was not only faintly contemptuous but that there was in it also a strange despairing bitterness.

She turned to Lachlan where he stood against the canebrake, still panting a little but clear-brained now and ready for what would come.

"And you, sir," she said coldly, her head high, her large eyes narrowed; "perhaps you will be so good as to make known to me who you are, and why you take it upon yourself to assault my—my friend (she hesitated a little at the word) here in my garden."

Mr. Francis O'Sullivan, the expatriate Irishman who had schooled Lachlan McDonald in manners and in fencing (both verbal and with the rapier), to say nothing of history and the arts, would have been proud of his pupil at that moment. There was a deep purpose in Lachlan's answer, and that purpose his answer was most skillfully designed to achieve.

He bowed courteously, yet with a certain stiffness. "Mam'selle," he said, "with pleasure I do your bidding. My name is Lachlan McDonald, and I am a Scotchman, a Frenchman, and an Indian, a Prince of the Muskogee Nation, a Chief of the Family of the Wind. I entered your garden because I heard a clash of swords and saw you bending over a fallen man. I regret, Mam'selle, that my interference was untimely, and I have the honor to bid you good evening."

He bowed again and, stepping swiftly backward, was lost in the gloom of the canes.

The shadowy garden, more shadowy than ever now as the dusk deepened, lay around him like the impalpable landscape of a dream. From the outer edge of the cane thicket Lachlan passed noiselessly amid clumps of myrtles toward the high wall looming beyond. Leaping upward, he clutched the lowest branch of a young sycamore and swung himself to the top of the wall.

The narrow, unlighted lane outside was empty. He perched comfortably on the wall, his knees drawn up under his chin, his lean, brown hands clasped about his ankles. For some minutes he sat silent and motionless, his eyes narrowed, his forehead wrinkled in a frown. At last his straight lips moved.

"Now here," he said to himself, "is Mystery!"

Shifting his position slightly, he looked up at the moon just rising above the trees. Presently his brow relaxed and he smiled, a smile of boyish, reckless abandon which obliterated in an instant the accustomed gravity of his thin, sharply-chiseled face.

"I fought badly," he muttered, stroking his chin with his hand, "but, i' faith, I think I talked surpassing well."

A murmur of voices checked him. He sat bolt upright on the wall, listening; and in a moment he made sure that the voices were those of the lady and the young gallant whom she had called Richard.

The two came on slowly. Tall hawthorns and roses of Sharon hid them from him so that only once could he catch a gleam of her white gown in the moonlight; but presently they were so near that he could hear every word. It was the girl who was speaking, and Lachlan's eyes brightened as he listened.

"A PRINCE of the Muskogee Nation," she said, "and a Chief of the Family of the Wind. Lord! Lord! Here is the very soul and essence of romance. A handsome boy too, and a fearless one. He fought a better fight than you did, Richard, against that ruffian."

"Odds my soul, Jolie!" Richard answered. "I was blind with rage, I think. I had told the scoundrel that if he came again when I was with you I would run him through;

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

and when, in the midst of your song, I looked up and saw him standing there with his supercilious, sneering smile, I rushed him instantly. Alas, my little bodkin was not meant to parry a rapier."

She laughed. But in the middle the laugh broke, became almost a sob.

"Oh, Richard! Richard!" she cried, "I am in terror—terror of the shame that may come. Falcon grows importunate. And I am losing hope of finding Gilbert. . . ."

They had passed around a bend of the path. Lachlan heard their voices no more and presently a door slammed shut beyond the shrubbery. He jumped lightly down into the street and set off eastward at a brisk pace.

His course took him toward the waterfront of the town. The narrow lane beside the garden wall was deserted; but when he reached the wide thoroughfare fronting the wharves he found it even more crowded and more lively than usual. Two ships from England had come into harbor that day, and in the late afternoon a large pack train had arrived from the mountain country of the Cherokees. Sailors and packhorse drivers, relieved at last from the long tedium of the empty sea and the weary miles of forest path, would own the town that night. Those of the townsfolk who disliked brawls would keep to the quieter streets or retire discreetly within doors; and there would be work for the men of the watch before morning—work, and perhaps some broken heads.

ORDINARILY, Lachlan would have considered this prospect with a little thrill of joyful excitement. But on this evening other matters engaged his thoughts, and he walked on with knit brows, careless of the strange faces that he saw on every hand.

They were, most of them, the faces of sailors and packhorse men, with now and then the stern, impassive face of an Indian or the lean, weatherbeaten face of some buckskin-clad hunter. A few of the latter Lachlan knew; and twice, as he passed an Indian, an almost imperceptible signal of recognition and of greeting flashed between him and the red man. But he stopped to talk with no one amid the groups that he passed strolling along the street or loitering about lighted doorways, until suddenly his way was barred by a stream of men issuing pell-mell from a tavern in front of him.

As they poured out of the doorway, they blocked the path along the street, and Lachlan halted perforce. They were packhorse men, he noted at a glance, wearing the fantastic half-Indian livery of their profession. He saw, too, that some of them had been roughly handled in the house which they had just vacated, that the jackets of two or three of them were torn, and that one—a hulking, scowling youth in a yellow jerkin—nursed an ugly cut on his forehead.

This one, as soon as he had gained the open street, seemed smitten with new courage. He yelled to his comrades to stop, and they rallied 'round him, muttering, cursing, and flourishing their fists, some few of which held long, glittering, evil-looking knives.

Lachlan stood nearer the door than any of the others, and he heard before they did the sound of footfalls just beyond the threshold. At once he jumped back into the dark shadows under the wall of the house; and next moment he saw a tall man standing in the doorway, a man whose face and form he was likely to remember. His lips tightened as he recognized Captain Lance Falcon.

FOR a moment Falcon stood motionless. His handsome, full-blooded face was flushed; his thick, red-brown hair was disheveled; his buff jacket was twisted awry and open under its showy blue sash.

Lachlan read the letter twice, whistled softly, and smiled, his black eyes shining

"So!" he shouted, "you're waiting for me, are you? You want some more o' the same medicine? Aye, aye, you scum, you shall have it!"

The big packhorse driver in the yellow jerkin—he with the bloody forehead—had a knife. He held his ground; but his comrades, less angry and less earnest than their leader, fell back. The street was in a hubbub now, and the man with the knife, confused by the clamor of the swelling crowd behind him, waited too long to strike. His wrist was caught in an iron grip and the knife was wrenched from him. Next moment Falcon had him by the collar, shaking him. The crowd roared and laughed its approval; and, after a little, Falcon thrust the man from him, turned his back, stalked slowly away, reëntered the house and slammed the door after him.

Lachlan, still standing in the shadows apart from the throng, heard a quiet chuckle close to his ear. He turned to face a tall, thin man, white-haired and white-mustached, brown almost as an Indian, and clad in the buckskins of a hunter. Lachlan's eyes lit with pleasure.

"Almayne!" he exclaimed. "The very man! I've been looking for you."

"You'd have found me sooner, boy," the hunter replied, "if you had not been in so huge a hurry. I've trailed you the length of the street. What think you of our gamecock yonder?" and he jerked his head toward the doorway where Falcon had just disappeared.

Lachlan hooked his arm through the other's elbow.

"I would talk with you, Almayne," he said, "about that same gamecock and about certain other more peaceable birds—to wit, a singing sanguilla and a bright-plumaged popinjay from London. Come, let's be going. Jem Marshall's inn is a quiet place, and you like his ale."

"OF THE three," said Almayne, when his second mug of ale was half gone and Lachlan had told as much—and as little—as was necessary in order to gain the information that he sought, "I take it that the sanguilla is of first importance. The gamecock and the popinjay are interesting only because they happened to be in the sanguilla's garden?"

Lachlan nodded, smiling.

Almayne eyed him sharply, then frowned.

"And why do you come to me for knowledge of these matters?" he asked. "I am a man of the woods. I know the savannahs of the Santee and the peaks of the Blue Mountains better than your Charles Town streets."

Lachlan smiled again, more broadly.

"So you like to pretend, old war horse," he said; "but I know you as well as you know those blue overhills of the Cherokees. The gossip of Charles Town is not beneath your notice; and for three months you've been idling here with nothing to do but use your ears. I'll warrant you've used them well."

"While you," grumbled Almayne, "have been idling in Willtown."

The next moment Lachlan saw a tall man standing in the doorway, a man whose face and form he was likely to remember. His lips tightened as he recognized Captain Lance Falcon

Lachlan laughed.

"Behold the proof of my statement," he cried. "Your ears have even caught gossip about my humble self. Now this girl of the garden—this Lady Sanguilla, as I have named her. Who is she? Whence came she? Who is this Gilbert she is seeking? What is she doing in old Stanwicke's garden, where a petticoat was never seen before?"

"She is Lord Stanwicke's daughter," said Almayne quietly.

"His daughter! I did not know that he had a daughter."

"That is not strange," the hunter muttered, and buried his face in his cup.

"Your tongue's lazy, Almayne," said Lachlan, impatiently. "I'll liven it if it takes a hogshead of Marshall's ale!" He gave an order to the black boy in attendance. "Now, what of this mysterious daughter of old Stanwicke, who calls himself a lord? Has he kept her hidden all these years in some dungeon of Stanwicke Hall?"

"He has kept her in England," Almayne answered slowly, "with her mother's kinsfolk there. It is her first taste of this raw New World. She arrived on the ship 'Queen Bess' in (*Continued on page 67*)

I Have Made A Million Dollars But I Haven't Got A Cent

By William C. Freeman

WHILE it is embarrassing, yes, humiliating, publicly to confess to an outstanding fault that has made a good deal of a mess of my life to-day, nevertheless I have decided to make this confession for the good it may do.

I am going to make a clean breast of how I let slip through my fingers all the money I have earned thus far in my lifetime, which approximates one million dollars. This amount I made through my work in the field of advertising, except a few thousand dollars I earned up to twenty-five years of age by teaching in country schools and by writing news letters to some country weeklies and daily newspapers.

Maybe one lone million does not seem a lot of money in these days of many millions and even billions; but it is a big sum of money, just the same. If there are any who think to the contrary, let them count a million. I tried to figure out the other night how long it would take to do so. I found I could count an average of one hundred a minute. On this basis it would take me twenty days of eight hours each, plus six hours and forty minutes on the twenty-first day to do the stint. I doubt very much if you or I were given an assignment to count one million one-dollar bills, upon the promise that all of them would be ours at the end of that time, that we could complete it. It would probably drive us mad—and a lot of use the money would be to us then, wouldn't it?

Let me say at the outset of my story that I do not regret, not for one minute, that I spent ninety per cent of the money I made. To wish any of this ninety per cent back at this time would make me feel that I would have denied much happiness to my family and to many others.

My only regret is that I spent *all* of my money, and more besides. If I had to-day the ten per cent I could have saved easily, I would have one hundred thousand dollars safely invested, and no debts. If I had this money I would feel really and truly that I was rich; and I mean just this, for I have never had a desire to accumulate money for money's sake.

Those school-teaching and newspaper-correspondence days of mine brought some cares and responsibilities, but they were met optimistically.

I married at the age of twenty-one, with the full approval of parents on both sides, who believed thoroughly in the doctrine preached by Henry Ward Beecher, that "early marriages are virtuous marriages."

Just one month and one day after I was married my father met a tragic death. He was suffocated by coal gas. Having been an educator all his life—and one of the best—he had not accumulated any money.

When he passed out of our family circle it was up to all of us to pull together and get along somehow, which we did.

Apart from the void left in our home by my father's death (my wife and I and my mother and only sister lived together), we had a joyful life, despite the fact that it was a tight squeeze to make ends meet.

My mother, who was exceptionally talented and resourceful (she had taught school with my father until I was born), decided to open our home to a married couple, old friends of the family. They came to live with us and their board helped to pay expenses. My mother was known far and wide for the wonderful meals she served. Later on, two well-to-do women friends of the family were taken into our home; thus increasing our revenue.

My sister helped very substantially by teaching a kindergarten class, which met in the big living-room of our home; my wife contributed her share to the household by taking charge of the sewing and mending.

Those were very happy days. Nobody in the household was extravagant or had any extravagant tendencies except perhaps myself, for I was always inclined to be free with money. I liked to make gifts to the family and to entertain friends.

WHEN the first baby came into our home—a boy—we all thought heaven had opened its doors to us. My wife's parents, who took the keenest and deepest interest in our affairs, and who were always ready to lend a helping hand, were equally happy over the coming of their first grandchild. My brother-in-law, much older than my wife, and a bachelor, could not understand at first the joy we all felt; but even he began to strut around like a proud peacock after a while. What a difference a baby makes in a home!

I am injecting these details into my story merely to emphasize how the early days of my life were lived. I had no opportunity to spend much money, and yet I had as much happiness in those days as I have ever had since.

The strange thing about it all is that the experience of those days did not teach me the value of money. If anybody ever had a practical lesson to guide him in his future, I certainly had it.

But let me tell you how this early experience affected me. The birth of my son inspired me to do something that would make more money than I was getting at teaching school and in writing for newspapers. I did not want my wife, mother, and sister to feel that they would have to continue indefinitely to do their part in sustaining the household. Why should a fellow, big and strong and healthy as I have always been, and with a reasonable amount of ability, be content to remain a spoke in the wheel? Why shouldn't I be the whole wheel, as far as providing for the family was concerned?

Following my desire to make more money, I took on the selling of books in addition to teaching and writing for newspapers. This earned for me quite a little extra money. Finally, I gave up teaching and concentrated on selling books, and writing for newspapers.

MY book-selling took me to Bridgeton, New Jersey. It was here that I got my first real start in making money. I had to be away from home a great deal to do this work, but the sacrifice was worth while. I earned enough money in a few weeks to send more money home than I had contributed to the household in any year from my school-teaching and newspaper correspondence. After combing the territory in the Bridgeton zone, I became interested in a newspaper in that city, the "Morning Star." It seemed to me that the editor and publisher of this paper needed a helper. I called on him and told him so. He said, "Heavens, young man, how can I hire you? I am not earning enough money to pay for my own living!"

"That's just it," said I. "I believe together we can make the 'Star' a success. I'll tell you what I'll do: I'll work for you for one week for one dollar a day. At the end of the week, if I have made good, I'll expect you to pay me three dollars a day for the second week; and then, if I continue to do well, I'll expect you to pay me six dollars a day for the third week, and will continue from then on until the paper makes enough money to pay me fifty dollars a week."

The owner agreed to my proposition. At the end of two months, I was being paid fifty dollars a week, which in those days was considered a big salary. I began to feel that I was well on my way toward making money—but all I wanted it for was to make my family more comfortable. Fifty dollars a week was just four times as much as I had made teaching school.

My job on the "Star" embraced editorial writing (not very brilliant), reporting (just ordinary), the writing and selling of advertisements (fairly successful), proof reading, bill collecting, and so forth. It kept me humping six days a week; but I could stand it, for I was strong and healthy, and, besides, the work was very interesting. I also contributed correspondence to the New York "Sun," Philadelphia "Record," and the Trenton (N. J.) "Times," which brought me in an

Digitized by Google
Original from
STATE UNIVERSITY SYSTEM OF FLORIDA

average of one hundred and fifty dollars a month, for this was a good news territory.

I learned a lesson on the "Star" which eventually shaped the course of my life. I found out that there is a great deal more money to be earned by selling advertising for newspapers than in writing for them. Advertising brings grist to the mill.

I put over one advertising stunt on the "Star"—a write-up of the south Jersey oyster industry, paid for by the oyster men—that brought in three thousand dollars cash, which the publisher divided with me fifty-fifty. I had never seen so much money at one time in all my life. Think of it! Fifteen hundred dollars—twenty-five per cent more than I had made in two years of school-teaching and odd tasks.

Did I save this money or any part of it? I did not. What was the use? I could do so much with it to make my wife, boy, mother, and sister happy that I let it go far easier than I had made it.

But would it not have been a fine thing if I had put this money away for a rainy day?

MY WORK in Bridgeton attracted the attention of Sam Hudson, New Jersey correspondent of the Philadelphia "Record," who was a shining example of that type of newspaper men whose greatest pleasure in life is doing things for others.

Sam told me that it was time for me to get located in a big city. He thought I had it in me to make good. He said he would get me a job in Philadelphia. He did, and I moved with my wife and baby to Germantown. I was given charge of the advertising department of the Germantown (Philadelphia) "Gazette," a weekly newspaper.

At the start I did not make as much money as I had earned in Bridgeton, because I had to give up my newspaper correspondence. The news for this section was covered by other correspondents. But very soon I was making twenty-five per cent more money. The "Gazette" increased its size three times to accommodate its advertising, and each time I received a very substantial increase in salary.

In addition to this, I was given a job to gather social news for the Sunday edition of the Philadelphia "Press." Bradford Merrill, managing editor of that newspaper, now a very important New York newspaper executive, assigned me a big territory to cover. This kept me busy every night in the week except Saturdays. I was paid five dollars a column; but I averaged seven columns every Sunday; which made me thirty-five dollars a week extra.

It was more money for me to spend, and I spent it. I did not know anything about budgeting my expenses. I just let it go as it came. I did not have time, or thought I hadn't, to watch my step in spending.

A year later I was invited to join the advertising staff of The Philadelphia "Press," a big opportunity for a young man, for I got wonderful training under the management of William L. McLean, now the owner of the Philadelphia "Evening Bulletin." I still retained my job as gatherer of social news—so my income was just about the same as I had been making in Germantown.

But before long my work attracted the attention of James Elverson, Sr., publisher of the old "Saturday Night" and "Golden Days," who had just purchased The Philadelphia "Inquirer." I was offered and accepted the advertising management of this newspaper.

PHOTOGRAPHED BY D. JAY CULVER

William C. Freeman

THIS meant a big increase in my income. And soon afterward there came a happy increase in my family, the birth of a daughter. Then I was able to do what I had longed to do since the birth of my son. I got the family together again under one roof—my wife and two babies, my mother and sister. At last I was able to relieve my mother of any cares or responsibilities, and never again did she have either as long as she lived. She died in her eighty-first year, twenty-five years after my father's death. I shall never forget her last words to me: "Will, you have never caused me a moment's worry since you were born, and I could not have had more than you have given me had I been the Queen of England."

I was making at this time four times more money than my father had made as superintendent of public schools in my home town of Phillipsburg, New Jersey.

All the money, however, passed out of my pockets as easily as water flows through a sieve. Expenses increased with every increase in my income, which is the habit, I suppose, with most people. There was no sane reason, though, for letting my expenses go beyond my income, which I did. I found myself piling up debts, and from this time on I was never out of debt. I did not worry about my debts, though, for I thought I could pay them off at any time. It never occurred to me—not until fully twenty-five years later—that debt eventually would bring upon me not only great anxiety and unhappiness, but that I would lose friends and credit as well.

But I must pat myself on the back for one thing: I was giving full rein to my big fault—spending money as fast as I made it, often faster; but I never shirked my work. I was always trying to find more things to do, and I always found them. I spent very little time with my family. I would go home to dinner every night and romp with the babies until their bedtime, then I would return to the office and often work (*Continued on page 196*)

How I Tamed My Temper

By J. Frank Davis

I DOUBT that there's a civilized man on earth whose anger is naturally more unruly than mine. I'm equipped with a temper that is literally vicious; a fact which no one ever believes. People remark to my wife about my equable disposition—and she smiles, because she *knows*.

And yet, although we have been married more than twenty-five years, and there isn't a symptom of my wrestlings with the black angel of rage that my wife cannot read as plainly as if it were written in foot-high letters upon a billboard, even she has seen me completely lose my temper only three times. And on two of those occasions I was justified.

On the third, when I had a sudden altercation with a seat-hog on an elevated train, I made an unpleasant exhibition of myself. That, however, was the last time I ever performed in public—and that was sixteen years ago. My last private performance, although somewhat more recent, was one of the two justifiable occasions I have mentioned.

My blood was young and hot when I learned how to handle my besetting sin. My temper was getting pretty well under control before I was twenty-five.

"Well, how did you do it?" people asked me, "tell us the rules for controlling temper."

I adopted two definite rules. One of them, which had to work, if at all, while anger was surging, I broke a good many times; I couldn't help it at first. The other rule I have never broken to this day. These rules I formulated while tossing in bed one night, unable to sleep because of the pain of a black eye, a swollen nose, and a right arm and hand so badly bruised and battered that they were all out of commission for close to a week. It wasn't any regret over a licking that started my reformation, because I hadn't been licked. On the contrary, the other fellow was justified in being thankful at that moment that he was alive. But his survival was no credit to my side of the ledger.

She had a business dispute with her boss

As I tossed about through the long hours of that sleepless night, I saw myself a potential murderer, and solemnly promised myself I would never be *that* again. The only way out was to rule my temper instead of allowing it to rule me.

Heretofore, it always had ruled me. It had conquered me that very day. Over a matter no more important than a hat and a pair of cheap cuff links, I had knelt on an unconscious man and hammered my fists into his face until other men dragged me clear. I summed up plenty of evidence against myself that night. I found myself guilty, and put myself on suspended sentence.

AS a child I had a violent temper. I always said whatever came into my mind to say, and I often threw things, with damage to the surrounding scenery.

Nothing that might possibly cure me was left undone at home. Being city dwellers, we had no woodshed; but there was a cellar, and under the cellar stairs hung a light, limber trunk strap. It was used when patience and forbearance ceased to be an adult virtue, but not too often nor too heavily. And it was never wielded with the slightest evidence of passion. My whippings were always deserved.

Precept and example did not break me of having blind, uncontrollable rages. Punishment, corporal or otherwise, didn't break me, either. I grew up into a moderately reasonable, good-natured young man until something angered me. Then I exploded.

I was not a brawler; the atmosphere of my rearing was calm and peaceful; I had rather fewer fights at school than the average boy. In the years afterward my quarrels were infrequent; but when I had one it was a quarrel to be remembered—usually with bitterness.

There are people, I will admit, for whom a quarrel merely brightens up the corner where they are. They can bicker, and "make up" and bicker again, and be, apparently, none the worse for it afterward. I have known business partners who fought orally like cats and dogs, and still remained friends. But I am not one who, in matters of quarreling, can take it or leave it alone. A quarrel, with me, means an irrevocable breach. Once let my temper cut loose, and I am not the master of my tongue.

And I cannot "make up" afterward. A quarrel in which I have participated remains unhealed. I do not mean that I cannot afterward meet my antagonist, and speak to him, and remain as outwardly courteous as though nothing had happened—although this is sometimes difficult—but we never again can have anything approaching cordial relationship.

I put all this in the present tense, even though,

He hadn't one friend in the world

ILLUSTRATED BY EDWINA DUMM

Digitized by Google
Original from STATE UNIVERSITY SYSTEM OF FLORIDA

in my experience, it is far in the past, because I know it would be as true to-day as it ever was, if I allowed myself to quarrel.

When I was in my early twenties I had some words on the street with a rival reporter. Harsh and ungoverned language developed, and he and I never again exchanged a word or a nod.

There were only a few other similar incidents. I am certain that among my acquaintances I did not have the reputation of being either an unreasonable or a quarrelsome person. But the thing that differentiated my quarrels from some other people's disagreements was their quality of finality. Every time I had any falling out with a friend, I had one less friend ever thereafter.

I wasn't proud of this disposition of mine, but I wasn't especially ashamed of it. Vaguely I regretted that I was that way, but that was the way I was. People could "like it or lump it."

I THOUGHT of some of these things that night when I couldn't sleep because my bruises ached. And I ask you to believe that the fact I had been magnificently beaten up in the early moments of that battle had nothing whatever to do with my remorse. What kept coming up into my mind over and over again was what I had done after the fight ought to have been over.

I had won. Battered and bruised, I had finally succeeded in getting through the flailing arms of my antagonist and had thrown him with a wrestling stranglehold—which is almost always barred from professional wrestling matches because it can easily be fatal—and then had got my thumbs on his windpipe and choked him into unconsciousness. I turned him over and was blindly hammering his face with both fists when other young men who had heard the disturbance came in and dragged me to my feet.

The fight had taken place in my room in a rooming-house, where I had found him that Sunday afternoon going through my suit case. There had been petty thieving in the house; I had already lost a hat and a pair of cuff links. This youth, a roomer in the same place, had sympathized with me and said he also had been robbed. But in his surprise at being caught he admitted he was the thief. Then I jumped at him.

He was taller than I and he could box. I never was a boxer at all, but I knew a little about wrestling. I took a fine thrashing, part of it with a heavy cane that he got his hands on at one stage of the fight. He hit me a good many times; I do not think, until I had got him down and choked him, that I had hit him once. Yet, for all the impression it made on me, that artistic beating that he gave me might have been done with the loud-sounding but harmless bladders on a string such as clowns in a pantomime used to wield.

What I thought of that night as I lay in bed wasn't the early part of the struggle, or the justice of my share in it, or the fact that ultimately I had whipped him, but of those blind, red moments when I had him unconscious, and still was pounding him in the face, angry beyond all control, as irresponsible for the moment as any madman.

I remembered a man, a few months before, whose sentence to four years' imprisonment for manslaughter had followed a rooming-house scuffle similar to mine.

To think of myself being stark, irresponsibly, murderously insane, even for a few moments, was not pleasant. Said I to myself, that night, "Never again will I let my temper get the best of me!"

And then I made the two rules. This is the first one:

"When you find yourself losing your temper and about to say something you will probably be sorry for, get out of the room. If you are out of doors, walk around the block. Don't say a word except, 'Excuse me,' to those present! If you do, you'll probably say too much."

Of course I except from this rule the occasions when I or any other man *ought* to get violently angry. One or two such occasions have since come to me, the most outstanding one when a drunken rowdy insulted my wife. Then, properly, nature took its course.

But most quarrels are not over really vital things, at least in their beginning. The occasions are very rare when a man cannot avoid rancorous dispute and at the same time preserve his self-respect. It is seldom indeed that one is the loser in anyone's eyes if, when something is said that angers him, he freezes like an iceberg and instantly drifts away.

I HAVE departed temporarily from many a group with an abruptness that sometimes must have seemed to be bordering upon discourtesy. My most awkward situation was an evening when I rose from a dinner table with a muttered apology as the soup was being served, and did not return to the house until after the other diners had left the table. I could not get myself in hand, on that occasion, for close to an hour.

As the years passed, however, the length of time necessary to achieve self-control shortened. It is now more than ten years since I have found it necessary to leave any company because of my temper. I get hold of myself without going away.

Rules are easy to *make*. It seemed easy enough to me to think of leaving when an argument grew bitter, but at first it didn't work, because I said the hot word, and remembered the rule afterward.

And that is where the second rule came in, which is:

"After a quarrel, if you were either wholly or partly in the wrong, or if you said anything that was unfair or untrue or unwarranted, apologize for your share at the first opportunity. Give your apology at least as much publicity as the quarrel had, if possible. And—note well this proviso—'in figuring whether or not you were partly in the wrong, do not give yourself the benefit of any doubt.'"

(*Continued on page 101*)

He Didn't Rule His Temper, But He Put a Muffler on His Tongue

"THE greatest newspaper manager I ever knew," says Mr. Davis, "was reputed to have the most violent and uncontrollable temper this side of Tophet. In his younger days it had sometimes been his unpleasant habit, when enraged, to discharge any man who spoke to him. This naturally lost him some good men. But at the time I worked for him he had discovered a method not to control his temper exactly but to prevent its working to his or anyone else's disadvantage.

"He carried in one of his pockets a special handkerchief, and the instant his temper flew off the handle he jammed that handkerchief into his mouth, and kept it there until his rage had evaporated. From behind it, when one spoke to him, if anyone was so unfamiliar with his failing and the handkerchief symptom as to do so, came harsh, indistinguishable sounds. He was presumably cursing his interlocutor, telling him what manner of man he was, firing him peremptorily on the spot—but the other man couldn't understand what he was saying.

"Unwittingly, one day I walked into his room on an errand and saw him sitting at his desk with the telltale handkerchief between his teeth. I backed right out, hastily remarking that I would return later. He said, earnestly, 'Woo-woo-woo-woo!' I have ever since wondered whether he fired me, or told me to go ahead with what I came to say.

"I have seen him stalking across the editorial room toward his private office with the white corner of a handkerchief hanging from the side of his mouth. No one of the staff ever seemed to look toward him at such moments. He would disappear into his room and the door would slam. After a long time he would reappear without the handkerchief, and the storm was over."

The Biggest Thing That Lindbergh Has Done

By Mary B. Mullett

WHEN "Charlie" Lindbergh landed at Le Bourget, after making the first non-stop flight from New York to Paris, he immediately started—but without knowing it—to achieve something incomparably greater than any transatlantic hop could possibly be.

It is the biggest thing he has done. It is the biggest thing *anybody* has done within your memory, no matter how old you are.

To fly across the ocean was a great stunt. To do it alone was a greater one. But he has accomplished something else which I think is still more remarkable.

To find out what this was, let's take the story of certain things which Lindbergh did, and of certain things which we did.

Now that we have stopped shouting ourselves hoarse, let's listen to the echoes of the noise we made. Perhaps we shall, as newspaper "Personals" say, learn something to our advantage.

No one, not even Lindbergh himself, knows all the amazing details of what happened in the weeks after he landed in France. I have been collecting a mass of these details. Some were gleaned from men and women who met and talked with him. Some are from those who merely saw him. Others are from people who haven't had even a glimpse of him. We must go to all these sources if we are to get at the truth.

This twenty-five-year-old American started a veritable human conflagration. So far as I can discover, the man who seems to have had the best chance to observe this strange conflagration was Carlisle MacDonald, the Paris correspondent of the New York "Times."

MacDonald was at Le Bourget when Lindbergh landed. He was close to the young aviator through the exciting days which followed. He returned with him to this country. He saw official Washington swept off its dignified feet. He watched New York go wild. His account of what happened in Paris alone is almost incredible.

"When Charlie arrived in France," MacDonald told me, "he expected to receive cablegrams from his mother and some of the men who had backed his flight. But he was utterly unprepared for the tidal wave of personal interest which immediately began to pour in.

"No one ever will know how many letters were written *about* Lindbergh. Thousands were received by newspapers. It is probable that millions were included in the private correspondence of people.

"But there were more than *three million* letters written to Lindbergh himself! Two hundred and fifty thousand cablegrams and telegrams were sent him. He has received several tons of parcel post packages.

"Before Lindbergh's first day in Paris was over, his mail had become a white elephant on a good many pairs of hands. Ambassador Herrick had assigned seven or eight members of his staff to the job. A whole wing of the American Embassy had been hastily organized as a Lindbergh post office. One of the American banks in Paris had loaned the young aviator ten of its most competent secretaries and several of its officials.

"By ten o'clock that evening, however, even this formidable force was swamped. Waste baskets were set in rows on the floor; and after a hurried examination letters and messages were chucked into these baskets. This work continued all that night and every succeeding night of Lindbergh's stay in Europe.

"The French Government, which handles both the post office and the telegraph business, issued orders to set up a special Lindbergh division. Instead of the regular deliveries, his letters and telegrams were sent to the embassy every hour.

"Of course he did not read all these messages. Probably he *never* will be able to read them. Someone has taken the trouble to estimate that, if Lindbergh dropped everything else, it would take him the better part of two years to go through his mass of letters. Tens of thousands of them never have been opened.

"'I would love to read the messages and answer them myself,' he said to me in Paris, 'but everyone realizes that this is impossible. All I can do is to thank these kind people through the newspapers.'

"He received letters and telegrams in English, French, German, Italian, Spanish, Russian, Chinese, Japanese, and almost every other known language.

"Practically every important city in Europe asked him to be its guest. Hundreds of distinguished foreigners invited him to their homes. Wherever he went he was mobbed by enthusiastic crowds.

"From the time he landed, business offers began to come in. As soon as it was realized that he had won an unprecedented popularity, these offers became simply astounding.

"I don't believe that Lindbergh himself knows the total amount of the business propositions that have been put before him. Most of them he dismissed without giving them a second thought.

"He has turned down a score of offers, any one of which would have meant a fortune in six figures, (*Continued on page 106*)

The Song

By Donald Gillies

THE press in the market slackens,
The noisy strife of greed,
The hue and cry for pleasure
Cease, while the heart gives heed
To an older sound and braver
Than soldiers on parade,
Than the ring of golden metal
And the fiery clang of trade—

The song of youth and courage
And all youth's artless grace;
The song of man assailing
The bonds of time and space;
The song of one for many:
A life, at stake, alone,
Winging through the darkness
To morning and a throne!

Age hears, and old dreams waken;
Youth hears, and vows anew;
Men's common kinship rallies
And joy and pride undo
Misunderstanding's mischief,
Prejudice's wrongs—
God send, at need, the voices
To sing for us such songs!

"IT ISN'T snowing snow, you know, it's snowing paper chips!" (left) New York, frantic with delight, stages in honor of Lindbergh's return the biggest street celebration ever seen. Chipped up telephone directories, books, magazines, newspapers and millions of yards of ticker-tape produced this "snow scene" in lower Broadway as Lindbergh passed. In places the amateur confetti became knee deep.

Dr. David Mitchell

DR. DAVID MITCHELL is a clinical psychologist. His job is to impart to people that "grand and glorious feeling" of not being afraid of anything, by teaching them how to unlearn their learned fears. For over twenty years, as experimental psychologist and President of the Consulting Psychologists of New York State, Doctor Mitchell has made an exhaustive study of human beings and their conduct. "The worst and most common fear of all," he says, "is the fear 'I Won't Make Good'." In this article Doctor Mitchell explains how this and other common fears arise and how they can be ousted by building up fool-proof habit systems that will tell the old injurious habits where they step off.

Fear and the sense of failure are the twin evils that crush human lives, and they are both unnecessary and can be got rid of"

What Are You Afraid Of?

An interview with Dr. David Mitchell, reported by

Albert Edward Wiggam

WOULDN'T it be a "grand and glorious feeling" to wake up some fine morning and discover that you were not afraid of *anything?*

Well, such a state of mind is possible for ou to attain.

There are only two natural, unavoidable ars. All except these two are *learned* ars; and, just as you have *learned* them, u can also *unlearn* them.

And you do not have to grit your teeth, develop any extraordinary will power, order to gain this feeling of self-confi-nce. You do, however, *have to do two y definite things:*

FIRST: You must discover the cause of ur fear, worry, and lack of self-confi-nce, which you will find is often some tle, completely forgotten, incident of ur childhood. Frequently, this discovery one will cure you.

SECOND: You must reëducate your ental habits to a new point of view.

In order to do these two things, the new ience, now usually termed "clinical" ychology, can very greatly help you.

These are the conclusions of Dr. David itchell, who has been dealing with the ronic fears of people for ten years as a nsulting, or clinical, psychologist, in his fice in New York City.

He also speaks from his twenty years of ork as an experimental psychologist and a university lecturer on psychology. is rank among his colleagues is amply tested by the fact that he is president of e Clinical and Consulting Psychologists New York State and chairman of the linical Division of the American Psycho-gical Association.

Recently, Mrs. Wiggam and I took a o-days automobile trip with Doctor itchell and his wife, exploring the high-ays and byways of Long Island. I found e doctor to be as expert a camper and immer as he is a psychologist, and able wash dishes with sand and dirt, without drop of water, until they were spotlessly ean—a feat which astonished and inter-sted me about as much as his knowledge f the human mind. I mention these facts ecause I concluded that his success in etting at the inmost workings of people's inds was partly due to his technical aining, partly to his originality in de-ising new methods of psychological nalysis, but also to the fact that he, him-elf, is a big, broad-minded, human person, ith rich understanding sympathies and n appreciation of the needs of everyday uman nature.

After returning to New York and getting rested over a good dinner, I said, "Now, Mitchell, I want to ask you about a remark you made when we were standing on the edge of Montauk Cliffs. You will recall that I told you it made me sick with fear to stand on the edge of high cliffs, towers, and canyons. You replied that I had learned this fear somehow and that I could unlearn it; and you added that normal human beings have only two natural, inborn fears. If most of our fears are not necessary, and if psychology can show us how to train ourselves out of them, it marks a turning point in human happiness."

In response to my request, we went into Doctor Mitchell's office. He got down a big bundle of records from his files, and for *five solid hours* he talked an uninterrupted stream of the best and soundest psychology of happiness and courage I have ever heard. And during all that time, he did not once mention the "subconscious" or the "subliminal self," or any of the vague nebulosities with which pseudo-psychology has filled people's minds.

Doctor Mitchell believes that in order to attain a healthy mental life, it is not necessary to acquire some mysterious "will power" or some spiritual "contact with cosmic energy" or some unbelievable power of "concentration" or "relaxation" or "harmony" or any of these hifalutin states of somnambulistic mental coma or mental excitement. He believes you can achieve self-confidence and self-control by much less elaborate and mystic procedures. What he believes is that you can *educate yourself* to become free from fear and the feeling of failure by building up simple and ultimately fool-proof *systems of habit*, which will make these things a practical impossibility in your life.

"THERE are hundreds of ways," Doctor Mitchell began, "by which people can *learn* to be afraid; but the original, intuitive fears—those we are born with—are only two. Dr. John Watson's brilliant experimental work has shown that if you hold a newborn infant in your hands and suddenly pull your hands away, letting it fall back on the pillow, it will cry with fright. Also, if you drop a steel bar, or slam the door near by, or allow a dog to bark in the room, or make any other loud noise, the babe will again show signs of fright.

"Watson has tried in hundreds of other ways to frighten little babies from one day to several months of age, and he has been unable to find anything that will frighten them unless it be accompanied by a loud noise or by placing the child so it feels in danger of falling.

"We can then, I think, assume as a fundamental fact of human life that all fears but these two are learned fears. If they are learned, they can also be unlearned. And that is a large part of my business as a consulting psychologist; namely, to teach people *how to unlearn their fears.*"

"DO YOU mean to say that if a child had the necessary training, if nobody ever talked fear around it, and if it were never frightened, it might grow up to a life entirely free from fear?"

"Absolutely! I've seen it done," replied the doctor emphatically. "I know two boys, one of them fourteen and the other sixteen, to whom I have been a sort of godfather for over ten years. These two youngsters, as far as we can discover, are absolutely fearless. I believe they have never known the emotion of fear."

"What would they do," I asked with astonishment, "if they were in real danger?"

"They would do just what you do a hundred times a day without knowing it. They would try to get out; but they would not get scared.

"You are in danger every time you walk up-stairs. People slip and break their legs or necks on stairways. But you don't keep thinking of that, and so you have no fear. Some people do think of this, and are scared.

"Now, it isn't dangerous to stand on the edge of a cliff unless you do something which ordinarily you do not do—unless you get frightened and lose your balance. If you don't think about it, you are all right.

"Let us see how these two boys meet situations which fill many much older persons with unutterable fear.

"Recently, the coal bin in the basement of their home caught fire. Many boys who had been taught to be afraid of fires would have become panic-stricken, wasted time, and possibly let the house burn down. But the younger of these boys, having none of the confusion of mind caused by fear, rapidly took measures to put the fire out. He mentioned it afterward only casually, as if he had merely kicked a stone out of his way on the sidewalk.

"Another instance: Most boys are afraid to sleep alone in a big house; some grow frantic at (*Continued on page 202*)

She bent toward him from the unyielding board seat. "Cheer up, Jim. We don't have to live more than one day at a time"

Five Cents For Luck

An epic of the northern prairies

By Lillian Beynon Thomas

ILLUSTRATED BY HANSON BOOTH

JEAN CARROLL was beginning her fifty-mile trip back to the homestead. She was humming "Red Wing," a song popular on the prairie that fall. She had heard some travelers singing it in the hotel in Swift Rapids, where she and Jim had spent the night. She thought the hollow rumble of the wagon over the frozen crust of the prairie made a splendid accompaniment.

From time to time she glanced at her husband, who was going back a short distance with her. He was walking beside the oxen. His bowed head and sagging shoulders tugged at her heart. She called, "Jim."

He stepped back and put his hand on the edge of the wagon box beside her. She bent toward him from the unyielding board seat. "Cheer up, Jim." She spoke more loudly than she intended. "We don't have to live more than one day at a time."

"Good thing too," he replied, with an evident effort to be cheerful, and he glanced toward her but not at her. "Good thing, too, with only fifteen dollars and five cents between us at the beginning of winter, and you in the condition you are."

"It might be worse," Jean laughed. She pulled her red hood down over her ears. "I might be ill instead of never feeling better, and Harry and Bess are so healthy. I tell you, Jim—"

"Whoa!" Jim's voice rang out above the rumble of the wagon and the oxen stopped promptly. He caught the edge of the wagon box with both hands now, and met his wife's eyes squarely. She noticed his drab, deeply lined face, that resembled the prairie from which all color had been squeezed by the icy grip of winter. But the prairie had been resigned—ready. Jim's face bore the marks of struggle, rebellion.

"I'm afraid to have you go back there alone!" His voice was heavy with too much emotion. "Jean, I can't do it. We'll give up. Three years is enough. Hail, drought, and, this year, frost. Even against that, we'd have made it if we'd had the railroad. That grain would have sold for enough to tide us over; now it will rot—all but what the chickens eat."

"ONE good year will put us on Easy Street!" Jean voiced the call of the rich black soil beneath his feet.

"I know; there's a new wheat too, called Marquis, that ripens earlier and stands—but what's the use? We can't hold out long enough. I won't let you stay out there—so many miles from a doctor—alone."

He stepped back, head up, shoulders squared, like a man who has made a decision that had been resting heavily on both his conscience and heart.

Jean's laugh rippled merrily over the prairie, borne along by a cutting wind that snatched it from her lips. "Let me stay!" Her voice bubbled with amusement. "Why, my dear boy, you can't prevent me. Do you think we're going to give up now, when another railroad, within twenty-five miles, will be in operation before spring? And next year we'll have our patent for the best farm in the world. Nothing doing."

"Harry needs boots right now, and you should have supplies," Jim continued, as if he had not heard her. "You can sell the chickens and the cow. McGregor will help you. Do you think you could drive the oxen and bring whatever you think we will need most, to Regina? Some of the fellows tell me there isn't much work in the bush this winter. I might need the oxen for odd jobs. I'll get a house as soon—"

"You are not going to Regina to do odd

Digitized by Google
Original from
STATE UNIVERSITY SYSTEM OF FLORIDA

jobs, Jim Carroll!" Jean's voice had lost its merry lilt; it, too, had taken on the hard rigidity of the prairie. She drew her sturdy frame up proudly, then she laughed. "You're just homesick, Jim. You always do hate to go away. Do you think this country can afford to have such a good farmer as you living in town, doing odd jobs?"

"A good farmer," he muttered; but some of the weight had left his voice. "Fifteen dollars and five cents! And how do you know next year will be any better?"

"We don't." Jean's buoyancy had returned. "That is half the fun. There isn't anything monotonous about farming." Then, with a quick pressure of her hand on his shoulder, "I know what it is—those pancakes you had for breakfast. Pancakes in the morning never do agree with you. Remember that when you have to make decisions before noon. But—but isn't it time you were going back? Your train—"

Jim Carroll reached over and caught his wife's tanned, work-hardened hand in both his. "Jean, either you are a superb actress or else you have the courage of ten men." He fondled the hand a minute before he raised it to his lips, then put it in her lap. He touched his hat, wheeled quickly about, and strode toward Swift Rapids.

A full minute Jean sat looking at the hand in her lap. Her eyes held something deeper than a smile as she raised it and placed her lips where her husband's had rested. Then, with a practical shrug of her shoulders, she reached for the whip.

"Get-up, Hughey!" She flicked the shoulder of the off ox. "You must do your prettiest. Your mistress is a great lady, and her knight has gone to do battle for her. She must keep his colors flying."

And those colors were flying bravely the evening of the following day as Jean muttered, "Odd jobs," and urged the tired oxen into a faster walk. Her small home was looming up in the darkening distance. How tiny it looked. Like a parcel dropped by a careless traveler, a black speck on a horizon-bound sea of savage, haughty, repellent prairie, unadorned by so much as a tree or shrub. "I'll do the 'odd jobs' this winter. And we'll win yet," she said, as the oxen broke into a run and dashed around the shack with a flourish.

An oblong of light from the quickly opened door, a boyish, eager voice, "Mother, is that you? Are you all right?"

"Sure, Harry! Everything all right here? Bess well?" Jean was stretching her numbed limbs. The oxen had stopped beside the water trough and were drinking greedily.

"Yes, I'll get the lantern."

"Mother—Mother, may I come out?" Six-year-old Bess's eager baby voice. . . .

"No; you go back and get supper for Mother." Harry, the lighted lantern in his hand, urged Bess back.

"Don't come out in the cold, darling; I'll be there in a few minutes," Jean called. She had climbed down out of the wagon and was unhitching the oxen.

"You go in the house, Mother. I'll take care of the oxen."

"I'll hold the lantern for you." Jean took it from his hand.

"Oh, I can manage all right," but he did not refuse her the lantern.

"We must take good care of Hughey," Jean said as Harry was tying him in his stall. "I'd have been lost a dozen times if I'd had to depend on Bob. His feet got sore too, and he wanted to lie down. He has no grit, that ox; Hughey is worth a dozen of him."

"Dad says it takes grit to be a pioneer," Harry remarked happily as he came out of Hughey's stall. He stopped a minute to say, "It must have been rough back East, where the first settlers had to chop down the trees before they could sow their grain."

"Yes; my grandmother often told me about it," Jean agreed, while her eyes rested tenderly on the red head, the freckled face, and the bright, winsome smile of her son. He would have his father's splendid physique, his gray, searching eyes, his shy shrinking from competition with his fellows—his exuberant joy in the conquest of the soil. No wonder the wild, untamed land with its mystery, its reticence, its niggardliness and its exuberant generosity, lured them; they felt the soul of the soil; they were farmers born.

"Odd jobs," Jean said the words aloud. "Not for my son!"

"Don't try to stop me, Harry," she said tensely. "I've got to do something"

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

"What did you say, Mother?" Harry looked at her over Bob's back.

"I was thinking you are going to be a farmer like your father."

"That is what I want to be." He was bending over the manger. "Mother, Daddy told me something about you."

Jean stiffened at the change in his voice. "Yes, dear! What was it?"

"He said I'd have to be careful of you—special like—for him." His was not the voice of a twelve-year-old boy; it was the voice of the male, the voice of the race that protects its young.

"That was thoughtful of Daddy. He was worried; but I'm really very well. It's nature, you know, dear."

There was a pause. Silence. Then Harry rustled out of the manger. "I guess I'll give Hughey a bit more hay."

The sound of the fork in the hay, the happy crunching of the oxen, Harry's cheerful voice from the shadows, "It'll be nice for Bess to have a kid to play with; I'm getting too big to play."

THEN they were approaching the house, Harry swinging the lantern. A wee face was pressed against the window. The door flew open, a shrill, childish cry of delight, and Bess was in her mother's arms, smothering her with kisses, half laughing, half crying.

"What you cryin' for, Bess?" Harry asked, as he hung the lantern behind the door and went to put some wood in the stove.

"I don't know," Bess sobbed. She climbed down out of her mother's arms and rushed to the stove. "You'll burn the potatoes if you don't be more careful." She stirred the potatoes in the frying pan.

"Harry got his feet wet." Bess vouchsafed the information with the eagerness of a child to tell all the news.

"How?" Jean turned quickly toward her son.

"Ah, that's nothin'. I told you to keep quiet, Bess."

"But what happened?" Jean demanded.

"His boot's all cracked. It ain't any good no more."

"Let me see it."

Harry hesitated, then held up his foot. His boot was cracked across the top, and half the sole was loose.

"Let me see the other one." He held it up. It was but little better. Jean walked over to the cupboard, which was some boards nailed to the wall. She stood a minute. When she turned around she had a dish she did not need. She put it back and went to the table and straightened the red cotton tablecloth six-year-old hands had not been able to spread smoothly.

"We'll have to send by Mr. McGregor for boots for you. Your father was afraid yours wouldn't last—but—"

"I'll be all right until Father gets work. Do you think he will soon?"

"Sure; but you can't wait. I'll write out an order to-night. I don't know when Mr. McGregor is going to town, but we'll hope it will be soon."

"But how can—?" Harry kicked the edge of the woodbox uncertainly.

"That's all right," Jean spoke quickly. "I've lots of money. Your father made me take ten dollars; yes, and five cents. I'm going to keep that five cents"—a pause—"if I can. Get me the pen and ink."

IT WAS four weeks before Jean received a letter from Jim. Harry, who had brought it from the post office, sprang forward as she drew the contents from the envelope. He caught a bill that had fallen out and looked at it eagerly, "One dollar!"

His mother, whose eyes were traveling over the brief letter, turned quickly toward him, "What did you say?"

"One dollar." He extended the bill.

"One dollar," she repeated. Her hand closed over the money and crushed it. "One dollar."

"Is Dad all right?"

"Yes—but very anxious about us. Work is scarce. I wish he hadn't—" She opened her hand and looked at the bill.

"I wish I didn't have to have boots." Harry glanced at his feet, which were covered with sacking stockings tied on with binder twine.

"You must have them," Jean spoke decidedly. "You have a cold now from getting your feet wet; but if I'd known, I wouldn't have sent for the raisins and prunes and—and the candy, for Christmas. Still, wee Bess." She looked at her little daughter, who was tying an apron on an old rag doll. "Oh, well!" She tossed back her head and smiled. "We have four dollars now—four dollars and five cents. That would be a fortune to some people."

"Would it really?" Harry's face brightened at the change in hers.

"Sure—in China or some such place," Jean replied vaguely. Then she began to bustle about. "I must put on some feed to boil for those chickens. I wouldn't be surprised if they'd begin to lay soon. If they do, we'll be just flooded with eggs, there are so many of them. Oh, if only we had a railroad!"

Harry, who was standing at the window, called, "I see someone coming." His stockinged feet left a wet imprint on the floor. "I believe it's McGregor's oxen."

Jean looked over his shoulder; Bess left her doll and stood with her chin on the window sill. "It *is* McGregor's oxen. Oh, Harry, I am so glad." Jean put her hand on his arm. "I've been so worried about your wet feet."

"I'm all right," he spoke gruffly; but his face was shining.

At last the oxen stopped in front of the door. "Won't you come in, Mr. McGregor?" Jean's voice had a joyous ring, like one from whom a weight has been lifted. Harry carried in the parcels. Bess shouted and laughed and got in the way.

"I'd like fine to go in for a bit; but the wife and the kids will be watchin' fur me," Mr. McGregor replied. Then he added in an aside to Jean, "I didn't get the candy—things were a bit dearer—and I thought—"

"Yes; that's all right," Jean agreed.

Then they were alone, opening the parcels. Harry's boots most important. Jean drew back to let him have the first glimpse.

"Gosh, ain't they dandy! I won't get through them for a while."

"Put them on," Jean commanded, as she felt the leather and looked at the iron cap on the toe. "They should wear." She turned to the other parcels Bess was trying to open.

"Mother—something's the matter."

Jean whirled around at the stricken voice. Harry was sitting, one boot on, the other in his hand. His face was white, his eyes tragic.

"They—are—both—for the same foot!"

"It—it—can't—can't—be!" Jean stuttered. She caught the boot out of his hand and held it from her. She turned it around, making little noises as she did so. "They—are—they are"—her voice rose shrilly—"both—both—for—the one—foot! Both! Did—you—ever—know?" She had begun to laugh, but the tears were running down her cheeks.

"Mother, what are you cryin' about?" Harry demanded sharply.

"I'm—I'm not—crying," she babbled, "I'm laughing—it's so funny. I—can't stop—laughing." She opened the door and ran across the yard toward the stable, her shrill voice floating back.

Into the stable she went, and seized a fork. With desperate energy she began to clean out the manure. In a few minutes Harry followed her.

"Mother, you shouldn't—"

"Don't try to stop me, Harry," she said tensely. "I've got to do something."

A second he looked at her. "I feel like that too;" and he went and got another fork, and set to work beside her.

That night, after Bess was asleep, Harry whispered to his mother, "I hid her doll."

"Why?" She looked her surprise.

"I'm going to give it to her on Christmas to make her glad, even if Santa Claus can't come."

Jean did not speak.

"That's all right, isn't it?"

"Splendid!" Jean's voice was hearty. "I'd never have thought of it; but it's great."

"I wish I could make you glad, Mother."

"You have." A second, her arm encircled the shoulders of her son. "Now, I'll tell you what we'll do. We'll sit down and make a list of all the things we want Santa to bring us; then on Christmas we'll imagine we have everything we asked for. It's a kind of game my grandmother used to play in the backwoods down East."

"Gee, I'm glad we don't have it as hard as they did," Harry said cheerfully as he went for paper and pencil.

SHORTLY after Christmas, Mr. McGregor came for Jean. They had a new baby at their home, and she was needed. For a week she was home only twice, and then for a short time; but everything seemed to be all right. However, the night she returned she was wakened by Harry's heavy breathing. Suddenly she sat straight up in bed, listening, anxious: "Harry, Harry, what's the matter?"

"This cold . . . seems . . . worse," came in a hoarse whisper.

In a flash Jean was beside him, her hand on his head. "You are feverish. Have you any pain?"

"Just a little." The words ended in a groan.

"Oh, Harry! Why didn't you tell me?" Jean was lighting a lamp.

"I . . . I thought . . . I'd . . . be . . . better after—" A gasping cry was wrung from his lips.

Jean was dressing. In a moment, she had a fire crackling and water on heating. But daylight crept in, and all the home remedies had failed to reach the deep-seated pain in the struggling body.

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

Jean stood on the crude new platform at Cargill station. Her wind-whipped skirts betrayed her feet wrapped in sacking. She shivered uncontrollably and her teeth chattered

Jean went to the bed where Bess was sleeping. She shook her gently.

"Bess, Bess dear, you must wake up. You must help Mother." Bess half opened her eyes, then closed them tightly.

"Dear, you must get up and take care of Harry. Mother has to go and get Mr. McGregor to go for a doctor. Harry is very sick."

"Sick!" Bess said sharply, and she sat up. "Harry sick?"

"Yes, very sick." Her mother was dressing her as she talked. "Bess must take care of him until Mother gets back. Keep the fire on, and don't go to sleep. Come now, Mother will show you what to do."

"Mother . . . you . . . can't go." The protest came from the sick-bed.

"It's all right, Harry; I'll manage splendidly. Let Bess get what you want, and keep as warm as you can."

Out into the penetrating cold. Day-light was coming sulkily, as if resenting the necessity of even lighting the hard, repellent earth. And what an eternity it seemed before she had the oxen hitched and ready. Then back for another cheering word to the suffering boy and the baby nurse, and she rattled away on her six-mile drive.

Urging the oxen along, sometimes running beside them, sometimes in the wagon, Jean found herself talking continually. "Do your best, Hughey. You can't fail me now. Good old Hughey! We couldn't have got along without you. Yes; you hook Bob if he doesn't do his part."

And Hughey, as if he understood the urgency of the case, seemed more like a trotting horse than an ox, as he speeded up to perform his unnatural task. And slowly the lengthening miles crawled past, until Jean was explaining the situation to Mr. McGregor.

"Indeed, I'll go for the doctor," he said at once; "but one of my oxen has a sore shoulder. Could I take Hughey, and let you take mine back with Bob?"

So stanch old Hughey, because of his almost human understanding and sympathy, was chosen for the harder task, and Jean set out with Bob and the strange ox. Snow was now beginning to fall, and it took all of her power of brain and body to keep them on the trail, and a good thing it was.

"What's the most important thing in the world?" asked the teacher

"To Grow An' Grow Forever 'n' Ever!"

Answered a starry-eyed little girl, and she was right! This is the story of a great man who has never ceased to grow, and who shows children how to keep on "forever 'n' ever"

By Marion T. Colley

THE position of superintendent of a public school system of sixty thousand pupils may not strike you as dramatic, but to Willis A. Sutton, of Atlanta, the job is all drama. He feels gravely responsible for the form, tragic or happy, which these young lives in his charge eventually assume. And of all that multitude of growing boys and girls there is not one to whom he is not personally known.

A little girl pointed him out to me recently on the streets of Atlanta as "the man whut luves childrun." He talks to them over the radio, she informed me, writes a piece in the paper for them every Sunday, and thinks about them all the time!

Out of the modest salary of a teacher he has contrived to aid more than eleven hundred young people "hungerin' fer knowledge" to satisfy that hunger. But he refuses to speak of this, or to have it appear in the light of philanthropy. "It was a business investment," he insists, "and a corking good one too."

During the seven years that he has occupied his present post, Willis Sutton has revolutionized the system of education in Atlanta. For one thing, he has accomplished the feat of having the teeth of every single child examined and put in good condition. And now he is spurring his young folks on toward establishing a new high standard of perfect health.

While this campaign is in progress, he is working to bring to pass another splendid dream—a great free university in which no boy or girl shall be denied a college education because of lack of funds.

His greatest achievement, however, is to be found in his remarkable influence over the young, particularly the boys of his schools. "There has not been so large a percentage of clean, upright young men in Atlanta in the whole of its history as there are to-day," I was informed by dozens of the foremost citizens. "This," they assured me, "is largely due to the influence of the man at the head of the public schools."

Mr. Sutton's reputation as a leader of youth is not confined to his own city; it has spread over the country. Within the past few years he has responded to invitations from thirty-eight states to tell what he knows about children, how he appeals to them and brings out the fineness in them.

Willis Sutton insists upon spending among his children every hour that he can filch from his desk. I put in a busy morning, trailing him from high school to kindergarten.

I found him finally in a room full of children of the elementary grades. He was drawing them out, rousing them to the very *n*th degree of mental alertness. He doesn't believe in telling young people—or older ones either, for that matter—anything that they can think out for themselves. Minds, like everything else, grow through exercise, he reminds us. And whatever fires the interest of a child sufficiently to make him rack his brains enthusiastically—whether it be a picture-puzzle, a game, or an original proposition in geometry—supplies this exercise.

"Children, what's the most important thing in the world?" He tossed this query, like a ball in their midst, as I entered the room. Before you could say "Jack Robinson" half a dozen youngsters were on their feet fairly bursting with answers. These included most of the things whose value Mr. Sutton had stressed in the schools: "Religion;" "The family;" "Always to tell the truth;" "Not to be 'fraid of anything except to be a coward;" "Good health;" "Clean teeth;" "Courtesy." A shrill-voiced little boy piped out excitedly, "A clean collar!" and in the laughter which this provoked hastily changed it to "Cleanliness." And a delightful small girl hazarded, "To be a real man."

BUT none of these things seemed to be just what the superintendent had in mind. In a way, he said, the answer to his question included all the suggestions the children had offered. Without it no man would amount to shucks; the very world would come to an end. Everyone was on tiptoe mentally. I could almost hear the thoughts crackling and sizzling beneath those dark and tow-colored bobs and shingles. Then a starry-eyed, red-cheeked little scrap of a girl caught his idea and announced it triumphantly; "I know, I know! It's to keep on—not to stop—to grow an' grow forever 'n' ever!"

Yes, that was it! He nodded agree-

Fine Equipment Doesn't Make Fine Schools

SOME years ago, Willis A. Sutton was a teacher in a remote mountain section of the South. He had no scientific equipment, no money, and very little encouragement. But what a school he had! The mountains 'round about were full of minerals. Teacher and pupils went out together, dug up all sorts of rocks, and thus had a course in geology. The hills abounded in wild life, which offered a chance for the study of natural history. But how could Mr. Sutton teach geography without maps? Here's how he taught it: On a six-acre plot of ground he laid out a map of the United States, indicating its rivers, its mountains, its coast lines. Railway systems were also shown, and enterprising students built miniature trains, and placed them on the routes of trunk lines. Miniature ships were made, and these were placed in the steamship lanes along the "coast" of this six-acre map. In this way, the pupils learned the geography of their native land. "I sure know this country," one of the mountain boys said when the model of the United States was completed. "I bet you couldn't lose me in it!"

A teacher with such imagination, energy and eagerness as Mr. Sutton could make a school anywhere and under any conditions! After all, the teacher is the big thing, and all the equipment in the world is secondary to him in importance. THE EDITOR.

nt, as elated as she. "To grow in dom and stature—gloriously, beautily—as that little boy of two thousand rs ago had grown."

This thing of *growth* is at the very heart all his teachings, growth in character l spirit, mind and body.

HE story of how Mr. Sutton came to devote himself to work dealing with ng people strikingly illustrates the ct of early training upon character.

'I was brought up to be a missionary," told me. "My mother had believed t she was called to follow this vocation, l when I was born, the seventh of her ldren, she had the singular conviction t I was to carry out the mission she had ed to fulfill. As a small boy, living on father's plantation near the little town Danburg, Georgia, the only name by ich I was known for miles around was 'eacher'."

When he was old enough to go to school, e children built him a tabernacle of s and pine boughs. And every day at ess, he held services there, gave out miliar hymns, called up burdened young ners awaiting only the invitation to ent of their wickedness. And as they ne, sometimes moved to tears by the ought of their misdeeds, he would pray nestly for them—and for himself as ll. "For I knew I needed it," he reerked.

So, at this early age, he acquired an imate knowledge of the bewilderments d griefs that cloud the bright days of ldhood.

On Sundays, the old minister, in his g black coat, looking over his specles to the high pew where Willis sat, aight and still, beside his mother, uld say, "Will our young brother lead in prayer?" And, responding, the boy would rise and stand barefoot in the aisle, and pray.

His elder brothers helped with the work of the farm; but his mother kept him about the house as her assistant. "Anxious to spare her in every way I could," he said, "I learned to run the sewing machine. As she basted, I stitched up the older children's clothes, and we turned out the finished garments at a grand rate. While we worked, Mother would talk of the future she foresaw for me. It was a future extraordinarily barren of wealth or fame, and rich only in unremitting toil for others. Yet, as she painted it, she made all other careers seem poor and unworthy beside it, and I would listen, stirred to the soul."

HARD times struck the farmers of his section when he was twelve, and for several years conditions grew steadily worse. As the time drew near when Willis was to go to Emory University to prepare for his work as a missionary, cotton fell to four cents, ruin stared the farmers in the face, and young people cherishing dreams of college and idealistic careers had to put aside those dreams and knuckle down to work.

His mother, however, refused to give in to circumstances. Willis was going to college, she insisted, if cotton dropped to nothing. It was *right* that he should have this training, and when a thing was right there was always a way by which it could be done.

But the weeks slipped by, and no way appeared.

"Two days before college was to open," related Mr. Sutton, "learning that there was a school without a teacher in another part of the county, I saddled a horse and rode over to see if I could get it. On my return home, I was astonished to find my trunk packed and strapped beside the front door. 'What does this mean?' I exclaimed. It meant, Mother informed me triumphantly, that I was going to Emory the next day, and she put into my hand a ten-dollar bill which she had borrowed from a neighbor.

"'I can't go on ten dollars,' I told her gently. 'Why, my tuition, alone, would be around seventy.'

"But she was not to be dismayed or turned from her purpose. This would get me there, she explained; the rest would come. She possessed the strength of many very gentle people. There was no resisting her. And the next morning, at dawn, feeling like a person in a dream, I was jogging along the red clay road in the old family chaise, bound for college, with ten dollars in my pocket, and back of that as my only assurance that my bills would be met—my mother's unfaltering faith."

In the months that followed the money reached him, even as she had promised. "It was through no miracle, however," he added, "other than her own tireless energies and unconquerable will. During that year, she sewed for her neighbors, grew farm products for the town market, raised bees and disposed of the honey and wax, secured another and larger loan from the same generous friend, and left untried no means of earning an honest dollar."

AFTER being graduated from Emory University, Willis joined the Methodist Conference of Northern Alabama, and at his request was sent to the Talladega Mountains of that state. "My charge," he stated, "consisted of five churches scattered among the hills of Clay County. The salary for all five was two hundred and sixty-three dollars a year; which was ample, for my parishioners were so generous that (*Continued on page 172*)

"Barriers between all hearts, wild or human, seem for the most part purely artificial"

Strange Comrades

By Archibald Rutledge

DRAWINGS BY LYNN BOGUE HUNT

IT IS said that nothing used to divert the populace of eighteenth-century London more than to see those amazing comrades, old Dr. Samuel Johnson and Topham Beauclerk, walking together. Nature had made them different, and circumstances had strongly developed the characteristics of each. Johnson was a monstrous scholar—uncouth, ragged, shambling in his gait, given to mutterings and to wild gesticulations; a sort of gigantic tramp of a man, the very sight of whom would send all the dogs of the neighborhood into a frenzy. Beauclerk—with the blood of the Stuart kings in his veins, with charming manners, delicate tastes, wealth, and social distinction his—was the veritable "glass of fashion and the mold of form." A leader of the gay and fashionable world of London, he had divorced the greatest beauty in England to marry her only rival. But, despite all his fashionable distinction, and despite Johnson's abysmal social shortcomings, these men were the most devoted friends. Johnson tolerated Beau's punctilious ways and his sarcastic quips, his urbanity and his love of gossip; nor was Beauclerk much disconcerted, when he was bowing to fashionable acquaintances, to have his companion desert him in order to rummage in the piles of garbage on the street in search of orange peel, for which he had a strange, engrossing passion.

"Sir," said Johnson to an acquaintance who had apprised him of Beauclerk's sickness, "I will walk to the extent of the diameter of the earth if it will help him." And down his rugged cheeks coursed the honest tears of manly affection.

Human comrades often seem strangely matched; and it is a real question whether likenesses or differences in character produce affinity. Strange, too, are the comrades that we often find among the children of nature. I have observed some exceedingly quaint friends among the wild hearts of the wastelands.

Hearts both wild and human, it seems, have a natural deep yearning for sympathy and understanding; but often individuals, families, clans, and species will be separated by artificial barriers. When once these fences are removed, association becomes easy and delightful. Even those enmities which are supposed to be of ancient and implacable origin vanish as soon as the artificial conditions producing those enmities are removed.

I recall with what amusement and astonishment I used to watch the behavior of Nymph and Music. Before I became married and partly civilized, I used to delight in keeping all kinds of pets, especially those of wild and strange varieties; and these friends of mine used to cause consternation among certain members of the household. For a negro cook, soulfully singing as she sweeps a room, it is an appalling thing to see suddenly seated sedately on the top of a door and rolling his eyes at her, a great horned owl. And for a colored maid, dozing before a fire to stroke caressingly in her lap something that she thinks is the cat only to discover later that it is a raccoon or a fox, is a memorable spiritual experience.

My gray fox Nymph often brought me into disrepute by her ghostly exits and entrances, her uncanny slyness, and her tendency to be light-fingered. But even the negroes, who, always associating a fox with a graveyard, take no delight in this beautiful phantom's artful ways, agreed that Nymph's behavior with Music was a strange and appealing thing to watch.

Music was the best foxhound I had. Whenever I took her into the woods, as I did almost every week during the winter months, she knew as well as I that we were fox-hunting. A deer she disdained. Though sometimes she would gulp avidly over the hot scent of a wild turkey, she would not follow the great bird. But in following a fox she was indefatigable; she went about it with that stern joy which the true artist alone can feel. With every fox Music seemed to be at natural and implacable hostility—with every fox but Nymph. They were almost ludicrously fond of each other.

ON OUR front porch we had some big hickory rockers with cushions in them. The hounds and my pets were supposed to resist the temptation to sleep in them. But many a time I found Music and Nymph curled up in the same ample chair, fast asleep, practically with their arms about each other. Music, like most dogs, very patently felt her superiority over the whole feline tribe, a superiority that I have often gravely doubted.

Nymph seemed perfectly aware of her com-

rade's tendency to be high-hat sometimes; and she retaliated in the best manner possible: she used to laugh at the hound! I am sure that you will agree with me that she did, when I tell you of the favorite trick she used to play on Music.

The hound knew that she was committing a breach of etiquette when she climbed into the chair; she was therefore always more or less guiltily alert when she was in that forbidden place. A sound or a glimpse, or some movement, would make her leap to the floor of the porch and make off hastily, even though the alarm was a false one. Nymph seemed to take in the full significance of all this; and she decided in that wild little heart of hers to make some amusing use of it. One day I came up to the porch and saw Music asleep in a chair in the sun. Under the chair was Nymph; and she did not see me. There was on her face a mischievous, whimsical look. I could see that she was up to some trick.

Suddenly she set her front paws sharply on one of the chair's rockers, tilting it back violently. With something like a frightened yelp, Music jumped over the back of the chair and came scurrying down the steps. Seeing me, she naturally concluded that I had in some way upset her. She sidled past me in a most crestfallen way. Nymph meanwhile lay under the chair, flattened to the floor, an expression of demurest mischief on her quaintly sharp intelligent face. She had shown that superior friend of hers which one really had mental capacity!

IT IS astonishing and reassuring to see how much fellow-feeling there is among the children of nature. Barriers between all hearts, wild or human, seem for the most part purely artificial; and though often they are formidable, they are seldom insurmountable. Who, for example, would expect that a strong affinity could be developed between a duck and a goat? This odd companionship sometimes made me feel as if my eyes were deceiving me. Yet I believe that I fathomed the real cause of the friendship of these two interesting creatures.

A friend of mine had an ample yard, in which wandered many domestic things, and among them these two. Each one appeared to be lonely; the goat because everything else, including the dogs, feared his satanic mien; and the duck because it was so greedy and quackful.

The goat was sinister; and the duck was incessant; a wide berth, therefore, all the other denizens of the yard gave them.

As a result, each one became lonely; consequently, they sought each other's society. Perhaps the alliance was slightly militant; at least I noticed that the duck's eyes were a good deal sharper than the goat's, so that the bird with vacuum-cleaner table manners nearly always spied first a chance for feasting. He would, quacking loudly, lead the goat across the yard; then, as the two approached the feeding place, the duck would fall discreetly back. The goat, lowering his head with the sharp menacing horns, would continue the advance, the duck waddling beside him. Reaching the food, they would feast greedily, especially the duck. The goat had a sparing, selfish way of eating.

Sometimes my friend who owned this menagerie would see these odd comrades getting more than their share, and would cross the yard to drive them away. At such times, the duck would give stentorian quacks of warning, at which the two culprits would retreat in good order.

When this goat would lie down in the shade of a huge live oak to chew the cud, blinking his cold, glassy eyes, the duck would often snuggle against him; and several times I saw the duck squatting on his back, preening his feathers. On one occasion I heard a distressed outcry from the duck, and upon investigation discovered that the goat was walking the top rail of a fence, eating poison ivy. His comrade was apparently protesting against his aërial maneuvers. As soon as the goat jumped down from the fence, the duck quacked softly and contentedly, and with a fond delight.

WHEN we study odd companionsnips, we have to be on our guard against what may appear friendships but really are not. Not long ago a friend of mine called me into a back room of his store to show me what he called "a wonderful sight." He said that he had a cat and a rat that seemed to be intimates. In a big barrel was a full-grown rat, and across the barrel from it was a big gray cat.

My friend explained that he had dumped the rat from a trap into the barrel, and had then dropped the cat in, thinking that thereby the last chapter in the rat's life would be speedily written. But, he went on to tell me, the two had been in the barrel an hour, and nothing had happened. When I looked in the barrel, I saw the rat crouched against one side, the cat crouched against the other. A wire screen had been placed over the top to prevent a possible escape of the rat.

Looking through this screen, I studied the situation. Of the two, the rat seemed the more self-possessed. The cat looked bored, and I thought I detected in her attitude something curiously craven. When the screen was lifted, she shot a quick glance upward, and then sprang for the top of the barrel, clambered over the lip of it, and disappeared behind some boxes.

"The cat seems scared," I said to my friend.

He looked puzzled.

"I looked at them a half-dozen times," he told me, "and I thought surely that they were making up to each other."

What appeared to be a curious liking was probably nothing

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

more than a *contretemps:* the cat did not like the idea of tackling the rat in such a place. Indeed, it is commonly true that sly killers like cats insist upon choosing their own fighting ground; and when denied this advantage, they will slink away from absurdly inferior foes. It seems to be true that nothing likes to fight, cornered. They will when driven to desperation; but a voluntary encounter is almost always an open encounter.

I once had a cat that showed remarkable ability to form quaint comradeships. This creature was a fine gray male of extraordinary sagacity. When I was at my summer home, ten miles from the plantation, this cat literally took to the woods, and for six months lived the life of a wild, predatory creature. But if I returned to the plantation for a day, he always appeared; and as soon as I moved back, he took up his abode in the house once again. Seeming capable of a distant but profound affection, a genuine attachment to me, though never an intimacy, this cat always made me think of ancient wisdom, and explained to me why the Egyptians found it easy to worship cats.

AMONG my pets was a great horned owl, a momentous bird of Druid-like aspect and deportment. I had captured it one day when it had become hung in a wire fence, and for months I kept it. In a way, a horned owl is a disconcerting thing for a man to look at, for if he is at all sensitive he is made painfully aware of his abject inferiority. I never looked at my owl without pitying myself.

It would be natural to suppose that this great bird would be at royal enmity with my lordly cat. But such was by no means the case. Though I sometimes let the owl fly about in a room, I kept it usually in a huge box with a wire front. On several occasions I found the cat lying suspiciously in front of the box; usually she would be eying the owl with basilisk fascination. Of course I interpreted her design as a sinister one. However, one day the owl was on the floor of his cage and close to the wire. Against the wire the cat was closely pressed. Here was no crouching incident to a coming spring; here was a loneliness, a yearning for sympathy.

Opening the door of the cage, I pushed the cat in, keeping a close watch on developments. The cat lay gently down, looking at the old oracle of the woods with an affectionate deference that amazed me. For his part, the owl seemed not the least disconcerted by the cat's proximity. It is, indeed, hard for an owl to lose his immense dignity. For a half-hour the two ancient enemies—in the sense that one was of the feline tribe, and one of the feathered—remained close to each other, quite apparently friendly. And almost every day the cat would take his sun bath in front of the owl's cage.

Certainly it is not in an owl's nature to be effusive or demonstrative; but he had an unmistakable liking for the comradeship of the cat. Watching their odd friendship, I wondered whether they were not somehow spiritually akin; the wisdom of each was of old: occult, mysterious; both lived by their silence and their stealth; both were at home in the deep of night. Both had hunted the same woods. They had shared with Night her pale celestial reign. They seemed to me to meet on terms existent only between those whose natures are subtly allied.

This cat of mine had another acquaintance of most engaging personality. This was a toad that lived at the foot of the back steps. I used to see them often at twilight, for then I loved to sit on the steps, especially on a spring evening. It was then that I used to hear, far across the river, the subterranean Minotaur-roar of the bull alligators; terrible, weird, but fascinating. Then through the sweetshrub bushes the last bees would be blundering homeward through the dusk, after a long day of flowery toil; then the ponderous ruby pillars of sunset would be glowing; then the whip-poor-will's shadowy song would come from the dewy heart of the darkening woods. Then, too, the cat would come down the steps, to sit for a long while beside the doorway of the toad's retreat; and usually, while the cat was waiting there, the toad would come dimly forth.

Suddenly Nymph set her front paws sharply on one of the chair's rockers

HERE assuredly were two genuine people of the mists and the twilight, two spirits of the dim and ancient night. I never noticed any intimacy between these two; but I often saw them side by side; they certainly appeared friendly; and they had a way of joining each other at a mystic hour, as if they had a secret tryst of some kind. Most small reptiles are the natural prey of cats; but here was an odd friendship, of which I would have known nothing had not I loved the twilight as these two did. Of course they had come forth to seek their meat from God; but I believe that they too enjoyed the dewiness of the evening, the sense of beautiful fading, the strange power of the night.

I am conscious that most of these anecdotes have been about domesticated or semi-domesticated creatures; the reason therefor being that in a purely wild state creatures are more rigorously separated by inexorable barriers. Man is essentially an iconoclast; and when he begins tearing down barriers, many new and apparently strange relationships are quickly established.

Not long ago, while at the really fine zoo in Rock Creek Park, Washington, D. C., I observed two birds making up to each other; and I suppose a similar approach has never been noticed. Several very large, handsome cockatoos, pink and white in color, had, some time before, escaped from one of the bird houses; but, the keepers told me, they kept hanging around. Indeed, I saw three of them, and heard them crying raucously. They would fly from tree to tree, staying rather high up; I could not be sure whether they were altogether satisfied with their lonely freedom. While I was near the huge cage where the eagles and vultures are kept, one of these cockatoos came over, and alighted on a high, bare tree, where he called harshly, but apparently with good cheer.

SUDDENLY, out of the misty December sky a wild crow dropped, alighting on the tree near the angelic vision with the fearful voice. The two birds were just of the same size; but there their similarity ended. The crow was just a crow; but the cockatoo was a dream-like thing, almost unreal in beauty. As for their voices, neither had the advantage as far as music was concerned.

I saw the two perfectly strange birds eying each other with interest, the head of each cocked to one side. After a few minutes, the crow hopped nearer; his approach was as awkward as he was democratic. But the proud beauty was pleased. She must have missed the companionship of the many birds in the bird house, and must have longed for fellowship, even with a sable-coated gentleman. It was clear to me that each bird had a genuine attraction for the other. Yet how oddly they were paired, and how bizarre they looked—as if a plowboy and a princess should fall in love with each other.

On a second visit to the zoo, a month later, one of the keepers told me that the cockatoos were still at large. Then I asked him if he had seen a crow with one.

"That old crow?" he said, smiling; "why, he's just crazy about the parrot, and the parrot about him. Some of these days there's going to be an elopement. I never knew that two birds so different would be so friendly as that."

Whenever we (*Continued on page 124*)

Headaches

What they mean and how to get rid of them

By William S. Sadler, M. D.

DOCTOR, I am certainly going crazy if I can't get rid of these terrible headaches. Isn't there ıy way to find out what causes these litting pains in my head?"

If I've listened to this cry of anguish ıce, I've listened to it a thousand times. Headache is the one form of suffering hich makes all the world feel kin. Only favored few can say, "I've never had a ·adache in my life."

In order to help you prevent or cure ɔur headaches, I must first help you to ıd out what is the cause of the trouble your specific case. Therefore, before I ıke up the seven sorts of headaches hich beset mankind, I ant to tell you one or two ıings about headaches in ·neral, what they mean, nd why some people have ıem and others don't.

Why does trouble in arious parts of the body ıanifest itself by pain in ıe head? One thing is sure: ot one time in a hundred ı the real trouble in the ead.

The brain, as the headuarters of the nervous ystem, assembles disagreeble sensations from all over he body. It is often forced o become the eloquent pokesman for the stomach, he liver, the heart, the idneys, and the muscles. he most insignificant organ r tissue of the body seems o possess the power to comel the head to suffer pain n its stead. Under such ircumstances, what can the oor head do but ache?

In one large hospital, vhere a careful study of the causes of ıeadache was made, the following inluences were found responsible, named in he order of their frequency: fatigue, bad ir, hunger, constipation, indigestion, ılcohol (the "day after" headache), eye train, infectious diseases, periodic sickness, nervous disorders, kidney trouble, ıose abnormalities, sinus infections, neualgia, and migraine.

The majority of people who suffer from constant headaches belong to nervous amilies. They have inherited a certain ıeurotic tendency, and their nervous ystem is more or less easily upset. All hrough their family histories there crops ɔut this nervous tendency, and it is this very thing, this lack of nervous stability, hat we doctors call *headache soil.*

When the nervous tendency is great, it equires but a trivial local irritation to produce pain in the head; on the other ıand, when the local irritating cause is very intense, headache may result even when the general nervous health is good. If there is a marked nervous tendency, and the local irritation is very great and the blood is filled with poisons, we have all the conditions present to produce severe and persistent headaches.

Let me first give you the list of the different sorts of head pains, and then we can take them up one by one and discuss the best methods for their treatment and prevention. It should be understood, however, that in these seven groups I am putting headaches that are due to almost fifty different individual influences.

When Your Head Hurts Look For the Cause Elsewhere

"WITH the exception of certain diseases of the brain and nerves," says Doctor Sadler, "pain in the head is merely a symptom of disease or disorder in some internal organ, the organs of special sense, or else it indicates functional disturbance of the circulation or nervous system. When your head aches, therefore, you should not be satisfied with merely finding relief from the pain. Find out what are the underlying causes of the pain, and, if possible, remove them."

1. MIGRAINE: This is the form of headache that "runs in families," commonly known as sick-headache, attacks of which come on periodically, women being affected more often than men.

2. NEURASTHENIC HEADACHES: These are the neurotic headaches of nervous people, the exhaustion headaches of nervous prostration. Many times these head disturbances are more of an unpleasant feeling than an actual pain, and they are found in a variety of nervous patients ranging from chronic worriers to victims of hysteria.

3. INDURATIVE OR RHEUMATIC HEADACHES: In these headaches, the trouble is located and the pain experienced in the muscles, nerves, and other structures of the scalp. As a rule, nodules and tender spots are found at certain points on the scalp.

4. BLOOD-PRESSURE HEADACHES: Into this classification fall those head pains which are the result of high blood-pressure, low blood-pressure and other circulatory disturbances, including anemia, and hardening of the arteries.

5. TOXIC HEADACHES: A very large group of headaches based on all forms of intoxication, including poisons taken into the body with food and those formed within the body, or unduly retained within the system; embracing the headaches of colds, fevers, and other acute diseases.

6. REFLEX HEADACHES: In this class belong those sufferings which are experienced in the head as the result of troubles in some other part of the body; chiefly in connection with the digestive system, and other internal organs. Headaches resulting from some constitutional diseases also belong to this class.

7. ORGANIC HEADACHES: Under this head fall those headaches resulting from troubles in the eye, ear, nose, and throat, and organic diseases of kidneys, as well as the headache of brain tumor, meningitis, and epilepsy.

8. COMBINATION HEADACHES: Probably one third of our headaches represent a combination of two or more of the foregoing general classes of head pains. This is what renders it difficult always to determine probable causes of a given headache—they are not always so easy to classify and recognize in actual practice. Again, at one time a person may have a headache of one sort, while at another time he may suffer from a headache of a different kind.

If you are a chronic sufferer from headaches, you should have a thorough medical examination, embracing the following tests: examination of the eyes, blood, urine, blood pressure, the nose, throat, and sinuses. The physical examination should be complete, including a thorough investigation of the nervous system and the muscles of the scalp and neck.

Migraine headache: The other day there came into the office a woman who gave a history of having had regular and severe headaches since she was sixteen years of age. Her general health was fairly good, and she suffered from no serious physical disorder of any sort, except these distressing periodic headaches. It transpired that both her mother and her maternal grandmother had been similarly afflicted. She had had some trouble (*Continued on page 84*)

Freeman's Whale

The story of a small boy who went fishing for fish—and landed an old man's heart

By Harold Titus

ILLUSTRATED BY VICTOR C. ANDERSON

NCE upon a time—to be more exact, when Jim Freeman was young—he possessed to an astonishing degree those qualities which we group and call nan. But that was long ago, and so ch had happened that he had become, he autumn of his life, a dour old bear, icient unto his gruff self, and without a nite personal interest in any man or man or child.

When he was a reporter on the "Tribune" e was more filled with the spirit of ndship and tolerance and good will n he. When he assumed the managing orship of the "Express" some of the nifestations of those characteristics e way before grave responsibilities. en he bought his first share of the vspaper his crust commenced to form; l by the time he had brought the xpress" through years of savage comition and become its sole owner he was own as a tough customer.

His wife died, and that drove him far o his shell. And when his only daughter rjorie did what she did to his pride, he ked alone, head up, letting the world ow that Jim Freeman needed no help to through with this process called living 's life.

So when sour, hard old Jim picked up boy Mickey, made him a companion, l gave evidence that he was caring re about the youngster than he had ed about anybody or anything in some een years, those friends who had held r from a happier day were set to ndering and thinking and, finally, to eming.

f Freeman had enough warmth left in heart for that, why shouldn't he forget rjorie's wild betrayal, get to know his n grandson, try to find something in on which to lavish the fund of affecn which must be bottled beneath his ck crust, and heal the breach that had lured so long between father and ighter?

The difficulty between Freeman and rjorie was easy to understand. Any her would have been hurt and huliated. But she was his daughter, his y child; she had been but nineteen en it happened, and years had passed. e was in want now, and making a brave nt to bring up her boy, which meant t she had some of her father's pride. at very fact would have touched most n. But not Jim Freeman; he would not himself forget.

Probably his hardness, the quality ich later stood in the way of reconation, was the factor which brought on disaster. Very likely, his way of handling men set the ingenious devil working in young Regan—although, of course, Marjorie's great loveliness had much to do with it.

Regan was a reporter who had landed a job on the "Express" and rocketed to the top of the staff. He was glib, picturesquely arrogant, a charmer, and his very assurance was a challenge to Jim, when he took notice of the young man. In him Freeman saw possibilities, and, as had happened to many another good newspaper man, Regan was put through what on the "Express" was called the process of sandpapering. Jim's motive might have been to determine the stuff of which he was made, or to make him conform, or just to humiliate him. No matter. . . .

Good assignments were given Regan no longer; he was detailed to drudgery, and, as a crowning humiliation, made society editor when that desk was unexpectedly vacated. He said nothing, took the chaffing with an odd gleam in his eye, and bided his time.

This was the winter that Marjorie Freeman was to come out, and her débutante ball was the biggest society event of the season. As society editor, young Mr. Regan crawled into rented evening clothes, presented his invitation at the door, and was introduced to the charming Marjorie. He turned on her his dazzling smile, was given one dance, persuaded her to cut three others for him, and poured such a fund of lilting blarney into her ears that she went with him down the stairs, into a taxicab and to the county building, where a sleepy clerk issued a marriage license and scrub women stood witness before a routed-out justice!

What the other papers did was a caution. What old Jim did never was known because, though it was winter, he buried himself in his fishing club on the Au Sable, and when he came out he never alluded to the matter. Regan went to work for the "Free Press" and lasted a year, when he vanished from the picture, leaving Marjorie in a furnished flat with an infant son. . . .

MARJORIE had a tough time of it. She would not accept help from her friends, because, she said, she must carry through what she had started. She sold her rings, learned dressmaking, and set herself up in business in an out-of-the-way neighborhood. Never a whimper from Marjorie.

Loessing, Freeman's attorney, was the only one to attempt a reconciliation. Marjorie expected nothing from her father, spoke of him with fondness, and was rearing her son to believe Jim a righteous man who had been sorely wronged. She said, though, that if her father needed her, and she could do anything for him, the doing would make her ever so happy.

When Loessing told this to Jim, the old bear raged. He needed no one, nothing! D' they think he was a weakling? Marjorie had made her bed, and all that sort of thing. If life wanted to hand him humiliation and disappointment, all right; he'd ask nothing of life. Which was his way of crying out that he was lonely, wretched, fearful of the future, yet afraid to bend and admit needs. Marjorie was his, he went on, and if she needed him he would take her in—but not with the child of that rat, Regan.

Loessing never went back to Marjorie with that. He had seen her with her child.

SO THE years passed, and Freeman buried himself in his one passion, fishing, and grew crustier to the world, more lonely in his own heart, and more fearful that sometime it would be discovered that he was not the self-sufficient figure he made believe he was.

He fished the world over, from New England to New Zealand, from California to China. But when he had tried everything, he came back to his native trout stream, and declared that, since the Michigan grayling was gone forever the next best thing was the fontinalis and the dry fly.

He was the most persistent of all the Whirling Duns, and it was a group of passionate anglers. From the day the season opened until September he lived most of his time at the club. Normally, he was a silent old ruffian, but he would talk about fish and angling, volubly, stormily, without end. He liked to philosophize at length on the traits which trout fishing disclosed.

A fisherman who would whip a stream all day when fish sulked, never satisfied until he *made* them come, commanded his respect. And the individual who, finally fast with a big fish, kept his head and his courage, and made the best fight he knew how, who did not grouse if he failed nor boast if he triumphed— Such a man, Jim Freeman said, *was* a man.

"But, Jim, do you suppose if you tied into Freeman's Whale, and lost him again, you could keep from crabbing, just a word or two?" Manners asked.

This was on one of the drizzly nights when Jim had been talking, when he had made one of his tentative approaches toward mellowing. And Manners wanted in the worst way to have the old bear soften; because it was Manners who had been selected to talk to Freeman about

The youngster grinned, and spoke the only words that had been uttered in long: "Cryin' out loud, but I got your fish on!"

the boy Mickey . . . and about that other boy, of Marjorie's.

"I *think* I could," Jim replied, and everyone laughed.

With a fish like Freeman's Whale, the big trout that had gone through the tackle of all comers in those past years, and the capture of which had been Jim's dream of glory, it was no wonder that even he hesitated to say just what he would do if he failed once again. And Manners sat back, hoping that Freeman was, some day, in another affair, to perform in a manner which would be surprising.

Jim's relationship to the Scouts and the boy Mickey was accidental. The troop had camped for a fortnight below the club, and before it was well established the scout master had visited the Whirling Duns, and asked if someone would talk to his boys on trouting. Loessing agreed, but was called to Detroit, and that happened to leave Freeman alone. Loessing had passed the obligation on to him.

Jim was not enthusiastic over the prospect; but when he was once started, with those kids in a big circle around him, his rods and flies laid out, he held their attention for two hours straight. He knew his subject and had enthusiasm and enjoyed the experience; but, of course, he would not admit that.

It was a few days later that, fishing up to the pool where Freeman's Whale lived, he came on one of these Scouts standing on a log and doing his awkward best to put a fly down properly.

The youngster had happened on a good piece of water, and as Jim drew near a little fish rose, made a swipe at the fly and was hooked. The trout was not much over legal size and when the lad struck he yanked him clear of the water and dropped him in again, almost at his feet. In his excitement he went off balance, and as he splashed he half turned around, and saw Freeman. He was wide-eyed and white and made frantic efforts to take in slack, holding his rod high over his head and cranking away with an old brass reel.

"I got a trout!" he yelped. "On a fly! I got a fish, and he's—"

He began switching the rod, trying to find tension on his line. But of course the fish was gone, and when he looked at Jim again his freckled face was drawn with disappointment.

"I *had* a fish," he amended mournfully, standing still and shivering, for he had on only his Scout uniform. "I had a fish on a *fly*."

REGRET had brought him almost to tears, but as Jim started to wade toward him he smiled a truly wonderful smile, and breathed, despite the chattering of his teeth: "I *did* have a trout on a *fly!*"

Of course, old Jim would not respond to that mood. He just walked up and scowled at the boy's rod. A veritable old mummy of a rod it was; the line was of linen and, without the grace of a leader, a snelled fly was tied inexpertly to its end.

"It's a wonder," Jim said, "you ever even saw a fish! Only a fool trout who was starving could be coaxed by that rig."

The boy's face fell, but then he said doggedly:

"Well, prob'ly you're right, sir. But I *did* catch a trout on that fly!" And his eyes lighted again in sublime triumph.

For a moment Freeman glowered at him. Then he waded ashore, put down his own rod, stripped the linen line from the boy's reel, and put on a spare tapered line of his own. He tied on a leader and fly, while the youngster's eyes fairly popped, and then said, in the curt way he had:

"Now, young man, step out here and see if you can learn something."

Just then a bugle sounded from the camp up-stream.

Original from UNIVERSITY OF FLORIDA
STATE UNIVERSITY SYSTEM OF FLORIDA

"Gee!" the boy said. "Gee whiz, sir, I'd like to, but I got to hustle. I certainly thank you for that swell line . . . or— D' you really mean me to keep it?"

"Did you think I was fooling you? And you want to cast with your wrist, not with your arm. Fly casting isn't baseball."

The boy was fingering the soft finish of the silk line.

"Thank you, ever so much, sir. I . . . I'd like to learn fly fishing."

Jim snorted. "That's what lots of men have said. And most of 'em have about as much chance of doing a decent job as you have!"

With this rebuke he glared into the youngster's face, where respect and awe mingled with gratitude and enthusiasm, and for the first time in years the man let a whim run its length.

"Come around; come up to the club, and I'll see if you have it in you to learn anything."

THE boy asked when, and Jim said any time, and Mickey's interpretation of that indefinite hour was while the Whirling Duns were at breakfast the following morning.

When Jim had finished he went outside.

"Well, young man, you don't let grass grow under your feet!" he declared, as if to snap Mickey's head off.

"No, sir"—with an odd, searching look. "I—I come to tell you I— That is, I'd like to buy this line you put on my reel."

"*Buy* it? What makes you want to *buy* it?"

"Well, it's this way: I don't like being under—now—obligations."

"Under—" Jim could not carry through his bullying manner on that. He pulled at his mustache sharply. "I see," he growled, and the whole club, listening, knew that this was a ten-strike for the boy. "Well, that line, new, cost twelve dollars. Say it's worth two now. Is that fair?"

Disappointment swept the boy's face and he looked down at the line. He was carrying his rod, all set up, even to leader and fly.

"That sounds cheap," he said soberly. "I got just eighty cents with me, and so—" He had looked up again. "If you've got any work I could do to help pay for it, I'd like to work it out. I'm apt to need my eighty cents, and I'm pretty good at work, sir."

Jim yanked his mustache again, and cleared his throat sharply.

"That's my car, with the chauffeur changing a tire. Maybe he needs help, and while I'm shaving you can get busy there."

THAT was the beginning. An hour later they were in the stream and Jim was putting the boy through the rudiments of fly casting—badgering, reprimanding. But Mickey minded this not at all. His eyes sparkled, and he cast until his thin arm refused to wield a rod. And in that time he learned not only the principles of a delicate technique, but learned that behind the gruffness of this man was a something that made him a splendid companion for a boy!

For a long time that afternoon the publisher lay in a hammock. His cigar was extinct; he was not thinking of rivers and trout and tackle, not even dreaming of Freeman's Whale. He was telling himself that it was a wonderful thing, an incredibly wonderful thing that had happened to him; (*Continued on page 119*)

"Thank you, ever so much, sir. I . . . I'd like to learn fly fishing." Jim snorted. "That's what lots of men have said. And most of 'em have about as much chance of doing a decent job as you have!"

On A Farm In The Hills She Built A City Of Trees

By William S. Dutton

THIRTY-ODD miles north of New York, in the rolling hills of Westchester County, is one of the strangest and most beautiful cities in the world.

It is Amawalk, City of Trees.

A city, mightiest of its kind, whose inhabitants number two and a half millions! Whose street lights are the stars; whose only roof is the arch of heaven; whose only sound is the ceaseless whispering of untold millions of leaves.

It is an enchanted city, for trees are its people; trees which, like immigrants, have been assembled from all parts of the world and which are more nearly perfect perhaps than may be found anywhere else under the sun. So beautiful are the trees of Amawalk that men have journeyed thousands of miles to see them. They have been transplanted to the four corners of the earth. Fortunes have been spent for the privilege of owning some of these trees. Their total value has been estimated as high as seven million dollars.

Now, as enchantment is a scion of romance, and as every good romance has its heroine, so is there a heroine at Amawalk. She is the spirit of the place and the genius of its growth, the queen of this City of Trees.

A woman owns and built Amawalk. She it was who gave it entity and soul, who, in humble partnership with the Great Builder, has made it approach perfection. A daughter with the courage and the will to dare has built reality and fame and beauty on a father's dream!

Less than twenty years ago, Evelyn W. Smith was a girl in her late 'teens. She was a silent, shy sort of girl who invariably listened while others talked. Private schools and travel in Europe had provided her education, and she had vague notions of making music her career.

The girl adored her father, and spent as much of her time as possible trailing him about. He was Major Orlando Jay Smith, a former Union Army officer of distinguished record, the founder and president of the American Press Association, a newspaper man known to every editor in the country. Trees with Major Smith were both a hobby and a passion. He loved them as he might have loved creatures with souls. To him, indeed, trees had souls.

Apart from his newspaper interests, the major made it his hobby to buy old farms that were to be had cheaply and plant them in trees. He was never without one of these tatterdemalion places of ragged stone rows and tumbling buildings, though he seldom possessed more than one at a time. This was his playground and his joy.

He scoured Europe for its most beautiful trees, its rarest trees, and planted their seedlings by the hundreds, then by the thousands, in the fields where there had been but brush and weeds. He cleared, fertilized, rebuilt, repainted. He experimented in tree culture and made himself an authority on it. And when one farm had been redeemed and planted, he sold and went on to another, thinking not of profits but of trees; while ever before him was desolation and behind him beauty which he had helped to create. It became his dream to grow trees more nearly perfect than the finest nurseries of the world had yet grown them!

But trees grow slowly; years must pass before they mature—and Major Smith, seeker for the perfect, was nearing the end of his life. The dream was now his impelling ambition; it filled his every thought; but, ironically, it had come too late. He knew; and feverishly he planned that the work he must leave unfinished might be carried on. For the first time, he felt, he envisaged the real possibilities in his perfect trees to be; instead of mere hillsides they might beautify whole cities and counties if the work could go on.

In hope he turned to his only son. He sent him to Wisconsin to study trees under famous instructors. Lost in his dream, Major Smith never questioned his son's interest, and the boy's protest against the plan fell on deaf ears. Under his son's hands the aging father saw his last beloved tree farm as a permanent nursery where perfect trees would be grown and sold far and wide. Thus people would come to see as he saw, the creed of the perfect tree would be spread, and destroyers of trees would become their preservers.

Such was the dream. Its tangible manifestations were to be found at Amawalk in the last of the old farms the major had bought and in the thirty thousand trees he had planted on its hills. The trees were yet small, the least, so it seemed, of his possessions. The farm was lonely and work-burdened. The dream itself, to those of practical mind, was but a will-o'-the-wisp ideal of a sick man's fancy— fine perhaps, but unattainable.

SO MAJOR SMITH died, leaving a widow, the son, Courtland, and two daughters, Evelyn and Mabel, still mere girls in their 'teens. The estate, with the home at Dobb's Ferry, New York, where they had lived, passed in trust to the widow. Courtland, who had repeatedly avowed his disinterest in trees, continued in his place as an officer in his father's business. Evelyn and Mabel received what was left—the Amawalk farm.

"What is to become of it?" asked Evelyn.

The constant companion of her father, she knew his dream. She knew what he had hoped her brother would try to accomplish there—but Courtland had now relinquished all rights in the place.

Neither of the sisters knew the first thing about trees, could scarcely distinguish one common tree from another. Only occasionally had they even visited the farm. They knew nothing of work, and least of all of farm work. Both the farm and they were without a penny of capital.

The mother, the brother, and their friends were all (*Continued on page 128*)

"There is Alway Something Better Just Ahead"

"WHY haven't you patented some of your inventions?" the writer of this article asked Evelyn Smith, who has worked out half a dozen valuable devices for moving big trees in safety to all parts of the world.

"I don't want to patent them," said Miss Smith quietly.

"But don't you know," persisted the interviewer, "that any competitor in the tree nursery business can use your ideas and inventions?"

"They are welcome," said Miss Smith. "In fact, I want everybody to benefit by them, so that I will be forced to search for devices still better. There is always," she added, "something better just ahead."

And in that last short sentence is the history of all progress.

WRIGHT A. PATTERSON.

Mr. Patterson and some of his associates (below) in the Western Newspaper Union, of which he has been editor-in-chief for more than twenty years. Mr. Patterson, the son of a circuit riding Methodist minister, was born in Kirksville, Missouri, in 1870. He began his newspaper career when a boy, soon acquiring that intimate, friendly knowledge of human nature which is essential to the country newspaper. In his present hard job as a sort of contributing editor to thousands of papers, he must know always what people like to read, what offends them, what makes them laugh, what stirs them up—in short, he must know what will make you subscribe to a newspaper!

Patterson Helps To Edit Twelve Thousand Newspapers

He is editor-in-chief of the Western Newspaper Union, a syndicate which serves at least twenty-five million readers of country and small-town papers—They are Republicans and Democrats, Protestants and Catholics—"In fact," explains Mr. Patterson, "they are as many-sided as a falling cat!"

By Neil M. Clark

THEODORE ROOSEVELT stood by his desk in the White House.

"You are known for giving every man a square deal," said his caller, a tall, rangy man in the late thirties. "That is all I am asking: a square deal for the country newspaper. Why shouldn't readers in small towns and on the farms have first-hand news of the Administration, such as city readers have?"

The President bared his famous teeth. "You win right there!" he said.

At that moment a door opened. Edward B. Clark, veteran newspaper man, stepped into the executive office. He spoke to both men.

"Mr. President," he said, "I wonder if you know exactly who this is you are talking to?"

"Yes," said Roosevelt emphatically, "Mr. Patterson, of the Western Newspaper Union. He wants White House courtesies for his staff representative. I have just told him they are his."

"But," went on Mr. Clark enthusiastically, "do you realize that Patterson helps to edit *twelve thousand newspapers;* that the biggest paper in the country has nowhere near so many readers as he has?"

The look in the President's eye, merely courteous before, deepened to interest.

"How long are you staying in Washington, Mr. Patterson?" he asked. "When can you tell me all about it?"

An appointment was arranged for the next day. Then, for three hours, the President of the United States was an eager questioner, while Wright A. Patterson disclosed to him a remarkable story of newspaper editing and reading. And the story that was told to the President that day, with the added experiences of two momentous decades, is what I am going to tell to you: the story of the American country newspaper, and of the organization that helps to make it possible.

Comparatively few people know of the Western Newspaper Union. Yet at a rough estimate it serves at least twenty-five million readers of daily and weekly newspapers, bringing them knowledge of day-to-day progress in business, science, religion, travel, education, adventure, and the multifarious undertakings of a busy world.

Consider for a moment: In this country there are between ten and eleven thousand weekly newspapers, and some twenty-five hundred dailies. Most of these are published in the smaller cities and country towns. Relatively few of them have the money to send correspondents to distant points to gather news; to hire expensive special cartoonists; to buy outright feature articles, poems, serials, and short stories from famous authors; to have fashion news, comic strips, travel features, sermons, or Bible lessons specially prepared; to get special editorials written by prominent people; to have exclusive writers of radio, automobile, household, and sports news; or any other kind of editorial material that makes up the metropolitan newspaper.

Yet, marvelously, these smaller papers have kept pace step by step with the big city papers. The country reader knows the important things that are going on practically as soon, and fully as correctly, as the man in the city who reads a paper which has hundreds of employees. He, too, has variety and volume of reading matter in his local paper. He, too, gets information, amusement, and the thrill of keeping abreast of the times. How it is done is a fascinating wonder story.

"THERE is romance in it, all right," agreed Mr. Patterson—we were talking in his Chicago office—"romance from the very day when, sixty-six years ago, a country editor faced a business crisis. The editor was Ansel N. Kellogg, and he owned the Baraboo 'Republic' in the eighteen-sixties, when Baraboo was a little lumber town tucked away in the wilds of Wisconsin.

"In July, 1864, Kellogg's only journeyman printer went to war with the Union forces. Without him, Kellogg could not get out a full sheet; and he could not replace him.

"He had an idea. Crude at the start as the biggest ideas usually are, nevertheless it founded a great industry.

"Madison was the nearest big town, and the Madison 'Daily Journal' was a good-sized newspaper. Kellogg went to Madison and explained his idea to the publisher of that paper. He wanted them, he said, to save the type from some of their most interesting articles, and with it print for him a two-page paper, which he planned to send to his subscribers with the pages of local news written and printed in Baraboo.

"This was done. The idea proved so successful that within a year Kellogg sold the 'Republic,' moved to Chicago, started the Kellogg Newspaper Company, and went into the business of supplying similar printed sheets to other small papers.

"Competitors cropped up, of course," Mr. Patterson went on, "the most successful one being located in Iowa. This Iowa company was bound up in the person and fortunes of George A. Joslyn, who was supplying a "ready-print" service to dozens of small papers that were springing up in the newly settled West. In 1880, Joslyn incorporated, and named it the 'Western Newspaper Union.'

"JOSLYN was a builder. His company grew rapidly, and bought out one competitor after another. In 1906, it absorbed the Kellogg Newspaper Company; in 1917, under permission of a court decree, it bought one more last large remaining competitor, and since that time has been virtually alone in its great field."

Mr. Joslyn died more than ten years ago. But it's a fitting cap to the romance that Mrs. Joslyn, who helped her husband valiantly when he was struggling for a start, to-day lives in a big house and on top of the highest hill in Omaha, and gives her time and resources to numerous charities, a leading citizen of the city she and her husband helped to build.

That, briefly, is the story of the business—a business which is manned to-day by men most of whom were brought up on little country papers, or who have lived their lives in that atmosphere.

Wright A. Patterson, who is editor in chief of the combined companies, was smearing printer's ink on his hands in the first years of his teens. Tall, lean, mild-mannered, white-haired, white mustaches, with unsuspected reserves of reminiscence, humor, and human understanding, his acquaintance includes Presidents—most of them for the past three decades—prime ministers, a king or two, generals, senators, and a host of others, great, humble, and of all grades between. In 1918 he was one of the twelve newspaper men to go as guests of the British and French Governments to visit European battle fronts. Upon him for years has rested the burden of deciding what shall be offered to the vast audience of readers which the Western commands.

Mr. Patterson (*Continued on page 158*)

"Beauty! Old, yet ever new.
Eternal voice and Inward Word."

In Her Own Country

A story

By

Agnes Sligh Turnbull

ILLUSTRATED BY FRANKLIN BOOTH

THE train had scarcely emerged from the smooth darkness of the Hudson River tunnel, when Eleanor Norton began to draw notebooks and tablets from the bag beside her chair and settle herself for a long, busy day.

Already New York seemed to be far behind her. The rhythmic click of the rails kept saying, "Going *home!* At *last!* Going *home!* At *last!*" And the landscape outside was flying faster and ever faster, hurrying to cover the distance between her and Willetsburg.

She was buoyantly happy and expectant. The joy in her heart sent a rich red into her gypsy cheeks. Her dark eyes shone with a bright flame. After five strange, crowded years, years of hard, unceasing work crowned with success at the last, she was going *home!* Home to the town of her birth. Home to Aunt Sally and Uncle Joe, the only parents she had ever known. Home to all the girls she had grown up with, and to the old neighbors, who were almost as dear as relatives!

It would have been sweet under any circumstances to be returning to all this after the long absence. But now, to be going with her laurels fresh upon her; to be going with full hands, bearing to the town that was not important enough even to appear on the map, an offering of *fame!* Oh, that was happiness indeed.

It seemed less than five years and yet somehow longer than a lifetime since the day she had left Willetsburg with her simple wardrobe packed in the shiny new trunk, and her precious packages of sketches and paintings carried carefully beneath her arm. Everybody was down to the train to see her off and wish her well.

"I give you exactly two months," Bess Laird had called out, waving good-by.

"She'll be back! She'll have to come back! Nobody can stay away long from Willetsburg," Uncle Joe had seconded.

But nobody, not even Eleanor herself, had dreamed of the things that really were to come: The months of small, dark hall bedrooms and cautiously spent nickels; of feverish, absorbing work in Art School, where the teacher's praise was sometimes food enough without a dinner. The days of bitter homesickness when there was not enough money to go home on, unless she abandoned the dream of her heart.

And then the scholarship to Paris! Care lifted by the first breath of success. Three years of the heavenly joy of work that grew nearer and nearer perfection under her hand. And at last her picture in a place of honor *in the Salon!*

When she returned to New York it was to find her work already known and sought after. There had been an exhibit, and more sales than she had dared hope for. Better still, there were orders waiting to be filled. Fame and Fortune, those hesitant lovers, had suddenly become her devoted slaves.

And as soon as the tumult of acclaim had spent itself a little, when she had rented her studio and finished the first most important orders, she wrote to Aunt Sally and Uncle Joe that at last she was coming!

SHE scarcely slept that night after the letter was mailed. All the long-deferred and stoically silenced longings leaped up again in her heart. The praise of strange lips was, after all, not altogether satisfying. She wanted to hear it from those who had known her when she drew menageries around the borders of her spelling-book, and caricatured the teacher on her slate!

But the thought uppermost in her mind, as she sat now in the speeding train with the papers and notebooks about her, was far removed from vanity or pride. As a matter of fact, Eleanor had the simple humility of a true disciple of beauty. The thought was unselfish. It was a deep longing to share with the people of Willetsburg what she had gained during these five years. To take it back with her like a shining gift, and pour it into their hands.

Dear Willetsburg! So familiar and friendly and kind-hearted! So circumscribed and uneventful, and yet so complacent withal! They did not dream, those good people who went about their busy, useful daily round, that just outside there was a thrilling world of beauty which they did not see. Very few of them had ever traveled afar, either in reality or in imagination. Now, she, like an eager Marco Polo, was returning to tell them of the wonders she had discovered.

AND they would be so glad to hear, for there was now a link between Willetsburg and Paris! Something in common between the old town's dingy Main Street and the gleaming Champs Élysées! Incredible and yet true, for she herself had brought it about! The precious painting that had achieved fame, that the judges had chosen to honor in the Salon, *was a little bit of Willetsburg!* The old black oak that stood in Fielding's Meadow, back of the town! She had painted it from a dozen sketches that she had made from time to time at home, and from the memory of it, as she had seen it standing, winter after winter, starkly noble amid the snow, with its curiously bent and widely sweeping branches etched against the sunset! She wondered, with a warm, happy quiver of anticipation what everybody would say about *that*. For they all knew of it. A copy of the picture with its simple title of "The Oak," and the account of its success, had been reprinted in the county newspaper from a New York issue.

She began to leaf through her notebooks. They were full of bits of description, scraps of unique experiences, vivid ink sketches of interesting characters. Now she must sift out the best of them and arrange them in such a way that she could pass them on to Willetsburg. She

Digitized by Google
Original from
STATE UNIVERSITY SYSTEM OF FLORIDA

would be invited to speak, of course, at the Wednesday Club, and probably at one of the Lodge's social affairs.

And then, every day, the neighbors would have questions to ask her. She wanted to give them her very best.

Outside raced the flying hours.

It was late at night when she found herself at last on the Willetsburg platform. But everything was just as she had expected: Uncle Joe and Aunt Sally close to the train steps, almost lifting her off her feet. And behind them, chattering, laughing, calling, *the old crowd* waiting to greet her! It was all too unbelievably good! She was swept from one to another, talking excitedly, her eyes wet with tears. And then, when the first noisy demonstration was over, they all trooped together up the street.

"And, say, she hasn't seen the new bank building," Will Harbison was calling out above the others. "Gee, Eleanor, you'll see some changes in the old burg since you left it!"

"And the Country Cl—"

"Dan Gates! I think you're the limit! We wanted to keep that for the big surprise. Now, as usual, you've spilled the beans!" Bess Laird's voice was sharply accusing.

"Well, come on, we might as well tell her now, since he's gone that far. What do you think, Eleanor! Willetsburg is coming right along. A nine-hole golf course!"

"And the dearest little clubhouse! It's to be added to later, of course. But it's big enough now for bridge parties and—"

"And the Saturday night dances!"

"We made Aunt Sally promise not to write you about it! Isn't it *wonderful?*"

"Wonderful!" Eleanor echoed. "Where is it?"

"Fielding's meadow and Lowry's hill thrown together. So that makes it awfully convenient."

"And the new Episcopal church is finished at last," somebody put in.

"And they've paved Jayne Street," another volunteered.

"Now listen, everybody!" Bess Laird called. "That's enough about the town's improvements. What Eleanor wants to hear is the personal items! Now, let me tell the big one! Please let me! Henry and Jessie *are engaged!*"

"Announced last week! If she had known in time you were coming she'd have waited!"

"And the Stetsons have twins! A boy and a girl."

"And the Beckers are—"

"Sh—sh! There's time for the scandal later."

"Yes, leave it for the girls to chew over alone," Will Harbison rejoined cheerfully.

It flowed all around her, the accumulated details. Five years' news, with Aunt Sally and Uncle Joe expostulating earnestly in between, "But we wrote her that! Don't you remember, Eleanor?"

At last the crowd reached the big frame house on Jayne Street, where they stopped. The same old porch chairs and swing—all in the same places. The same honeysuckle and rambler roses. The same old, shabby comfort showing through the lighted windows.

Eleanor drew a deep breath. It was all so restful and satisfying. She said good night to the crowd, making wild promises to do everything they asked of her. Her head buzzed with the plans: luncheons, bridges, bacon fries, auto trips, teas!

The one reference to her own recent experiences was made by Bess Laird as they all reluctantly moved off.

"We'll show you that your gay Paree has nothing on Willetsburg," she called.

When she was left alone with Aunt Sally and Uncle Joe, she relaxed utterly into young girlhood. It was sweet to be petted and made much of after the years of courageous struggle and hard independence. She leaned suddenly upon their love.

Uncle Joe and Aunt Sally gloated over her. And she was actually here, safe and sound, and no harm had come to her in all the wild, wicked places she had been! Aunt Sally could hardly sleep nights thinking of her lamb away off there among *foreigners!* Well now, maybe she would stop traipsing around. What Uncle Joe would like to see her do, was just to marry some nice fellah like Will Harbison here, and settle down in Willetsburg. . . .

She went asleep that night with the old quiet flooding in about her, in the room in which she had lain awake so many nights to dream of what had now really come to pass. Sweet! Sweet! She had been too tired to talk about her work that night. To-morrow she would tell them all about it.

But the next morning there seemed to be no burning questions in Aunt Sally's mind, beyond the one as to whether Eleanor would rather have chocolate

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

icing or coconut on the cake she was baking. And would she like chicken or baked ham for dinner?

The girls came over early, and bore her off to see the Stetson twins. It seemed that all the old group were either married or about to be, except herself. She listened to excited details of Jessie's engagement ring and Marian's new sun-parlor furniture, and Billy Benton's first tooth. She heard over and over that Dan, and Jake, and Huntley were the most perfect husbands the world had yet produced, but that Anne Becker was actually going to *get a divorce* from Hal! The first real divorce in Willetsburg! The full details of the case took up the remainder of the morning.

In the afternoon she was escorted by the old crowd at full strength to the new club grounds. The boys carried their golf clubs with a self-conscious swagger and talked of their scores. The girls eyed them proudly.

Eleanor's keen, friendly glance saw it all amusedly. They were so eager to make the display entirely correct for her sake, when she, of them all, was least acquainted with the Country Club atmosphere. There had been neither time nor opportunity for it in the five busy years.

THEY had reached the edge of town now. A smooth rolling green stretched away where old Turner's potato patch used to be. Fielding's meadow had become a bunkered fairway, and the brook where the town children had always waded pleasantly on hot summer days had been widened to a muddy hazard.

All the old beauty of Lowry's hill, ragged with elderberry bushes and sumac, had been painstakingly cleared away. But she must forget she was an artist. She must be human. The golf course was great fun. She—

"And would you please *look* at our clubhouse?" Bess was saying exultantly.

Eleanor turned to the west. She had purposely kept from looking at once in that direction. She had wished to wait until she could go off by herself, and then, as if it were a small sacrament, tell the old Black Oak what it had done for her. Feast her eyes again upon its beauty.

She turned slowly around. Then she gave a cry. They all stopped to look at her. For the cry was not one of pleased surprise. There was sharp pain in it.

There, on the slight rise of ground where the great tree had spread its branching limbs, stood the smug little house with its toy veranda and fluttering curtains, with its gravel driveway serpentining importantly around it. There it stood, in its crass and boastful newness where before had been one of Nature's very masterpieces.

"Well, don't you *like* it?" Bess inquired. "I take all the credit for the location. I picked that spot as soon as we talked about a club, didn't I, girls? Well, Eleanor, *say* something! We crave praise!"

Eleanor's lips felt stiff. She looked from one cheerful face to the other.

"I was thinking about . . . *the tree*," she said slowly.

Will Harbison began at once:

"Now you know, *I* hated to see the old oak come down. A darned shame, I told Bess, to sacrifice a tree like that. But you know the ladies! That clubhouse had to stand on that very spot or not at all."

"But it *is* the best place for it, right on top of that little knoll, and there wasn't room to put it there unless you cut the tree down!"

"That's right! The oak was in the middle of the space."

"And besides, we have all those lovely logs for the fireplace next winter. Eleanor, you *must* come back for Christmas. We're going to have a big dance and—"

"Well, Eleanor, don't you think it really *is* pretty smart for Willetsburg?"

She gathered herself together. It was not the first time in her life she had had to assume a sprightliness she did not feel. She atoned for her slow response. She heard herself laughing and exclaiming, and meeting the gay banter of the others. Deep within her, she choked down the bitter surprised hurt that threatened to overcome her.

But that night, in the stillness of her room, she sat down to face it. The tree she had worshiped since she was a child was gone. Cut down to make room for that glaring little monstrosity of a clubhouse. The old Black Oak! And nobody knew or cared that it had hung *in the Paris Salon!* Through all the day, no one had asked her about her work. Jessie had inquired how she could *stand* it to be so far from home, and was Paris really as wild as people said? And they all called her the "Celeb." But outside of that the conversation centered on their own interests. She lay awake a long time that night, trying to think of something that would ease the disappointment of her heart.

The next morning Aunt Sally told her over her late breakfast that Mrs. Tulley had telephoned.

"She's president of the Wednesday Club, and she wants you to speak at their next meeting. I told her you would. That was right, wasn't it? She's coming over to-morrow to talk to you about it."

Eleanor brightened. All day she kept turning over in her mind the choice memories she had stored there. The opportunity she had hoped for was to be hers. If she could only put into words for these women the beauty she had seen!

THE next day Mrs. Tulley arrived, smartly dressed and beaming. She was a newcomer since Eleanor had left Willetsburg. She began promptly upon the business in hand, while her eye took in each detail of Eleanor's dress.

"You know, Miss Norton, next Wednesday is guest day at our club, and we've invited the Music Study and the Home Interests clubs from Coatesville to meet with us at the Elks' rooms. Just a social day, you know—no heavy program. And I wondered if you would speak to us?"

Eleanor smiled, but Mrs. Tulley gave her no chance to answer. She hurried on:

"You see, this winter the Home Interests invited our club over there and gave us *such* a treat. They had a fashion show from the city—regular mannequins! The women were crazy about it. Now, my idea was that if you would just give a little talk on Paris fashions—*you* know, whether bobbed hair is going out and how they are wearing skirts—just a general forecast of the styles—well, you know it would be *marvelous*, especially since you are an artist and naturally would have an eye for interesting effects. By the way—if it isn't rude—do you happen to have with you any dress bought in Paris?"

Eleanor gripped the arms of her chair. She must not have hysterics in this woman's presence! She must be civil to her, at any cost.

"All the dresses I have with me were bought in Paris, Mrs. Tulley. You know I lived there for three years."

The other woman stared at her with a kind of holy awe.

"Miss Norton! *All of them!* Why, our women will be thrilled just to *look* at you! I'll manage to pass the word around. And you *will* speak, dear Miss Norton, won't you?"

Eleanor hesitated, while she swallowed a queer lump in her throat. Then she said slowly:

"I had thought of speaking on rather a different subject; but if you think this will give the club the most pleasure—"

"Oh, it will be *wonderful!* I can't tell you how much we will enjoy it."

She left at last, an animated wisp of thanks fluttering behind her.

WHEN she was out of sight Eleanor sank limply back into her chair. So this was the end of all her longing to bring a gift to Willetsburg! They would have none of it. In her own country she was without honor. Her offering of beauty could not be given.

Eleanor set her lips. Very well. So be it, then. Her only praise, her only encouragement and understanding must come from strangers. Between the heart of Willetsburg and her heart there was a great gulf fixed.

She went up-stairs and repacked the notebooks, and the sketches with which she had meant to illustrate her talk, in the bottom of her trunk.

Nothing in the course of the next days lightened her disillusionment. She drove and danced and lunched and dined, as she was gayly commanded to do. Each one of the girls was bursting with eagerness to show off *her* house, *her* baby, *her* wedding silver, *her* new car!

Uncle Joe and Aunt Sally were supremely content. Their child was home from her dangerous wanderings. The old house was full of young people again. Somebody was always dropping in and being pressed to stay for Aunt Sally's famous chicken and hot biscuit suppers. They waited, she and Uncle Joe, on the vine-covered porch until Eleanor returned from an evening gathering, to hear all the news.

"My, you certainly are being entertained!" Aunt Sally would remark complacently. "I knew you would be! And isn't it just grand that you're going to be here for the picnic? Who did you say invited you for to-morrow?"

"Well," Uncle Joe would break in, "it's about time you're setting out to enjoy yourself, after all this working away on them fool pictures an' things. What *I* want is for you to forget all about this painting business an' settle down with some nice fellah that can give you a good home. A pretty girl like you living in a *studio* in a big city! Now that don't look right to me."

It was late afternoon on the day of Bess Laird's bridge. Eleanor came up the walk wearily. This party had been like unto

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

all the other parties. The same trifling gossip, the same ill-concealed interest in high scores, the same frank enthusiasm over the good things to eat. Eleanor had wanted to scream.

As she entered the house she heard a faint tapping at the back door. Aunt Sally was out, so she went on through the big cool rooms.

There, under the grape arbor that screened the back porch, stood two travel-stained figures, a woman and a little girl. At a glance, Eleanor surmised they had come from far back in the country, and it looked as though they had come on foot. The woman carried a market basket, and was no doubt selling something.

"Did you wish to see my aunt?" she inquired kindly.

The woman smiled timidly.

"No," she said in a slow, soft voice. "We wanted to see Miss Norton. . . . Why . . . are you—?"

For Eleanor was opening the door hospitably.

"Yes; I am Miss Norton. Won't you come in?"

The woman entered, drawing the child with her. Her eyes were fixed worshipfully on Eleanor's face.

"You don't know," she stammered, "what this means to me. I—I didn't know whether we'd even get to see you; but I've been planning ever since I saw by the papers you were here, to bring Mary in. Mary, shake hands with the lady. *This is the artist!*"

ELEANOR took the child's hot, dusty little hand and looked into the blue eyes that were raised wonderingly to hers, then turned to the mother.

"Do sit down and rest, both of you, and tell me how you came to know anything about me."

The woman placed her basket beside her. Eleanor noticed now that she had the same deep gentian eyes as the child.

She smoothed her plain gingham dress nervously, and went on:

"It seems kind of bold, me coming like this, a perfect stranger. I'm Mrs. Hart, from out by the Cross Roads. But I've thought so much about you and your work ever since I read in the paper first that you were going off to New York to study art—and then about the scholarship to Paris—and then your picture in the Salon, I sort of felt I just had to come and bring Mary—"

She stopped, embarrassed. Then, encouraged by the flash of surprised pleasure in Eleanor's eyes, she added:

"I used to draw a little myself when I was young. Of course I never had any chance, and when I was married—you know how it is on a farm with a big family." She smiled wistfully. "There ain't much time for drawing. But now, Mary! It seems like she's taking to it the way I did, only more. That's why I wanted her just to *see* you! She won't ever forget. She's like that, always remembering things. I want her to have her chance, mebbe, some day." (*Continued on page 98*)

"Yes, I Am A Crank!"

And so is every person who has ever done anything, says B. H. Kroger, who operates a chain of thirty-six hundred stores

By Charles Lane Callen

A GOOD many years ago, forty-five to be exact, a wholesale-grocery salesman bustled into a Cincinnati store with the air of one who had little time to waste. With a practiced flourish, he placed a can of corn upon the counter and tapped it with an impressive forefinger.

"Ever see anything classier than that wrapper?" he demanded of the storekeeper. "Makes you hungry for stewed corn the minute you look at it." He went on, confidently, "That wrapper'll sell more canned corn in a day than you've been selling in a month. I'm putting you down for three cases. You'll want all of a dozen cases next week."

It was a little store, a mere one-man-and-boy establishment which the salesman "made" because he must. The storekeeper was small, slightly built, as unimportant appearing as his business, and scarcely more than a boy in years. Not so long before he had been soliciting orders and driving a wagon on the streets. Prior to that he had been a farm hand at six dollars a month "and found." By every rule, the imposing bulk and air of the salesman, twice his age, should have awed him.

"What d'yuh say?" boomed that worthy, poising his pencil over order book. "Price is right, stuff's right, and—" He stopped short, then stared in astonishment mingled with wrath at the meager figure opposite. The storekeeper calmly had picked up the can of corn, stripped it of its pretty wrapper, and there it stood between them, bare and characterless.

"What's the big idea?" the salesman demanded.

Deliberately the storekeeper crumpled the torn wrapper in his hand.

"My customers eat corn," he said crisply, "not wrappers. Since we understand that, now suppose you open your sample and show me what's inside. That's what you were hired to do."

The salesman blustered, he argued, he swore under his breath; but he did open the can, which he was hired to do. And next morning, with memory still rankling, he vehemently explained to a fellow salesman what had followed upon his use of the can-opener.

"He smelled that corn," he related. "He tasted it. Not content with that, he dumped the corn out and washed it, after which he had the nerve to tell me that it was full of hulls! Of all the blasted cranks I've ever met that fellow is the worst! His name is Kroger. I hope to Gawd he starves!"

Since that day, forty-five years ago, many hundreds of men, like the corn salesman, have sworn mightily under their breaths and called B. H. Kroger a crank. And Kroger cheerfully, heartily, unhesitatingly admits it!

"If a crank is somebody who knows exactly what he wants and who insists and persists until he gets it exactly in that way, you may just put me down as the worst crank in this whole town," he says.

However, Kroger has not starved. Instead, his crankiness very directly has helped him build a fortune.

A man who had no reason to be friendly to Kroger pointed him out to me as "one of the four biggest men in Cincinnati." He added that Kroger was reputed to be worth $60,000,000 and that Kroger stock was that day quoted on the Cincinnati exchange at thirteen times its par value.

"He began with one store. To-day he owns two thousand," he said.

I CHECKED up and found he had understated the facts. To-day Kroger is the head and founder of a great retail organization which operates more than 3,600 stores in Ohio, Michigan, Missouri, West Virginia, and Kentucky. The business of the B. H. Kroger Grocery and Baking Company amounts to $160,000,000 a year. It is the third largest baker of crackers, and its annual production of bread, for sale in Kroger stores, exceeds 100,000,000 loaves. The employee roll of one boy has grown until now it numbers 12,500 workers. Additionally and incidentally, Kroger is the president of the Provident Savings Bank and Trust Company, of Cincinnati.

I looked up Mr. Kroger. According to the evidence, it had paid him uncommonly well to be a crank and I was curious to learn how he had "got that way," and why, for crankiness never before had appealed to me as a profitable trait.

What was my surprise, therefore, when this man, who has spent a lifetime in dealing with people, informed me promptly and bluntly that I was a crank, that you are a crank, that everybody to a degree varying with the individual is a crank of one sort or another!

"Show me the most successful man in the world," said Mr. Kroger, "and I will show you the world's biggest crank. What is more, he *had* to be a crank to be successful! A great artist is great, why? Because he is a crank about form and shade and color; a great engineer because he is a crank about precision, materials, and design; a great writer because he is a crank about words and atmosphere and characterization.

"PICK out the best bookkeeper you know; he is a crank over accuracy and thoroughness. The woman whose appearance you admire is a crank about her hair and dress. And the cook whose food has the most delicious flavor and whose dinners are the most savory is the peer of all cranks when she buys her meats and vegetables and groceries.

"My business is that of dealing daily with thousands of cooks and housewives," added Mr. Kroger, his shrewd eyes twinkling, "and it was they, years ago, who taught me the virtue of crankiness. I became a crank deliberately and by design, for which I must thank the women. It was my mother, a wonderful woman, who started me on my cranky way."

I studied the man before me—slight of build, grayed, seamed of face; in spite of a ceaseless activity and seemingly exhaustless energy he has never in his life been entirely well. I noticed that his hand jerked nervously where it hung at ease over his chair arm. His face was as devoid of fear as a sheet of steel, that of a man used to fighting alone, and to constant fighting, with the odds often against him. But a shy softness tempered his direct, steady eyes, so that it did not surprise me

And an Egotist, Too!

"LET us be frank in this talk," said Mr. Kroger. "I have said we are all cranks. Likewise, most of us are egotists. We like to palm off our egotism as self-confidence; sometimes we call it 'faith in ourselves;' but, whatever we call it, it is the ego, the 'I' exalted. Purposeful, confident action *must* be founded on a belief in 'I,' for without that belief there would be inaction."

STATE UNIVERSITY SYSTEM OF FLORIDA

later to learn that each summer, at his big farm near Cincinnati, he cares for several hundred anemic poor children. He never mentioned this in our talk, though it perhaps is his biggest interest outside of business.

Christened Bernard Kroger, he was born in Cincinnati in 1860, the fourth oldest in a family that was to grow to eight. His father, a small merchant, had come to America in 1827 from Alsace-Lorraine, working his way in a sailing ship. Big, affable, easy-going had been the elder Kroger, popular with his neighbors, open-handed, genuine. Farmers who had begun their journey into town long before daylight made up a goodly portion of the patronage accorded his little general store on Central Avenue; and fifteen or twenty of them with huge appetites usually sat down each day at the free Kroger table for noonday dinner. That was the elder Kroger's idea of "service to my customers." It made his store a gathering place. He sold dry goods, which farmers usually bought by the bolt. He died at seventy-one.

Young Bernard's mother was the disciplinarian of the family. Born in Germany, she had been brought to America at the age of three, a daughter of pioneers. Under her hand the Kroger home above the store was kept immaculate. Her meals, always on time, were famed for thirty miles around. A church woman, unswerving and literal in her faith, she dominated her household. There was no excuse except a serious illness to warrant shirking duty on Sundays. There was no excuse under the sun for untidiness and waste. Cleanliness *was* next to godliness; and industry was second only to cleanliness.

THE boy Bernard was like her, except in physique, possibly due to an admiration and a love which knew no bounds. Hardy and tireless, up to within a few weeks of her death at the age of eighty-eight, Mother Kroger knew not a sick day. At eighty-five she took a railroad journey unaccompanied. With undimmed eyes she read the best magazines, and was better informed on international affairs than most men. Many times, I've no doubt, she was called a crank.

She was a crank in this way, Mr. Kroger explained: She insisted that a thing be done right; that it be done promptly; that it be done thoroughly. The store, for instance, sold among its endless variety of goods those old-fashioned cotton-stuffed "comforters" at one time to be seen in every farm bedroom. They were hand-made by neighborhood housewives. One of Bernard's boyhood duties was to carry the bundles of cotton to the makers and to return the completed comforters to the store for sale. His mother subjected them to inspection, and never accepted one her exacting nature would have refused for her own bed.

"Women will come in here to buy these comforters who are just as particular as I am," she was wont to say. "If I can see poor stitching they will see it too. The only way to satisfy a particular customer is to be more particular. Satisfy the most particular customer you have and you'll satisfy everybody."

Although she did not know it, she was stating a policy upon which one of the country's great businesses was to be founded. Bernard Kroger himself was too young to realize its full significance then, though later it was to be his guiding rule.

In the panic of 1873, the Kroger store failed.

Rather, the store itself did not fail, but "outside speculations" of the elder Kroger in real estate collapsed and the store and its stock had to be liquidated to meet the losses and pay debts. Bernard got work in a drug store. He was thirteen, but he had to work seven days a week, and nights. Even in adversity Mother Kroger's principles held iron-bound. "A job which keeps a boy at work Sunday and away from church is no job," she declared. Bernard went to church, though he had to quit his position at the drug store in order to do so. "I'd sooner starve," said Mother Kroger, "than have a boy of mine turn his back to duty." An iron woman! Kroger worshiped her.

Bernard H. Kroger was born in Cincinnati sixty-seven years ago. He was successively a drug-store clerk, a farm hand, a delivery-wagon driver, and finally manager of a grocery store on the verge of failure. Immediately he made the store pay. That experience led him to open a store of his own, from which beginning he has built one of the big retail organizations of the country. In addition to being head of the B. H. Kroger Grocery and Baking Company, which employs twelve thousand persons, he is president of the Provident Savings Bank and Trust Company, of Cincinnati

From the drug store he went to a farm, at six dollars a month. It was thirty-five miles from Cincinnati in a flat, marshy country. His bed was a bunk in the tool house, covered with a sheepskin robe. Mosquitoes from the marshes swarmed through the unscreened windows and made the nights a torment. Every bone and muscle in Kroger's frail body ached and groaned from the man's work he attempted to do.

"I was homesick," he told me. "I wanted to run away. Each morning I dreaded the daybreak and each evening I dreaded darkness."

HIS mental agony, to this day recalled with quiet horror, tested to the last ounce every bit of metal that was in him. On top of it, but causing no cessation in his work, came malaria with its paroxysms of sweating fever. The boy shrank to a bag of bones; his skin became as yellow as the ripe wheat in which he toiled. Thinking of what his mother would say of a quitter, however, he stuck it out. It was his first big fight.

A year and a half he worked on the farm. A Cincinnatian was the owner of the place, which was directed by a manager who had only the most rudimentary notions about farming. Kroger was learning nothing, getting nowhere—and he wanted, as he had never wanted before, to get ahead, to earn more, to be able to send more home to his mother.

"I was a spectacle, no doubt," he said to me, "skinny, yellowed, long-haired, big-eyed, and shaken by fits of the malaria. My clothes were worn out and patched. I wore leather boots which rattled about my shins. My cap was so faded you couldn't possibly tell what had been its original color."

So he came back to Cincinnati, looking for a better job. A remarkable fact was that he never doubted for one moment his ability to find such a job, and to handle it when once found.

"I've been accused of being an egotist," he went on. "I was a bigger egotist that day when I returned to Cincinnati from the farm than I've been at any time since. The years and experience have since taught me that I can be wrong probably as frequently as the next man, but that fact never occurred to me then. In my own estimation I was one hundred per cent right, all of (*Continued on page 183*)

Mr. Jay S. Stowell and his family, at their home in Fox Chase Hills, Pennsylvania. Mr. Stowell is a Congregational minister; but for years he has been employed as a Home Mission and Church Extension worker by the Methodist Episcopal Church. His field extends over the entire United States and many of its territorial possessions. His books, among them "The Child and America's Future," have had wide sales. Mr. Stowell is a graduate of Oberlin College, Union Theological Seminary, and Columbia University. He became an itinerant missionary soon after leaving college

I Have Never Been Turned Away From A Cabin Door

By Jay S. Stowell

IS THERE any relation between the size of a house and the difficulty of getting past the front door?

I cannot prove it, but I believe there is. Hospitality to strangers seems to decrease in inverse ratio as extra rooms are added to the domicile. In a one-, two-, or three-room cabin there is always "room for one more;" but above that you never can tell. There seems to be something about the architecture of a cabin, whether it be in our Eastern highlands, in the adobe country of New Mexico, in the mining camps of Colorado, or the sage-brush plains of Montana that makes the whole world kin.

Experience revealed this truth to me after I had walked up to many doors in many different states and asked the simple question, "May I stay all night?"

Perhaps my experience has been different from that of others. It has fallen to my lot to go into the out-of-the-way places and to live with just plain everyday folks, no one of whom was under any obligation to extend courtesies to me.

Somewhere around twenty years ago I set out in the rôle of a Sunday-school missionary. How much good I did to the world I cannot say; but my experience taught me a few elemental truths.

I began my missionary work in the mountain country of West Virginia, and before I gave it up I had covered assignments in western Pennsylvania, in Montana, in western Colorado, and in Oklahoma. Since that time, as a writer for church and missionary organizations I have traveled repeatedly into all the states of the Union, and I have taken time to get away from cities and railroads and saunter back where plain people live, sometimes fifty miles from the railroad, sometimes much more.

BUT my first experience in asking hospitality of strangers began before I took up my missionary work, and it was the bitterest of all. Possibly it was fortunate for me that I did not then realize how many times I would be asking the same question in the years that have followed.

I was teaching school in a hidden hamlet in the foothills of the Adirondack Mountains, five miles from the railroad. The way was rough and hilly, and under the best of conditions the journey was an arduous one. On a night which I shall never forget I stepped from the train and watched it pull away into the darkness. Then I turned toward my destination. Snow had been falling all day, and high drifts were piled on both sides of the road.

I had not gone many rods before I knew that I was face to face with two grim realities, snow and night. I might have turned back, but there was little to turn back to. So I kept on. I covered a quarter of a mile and rested in a deep drift. I pushed forward, and in course of time covered another quarter. At three quarters of a mile I knew I should turn back. But a long distance ahead I saw a light, which lured me on. I would ask shelter of strangers. Surely a night like

Digitized by Google

STATE UNIVERSITY SYSTEM OF FLORIDA

this they could not refuse to give shelter. How long it took me to negotiate that walk I do not know. Each step was taken with difficulty, and I beat back the billows of snow as a swimmer breasts the waves of the ocean. At last I reached the house and knocked on the door. I made my wants known. I was exhausted and far from my destination. Could I stay all night? I was curtly told that I could not stay; but that probably I could be cared for at the next house, nearly a mile away.

The refusal was like a blow in the face, but I made no protest. Summoning all my reserve I stumbled on my dreary way. Never before had I quite realized the awful dead weight of piled snow, snow so soft that one sank into it as into cold feathers, and so heavy that, to tired feet, it seemed as lead. My progress was slow and labored. But somehow I struggled on and reached the house.

It was now late and the house was in darkness.

I knocked.

There was no response.

I knocked again and again. I called.

A voice said, "Who's there?"

I told my tale.

"We can't get up," said the voice. "We're all in bed. You will have to go on."

Although I was well versed in the Scriptures, in the cold and darkness and in my bodily misery, I forgot about the man who won out because of his importunity. Foolishly, I accepted the answer as final. Despair and humiliation seized my soul. I felt like a beggar. I was ashamed. To turn back now was out of the question. Before me stretched a worse road than the one I had passed. I looked at the large, well-built house towering in the darkness, with its broad veranda, that so belied the soul of the house within.

Once more I took the road.

EVERY step was a struggle. The snow was deeper now; but the wind had ceased and the stars were shining through the clear cold air. I was no longer weary. That word is too weak. I was on the point of complete exhaustion. I would lie back in the midst of a drift, and then rouse myself and push on. I came to an abandoned house. In front stood a tall milk stand. The wind which had swirled the snow about it had left an inviting little cave, which spoke to me of rest. With an overwhelming sensation of satisfaction and relief I rolled into that snow nest. My tired muscles could do no more. I knew that I would be found dead—perhaps in a few days, possibly not till spring. It mattered little to me; death seemed to have no horrors. I was not brave, I simply did not care. Rest was the most desirable thing in the world. Nothing else mattered.

How foolish are the despairs of youth.

I had rolled under that milk stand to die. My worries were past, and I lay like a lump of lead. I kept no account of time. Gradually, my mind cleared. Instead of thinking about death I found myself considering ways and means of completing my journey. When I finally crawled out on all fours from my snowy haven I was a remade man. My struggles were not over; but a new strength had come to me. In the small hours of the morning I reached my destination. Six hours I had battled with the snow—but I had won.

Any grudge I might have held toward the unfriendly humans who doomed me to the experiences of that terrible night is gone. I know now what the trouble was—their houses were so large that they had no room. I have some vivid memories of being turned from other doors in later years, but always it was from the painted houses, the houses with comfortable verandas, the houses with many rooms, never from a humble cabin home.

Time passed, and I received my commission as a Sunday-school missionary, together with instructions to work a certain field in West Virginia. I was to go to the end of the (*Continued on page 180*)

If You Ask Me:

It costs a lot to be a snob

"A SNOB," said a little friend of mine recently, "is a fellow who pretends to be what he ain't because some other fellow is."

And that, I maintain, is a pretty good definition.

We all wish to put the best foot foremost. Indeed, I believe it is the duty of each of us to appear just as well as is compatible with his financial and intellectual honesty. In this day of high prices, we cannot make much of a "show" unless we have a great deal of this world's goods. But why want to make a "show"? There is nothing shameful in not having so much money as one's more fortunate neighbor. And pretense of wealth is invariably vulgar.

Since it costs so much to live decently, why add to the difficulties by doing things we cannot afford, just for the sake of what people will say?

"My dear," remarked a woman to me, "if I cannot entertain as well as the people who entertain me I won't entertain at all."

The poor lady is all wrong. Being a snob, or a would-be swell, she does not see that the greatest honor she can do a friend is to show such hospitality as she can afford.

I have in mind one of the homes where there is no sign of snobbishness, where husband and wife are too sincere to make pretenses. Their means are moderate—so moderate that a snob might look down on them. But in all my life I have never met with more exquisite hospitality.

The young wife does her own work in the little cottage in which they live. She is charming and attractive, and her wealthy friends seek her out and invite her to their houses. I have never heard her regret that she cannot entertain as they can. She receives them in her tiny home with the most beautiful and gracious welcome. She does not apologize for the simplicity of the fare nor for the inexpensive ménage. She sets before her guests the best she can afford, and no more. She has taught me many a lesson in the virtue of sincerity. She feels there is nothing shameful in being poor.

I took a much-traveled woman-of-the-world to this little home. When we left, she turned to me with a moved smile and said, "That is royal hospitality. I am more honored at having been the guest of that young wife than if I had been entertained in a palace. She is the *realest* person I have met in years."

Of course, being rich is mighty agreeable, and the rich are justified in procuring for themselves the best of everything. We would do the same if we could. But when we cannot afford it, why cripple ourselves, starve our bank accounts, and sacrifice our honor and self-respect to snobbery and the desire to be swells?

If you would be a swell, you must pay for it. If you have the money and the inclination, go ahead. But if you haven't the money—don't go in for pretense.

Those of us who do not try to be swells—or who have not the means to be—know certain joys of which our wealthy friends are ignorant. When we do manage, by saving or because of a run of luck, to gratify some longing, we enjoy it as we never would if it were an everyday occurrence.

As I've said before, it must be nice to be rich. But if one cannot be—it is awfully nice to be just sincere and honest and live right in the middle of one's pasture, content with all the simple, beautiful things that are there.

The price of being a swell and a snob is a sense of never-ending strain in pretending to be what one is not.

Scattergood Stirs Up More Than Rubbish

A story

By Clarence Budington Kelland

ILLUSTRATED BY PAUL MEYLAN

WADE LUMLEY was not so young as he had been when Scattergood Baines first walked barefoot into Coldriver, kicking up the dust of the summer road and delighting in the sensation of warm sand oozing upward between his toes. He still conducted the dry-goods store which his father had owned before him, and which *his* father had inherited from the first Lumley to take up his residence in the valley.

The three-story frame building was one of the landmarks of the village. In the hundred years of its life it had known many coats of white paint, and more than one family could tell how some aged member of it had been equipped there with his first baby clothes, and with the garments he wore upon his last journey.

The bookkeeping of this establishment had not altered in its simple method since the day of Lumley the First. The books consisted of two spindles. Upon the first of these were bills, upon the second were receipts. No inventory was ever taken, no clearance sales were ever held. Yet, on December 31st of each year, the proprietor knew exactly how he stood.

"Don't need no figgerin' to tell me that," Wade often said. "Allus pay what I owe the end of every year—and what I got left is mine."

It was simple, and it sufficed in a simple age and among simple people. But latterly times had been growing more complex. Wade's grandson—for Mr. Lumley's son was lost to him—argued with his grandfather for the introduction of more modern ways; but the old gentleman was adamant against such inroads. "What was good enough for my grandfather's good enough for me," he said, and there the matter rested.

So the Lumley store had lagged, and then staggered, and now was tottering. Even Wade himself realized this. He realized that the enterprise of whose antiquity he was so proud, and upon whose history he so loved to discourse, was upon the brink of dissolution.

In this emergency Young Wade Lumley, the fifth of his name, took his courage in his hand and called upon Scattergood Baines. Mr. Baines sat, as he usually did in summer, upon the piazza of his hardware store, ready to entice passers-by inside to purchase articles large or small from his stock. He looked down, eyes shaded by his flapping straw hat, as the young man stopped upon the bottom step.

"Mornin', young feller," he said.

"Mornin', Mr. Baines."

"Jest stoppin'," Scattergood asked, "or stoppin' for suthin'?"

"I kind of wanted to talk things over with you, bein' as how you're the head one to the bank."

"Um. . . . Your grampa's notes, mebbe?"

"I jest dunno what's to be done," said Wade.

"Your grampa 'n' me's old friends, Wade," Scattergood said, "and 'most everybody else is his friends too. I calc'late everybody's willin' to turn to and do what he kin."

"We can't reduce the notes. . . . And seems as though we couldn't keep on, though we manage to borrow more."

SCATTERGOOD pursed his mouth and puffed out his round cheeks. He looked at Wade briefly, and then allowed his narrowed eyes to travel off across the bridge toward the store in which the Lumleys had gone about their affairs so long that the memory of no man then living ran to the contrary.

"Money in the bank hain't mine, Wade. B'longs to folks that has saved it up and put it there for safe keepin'."

"I know it."

"We hain't got no right to risk it, Wade, nor to give it away. We got to do right by the folks that trusts their savin's into our hands."

"Seems as though," said Wade.

"If you can't pay down on them notes, it don't seem likely you kin pay off more notes on top of 'em."

"It don't," Wade said heavily.

"Your grampa's kind of set in his ways, Wade."

"He's all right," the young man replied firmly. "It's Grampa's store, and he's got a right to run it like he wants to."

"To be sure, Wade, to be sure. Hain't nobody questionin' it. But the rub kind of comes in right there. He hain't got the right to run it like he wants to with other folks' savin's. Git the p'int?"

"I git it," said Wade. "W-al, much obleeged. I didn't calc'late much was to be done. But I do sort of wish it could have been shored up to outlast Grampa. It'll most likely break him down to see the sheriff nail a notice on the door."

The young man turned away with drooping shoulders and walked a few steps. Only then did Scattergood seem to notice his departure.

"Goin' some place, Wade?" he asked.

"Back to the store."

"Give up kind of easy, don't you?"

Scattergood knew his people, knew their fierce pride and how it cut to the quick to be compelled to ask a favor. He knew it was beyond the power of one of them to press for mercy—and his eyes wrinkled in a kindly smile, though his lips remained grave.

"I calc'late I said all I got to say," Wade answered.

"Other folks may want to do some sayin'," Scattergood said. "Hain't I goin' to git a chance?"

Wade turned back, and stood waiting, awkwardly.

"Set," said Scattergood. "Um. Hain't no reason a store like yourn shouldn't pay here, is the'?"

"I calc'late we're kind of out of date. Newfangled things is the style, and our ways of doin' don't fit in."

"Figger you understand about the new ways, Wade?"

"I got idees," said the young man. "But Grampa, he don't hold with 'em."

"Many bills owin' to you?"

"A sight. Grampa never was one to press folks much."

"He wa'n't," said Scattergood. "And he wa'n't never one to look if a man could pay before he give him credit."

"Lots of bills he never expected to git paid," said Wade.

"I know," Scattergood said, and nodded. He did know. He knew of more than one family that had been carried through hard winters by the elder Lumley. He knew that no penniless father or mother ever asked for credit in vain. He knew many things—all to the credit of Wade Lumley as a human being; but few to his credit as a man of business.

"Don't b'lieve there's much collectible," said Wade, "even if Grampa knew who did the owin'. He kind of tears up the accounts after a while."

"NEVER held one of these here clearance sales, did he?"

"No, nor his pa, nor his grampa, neither."

"Old stock must 'a' accumulated consid'able."

"Top floor's full of it. When a thing gits so it clutters up the shelves we move it up-stairs. 'Tain't fit for nothin' but to burn; but Grampa, he likes to hang onto it. Says he put his money in it, and he can't bear to throw it away."

"How much money do you need—

Digitized by Google
Original from
STATE UNIVERSITY SYSTEM OF FLORIDA

altogether, Wade?"

"I calc'late mebbe ten thousand 'ud see us through. Takin' up the notes and all."

"But how'd you pay it back? Goin' from bad to wuss, seems as though. Folks is gittin' into the way of goin' to stores that keeps more up-to-date stock and sich-like. Calc'late you kin build up a business agin?"

"I could," said Wade.

"IF YOUR grampa 'ud let ye. Uh-huh. Calc'late he'd ruther go bankrupt than to give you a free swing at it?"

"He don't figger it's our business ways that's ruinin' us."

"Couldn't he mebbe be showed?"

"It hain't for lack of my tryin'," Wade said.

"Calc'late he knows how bad things is?"

"He does, kind of, and yet he don't. Seems as though he's got a kind of faith things'll go on, somehow."

"I figgered so," Scattergood said. "No, your grampa won't never tolerate no change—that he kin help."

"I've wanted to fix up the winders so as to attract folks."

"Be kind of a pity," said Scattergood, with a sly twinkle in his eye. "Them things he's got in the winders now is perty familiar to folks. We'd miss 'em."

"The' hain't been a thing disturbed in them winders since I was born," said Wade.

"Calc'late them goods in the storeroom 'ud fetch anythin' at a rummage sale?"

"They'd fetch more at a bonfire," said Wade.

"Um. . . . G'-by, Wade. Hey, hold up a minute! I hear your grampa's goin' to the Masonic doin's down to Higgins Bridge to-morrow."

"He's been countin' on it."

"G'-by, Wade."

"G'-by, Mr. Baines." The young man turned away, discouragement eloquent in his drooping shoulders and bent head. Scattergood peered after him and waggled his head.

"Calc'late," he said to himself, "we got to play a mean trick on the old feller. Kind of hold his nose and make him take castor oil!"

Next morning, having first made sure Grampa Lumley had driven away to Higgins Bridge, Scattergood ambled across the bridge to the store. He stood in the doorway and peered into the dusky interior, smelling of calico and coffee, and so arrayed with stock that a progress down the aisles was close to an impossibility. Dresses hung on hangers, gloves and mittens dangled—though it was summer—strings of hats and caps flapped; barrels of sugar and boxes of fancy cookies elbowed crates of vegetables. There was even a smattering of millinery. The old hardware merchant waggled his head in silent disapproval.

Wade stepped from behind the counter to meet him.

"What kin I do for you?" he asked.

"You kin traipse me up to the top floor," said Scattergood.

"Suthin' there you want?"

"Jest want to prowl."

SO THEY mounted the stairs, themselves burdened with surplus stock. Racks of brooms, a couple of high-chairs, a crate of dishes! The second floor was given up to furniture and wall paper and carpets and curtains. But the third floor! It was a New England attic raised to the *n*th power! Bales, boxes, barrels, crockery, furniture, dress goods, women's cloaks dating back to post-Revolutionary days, tinware, pewter, china!

"Hain't never been up here before," said Scattergood. "It's dog-gone educational, hain't it? . . . You kin run along if you got suthin' to do, while I rummage."

"Hain't got nothin' to do," said Wade.

Scattergood remained an hour, and Wade marveled that he should spend so much time. The old man chuckled as he brought to light a couple of spinning wheels and a brace of bed warmers. He set in a group a dozen or more articles of brownish crockery. He lifted and tugged and sweated, and got himself remarkably dusty.

"Mebbe," said Wade, "if you was to tell me what you was lookin' for I might help ye."

"Hain't lookin' *for* nothin'. Jest lookin' *at*."

Presently he signified that he was finished, and they went down-stairs again.

"Kind of a conglomeration," Scattergood said. "Don't call to mind ever seein' anythin' jest to compare it to."

"The' hain't nothin'," Wade said wearily.

Grampa Lumley stopped suddenly and pointed to a vacant spot. "Where," he

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

demanded of his grandson, "is that there box of prunes that's been settin' right there?"

"Um. Figger ten thousand'll put you onto your feet?"

"It would," said Wade, "pervidin' Grampa would countenance a mite of changin' around."

"Pity," said Scattergood. He regarded Wade under his hat brim. "Willin' to take a chance on gittin' into trouble—if it was done for Grampa's good?"

"He's been mighty good to me," said Wade.

"He's aimed to be good to everybody," Scattergood said. "He got all equipped up with the gumption to be a good man, without none of the gumption to make money. . . . Hain't no relative he's wantin' to visit for a month or so?"

"You couldn't git him away from this store for more'n a day to a time."

"The's allus a way," said Scattergood. "Tricks in all trades but Pa's, and he drives screws with a hammer."

"What you got in mind?" Wade asked.

"Hain't jest sure. Seems like mebbe the best thing 'ud be a rip-snortin' fire. Got plenty insurance?"

"It's lapsed," said Wade.

"Then we'll give up that idee," Scattergood said, so seriously that Wade wondered if the old hardware merchant actually had contemplated arson. "As I asked you once before, be you willin' to take a chance?"

"I be," said Wade. "I'll do 'most anythin' within the law to git Grampa out of this mess."

"I calc'late we kin keep this side of crime," said Scattergood. "Unless we conclude we got to commit assault and battery on Wade to kind of banish him out of here for a few weeks."

"Nothin' else'll do it," young Wade said feelingly.

BUT he was wrong. Rheumatism did it. Too much sitting on the grass at the Masonic picnic did for Wade Lumley's joints, so that he found himself in a decidedly creaky state and unable to move out of his big wooden rocker. This, young Wade drew out on the piazza every morning, so that the old gentleman could sit and watch his neighbors going about their business, and consequently chafe less at his own inactivity. Scattergood interviewed the doctor, who assured him Wade would be quiescent for a matter of weeks.

"Allus did credit a far-sighted Providence," Scattergood said, with what the doctor regarded as a lack of sympathy. "Um . . . Doc, you see to it that ol' coot don't move till I give you the word."

"What do you mean, Mr. Baines?"

"Didn't dodge around no corners, did I? Didn't leave you in no doubt where I stood? At all times," he said impressively, "I calc'late to mean what I say exact—exceptin' such times as I mean suthin' altogether different. This time I don't."

"He'll be a hard man to keep quiet," said the doctor.

"Then git you one of them yaller smallpox signs, and quarantine him up tighter'n Nellie Lakin's Sunday shoes," said Scattergood.

HE WALKED from there to the store. "Now," he said to Wade, "we kin commence to stir."

"Stir what?"

"This here mess," said Scattergood. "I figger about a thousand dollars'll fix up this front so daylight'll penetrate. And then we kin sort stock, and git in suthin' salable, and rig up some fixtures and what-not."

"But—that's what we can't do. We can't git no more credit, and we hain't got cash, and there's Grampa. He'd tear himself all loose if we was to do sich a thing."

"Nevertheless, we're a-goin' to."

"We can't be no more busted 'n we are," said Wade dolefully. "But I do hate to be owin' more folks we can't never pay."

"Mebbe we kin contrive to pay," Scattergood said.

"But jest what be you goin' to do?"

"I calc'late," said Scattergood, "to turn this here place into a store, instid of a rubbish heap."

"The Lord knows what Grampa'll say when I tell him!"

"He won't say nothin'—'cause neither you nor anybody else is goin' to tell him."

Wade shook his head dubiously. It was to be seen that he was alarmed; but, as Scattergood read his face, he could at least dodge a portion of the blame. Scattergood smiled.

"You kin tell him—when the time comes—that I overbore ye," he said, "and bullied you into it."

"I calc'late I kin bear my own blame," said Wade, a trifle testily.

"You might git Elsie to help you do it," Scattergood said in a casual sort of way; but the young (*Continued on page 192*)

"I'd Rather Build A Mansion Than Merely Live In It"

Another "Just Folks" Article

By Allan Harding

SITTING in a deck chair, on a steamer homeward bound from Europe, I was so absorbed in reading a mystery story that I was temporarily deaf and blind to my surroundings.

Suddenly a sharp exclamation roused me to attention. Two men sitting near me had been carrying on a rumbling conversation. Then, apparently, the idle current of their talk had struck a snag.

"*Gosh!*" one of them exploded. "Don't talk about work! I'm sick and tired of it. I'm a slave to my job and what do I get out of it?"

"Not much, I should say, if that's the way you feel about it," replied his companion.

"Well, it *is* the way I feel about it," declared the first speaker. "Two more days of freedom, and then back to the treadmill. Come on! Let's go and have a drink and forget it!"

When his invitation was declined he lumbered to his feet, yawned, and headed for the smoking-room. The other man looked after him, muttered a low but eloquent "Humph," picked up his book, and began to read.

It was exactly two weeks later that I met John Jones—yes, that is his real name—and by a curious coincidence discussed with him the very same subject; for we, too, talked of work and of what a man gets out of his job.

Before telling you what John Jones works at, I am going to tell you what he gets out of it. Then if you can guess what his job is—well, you're a pretty good guesser.

He is one of the proudest men I have ever met. Proud because he knows he can do his work as well as any man can do it. Proud also because he not only *can* do fine work but also *does* do it.

He knows that he turns out jobs which are one hundred per cent perfect. So he has that air of confidence which comes from ability plus integrity.

He is a contented man, too. Not after the fashion of some men; the stick-and-stone sort who are contented so long as they don't have to stir themselves. He has his ambition. He pursues it with zest every day. And he has the satisfaction of daily achieving it.

He does not fear any man. Why should he? The world needs his work. We want what he can give us. He doesn't have to cringe to anybody. He envies no one. Because he knows he has the only things that are *worth* enjoying: happiness, contentment, self-respect, and the respect of others.

Now suppose you try to guess the job at which John Jones works with so much pride. . . . Perhaps he is a famous lawyer; a great doctor; a shepherd of human souls; a captain of industry; a farmer, raising wheat to feed the hungry; possibly the president of a savings bank, where the poor—

No! You're getting colder and colder, as the children say when they're playing "Hunt the Thimble." John Jones is none of these things. He is a plasterer! His father, his grandfather, and his great-grandfather were plasterers before him.

To you, perhaps, he is just a worker with his hands; a mere manual laborer. But if that is your idea, again you are on the wrong track.

From John Jones I gained a new respect for "mere manual labor," when it is performed by a man who has skill, intelligence, and a real sense of honor.

That man whom I overheard on the steamer, complaining that he was a slave to his job, angrily demanding what he got out of it? I found later that his job was the law; one of the most interesting professions in the world. Yet to him it was as dull as a treadmill. He hated it as the galley slave hates his chains.

I hope that man will read this story. I hope the thousands of other men and women to whom their work is a treadmill will read it and envy John Jones; envy him to the point of trying to have, for themselves, the things he has and which are worth envying.

JOHN JONES lives in Brooklyn, but he was born in Wales, the home of his people for generations before him. He looks a little like his famous countryman Lloyd George, except that his cheeks are rosier, his gray hair more abundant, and he is physically better set up.

John Jones has the best of it in another respect. Lloyd George became prime minister of England. But he lost that job and, so far, he hasn't been able to get it back. Jones *never* has lost *his* job! So he scores that point over the ex-prime minister, and over a good many other folks as well.

However, as an American citizen, he doesn't bother his head much about what Lloyd George is doing. He has been in this country forty years; ever since he was eighteen years old. In those forty years he has been busy with his own ambition. And he has achieved it.

His ambition was to be as good a plasterer as any man with two hands, two eyes, a brain, and a conscience could become. He believed in following the Bible injunction to do with all his might whatever his hands found to do.

One of the results of this belief was a certain ceremony which took place not long ago in a great bank building which was approaching completion in New York.

John Jones had been in charge of the plastering in this splendid new building. Following the architect's blue prints he had produced elaborate cornices, moldings, cartouches, the tricky curves of groined ceilings and rounded coves.

"At one point," he told me, "I made the steel workers and metal lathers take down their work and do it over again. There had been an error in the measurements. If I had plastered the beamed ceiling as it was constructed, the panels would have been the wrong size for the frescoes which were to go in them."

"BUT is it up to you to correct the mistakes of others?" I asked.

"It certainly is, if their mistakes would make my own job less than a hundred per cent perfect!" he said emphatically. "I have no right to hide behind another man's errors."

"Did the steel workers and metal lathers resent your putting them to all that trouble?" I asked.

"Yes," he said with a grim smile; "I was the most unpopular man on the job for a while. But the thing had to be *right!* I wouldn't go on with it until it *was* right. And in the end I don't think they nursed any grudge against me."

The ceremony I spoke of was, in part at least, a result of this stubborn insistence on having things "right." One day a group of well-dressed men entered the lobby of the almost finished bank building and asked for John Jones the plasterer. A little impatient at being interrupted, Jones came forward to meet them. He had no idea of their purpose in coming. He didn't even know who they were.

Moved by curiosity, other workmen edged nearer to the little group. What was going to happen to Jones? After all his insistence on having the work of other men done right, had he himself made a slip of some sort? Who were these visitors, anyway?

The spokesman for the strangers quickly answered these questions. He explained that they came from the New York Building Congress, an organization composed of architects, builders, contractors, and representatives of the men employed in the building trades. Its purpose is to promote better relations, higher standards, and better methods in the industry.

One way of doing this, he said, is to recognize the value of high-grade workmanship and to reward the man who does such work. Therefore, it gave him great

pleasure to present to John D. Jones, plasterer, a Certificate of Honorary Craftsmanship as a mark of esteem and appreciation on the part of the New York Building Congress. Whereupon, he handed to the surprised Mr. Jones a handsomely engraved document in which the essential facts were set forth in black and white.

"How did you feel?" I asked him, when we were talking of this tribute that had been paid to his craftsmanship. "I was pleased, of course," he said. "A man is glad to know that his efforts are recognized and appreciated. Most bosses and employers don't seem to understand this trait of human nature. They are afraid that praise will make a man conceited and hard to deal with. But I think they should regard praise, or perhaps I should say appreciation, as part of his wages. If he earns it, and doesn't receive it, they are 'holding out' on him.

"I can say this freely, because I've had nothing to complain of in that line. My employers have been generous in their appreciation. But I know plenty of good workmen who are not so fortunate. And I want to tell you that it takes a lot of good honest backbone to go on doing your very best, without knowing whether anybody except yourself sees the value of what you are doing.

"I AM one of thousands of skilled workmen in the building trades: carpenters, bricklayers, plasterers, painters, electricians, lathers, steel workers, plumbers, and so on. We make the houses in which you live. We construct the buildings in which the business of the world is carried on.

"Don't think for one minute that we don't know what we are worth to the communities where we live. Just because we wear overalls and can't keep our hands and collars clean, we don't despise our jobs. On the contrary! We know that we carry on one of the most essential of all industries.

"I think it might help everybody concerned if the so-called 'white-collar class' could understand our point of view. I am convinced that the average workman at a skilled trade has more *respect* for his job than the average clerk or bookkeeper has for his.

"Moreover, the workman is likely to be happier. Half the clerks and bookkeepers in the country would rather be working with their hands than standing behind a counter or writing figures in a big book. With comparatively few exceptions, a boy's instinct is to use his hands rather than his brain. The chief reason why he changes as he grows older is because he thinks he will be more 'respectable' in a white-collar job.

"Thousands of men who hold such jobs are never so happy as when they are painting the kitchen floor, building a garage in the back yard, tinkering with the electric bell, or working in the garden. That's a fact and everybody knows it.

"But that isn't the whole story. Suppose a man's chief concern is the money he gets for his work. Well, in these days the skilled workman is better paid than most of the salaried white-collar class.

"For example, I work five days a week, seven hours a day, and earn seventy dollars. If I would work overtime, I could earn a great deal more, for we receive time-and-a-half pay between certain morning and evening hours, and double pay for night and Sunday work.

"But I won't work overtime. I care more about my health than I do about the extra money. I have seen too many warning examples. One of my friends worked overtime on a job all day Saturday, all that night, and all through Sunday and Sunday night. He earned several hundred dollars. But on Monday morning he came to the job dull and fagged. It didn't pay. Inside of two weeks he fell ill. After a time he recovered and came back to work. A little later he was taken ill again. And that time, because he was too worked out to make a fight, he died.

"I have had only one illness in over forty years. That was three years ago when I had a long siege with influenza. First my son had it—and died. On the day he was to be buried, I came down with it. For two weeks I was unconscious of what was happening around me.

"When I came to myself, I found that my family had been almost wiped out. My son, my wife, my oldest daughter—all were gone. Only one daughter was left. She, with her husband and little girl, lives with me now.

"I was five months getting over that illness. But if I hadn't been the sound, healthy man I was, I *never* would have got over it. And if I hadn't been industrious and thrifty, with money put by for just such emergencies, I should have come out of it with a load of debts which would have kept me half sick with worry."

"You seem to have ordered your life according to a definite plan," I said.

"Well—" he hesitated, "I never thought of it that way. But I've always known what I wanted. Perhaps that's the same thing."

"DID you want to be a plasterer?" I asked.

"Yes!" he replied; and this time there was no hesitation.

"I was born and bred to the job," he went on. "For three generations—perhaps longer; I don't know about that—my people had done that kind of work.

"When I was a child my father left Wales for a time and we lived in England. One job on which he was employed was the building of a row of cottages at Crewe. I was only eight years old then. But after school and in the evening I worked beside my father, putting on the laths—as far up as I could reach.

"You can't do a good job of plastering unless all the work that has gone before it has been well done. From the foundations to the roof, everything must be right. If the foundations are not solid, if the walls are not weatherproof, if the roof leaks, if the lathing is imperfect, sooner or later the plaster will tell the story. So the plasterer is concerned about the quality of other men's work as well as his own. That makes his job harder. But it also makes it more interesting.

"Until I was eleven years old I went to school, working with my father at odd times. Then I left school and worked every day. We went back to Holywell and I lived there until I was eighteen years old. I liked my work and could do it as well as any man in all the country around. I was happy and healthy. I didn't smoke or drink. I never have touched tobacco or liquor.

"I hadn't much education. Never have cared for books. But I had something besides work to interest me. As you probably know, the Welsh are keen about music, especially about singing. I learned to read music and found more pleasure in it that in reading books.

"In my opinion, I hit upon one of the secrets of a happy life. I had work to do and I took pride in doing it well. But music gave me another outlet and a totally different one.

"Before my illness, I was for years the tenor soloist in (*Continued on page 155*)

A rare old photograph of frontier days, showing Captain John R. Hughes (on chair) with his company of Texas Rangers and a Mexican bandit. (Below) Captain James B. Gillett, of Marfa, Texas, as he looks to-day

PHOTOGRAPH BY W. D. SMITHERS, SAN ANTONIO, TEXAS

Quick On The Draw!

Captain "Jim" Gillett, Texas Ranger, city marshal, and cattle ranchman, knew the frontier in the days when "shooting irons" were the court of first and last resort—His adventures in helping to tame the wild Indians, and the wilder white men who had "gone bad"

By George W. Gray

YOU have read of the "two-gun man" of the West, the shooter who is not content with one pistol but who pulls two, and with deadly accuracy fires both at once? He has been the hero of many a Wild-West thriller. But did you ever actually see one of these double-triggered boys?

Captain James B. Gillett, of Texas, says *he* never saw one. And I don't know a man who has had more experience with gun fighters than this soft-spoken border ranchman. He is famous throughout the Southwest as a frontiersman and peace officer. Adjutant General King, of Texas, used to introduce him as "Jim Gillett, the best shot in the world."

"No, sir," said Gillett, as we were sitting talking together in a Mexican restaurant in San Antonio, "I never saw anybody fire two guns at once in serious fighting; and I don't believe many of the so-called 'two-gun men' ever existed. I've heard that Wild Bill Hickok could shoot two guns at the same time, but I never saw him do it. I wouldn't think of attempting it."

"Did you carry two guns?" I asked.

"When I was a Texas Ranger, and on horseback most of the time, I carried a rifle and a six-shooter. Later, as city marshal of El Paso, I wore two six-shooters, and I kept two sawed-off shotguns at strategic points in the town.

"I'll bet I've stopped a dozen killings in El Paso by presenting one of those

guns. I think Wells-Fargo Express guards originated this weapon. They found that when ten or twelve inches were sawed off the barrel, a shotgun would scatter buckshot over a wide area. Officers all along the frontier adopted it, and none of us ever found a more effective implement for stopping desperate men at close quarters."

"Could you hit a mark by firing from your hip?"

"No, sir," emphatically replied Captain Gillett. "A man might try that as a fancy trick; but when you get down to business, it is mighty important to aim at what you want to hit. In all my experience with both officers and desperadoes, I never saw a man shoot from the hip. All of them would pull the pistol, point it from the shoulder level and fire. There's a lot of stunt shooting that I never heard of until I read about it in story books.

"Shooting was serious business with us on the border, and there was no time for circus tricks. Ammunition was precious. I can't remember ever engaging in target practice. As a boy, I learned to shoot by hunting wild game, and as a Texas Ranger at the age of eighteen years, I continued my education by hunting bad Indians and outlaws.

"EVERY man carried a gun on the border, the bad men as part of their business equipment; the honest men as protection against the bad ones. Those fractious fellows who infested the saloons, camps, bosques, plains, and mountains of western Texas could pick a quarrel for precious little cause and on mighty quick notice.

"I remember my first experience. I was a mere kid of a cowboy. The men of our outfit were eating around the camp fire when two of them got into an argument. Suddenly one of them pulled a pistol. There was a flashing of fire, and the other dropped, shot through the heart. I was so close to this fracas that my right shoulder was powder-burned.

"It was said that John Wesley Hardin, the preacher's bad boy who went wrong and killed twenty-seven men, shot six of them because he objected to their snoring. But when I helped to escort Hardin to the penitentiary, he claimed that story was all wrong. He said that he had killed only one man for snoring. Hardin's brother was shot down because he was brother to the outlaw, and not because of any crime he had committed. And eventually John Wesley Hardin himself, after being pardoned by the governor and released from prison, was shot down from behind.

"An attitude of absolute fearlessness, backed up by a gun and the ability to use it, was the officer's only hope in coping with desperate fellows. On one occasion, I was pursuing a much-wanted outlaw through the mesquite brush of Kimble County. Both of us were mounted and riding headlong through the scraggy timber. My face was bleeding from a dozen cuts inflicted by the sharp branches of the mesquite, but I was steadily gaining. The fugitive must have realized that soon I would be right at his back, for suddenly he reined his horse to a quick stop, leaped down and, shielding himself behind his mount, leveled his shotgun at me as he yelled with an oath, 'Stop, or I'll put a load of buckshot through you!'

"My horse was going at a dead run, and I could see the two holes of the outlaw's double-barrel shotgun growing bigger and bigger as I rushed toward them. Within twenty-five yards I stopped and jumped down, my rifle ready. But he was not willing to fight on such terms, and he broke from the cover of his horse and ran. I fired. The bullet grazed him so close that he ran back to the shelter of his horse. I was panting and excited from the long chase, and could scarcely draw a steady bead, but I had my rifle leveled, waiting—when another Ranger galloped up, and, outnumbered, the outlaw surrendered.

"If I had flinched when he ordered me to stop, that fellow would surely have let me have both barrels of his gun. He was under indictment for assault to kill, and he was notorious in the community as a shooting man."

"I suppose there is a certain unnerving effect in being chased," I remarked, "especially in being chased by an expert marksman. Did you ever have that experience, Captain?" I asked.

"Well," said the Ranger, "I know what it is to be chased by a mob. This was one of the most desperate and dangerous episodes of my life. It happened later, during my service under Captain G. W. Baylor, on the Rio Grande border.

"The experience had its origin in a Christmas festival held in the little Protestant church in Socorro, New Mexico, in 1881. The exercises were interrupted by a disturbance in the rear of the congregation. Mr. A. M. Conklin, editor of the Socorro 'Sun,' was in charge of the meeting, and when he went back to investigate he found that two young Mexicans were the disturbers. They boisterously dared Mr. Conklin to fight. He answered that there was nothing to fight about, that they were welcome to attend the meeting; but that they must behave. He made them take their muddy shoes down from the pew, and he cautioned them to keep quiet.

"A few minutes later the two Mexicans left the church, mumbling curses and abuse. They were brothers, Abran and Enofre Baca, and they were well known in the town. Abran was about twenty-five years old, and Enofre twenty-three.

"The exercises ended without further incident, and the meeting broke up. As Mr. Conklin passed out of the church with his wife on his arm, the two Baca brothers stepped out of the shadows. Abran grabbed Mrs. Conklin and jerked her to one side, while Enofre pressed his six-shooter against Mr. Conklin and fired. The editor tumbled off the church steps, dead. The Baca brothers scurried off into the darkness.

"This murder created great excitement, for its victim was one of the most popular men in the community. For weeks, scouting parties combed the whole territory in search of the murderers. The governor of New Mexico offered five hundred dollars for their capture, and the citizens of Socorro published that they would pay an additional five hundred dollars for the Baca brothers, dead or alive. When copies of these proclamations arrived in our Ranger camp, the captain passed them around, and each Ranger read them with close attention. In those days, one thousand dollars was a big reward.

"The murder occurred in December. Late in March, we arrested two suspects, and one of them proved to be Abran Baca. I took him to Socorro and delivered him to the authorities, and received one half of the reward.

"THE Socorro authorities immediately began the prosecution of Abran Baca; but his family hired clever lawyers who got the case transferred to a distant county, where he was tried and acquitted. He immediately left New Mexico. The people of Socorro felt outraged by this acquittal, and it made them all the more determined to see that the other brother got a punishment appropriate to his crime.

"Along in May, little more than a month after my return from Socorro, I met a friend who was just in from Mexico. He said there was a young man in the little town of Saragosa who fitted the description of Enofre Baca. I told him I would give him twenty-five dollars if he would visit Saragosa and make sure that the man was Baca. A few days later, he was back with the definite information that the man was Enofre Baca, and that he was employed as sales clerk in a store. He gave me a full description of the store.

"I now began to figure how I could get Enofre Baca. I feared that it would be useless to make formal complaint to the local authorities in Saragosa. During a previous experience, with a Mexican murderer who had taken refuge in Mexico, the authorities had let my prisoner escape. I didn't want to give Baca that chance.

"The more I thought about it, the more strongly I felt that the only way was to go there unawares, simply take the man quickly, put him on a horse, and race to the border and across to the United States. I knew that the commander of my Ranger company, Captain Baylor, would never agree to such a program. Nevertheless, I decided to do it, and I began to lay out a definite plan.

"I knew that one man couldn't handle the situation, so I selected one of my comrades in the Ranger company, George Lloyd, to go along with me. He was a little fellow, but as fearless a man as ever I knew.

"We left our Ranger camp at seven A. M., crossed the Rio Grande at the ford, and immediately struck out into the bosque, or woods, for I didn't want to run the risk of meeting people on the public road. In this way, we got around on the west side of Saragosa and approached from the thick brush. It was after eight o'clock when we reached the front of the store.

"I jumped down from my horse. Lloyd, who remained mounted, caught my bridle and held old Dusty while I went into the store. This was according to our plan.

"Enofre Baca was at the counter measuring out a piece of cloth. His customer was a Mexican woman; there were two other women in the place. I walked up to Baca with (*Continued on page 165*)

Texas Rangers in the Big Bend country in the early days. "Absolute fearlessness, backed up by a gun and the ability to use it, was the officer's only hope in dealing with desperate men," Captain Gillett says

I Feel As Young As I Ever Did

By Irving Bacheller

THERE is only one human being of whom I have definite knowledge—myself. I am to tell how it has come about that, at sixty-seven, I feel as young as I ever did. Indeed, I am younger than I was at twenty-one. I have not the solemn outlook, the burdened sense of responsibility, nor the all-embracing knowledge that I had then.

To-day, I have excellent health.

I possess a growing capacity for fun.

I have made considerable progress in learning how to live. I have no fear or worry.

I have become fairly well acquainted with myself. Better still, about half the time I am now happy in my own company.

I have found my way to the work I love, to many friends, and to more than my legitimate share of peace and happiness.

Forty-five years ago, I had nothing like the measure of good things which I now enjoy. My life began in a rather stern period of our history and among people who had known the hardships of pioneering. Only thirteen years before I saw the light, anesthesia had just come into use.

In the land of my birth, fun was unpopular, save with the very young. A friend of mine tells this little story of his boyhood on a farm in northern New York: Another young lad had come to visit him. They played croquet in thick, heavy grass. They threw stones at a mark. It was poor amusement. They went to my friend's father, begging him for advice on the general subject of having fun. The man gave a moment of thoughtful consideration to the matter.

"Well, boys," he said, "if I was you, I'd see which can weed a row of onions the quickest. When you've done that, I'll try to think o' suthin' else."

Sunday leisure was the only kind we knew. It was a sad and lonely leisure. What a stropping of razors in the morning stillness! Later, what a snoring of weary men! It was a funless, dreadful day. Sometimes we washed up and went in tight boots to meeting at the schoolhouse. And we usually came home with head and feet aching.

You can readily see that my talent for fun was not impaired by over-exercise. It was perhaps fortunate, for nowadays I see young people who at thirty seem to have worn out their capacity for innocent fun.

I have spoken of my rather solemn spirit at twenty-one. Some of it came of this somber background. In part, it was an inheritance—a shadow of the near past. Poverty, Disease, Pain, and Decay had been like robber barons preying on the human caravans for ages. They worked night and day, seizing whom they could, and now and then stampeding great detachments into the valley of the shadow of death. They robbed men of cheerfulness and comfort, with every kind of torment they were able to contrive. The multitude limped along with many afflictions, and its spirit was well voiced by the mournful poetry of Isaac Watts. In my youth four beloved members of my family died of ills that are now curable.

To me, this was a sad world—a vale of tears. Indeed, mine was almost a joyless youth. I was not robust. My best fun was fishing with an alder pole in the brook after I had done my stint in the woodshed. At thirteen, I went to learn the "mercantile business" in a country store, sweeping and scrubbing and selling kerosene and tea and crackers—chiefly kerosene—and telegraphing with the old key and register. I worked for kindly, good people; but I was homesick and unhappy. Life began to look rather hard and stern to me, and to smell of kerosene. I had a right to my solemn feelings.

AS TO my sense of responsibility and vast knowledge, I was like most young men of my time. Our knowledge was free from doubt or hesitation. We thought that we knew the remedy for all the troubles of men and, therefore, we felt a strong sense of responsibility. We did not realize that the most abundant thing in the world is not knowledge but ignorance. Fortunately, I soon found out that I had rather more than my share of this general stock of ignorance. I now know that no man can have enough learning to make a sure foundation for conceit. But before I made this discovery I had already acquired my share of this undesirable quality.

The age of invention had begun. The scientists were astir. They were the prophets of a new faith. It was faith in the truth of God as revealed by science. The wealth of the human family was incredibly increased and distributed. The hours and severity of its toil diminished.

The world began to cheer up. And, along with a lot of other folks, I began to cheer up too.

At this time there were two differing fellows under my vest. One personality was serious-minded, even shadowed with melancholy. He was inclined toward religion. The other fellow was merry-hearted, optimistic, even a bit reckless. In certain crises, the latter dominated the situation. He had a strong will. He could fling worry to the winds. So it came about that events which appalled certain of my friends only made me laugh. What was trouble to most boys was fun for me. Was it because I had become acquainted with troubles, so that I could correctly estimate their relative importance?

I HAVE never forgotten the death of our beautiful white mare. She was a fast trotter, and a showy, proud, high-headed creature. My mother and the children wept. My father said:

"Save your tears for some event more worthy of them."

Often I have thought of those words when my eyes were growing moist.

I remember, after spending a few careless holiday weeks with a young friend in a Vermont hotel, my pal summoned me to a conference in our room. He was in a most serious frame of mind. The hotel keeper was insisting upon the payment of our bill. We had to borrow the money from a relative.

After settling with the innkeeper, we took an inventory, and found that we had scarcely enough cash to take us back home. The solemn look in my friend's face amused me. I lay back on the bed and roared with laughter. My subliminal self has ever had this method of appraising events which look unduly serious to other people. I remember that my friend laughed with (*Continued on page 137*)

Education is Dangerous Unless You Know What *Not* To Do With It

"THE danger of a *little* learning is amusingly illustrated by the story of a neighbor of mine who had an educated dog," relates Mr. Bacheller. "My neighbor said: 'I had taught this dog to find things I had hidden. One day I tied a fuse to a stick of dynamite and shoved the thing under a stump I wanted to blow out. I lighted the fuse, and ran. Suddenly I saw the dog running at my side with the stick of dynamite in his mouth, the fuse trailing and sputtering behind him. He seemed to be saying, kind o' conceited: "See how smart I am!" I tried to grab the fuse and smother it, but he dodged. I didn't have no time to argue with him so I just run. He kep' close to me. I clim a tree an' done it supple—and saved my life, and I've always thanked God that dogs can't climb. I tell ye, an education is a bad thing unless you know what *not* to do with it and when not to use it.'"

I'm A Regular Old Omens' Home

By H. I. Phillips

NO REALLY intelligent, perfectly balanced person, according to the experts in such things, is superstitious. Which, if true, puts me in the unintelligent, unbalanced, half-baked class in this, the very first paragraph.

For I am superstitious. In fact, in certain cases I am super-superstitious. I believe in signs. I'm a wonderful host to omens. I never snubbed a portent in my life. I am a hail fellow well met when it comes to meeting auguries, auspices, harbingers, et cetera and et cetera. Nearly any old, worn, feeble superstition that has been left out in the cold by a fickle public can come in and have a nice comfortable home with me. I am a kind of Old Omens' Home.

Of course it has its drawbacks. Even a few superstitions cramp one's style considerably. When you have as many as I have, they become positively uncomfortable at times; but I am not complaining. I wouldn't be without them for anything.

How I got that way is something I can't explain. I began with one superstition, and worked up to one of the finest collections in the land. This first superstition, I remember distinctly, came to me when I was about seven or eight years old, in the form of a rhyme quoted by a boy a few years older. We were walking through a street paved with the old-fashioned huge, square flagstones when this boy cautioned me never to step on the cracks. As he put it:

> If you step upon a crack
> You will break your mother's back.

That struck me as a rather horrifying suggestion, and I thereafter stepped over all sidewalk cracks as if my reputation as a dutiful and not inconsiderate son depended upon it. The impression left by that omen left me wide open to attack.

MY PARENTS were but mildly superstitious. They believed in a good many old-fashioned weather portents, such as "Rain before seven; clear before 'leven," and "Curdled sky never leaves the ground dry," but the atmosphere in my home was far from a superstitious one. I had a grandmother who used to interpret events from the formation of the leaves at the bottom of a cup of tea, and another who thought there were some peculiarly medicinal properties in a handful of April snow.

But my own superstition complex must go back beyond even their time. I had some ancestors among the first Massachusetts colonists up around Salem. Those Massachusetts colonists were a superstitious lot, particularly the Salem ones, and I have a hunch some of my forefathers may have been among those who fell hardest for the witch delusion and the evil-eye talk. If so, my susceptibility to superstitions may come from them, F. O. B., Salem, as it were. Even to-day a little evil-eye gossip would go a long way with me, if I had just been through a spell of particularly hard luck.

Welcome, one and all!

The belief that evil can be averted by crossing the fingers, and that it is bad luck to walk under a ladder, I heard as a very small boy; and, looking back, it seems to me my early boyhood playmates had more than a reasonable quota of superstitions. The horseshoe omen was then the outstanding one in this country and, as horseshoes were in those days plentiful, I saw to it that I had a big collection. My understanding of it was that there was a year's good luck to be counted on for every nail in the shoe; and I am quite certain that by the time I was twelve years old I had carted home enough horseshoes and nails to take care of me for a century or so.

I never questioned the authenticity of omens. They seemed good things to have around, and I just appropriated them on their face value, no questions asked.

I still believe black cats bring good luck, despite the fact that a lot of people regard them as omens of evil. A black cat, or even one that is swarthy, crossing my path, following me on the street or straying into my home or office, gives me just as much kick as it ever did. I have four black cats on my desk before me now as I write. They are not live black cats, of course; although I would not object to live ones if I had them. Two of them are wooden, one is tin, and one is upholstered with real hair.

"If you really believe a black cat brings luck, why don't you depend on one instead of a whole zoo?" you ask. Well, they were given me by relatives and friends who knew of my regard for them, and I believe them potent in the order of precedence. The oldest I have had ten years, and it is getting feeble, and suffering from wear and tear. One eye has a tendency to drop out every now and then, and the head gets loose. I regard a black cat with one eye out or with a loose head as losing much of its effectiveness, and never fail to replace the eye and to strengthen the neck immediately. It is getting to be quite a care in its old age, but it can have anything it wants.

OF COURSE I don't expect too much from them. Despite the fact that my desk is guarded by four of them, disagreeable letters find their way to it, my typewriter gets all out of kilter at critical moments, communications and notes get mislaid, and recently a ten-dollar bill disappeared from an envelope in a top drawer. Not even a black cat can take care of everything. But the four of them do very well.

My solicitude for them when we move from one home to another is extreme. I place them in a box very carefully and hand it to the most gentle-looking of the moving men, with these words: "This is a very valuable package. Break a few chairs if you must, bust a barrel or two of dishes if it is necessary, tear a leg off the $3,800 player piano, if you feel the urge, but guard this as you would your life."

I am not partial to rabbits' feet. People who have tried them tell me they are very good; but I began with black cats and see no reason to shift to rabbits. Cats and rabbits don't get on well together,

STATE UNIVERSITY SYSTEM OF FLORIDA

anyway. At times I have carried lucky pennies and charms, and as a boy I toted around in my hip pocket a horse chestnut, on a neighborhood gardener's story that it would keep away rheumatism, rickets, whooping cough, mumps, or, what have you?

ONCE, on a trip to Bermuda, I wore a small pouch of salt suspended from a string around my neck, on a friend's recommendation that it would ward off seasickness. I didn't happen to be seasick on the outward voyage, and just before the homeward trip I recommended the idea to an elderly gentleman who seemed deathly afraid of the sea. On the second day out I came upon him, prostrate in a steamer chair, wrapped in blankets, and looking very wan.

"How do you feel?" I asked.

"Terrible," he said, and then, very sheepishly, "Say, don't say anything to my wife about my wearing that salt bag. She'd never stop makin' fun of me about it."

That man didn't believe whole-heartedly in his charm in the first place, or he wouldn't have been so ashamed. You can't expect any charm to give you a square deal if you're giving it only fifty per cent support.

One superstition I am very serious about is the one that decrees it bad luck to walk under a ladder. I'm not exactly afraid to walk under a ladder; I'm not absolutely convinced a major calamity would happen if I walked under it, or slept under it for that matter; but I do feel that, in view of the widespread feeling about the matter it is just as well to walk around it.

Frankly, I want the omens on my side, whether they're weak or strong. Very silly, you say? Probably so, and all very well. You walk under the ladders, and I'll walk around them. I feel better about it. And there are days in my walks around New York when it seems to me somebody is using a ladder in front of ninety per cent of the buildings. I always walk around them, and I notice that I have lots of company in my detours.

The author whistles in a dressing-room

A few months ago, after an outing on an island in Long Island Sound, I sat with some friends in the rathskeller of a Connecticut restaurant for a luncheon. Two stairways led from the entrance to the street, one going to the right and one to the left. As we started out of the rathskeller I saw a ladder across the steps to the right with a man at work on it. One member of the party, a well-known Connecticut editor and politician, noticed this, and said, "You fellows don't mean to tell me you're superstitious about walking under a ladder!"

"We certainly are," was the answer.

"Well, you poor saps!" he replied.

Whereupon he took three steps up the stairs toward the ladder, and then, thinking better of it, made an about-face and came up with the rest of us.

"Oh, well," he said; "in case there is anything to it, I might as well play safe."

I have a friend who is a New York magazine editor, and who always walked under ladders up to a few years ago. Now he makes it a point to walk around them, and far around them, too. His reform took place in Baltimore on the way to a wedding. It was in the winter, and he had left the Belvedere Hotel in that city, wearing a new chinchilla overcoat and what is known as a hard hat. Not far from the hotel he noticed an extension ladder against a building and stretching over the sidewalk. My friend was not superstitious. He walked boldly under the ladder, and, as he did so, something hit the sidewalk at his feet, and he found himself in a geyser of white paint. A painter had chosen that moment to drop his bucket.

MY FRIEND jumped to one side and looked down on his nifty chinchilla garment. At the bottom it looked like good polar bear. Around the belt line it resembled spotted deer. From there up it was imitation civet cat. His hat was not without its white splotches. Hurling a few remarks at the painter, he hurried back to the Belvedere and appealed to the valet to put him in such shape that he might go to the wedding and not be mistaken for a cover design for Whittier's "Snowbound."

"All I can do is to soak it in gasolene," said the valet.

"Soak it in anything," ordered my friend, "anything but white paint!"

A gasolene bath did remove the paint; but it didn't improve the coat much, and he arrived at the church for the wedding

"Scotch

A story you

By Mil-

Bertha was staring beyond him at the door. Rigid, white as a ghost,

WITHOUT waiting to determine whether Pelgram was armed, Gladden lashed out at him. Anger made him reckless; hate made him blind.

He felt his knuckles sink into the fleshy neck, strike hard against the rigid jaw. Pelgram's face, bloated and splotched with rage, loomed in Gladden's vision. He struck and struck at it, tracking a red smear down from the mouth.

He heard himself sobbing in a strange voice, but he felt nothing. There was a salt taste on his lips. He sagged to his knees, without breath, sprang back like a spring and hammered at the swollen mask, the dark, evil eyes that remained, in that bloody struggle, fixed and malicious, cunning and triumphant.

Gladden tried to blot them out. He caught the rancher by the cloth of his shirt, jerked him forward and butted at him with his own head, skull against skull. The light in the hallway swung in a long arc. Gladden discovered himself standing on his head, grabbing Pelgram by the legs. He pulled hard and threw him to the floor.

They rolled across the porch, thrashed and grunted on the edge, bumped down the steps into the gravel. Gladden had forgotten any good reason he might have had for protecting himself. His wet face and sticky hands did not frighten him. He kept at the job of blotting out Pelgram's eyes, until a dull blow just under his left arm paralyzed him. He felt faint. He saw Pelgram getting slowly to his feet.

"There. That'll fix you!"

Then the light snapped out.

A useless reiteration. He woke to this bitter realization in his own bed. He heard the doctor, he judged it was the doctor, say, "I've got it. Missed the heart! He's lucky!"

What had missed his heart? Certainly not the farcical futility of his struggle. A bullet, a mere matter of lead and impact, is incapable of inflicting a wound equal to the awareness of failure.

He slept, however, when he was told to sleep, and woke again to lamplight, to Bertha, watching him, to an even worse calamity. For he saw, at once, that there was something behind Bertha's eyes which had not been there before. He remembered Mrs. Pelgram, running down the road in the dark. Rather than face the thing she had done, he fainted away.

"You lost a lot of blood," he heard Olive say. "But you're going to be all right."

This third awakening was tranquil and clear. He became conscious of bandages, of a neat round pain under his arm. "I remember," he said; "I had a pain just like that when a piece of shrapnel hit me in the knee. Only it was a triangular pain. This one is cold. Shrapnel's hot."

"You lie still," Olive said.

"I'm perfectly lucid. What happened?"

"You were shot."

"Was it a long time ago?"

"Last night. Sleep if you can."

He could. He felt her hand, cool and firm, pressing him down into sleep, down and down. A long blank broke into light

Valley"

will never forget

dred Cram

and he floated back to his responsibilities, the interrupted need to take part in the wildly uproarious, complicated farce that life is. Olive had gone. In her place, serious and sympathetic, Hansen.

"I'm afraid it was my fault. I'm sorry. He very nearly killed you. The worst of it is, we can't punish him. You fired four times to his once."

"Out in the canyon! And over his head!"

Hansen smiled. "So I supposed. But you had no witnesses. Pelgram's crowd will all swear to the same thing. You'd better keep still."

"Then I'm licked?"

"Not exactly. I've heard rumors that Beale's crowd intends to start work at once. And Calabri's rebuilding the line."

"Already?"

"You've been unconscious for more than a week."

"Holy smokes! I can't afford to be unconscious. There's so much to do."

WHEN he moved, the pain went through him like forked lightning.

"Stay where you are. I'll come out every day. Olive Smith and her mother are here now. Bertha's staying home from school." Hansen hesitated. "A fine kid, Bertha. I'd talk to her, if I were you."

"About what?"

"She's not happy." Hansen rose, sighing, his fat sigh of frustration. "Not quite happy—women—we don't realize—"

"What on earth are you driving at?"

Hansen offered his hand. "Good-by. Take care of yourself."

"But what do you mean?"

Hansen shook his head. "There aren't words for it. I'm sorry if I blundered. Good-by again."

Gladden lay where he was, alone, trying to gather up the broken pieces. His pain was easy to understand: he could feel the path of the bullet where it had plowed down through the flesh, to emerge at the waist. It hurt, but not too much. Fainting was worse. Loss of consciousness was like drowning.

Gladden had always wanted to die wide awake and fighting, to go out shouting if not rejoicing. He hated mystery. Hansen had insinuated that Bertha was unhappy, and that there was something definite he could do about it.

Mrs. Pelgram, of course! Slow poison. The acid of insinuation, corroding the surface of a child's mind, scarring and defacing.

He tried to sit up, and called, "Bertha! Bertha! Come here!"

Olive answered.

She seemed older. Taller. He looked up at her with the questioning, defenseless expression of an unaccustomed invalid. It was like her to say nothing, neither to rally him nor to pity him. Her lovely eyes were kind and grave.

"Hello," Gladden said.

She sat down near him. "Bertha's not here. She's feeding the chickens. Can I do anything?"

It was on his tongue to say, "You can love me!" But he only shook his head. The idea of emotion frightened him.

"This is a mess," he said. "I ought to get up. How can I thank you?"

STATE UNIVERSITY SYSTEM OF FLORIDA

"I like you," she said. She propped her chin on her hand and regarded him steadily. "I like you, Jim Gladden!"

"But you don't love me."

She closed her eyes. She was so near that he could see the faint shiver that ran over her from head to foot, the sudden quickness of her breath, the tightening of her lips. She opened her eyes again. Very slowly, she leaned forward, slipped off the chair and knelt beside the bed.

She was strong and alive. Gladden's weakness defeated the need of the moment. He should have taken her in his arms. Instead, with an effort, he covered her hand with both of his. "You could love me, Olive?"

Then, suddenly, he thought of warning her. "Don't love me! I'm not ready. This is only a notion of mine. Because you are beautiful and brave."

She passed surely among his unspoken objections. Holding fast to his hand, she seemed to consider, to weigh, to balance love and friendship.

In that unreasonable, hushed moment, she was more precious to him than ever because she was unflinchingly honest. Her face was close to his; she was more real than himself; he could feel her breath, the dear warmth of her flesh. Alone in the ugly, bare room, they were silent, since there was no need to pretend or to argue. They looked love in the eyes. There was no desire, no pain; nothing but pity and truth.

Outside, the trees stirred; there was a chatter of birds, a gay, insistent, exciting confab; far off, the questing cry of a train.

GLADDEN and Olive sensed the divine certainty of love. For them? They trembled on the brink, breathless and silent. The listless dream mastered them. The weakness. The surrender. A tide rising. A moment, already changing, that might never come again.

Gladden thought, "I love her!"

Olive's head drooped forward. She whispered, "I don't know, Jim!"

So it was lost. On the turn of a word. An impulse, hesitant and reasonable, where there should have been ecstasy and recklessness.

"I don't know, Jim. I like you. But love—" She bent quickly and kissed the back of his hand. "I'm sorry! Can't we go on, just as we were?"

"We can, of course!"

They smiled. Tears welled across the bright question in her eyes. Love doesn't always come when it is called; it is an informal and haphazard visitor. Olive knew this. She admitted failure where another woman might have experimented with a substitute.

"I'm sorry," she said. "It would have been nice!"

"Let's try," he said quickly.

She shook her head. Briefly, lightly, she touched his hair.

"It isn't done that way!" she said. "We can be friends—that's all. We don't love. Not really."

And Gladden knew that she knew.

When he began to move about again, the holidays were long over. February was already turning the leaves of the almanac-calendar on the kitchen wall.

The world he returned to was different. The hills were green. Poppies, whole fields of them, had the metallic brilliance of copper. Mustard flung down carpets of yellow in every orchard and the ditches were bright with lupine, Indian paintbrush and flowering weeds.

A warm sun after many weeks of rain tempted the fruit trees. Blossoms, like wax, burst along the bare stems. A cleaner, bluer sky, a blacker earth, air sweeter and more keen, so still that sound carried great distances. The tapping of hammers, the barking of farm dogs, the clatter of tractors, and the high, shrill voices of children. The earth had come to life.

Gladden responded with the eagerness of the convalescent; his weakness admitted impressions, reactions, that health and activity shut out from consciousness. He found life as new and as naked as birth itself. He was shaken by the privilege of being alive. He was mentally an adventurer, physically a sluggard. He liked to sit in the sun, testing his capacity for happiness.

But this could not last forever. Calabri had had to stop the work for lack of funds. There was plowing to be done. Tuerta, fat and lazy, watched the comings and goings of strange men in her pasture. Oil! Oil! Oil!

They bridged the ford, and for the first time Gladden was able to drive across. A muddy road scarred the hill almost to its summit, while heavy trucks lumbered upward with material. Before many days, Beale reported, the noisy business of erecting the derrick would begin.

He brought with him groups of preoccupied oil men, who paid no attention to Gladden or to the farm; they discussed briefly the game and the stakes, departing, as they had come, in high-powered cars bearing city plates. Their presence, the concise importance of their speech, their absorption and indifference annoyed Gladden; he wanted them gone. He resented their air of proprietorship. After all, the land was not theirs.

At moments, he hoped they would be cheated, and that, having thrust their shaft into the secretive earth, they might fail to find the oil they hoped for. Again, for the sake of the children, he hoped for success. They could not expect a substantial fortune from a single well; but they might at least look for enough to placate the wolf at the door.

In this case, he would buy property farther down the Valley, since it was not part of his plan for them that they should live for long in the reek of petroleum. Fruit-growing was a healthier, saner business.

ALREADY Gladden had found property that appealed to him, a sheltered tract at the foot of Soledad, which Hansen thought might be available. A house could be built in a small grove of trees. There was a natural spring, rich soil. With Pete, Gladden climbed a fence to inspect the land. They sat on the crest of a low, round hill, thigh-deep in poppies, and built a house out of words.

They couldn't be bothered with details. The house just grew and grew, until it included a swimming pool, tennis courts, a fine garden and a gymnasium. Pete was excited. After every new flight of imagination, he would slap his knees and say, "Gosh!" in a tone of great reverence and surprise.

Gladden had to shake himself out of his lassitude. He postponed as long as he could thinking about Pelgram. When at last he brought his mind around to it—reminded by the sight of an ugly scar—he remembered Mrs. Pelgram's running down the road toward the ranch, and the look in Bertha's eyes.

The Bertha who had happened since his illness was new to him. She was trying to be everything she hated to be: she had turned domestic. She scrubbed and cooked and made beds, and went out to the barn to see the kittens only when she had finished tidying up the house. The kittens were almost cats now. They required more and more food. But Bertha accepted this, too, as inevitable, a part of her feminine need to serve.

GLADDEN suddenly realized that, whatever it was Mrs. Pelgram had said to her, he'd better not ask any questions. Yet the thing got under his skin, like a barb. It worked and bothered him, sleeping or waking. Finally, he said:

"Bertha, Mrs. Pelgram came here, the night I was shot, didn't she?"

"Yes. She did. I sent her away!"

Bertha looked at him, then looked away again. There was a flash of protest, a plea for mercy in her eyes. He saw with horror that she was blushing. It was the dark, painful flush of humiliation.

"What did she say to you? I have a right to know. If she made you unhappy, I'll—I'll—"

"I guess nobody can help being unhappy some of the time," Bertha said. "After you grow up, it's usual."

"It needn't be. Besides, you aren't grown up. What did she say?"

"Have I got to tell you?"

"Don't you want to tell me?"

"No."

"Well, I can guess."

She put out her hands. There was such a look of panic on her face that Gladden felt a pang of remorse. But he couldn't stop now, until he found out why Bertha had changed, why she ran away from him, why she tried so hard to please him, why she never went barefoot any more, or turned somersaults, or chinned herself in the orchard, or forgot to wash her neck, or to brush her hair.

"There are only three things she could have said to you. Either she told you that I am a fake and an impostor, or she told you that I tried to kill her husband, or she said that people were talking about your being here with me. On all counts, she lied. But if you believed her—if you *still* believe her—I'll go away. I'll *have* to go away, don't you see, if my being here makes you ashamed or unhappy."

For a long time Bertha was silent. Her back was turned. She stood by the kitchen sink, hands and arms immersed in hot suds. The suds crackled and bubbled, but she did not move. Her silence frightened Gladden into a burst of anger:

"So you believed her! You'd take her word against mine!"

"It isn't you," Bertha said in a dull voice. "It's everybody. She said—" Passionately, flaming, Bertha flung around to face Gladden. "Jim, it's not my fault! I didn't know! I don't want it so! But the girls at school. People. They talk. They laugh at me. Half the time, I don't know what they mean! But I know it's

omething ugly. And I feel ashamed. I lon't want to. I don't know why. But feel ashamed!"

Gladden stared at the floor. He found t impossible to speak. A chilling paralyis, something deadly and cold, clutched t his spirit. He saw now, how he had ailed. He had imagined himself in a leasant, a safe, Arcadia, removed from he clacking tongues of little, idle people. This clean land, this clean sky, this solation! Why did not the very fact of pace and sunlight purify, chasten, and estrain?

Well, by heaven, she should not know what they meant! Not if he could help it. There still remained his uncle Steven, a ready-made career, the transfer of his guardianship to Olive and her mother. . . . What was nobody's business had become everybody's business. Even Hansen had tried to warn him, had told him to talk to her.

How could he talk to her? What could he say? He had never admitted to himself that he might love this child. Now, lifting his eyes with a weight of pain and chagrin behind them, he looked at her.

For the first time he failed to see the child he had found that night on the dark, dusty road and had carried in his arms across the ford.

This was not a child. He noted with a deep sympathy the young curves of her body. How dear, how desirable, how mysterious she was! Why did her frailty and her resistance make his heart ache? He supposed that all men must at some time pity women for their very loveliness.

A strange mental up-tilt, a loss of equilibrium made him certain that the old Bertha was gone; this was a stranger.

He managed to smile at her with his best, most reassuring twinkle. At once she began to tremble.

"You made me tell you! Now you think I'm a fool!"

"No. I think (*Continued on page 141*)

INTERESTING PEOPLE

Herbert Ravenel Sass Was Twenty Years Storing Up Material for "War Drums"

Herbert Ravenel Sass and his family. This picture was made in the front yard of his home in Charleston, South Carolina. Mr. Sass was for years a newspaper man, before he became a well-known writer of fiction and magazine articles

THERE was a time when the buffalo ranged eastward from the great plains almost to the Atlantic coast, perhaps quite up to it; when panthers stalked their prey where the great cities of the East now stand; when deer by countless thousands grazed in the valleys where Eastern farmers now plow the fields; when sunrise along the Atlantic shores of America was heralded by the call of wild turkeys and of innumerable other birds. And then came the time when buckskin-clad hunters began to penetrate into the vast wilderness, when Spaniards plotted with Indians against the safety of the English settlers, and when pirates were common along the South Atlantic coast.

Those were days of startling adventure; of romance, of danger, and of intrigue; men and women. But of all the romances of that time, none is more amazing than the story of Alexander McGillivray, who ruled as prince of the Muskogee Confederacy, a great organization of Southern Indians. His father was Scotch; his mother was the daughter of a French captain and an Indian princess.

Perhaps you have never before heard of this Alexander McGillivray and his principality in the raw, new world that now is the oldest part of the United States; possibly you have given these early days of America but little study, even though the tales that are told of America's youth are among the most fascinating in all history. But in Charleston, South Carolina, there is a man who has lived, as literally as books could enable him to live, in the sunrise days of the New World. From the time he was a child, Herbert Ravenel Sass gloried in the exploits of the wilderness hunters, lost himself in the stirring fights with pirates along the Carolina coast and steeped himself in the history of Spanish plotting against English settlers.

"Some day," Sass promised himself, "some day I am going to write a book about those times, an adventurous romance about those people who knew America when I should like to have known it; and I shall put into that book, against the background of the marvelous wild life of the early days, wilderness hunters with their long rifles, Indians, pirates, Spanish plotters—and Alexander McGillivray!"

In "War Drums," a fiction romance of the early America wilderness, Mr. Sass has done just that. It is the stirring serial which begins in this issue of THE AMERICAN MAGAZINE. It is full of adventure, suspense, and romance; it has an historical background, but it is all fiction—except that Lachlan McDonald, the hero, is a character based upon the real Alexander McGillivray, or suggested by him. There are fights and flights and intrigues and escapes in this gripping romance, which is never dull.

Herbert Ravenel Sass was born in Charleston forty-three years ago. His father, George Herbert Sass, was a lawyer by profession, a public official by occupation, a poet and literary critic by preference. In the home where Herbert Sass grew up his father had accumulated a library of more than three thousand volumes. But young Mr. Sass, while an inveterate reader, as was his father, was also a boy who loved the woods.

"Almost from my earliest days," he says, "I had a passion for natural history—for the woods, the marshes, the beaches, the lore of birds and beasts. I have never yet passed up a chance for an outing in the wilds, and, thank heaven, the coast of South Carolina is still a place that abounds in wild life and wild places."

But Mr. Sass had a long apprenticeship to serve before he entered the field of creative writing and became nationally known as the author of short stories and articles that dealt, mainly, with wild life. For a time after his graduation from the College of Charleston, he worked in the Charleston Museum, and then for fifteen years on the "News and Courier" of that city, most of the time as assistant editor. His duties kept him fairly close to the office, for he was an editorial writer, but his love for the out-of-doors was fed by a column he conducted, called "Woods

Digitized by Google
Original from UNIVERSITY OF MICHIGAN
STATE UNIVERSITY SYSTEM OF

nd Waters." In this column all manner f anecdotes about wild life was printed.

"More than once," he says, "while I as pounding out an editorial I would lance out of the office window and see n eagle or a stately heron or a flock of reat wood ibises sailing over the house-ops of Charleston. Then I would long o be free of office duties. But all the ime I was storing up material in the ope that the day would come when I ould make a break and write the things wanted to write. Sometimes I would ome almost to the decision that I should strike out 'on my own,' but then I would remember that I had heavy responsibilities and no money, so I'd go on plugging at the job.

"Meanwhile, I had written a few things for national magazines. Then, one happy day, Charles Livingston Bull, the illustrator, came to Charleston and we roamed about together in the woods near by. He urged me to turn free-lance writer. And the words of daring he said to me would not get out of my consciousness. For a time I compromised by getting up before dawn and writing on my own stuff, then going to the office. Bull repeated again and again his assurance that I could make good. So, finally, I took the plunge."

From the start, the stories Mr. Sass wrote were successful. Within two years the biggest magazines were seeking his work. Short stories and articles by the dozen built up his reputation, and then he tackled that novel he had promised himself to write. "War Drums" is the result. Into this romance he has put his best writing, and the accumulated enthusiasm, knowledge, and imagery of half a lifetime. JAMES C. DERIEUX

Louis Dorn Knows Ten Thousand People and Can Call Them All by Name

HE WAS of medium build, square-shouldered, and bronzed by the wind and sun. The years and hardship had put lines in his face and had urned his hair to gray. He had been in outh Africa, and had not set foot on merican soil for twenty-five years. Africa nd time had so changed him that even is own family had not known him.

He sauntered unobtrusively into the eception-room of the White Company's ig motor-truck plant in Cleveland. The enches were filled with waiting men. Dorn, the reception clerk, was jumping om telephone to desk, from desk to telehone, with a dozen duties on his hands at nce. The man from South Africa stepped onfidently up to Dorn's window.

"Hello, Louie," he said, and thrust out browned hand. "Here is one face you've orgotten."

Louis C. Dorn looked up. For half a inute he scanned the stranger's face, and en his hand closed heartily over the exended brown one. He repeated the ther's name.

"You win!" grinned the visitor. How did you ever recognize me, hanged as I am, after twenty-five ears?"

"Louie" Dorn is reputed to know en thousand faces and to be able to ecall the names and businesses of eir owners. Dorn is said never to orget a name or a face among the undreds who deal with his desk every ay.

For an hour, not long ago, I sat ear Dorn's desk in the White Company's reception-room over which he as presided for fourteen years. The tream of men was constant. Many f the callers, I learned, visited the ompany no more than once or twice year. One man had been there but nce before, four or five years preiously. Dorn had seen him at that ime less than five minutes. Yet this an, and every other who came hrough that door, was greeted by ame. Dorn also recalled the salesen's companies' names, the product hey sold, and the purchasing agent hey desired to see. Not once was he rong.

"What is the secret of it?" I asked im.

Mr. Dorn, who is fifty-three, setled back in his chair to explain. Anyody, he insisted, can have a good memory, provided he is willing to train it.

"One of my first jobs," related Mr. Dorn, "was in a retail shoe store here in Cleveland. I fitted shoes on a good many strange feet in a day. Customers came and went, but I didn't know them.

"One day I went out and bought a ledger. After I had waited on a customer, I put down his name in my book, the size and style shoe he had bought, the price he had paid, and anything else worthy of note. I promised myself to recognize that man the next time he came in, and to insure my doing this I took a careful look at him. The first customer, I noticed, wore an odd-looking watch charm. Six months later when he came in again his face puzzled me, but I recalled him at once by that charm.

"Thereafter I tried to remember the peculiarities of people, and by associating the peculiarity with the name the moment I detected it again, I was given a clue to the name; the name, in turn, suggested facts previously set down in my book and which I had taken care to memorize.

"I did this for seventeen years. It was difficult at first. Gradually it became easier. My eye, trained to detect individualities, got so it caught them at a glance. Constant memorizing made me less and less dependent on my ledger, until finally I did without it altogether.

"There was one man who, years ago, was given to wearing very fancy striped and flowered vests. Then he got married and I didn't see him for a number of years, during which time his wife cured him of his taste for fancy attire. He showed up again as soberly dressed as a minister, but his face suggested the bygone vests, and from vests I recalled who he was.

"It may be only an odd way of pronouncing a word, or an odd droop of a shoulder, or a way of walking, yet all of us have these peculiarities that make us individuals. Take the pains to hunt them out and you won't easily forget a man thereafter."

A visitor whose business is of little im-

Louis C. Dorn has been reception clerk at the White Motor Truck Plant in Cleveland, Ohio, for fourteen years. In that time, he has remembered the name and business of everyone who ever entered the reception-room

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

portance also may be readily discovered, said Mr. Dorn, and he explained:

"He will evade telling you his business, for fear his man will refuse to see him.

"The experienced man, and the man who believes in his product or proposition, will unhesitatingly state his name, his business, and whom he wishes to see.

"While the stranger is doing this, and later waiting on a nearby chair, I size him up. Perhaps it will take a talk with him to bring out an identifying mark, but always I can find one.

An officer of the White Company, who was a shoe-store customer of Dorn's, recognized his particular ability and had him established in the White Company's reception-room fourteen years ago. In addition to handling all visitors to the plant, Dorn serves as a passenger transportation agent, in which capacity he expends yearly for railroad tickets and the like more than $100,000.

WILLIAM S. DUTTON

She Makes Cincinnati's Women Visitors Feel at Home

DURING the past six years Miss Amy Virginia Pace, of Cincinnati, has been hostess probably to more guests than any other woman in America. She has helped to entertain, as the official hostess of the Cincinnati Chamber of Commerce, approximately 700,000 people.

She is young and slender, with bobbed brown hair and dancing eyes. Miss Pace was only nineteen when she became Cincinnati's hostess, which means she is only twenty-five to-day. Cincinnati claims for her the distinction of having been the first and the youngest city hostess in the country.

After finishing high school, Miss Pace took a stenographic course in a business college and went out to search for work. The Convention Bureau of the Chamber of Commerce just at that time happened to be overwhelmed with work. The manager, Thomas Quinlan, told Miss Pace that he would be able to employ her for a week or two, but somehow that young lady discovered so much undone work and so appropriated it to herself that she became indispensable. She was always on hand and available in emergencies.

One of these emergencies arose when a convention of railway bridge builders was scheduled for Cincinnati. Among the visitors were several hundred ladies. The bureau manager looked about in desperation; and there, ready for orders as usual, was Miss Pace.

"Jump in," the manager directed, "and see what you can do with this convention. We can take care of the men. I'm going to leave the women to you."

Miss Pace had never attended a convention. Furthermore, she knew that conventions were important to Cincinnati. The delegates spent several millions of dollars yearly in the city. If these ladies were given a poor impression of the city, other conventions might be lost.

"I was frightened," confessed Miss Pace, "until I sat down to think. I reasoned that these visiting women would like to do about the same things I would like to do in a strange city. They would want to see what we had that was interesting, visit our stores, and go to our best show. I decided to treat them exactly as if they were friends from another place coming to visit me."

So Miss Pace met her visitors at the station. The first afternoon she had them as her guests at a card party where, over the little tables, they soon became acquainted.

Once acquainted, the personal contacts helped to weld the party together.

PHOTOGRAPH FROM J. R. SCHMIDT, CINCINNATI, OHIO

Miss Amy Virginia Pace is the official hostess for the Cincinnati Chamber of Commerce, in which capacity she has entertained 700,000 wives of men attending conventions there

"I engaged special street cars," she explained, "so my party would not be broken up unnecessarily. I showed them through stores by starting on the top floor and going down in order. At the Zoo, when it was time to leave, I blew a whistle, to summon my guests. Last of all we had the theatre party."

The manager of the convention bureau kept vowing that he would have to engage a hostess regularly to entertain women visitors. He envisaged for this duty a woman much older than Miss Pace, with a much wider social experience and an imposing carriage.

"I'll look around," he told her, "until I get somebody to act as hostess. I know it takes your holidays and evenings, but it's only temporary and I know you won't mind helping out."

Miss Pace did not mind. In fact, she enjoyed her work. Her ingenuity, tact, and charm were given free expression.

And with every convention she won new friends and the Chamber of Commerce was congratulated anew on its choice of a hostess. The convention bureau manager suddenly ceased to look for a hostess. To clinch the decision, he made Miss Pace the assistant manager of the bureau.

Since then Miss Pace has handled several hundred conventions. Some of them have been as small as 25 delegates; a few have been as large as 30,000. She has entertained single parties of as many as 500 women at once.

Vacations she has given to perfecting herself in knowledge of the cities and sections from which her guests are drawn. Visitors spoke of their home towns, so she went to these towns. "It delights a visitor," she said, "when I have knowledge of her own city.

"The most frequent question I'm asked," she said, "is 'How large is Cincinnati?' The next thing is a comparison of Cincinnati with *their* city.

"Point out a public building, and unless it cost more than a similar building at home, the visitor is not greatly impressed. But when it comes to homes the reverse is true. 'You pay $40,000 for such a house here?' they say. 'Why, in our town you could buy finer than that for $20,000!'

"My funniest experience, I think, was furnished by a nice plump Western lady who had been close to my side for three days. All of this time, while listening to me talk, she had seemed literally to devour every word I said. We were returning to the hotel on the last day when she spoke for the very first time.

"'What *is* the name of this town?' she asked. 'Cincinnati, you say? My stars! Here I thought all along I was in Cleveland!'"

War Drums

(*Continued from page 11*)

ıstody of Mistress Wilkinson, just two ıys after you rode to Willtown. On the ıme ship came Mr. Richard Barradell, Hampshire and London, whom you ıiscall a popinjay. He is not the lady's ver, and he returns to England on the Queen Bess' to-morrow, so you can disıiss him from your mind. So far, she as remained in Stanwicke's town house, nd all Charles Town is agog with her eauty. But she goes to Stanwicke Hall ıortly."

"That's better," said Lachlan. "We re getting the story now. And your ardon, old friend, for my jest about the le. You will tell me of this lady for iendship's sake, and because of the days e've spent together."

Momentarily the hunter's eyes twinled. Yet his countenance was grave.

"It might be better if I told you nothıg. Listen, lad. Take my word for it, you ill not like this girl, this Jolie Stanwicke. he is proud and overbearing and shortempered. She has been much in London, nd holds herself a great lady, and all that he has seen in Charles Town she laughs o scorn."

"She did not laugh to scorn," Lachlan aid thoughtfully, "a Prince of the Musogee Nation and a Chief of the Family of he Wind! Nay, the titles seemed to please er. And though she saw him defeated, he was gracious enough to call him—beind his back—a handsome youth and a earless one, and to praise him for the fight ıe had made."

ALMAYNE seemed struck by a sudden thought.

"When do you go to Talasé?" he asked ıopefully. "Your warriors have arrived. have seen them in the streets."

The young man smiled.

"I had intended leaving on the third lay from this; but the journey may be postponed. My father bids me come to ıim, but not in haste. As for my braves, hey can rest here for a while, and await ny pleasure."

Almayne, drumming restlessly on the able, raised his eyes suddenly to meet the ther's gaze.

"Lad," he said earnestly, "it is time you started for Talasé. Your father ıwaits you there, your mother is eager for your coming. In all the Muskogee towns he Red War Club has been set up. The Bloody Stick and the Chips of Wood have been sent to twenty chiefs. There is war n the wind—war with both Choctaws and Chickasaws and perhaps with a great tribe from the West. Your father has sent for you, and you must go."

Lachlan met the other's gaze gravely.

"It is strange, Almayne," he said. "I never before have known you show such eagerness to be rid of me."

The hunter's face was troubled.

"Lachlan," he said slowly, "I will tell you again what you already know, because the telling of it now may serve a good purpose. When your father came here from Scotland in his youth, many years ago, I fell in with him and a great friendship grew between us. We followed the wilderness trails together as hunters and as scouts against the Yamassees and the Spaniards at St. Augustine. When your father became a trader and the owner of a pack train, I was his partner; and I went with him when he established his post at Talasé in the country of the Muskogees.

"I was with him when he met Sehoy Tourville, the daughter of the French captain, Louis Tourville, and a Muskogee princess of the Family of the Wind. I was present when he married Sehoy, and I know that he married her for her loveliness and goodness, and not, as some say, in order to gain the power which afterward came to him. I was with him when the Muskogee chiefs made him High Chief of all the tribes. I know what he has done since then for the people whom he has ruled. And I know that he has always looked to you to carry on that work when he is gone."

The hunter was silent for a moment. Presently he continued:

"ONONLY one point we differed. Your father thought that in order to fit you for that work you must be sent here to school in Charles Town. I held the opposite opinion. I said that you must remain in Talasé; that you must grow up there: that, if you were to rule the Muskogee nation as its High Chief or King, you must grow up a Muskogee brave and not a young English gentleman.

"In the end we compromised. Until you were eighteen, Talasé was your home. Your father was your teacher and he taught you all that an English school could have taught; yet you were an Indian and your friends were Indians. But at eighteen your father sent you here to Charles Town to Francis O'Sullivan, whose pupil you have been for five years, and from him you have had an education such as few other men in this New World can boast. Now, all that is over. The time of your training is ended. The time of your work draws near. To fit you for that work, your father has spent half his fortune on you; and now, with war threatening his people, he says to you, 'Come,' and sends his warriors to escort you home, like the Prince that you are."

Once more Almayne paused, his hard gray-blue eyes suddenly alight. He leaned forward and struck his fist upon the table.

"What are you, boy?" he demanded fiercely. "Are you Lachlan McDonald of Talasé, Prince of the Muskogee Confederacy? Or are you Lachlan McDonald, Gentleman, of Charles Town, with time to waste on every pretty girl who crosses your path?"

A long silence followed. It was the younger man who broke it.

"Thank you, Almayne," he said slowly. "You were always my friend, and you have said to me what needed to be said."

He paused as if to choose his words with the utmost care.

"I will answer your question," he continued. "I am Lachlan McDonald, Prince of the Muskogee. And I am also Lachlan McDonald, Gentleman. Because I am the former, I shall go home to my people. Because I am the latter, I hope to perform before I go a certain duty which chance has laid upon me here."

His black eyes searched the other's face. He leaned forward across the table.

"There is a lady in Charles Town who is in trouble," he said slowly, "the loveliest lady that I have ever seen, the lady Jolie Stanwicke. With or without your help, Almayne, I shall see what may be done for her."

The hunter's answer came quickly.

"You'll get no help from me," he cried angrily. "And I'll tell you nothing—except this: that you are playing with fire; that you are planning a course from which no good can come."

"In that case," replied Lachlan with a shrug, "I must fend myself from the fire as best I may. So you won't help me, then? You'll tell me nothing more?"

"I'll tell you nothing!"

"All the more credit to me when I have solved the mystery unaided." Lachlan called the black boy to him, paid his score, pushed back his chair and arose.

"Good-night to you, Almayne," he said.

"Where now?" the hunter asked gruffly

"The night's young," answered Lachlan. "There's time to make a beginning in this affair of Mistress Jolie Stanwicke, whom I still prefer to call the Lady Sanguilla. I think I shall pay a visit to a certain Captain Lance Falcon in his room at Ramage's tavern. Perhaps I can learn from him what I have failed to learn from you."

Almayne spread his hands in a gesture of resignation.

"Sit down, Lachlan McDonald, Gentleman," he said gloomily. "I am in charge of the affair of Mistress Jolie Stanwicke, and Captain Lance Falcon is her enemy and mine. Since you are bound to meddle in what does not concern you, there are certain things that you had better know."

JAMES ALMAYNE, the hunter, and Lachlan McDonald talked till after midnight at Jem Marshall's inn. Before they parted, certain matters had been concerted between them; and Lachlan was thinking deeply of these matters when, on his way to his lodgings, he passed by Ramage's tavern. Falcon lodged there when he slept in town instead of on his brig, and as Lachlan walked slowly along the street, he watched curiously a lighted window of an upper room, thinking possibly to catch a glimpse of a man with whom he had already had a somewhat memorable passage and who seemed likely to become even better known to him in the near future.

The man interested him keenly. None seemed to know certainly who he was or whence he came. In the taverns, where he spent his money freely, he was a hero. He had dined at the Governor's Mansion and he enjoyed terms of intimacy with Edward Stanwicke of Stanwicke Hall, master of two Carolinian baronies and one of the greatest landholders of the Province.

Yet it was well known that his brig, the "Good Fortune," was in reality a ship of war, well armed, well manned, with a crew of marvelously disciplined cut-throats:

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

and some who remembered the pirate wars whispered that Charles Town might find one day another Stede Bonnet on her hands, and prophesied a time when Captain Falcon and his men would dance on air at Execution Dock, where Bonnet and his crew had danced so grimly.

Lachlan had passed by now some yards beyond Ramage's tavern so that he could see over his shoulder not only the east window fronting the street but also another window in the south wall of the house, facing a small courtyard. Suddenly this second window, which also opened upon the corner room occupied by Falcon, fixed his attention.

In the bright moonlight Lachlan saw a small white object like a little ball shoot upward from the courtyard toward this south window, strike against the wall of the house just below the window sill and drop back into the yard.

LACHLAN halted, instantly alert. A high fence separated the courtyard from the street; but his ears were the ears of an Indian hunter, and presently he heard faintly the sound of someone moving in the courtyard. He knew then what was coming moments before it happened.

This man, whoever he was, was searching in the grass of the courtyard for the little white ball which he had tried to throw into Falcon's window. Presently he would find it; and when he found it he would throw it again.

Some minutes passed. Then upward into the moonlight soared the little white ball once more. This time, the thrower had evidently stationed himself directly below the window; and this time his aim was better. The white ball soared a little above the window sill, then dropped upon it and rolled inward.

Lachlan, from his watching place in the street, could see what the thrower of that mysterious missile could not see: To the latter, peering straight upward at the window above him, it must have appeared that the white ball had dropped from the sill into the room; but Lachlan knew that it had not fallen into the room, that it still rested on the sill, some inches from the edge. He could see, moreover, that it quivered slightly in the light breeze; and at once a faint hope stirred in him.

His eyes remained fixed on the window, while his hearing groped for each stealthy sound that came from the courtyard beyond the fence. He heard the man who had thrown the little white ball make his way out of the courtyard through a gate that opened on an alley behind the inn.

Lachlan realized that he could only play a waiting game. He chose to wait, however, in the now empty courtyard instead of in the street, where some belated passer-by might interrupt his vigil. Scaling the fence, he dropped to the ground on the other side.

For a long while thunder had been muttering in the distance, and Lachlan watched hopefully the black cloud from which these mutterings came.

At last the squall burst, with a sudden glare of white lightning and a thunderclap like a frigate's broadside. And Lachlan saw with delight that the curtains of the lighted window above him were blowing outward in the breeze which swept through the other window into the room.

From his post in the courtyard he had not been able to see the little white ball on the sill; but he knew now that it was there no longer. He had seen it quiver in the light airs before the squall came. Beyond a doubt that first gust blowing through the room from the east had blown it outward from the window sill.

The next task was to find it; and just as the first volley of rain began to fall he lit upon it in the grass. Stealthily, yet swiftly, he made his way out of the black courtyard through the gate opening on the rear alley and hurried homeward through the rain to examine his prize.

It was what he had expected, but far better than he had dared hope for. The white ball was a bit of white cloth rolled and bound with a light cord. Within the ball was a closely folded square of paper. Eagerly he spread this out upon the table in his room and read by the light of his candle the following in Spanish:

Antonio the Indian will deliver this in the usual way. It will make known to you Don Ruy Ortiz, now my lieutenant, who but recently arrived at St. Augustine from Barcelona. By Don Ruy I send you news of Chief Concha's prisoner, and Don Ruy will request certain information that I would have from you.

His sloop will enter the River of Stono. You will anchor your brig in mid-stream in the River Ashley off the old Cypress Wharf. At *12* o'clock of the night after this is delivered to you, Don Ruy will come by canoe to your brig. See that you *display two lights*, one above the other, for his guidance.

The letter was signed "J. M."—plainly the initials of Don Joachim de Montiano, the Spanish commandant at St. Augustine.

He read the letter twice, whistled softly, and smiled, his black eyes shining.

"So," he murmured, "our captain is on good terms with the Spaniards, and will receive a visitor from St. Augustine tomorrow night. And he is much interested in someone whom Chief Concha holds as a prisoner. A strange coincidence, that, and one which would interest Almayne."

FOR a while he sat frowning, putting two and two together, going over in his mind certain facts that Almayne had made known to him. Suddenly the frown vanished. For some minutes he studied a plan which had leaped full-formed into his brain. Then he went swiftly to work.

Carefully, with a knife point, he erased the "2" in the numeral "12," then with his quill and ink inserted in its place a cipher, so that the "12" became "10." This accomplished, he refolded the paper, replaced it in the cloth, rolled the latter again into a ball and bound it with the cord. He then blew out his candle and went down once more into the street.

The squall had passed, but the moon had not yet emerged from the clouds. A few minutes' walk along unfrequented ways brought him to the alley behind Ramage's inn. He entered the courtyard and saw at a glance that the light still shone in Falcon's window.

Lachlan smiled, interpreting this as possibly meaning that Falcon expected a message. With greater skill than the first messenger had shown he threw his little cloth ball and saw it pass through the window; and watching from the cover of a cassena bush, he had the added satisfaction of seeing Falcon appear at the window for a moment and wave his hand.

Lachlan, invisible in the blackness below, bowed with mock courtesy.

"Good night, Captain Lance Falcon," he whispered. "Good night and good luck, until we meet at the Sign of the Two Lights at ten to-morrow evening!"

Lachlan slept late the next morning. When he had arisen and had breakfasted, he turned his back on the April sunshine which made Charles Town as fair as Eden, climbed once more to his room, and sat down at his table with quill, ink, and paper before him.

For some moments he sat idle, his thoughts seemingly far away. But when of a sudden a black and russet oriole of that slim, graceful species which was called sanguilla in Carolina burst into spirited song in the oak just outside the window, he awoke from his dreams. A quick smile lit his face. Bending his head, he began to write:

TO MISTRESS JOLIE STANWICKE: I must ask your pardon at the beginning for addressing you thus boldly upon an acquaintance which was due to accident. I shall risk your displeasure for a reason which you may or may not deem sufficient—to wit, the fact that I am now engaged upon your service, and in your behalf shall this night hazard my life.

I have learned from the hunter, Almayne, my old friend, of your predicament and of your quest, and we are become allies in serving your need. Thus I know that you have come to Carolina seeking that lost lover of yours, Gilbert Barradell, who has your heart, and who came to this New World a year ago to seek his fortune. I know that he vanished in the wilderness not long after his coming here; that he was traced to the country of Concha, the Appalache chief, and that there all trace of him was lost; that his brother, Richard, who sails this day for London on the "Queen Bess" has engaged the services of Almayne as your last hope of finding him; and I know, too, that your father, for reasons of his own, disapproves your quest.

It may be—and I pray God so—that I can help. Almayne believes, as you are aware, that the man Captain Lance Falcon has knowledge which we need. Last night chance permitted me to confirm this suspicion in some measure, and at the same time opened to me an opportunity (I hope) of learning more.

To-night, at some risk, I shall grasp that opportunity. This letter will come to your eyes only if misfortune befalls me. If all goes well with me, I shall reclaim it unopened from Almayne, to whose safekeeping I entrust it.

He sat, then, for a while considering what he had done. Why had he written this letter? And why was he about to venture his life for this girl whose loveliness was not for him, because it was already pledged to another?

IF HIS deception were discovered, what chance would he have alone on Falcon's brig, with that crew of cut-throats? He believed himself, thanks to Mr. O'Sullivan, his Irish teacher, to be one of the best swordsmen in the New World. But one rapier could not withstand forty cutlasses.

And was she so beautiful—this Lady Sanguilla, as he had named her? In the dim garden, where he had seen her for the first and only time, Lachlan had not been able to distinguish her features clearly. Her hair, he had thought, was red or bronze-gold; he had been thrilled by the richness of her voice; she had moved with indescribable grace, and she was slender and of more than middle height, and there had been something about the way in which she carried her head. But as for beauty—well, Almayne, who had de-

It's in This Tube, Men

10 shaves Free mail the coupon

The supremacy we do not ask you to believe until you've proved it for yourself

GENTLEMEN:

Ask your druggist, and he will probably tell you Palmolive Shaving Cream is his fastest seller.

Countless men have written praising it; sales figures are amazing. Our years of experimenting have been crowned with success. We believe we will win you, too.

But before we ask you to *buy* a tube, we wish Palmolive Shaving Cream to prove its own case on your beard. Hence we offer a 10-shave test, free. Just use the coupon.

* * *

Sixty years of soap study stand behind our laboratories. 130 formulas were tried before we succeeded in this unique creation. 1000 men had told us what they sought—5 things a shaving cream should accomplish. They set our goal.

What we have accomplished is in the tube we send you. The unvarying qualities that have won men by the millions. If we win you, you'll thank us for the test. If not, return to what you have been using.

Test these 5 improvements

1. Multiplies itself in lather 250 times.
2. Softens the beard in one minute.
3. Maintains its creamy fullness for 10 minutes on the face.
4. Strong bubbles hold the hairs erect for cutting.
5. Fine after-effects due to palm and olive oil content.

Ask for this free test. Shave 10 times and *learn* why men adopt it. *Words* can't win men to quit their former shaving cream for this. Cut the coupon now.

THE PALMOLIVE-PEET COMPANY, CHICAGO, ILL.

To add the final touch to shaving luxury, we have created Palmolive After Shaving Talc—especially for men. Doesn't show. Leaves the skin smooth and fresh, and gives that well-groomed look. Try the sample we are sending free with the tube of Shaving Cream. There are new delights here for every man. Please let us prove them to you. Clip the coupon now.

10 SHAVES FREE

and a can of Palmolive After Shaving Talc

Simply insert your name and address and mail to Dept. B-1398, Palmolive, 3702 Iron Street, Chicago, Ill.
Residents of Wisconsin should address Palmolive, Milwaukee, Wis.

scribed her grudgingly as a miracle of loveliness, might not be a trustworthy judge. Yet, even in that dim garden—

He mused for a long while at his writing table, curiously considering these and other matters. At last he arose, slipped under his belt the sealed letter addressed to Mistress Jolie Stanwicke, and went out to find Almayne.

He spent some hours with the hunter, for there was much to be argued and discussed, and there were certain things to be done in preparation for his enterprise. He talked also with two tall young Indians, Muskogee warriors from Talasé, who had arrived in Charles Town two days before to accompany Lachlan on the long and dangerous wilderness journey to the Muskogee capital. In the late afternoon, after dining sparingly at Marshall's tavern, he returned to his room.

It was at ten o'clock that he was to meet Falcon on the latter's brig. Three quarters of an hour before ten o'clock, Lachlan went softly down the stairs and into the street.

The moon and Lachlan McDonald were good friends; but never before had she seen him as he was now—a swaggering young soldier of fortune. A red feather nodded in his broad-brimmed hat; a scarlet sash was wound about his buff jacket; a serviceable rapier swung at his side. Withal, there was something foreign about his gear, or about the way in which he wore it—something which smacked not at all of Charles Town or the English folk who dwelt there. Swarthy as the swarthiest Spaniard, lean, lithe, and straight as a sapling pine, Lachlan McDonald on this night might well have been Don Ruy Ortiz of St. Augustine, to any man to whom Don Ruy was unknown.

THERE was one disagreeable possibility which might spoil everything at the start, the possibility that Falcon might recognize this false Ortiz as the man with whom he had wrestled in the Stanwicke garden.

Determinedly Lachlan put this thought from him; and logic seemed, in a measure at least, to be on his side. He had leaped upon Falcon from behind. The latter had not seen his assailant's face until after some minutes of desperate struggle, and by then that face was grimed and bloody. He had seen it, moreover, only in the half-light of dusk. He would hardly recognize it, Lachlan told himself, when he saw it again.

There was no time to lose. At twelve o'clock the real Ruy Ortiz would board Captain Falcon's brig, and before that hour arrived the false Ortiz must have concluded his business and bade his host good-by.

He walked swiftly, therefore, by the most direct course, toward the place for which he was heading, passing presently beyond the old city wall and out upon the meadows and commons to the west of it, where as yet only a few houses had been built. A creek made in here, and at a small boat landing on the shore of this creek a tall figure loomed suddenly in the darkness.

It was Almayne—no longer clad in hunter's garb, however, but looking a nondescript seaman in soiled, open-necked shirt and loose trousers, a blue handkerchief about his head, a cutlass strapped to his belt. A few words passed between them; then they dropped from the end of the landing into a long cypress pirogue which waited there. Amidships sat two figures almost indistinguishable in the gloom, the two Muskogee warriors of Talasé. To these Lachlan whispered a grave greeting in their own tongue.

"Striking Hawk, Little Mink, my brothers," he said, "you have come, as you promised. It is well."

Almayne loosed the rope which held the pirogue to the landing, pushed the boat clear, and seated himself on the forward thwart. In a moment the long paddles wielded by the two Indians were driving the canoe swiftly and noiselessly down the winding creek to the river.

Presently they swung to the left and dropped straight down the Ashley toward two lights, one just above the other, which glimmered faintly far out in the stream.

SUDDENLY the brig loomed black before them, not ten yards distant. They ran under the vessel's stern, then eased the pirogue along to the ship's waist, where her rail was nearest the water line.

No sound came from her. Lachlan rose, placed his foot in Little Mink's cupped hands, reached upward and grasped the bulwark. Next moment he stood on the brig's deck.

He stood silent, watchful, his back to the bulwark, his hand on his sword hilt, his eyes searching the gloom. He saw nothing, heard nothing. The dim deck lay empty before him. If there were any living thing on Lance Falcon's ship, it kept itself hidden, and it made no sound. Yet somehow Lachlan knew suddenly, with a queer tingling of his spine, that unseen eyes were fixed upon him.

The knowledge startled yet steadied him. His hand left his sword hilt and, sweeping off his hat, he bowed low.

"By our Lady, Captain Falcon," he said in Spanish, "yours is a merry ship! For a moment I thought I had stepped into a tomb."

There followed several seconds of silence. Then a form detached itself from the shadows, and a deep voice spoke.

"Welcome, Don Ruy Ortiz," it said. "I have been waiting for you. It is generally the custom of my visitors to ask my permission before they tread my deck."

Lachlan laughed easily.

"A thousand pardons," he replied, "if I have transgressed a rule of the sea. I know little of such matters."

His tone changed suddenly, became stern and hard as steel.

"As for your permission, Captain Falcon, I came not here to seek favors. If you like not the manner of my coming, there are those who, perhaps, can alter your tastes."

It was a bold stroke. For a tense moment Lachlan awaited its effect, his hand once more on his sword hilt, his face close to that of the tall man who confronted him. He could hear the latter's quick, hard breathing, could almost see his lips frame an oath. But the oath became a laugh.

"My faith, Señor, I had not meant to ruffle your feelings," said Falcon, "but only to give you friendly counsel. He who boards a ship unannounced in the night may find his head split by a cutlass before he can speak his name."

Lachlan bowed gravely.

"I will treasure your advice, Captain Falcon. And now to business. The sooner it is dispatched the better. My paddlers will await me in their canoe."

He had hoped that that business might be conducted in the darkness of the brig's deck; but Falcon led the way aft, and Lachlan followed perforce. Falcon entered the cabin ahead of him, lit lamps, poured red wine from a handsome silver vessel, and, motioning him to a chair beside the table, seated himself opposite.

"I have sent my men ashore, Señor," he said, "except three or four who are asleep below deck. My crew will return in an hour and till then we shall not be disturbed. . . . By my faith, Don Ruy Ortiz, I think that I have somewhere seen you before."

Lachlan looked his host coolly in the eye.

"It is not likely, Captain Falcon," he replied, "unless you have traveled in Catalonia or Valencia or have visited the Sicilian coast, where I served in Gonsalvo's command. I came only last month to St. Augustine, and I have yet to pay my respects to the English in Charles Town."

For a long moment he endured the ordeal calmly, while Falcon stood frowning; then the latter smiled and made a gesture as though to dismiss the matter.

"'Tis some trick of the memory," he said lightly, "some whimsy of the mind. And now, sir, to our affair. You have certain tidings to give me, I believe."

"I hope, Captain Falcon," Lachlan replied, "that my news is more valuable to you than it appears. It is brief enough. My colonel, Don Joachim de Montiano, bade me tell you that Chief Concha, the Appalache, still holds his prisoner."

Lance Falcon nodded slowly, twisting the end of his stiff mustache.

"And what of the affair of Chief Concha's daughter?" he asked eagerly.

Lachlan reached beneath his sash for a kerchief, pretending to rub a spot on his sleeve. He was in deep water at the very start. There had been no mention of Concha's daughter in the letter.

He lifted his shoulders in a shrug and spread his hands in a gesture which might have meant anything.

"As to that, Captain Falcon," he said, "I am given to understand that it progresses very slowly."

IT WAS a blind stroke delivered with a silent prayer that it might not be a blunder. Its effect was startlingly dramatic.

In an instant Falcon's face was convulsed with rage. His thick brows drew together in a black scowl and his closed hand struck the table with a crash. Lachlan pushed his chair back a little that he might more quickly leap to his feet if the need arose; but in a moment the man opposite him seemed in a measure to regain his self-control.

"I knew it," Falcon growled. "I knew that nothing would come of it. I was a fool to listen to Montiano. Henceforth, I do what my own judgment tells me."

Again Lachlan plunged blindly.

"You are too hasty, Captain Falcon," he remarked quietly. "I did not say that the affair was at a standstill. I said that it progressed slowly. Is not that something gained?"

The question seemed in some measure to renew Falcon's anger.

Try this method of Cleaning Teeth

Take advantage of this Free Trial Offer—
See your teeth grow perfectly clean

TEETH that flash and sparkle when you smile; teeth so clean you love to show them . . . you can have them quickly, easily, if you will use this simple cleansing method.

It is a scientific method, developed after thousands of experiments. It is a method that has been used by three generations. Today more dentists recommend it and more people prefer it to any other dentifrice made. Leading dental authorities now say that the one function of a dentifrice is to clean. They warn against relying on any dentifrice to correct diseased conditions of teeth or gums.

CLEAN

Your dentist will urge you to use a dentifrice for *one* reason only—to keep your teeth *clean*. If you think your teeth or gums need treatment for any disease, don't expect a dentifrice to cure you—but go to your dentist at once.

Simple—Scientific

Colgate's Ribbon Dental Cream is based upon a scientific cleansing principle. It has a dual action. When you brush Colgate's on your teeth, two things happen: First, the finely ground calcium carbonate rubs loose the clinging food particles and safely polishes the enamel to a sparkling brilliance. Second, a delicious, aromatic foam sweeps over the teeth and gums, seeks out hidden crevices, rinsing them scientifically and removing the very causes of decay. Keep your teeth "Colgate" clean; visit your dentist regularly, and you are doing the safest, most sensible thing in the world to keep your teeth healthy and beautifully.

"Upon my life, Señor Ruy Ortiz," he cried irritably, "I do not know, and I am not likely to know so long as I trust to your commandant, Montiano, in this matter. Why he should be so tender toward this Gilbert Barradell I cannot guess. But this I will tell you—that I am done with dallying and paltering. The matter is my private affair. It is no part of my bargain with Montiano that I should follow his wishes in this business. I shall defer to him no longer. Within the week I shall set sail for the southward, and when I reach Concha's town I shall deal with Barradell as I think best."

At the first mention of Barradell, Lachlan's heart had given a mighty leap. It was true, then. Chief Concha's prisoner was indeed Jolie Stanwicke's lost lover. What had been hitherto mere conjecture was now a certainty. That there was much more to be learned was obvious; but it was obvious, too, that an effort to learn more would be desperately dangerous.

All this Lachlan realized in a flash; yet yielding to impulse, he ventured greatly.

"So be it, Captain. It is not for me to dissuade you."

He lifted his wine to his lips.

"To your success!" he murmured and drained the glass. Then, with a quizzical smile, he said softly:

"THERE is a proverb in my country which affirms that when you have dealt with My Lady's lover, you have still to deal with My Lady. Will that be easy, Captain?"

He did not know what storm this rash impertinence might provoke. He had scarcely spoken the words before he regretted them. Yet, to his amazement, Falcon smiled.

"I perceive," he said, "that Don Joachim de Montiano has told his lieutenant much but not all. There will be no trouble about the lady, Señor."

He held out his left hand, palm upward, and tapped the palm with the forefinger of his other hand.

"I hold her father there," he said slowly. "I can crush him when I choose!"

He broke off suddenly and, reaching for the wine, refilled his glass.

"But enough of this matter, Señor," he said. "I see that you have nothing more to tell me regarding it, and that Montiano's object in sending you here was to prevent me from acting upon it in my own way. In that object he has failed. As I told you, I shall sail southward within the week."

He raised his finger as Lachlan began to speak.

"Spare me your remonstrances, Señor!" he exclaimed. "My mind is made up. If Don Joachim values my services to him here, he will not seek to thwart me."

"Your services have indeed been valuable, Captain Falcon," Lachlan murmured. "I make no doubt they will be suitably rewarded."

"As to that," replied Falcon briskly, "I ask but little—though I might ask much, not only for what I have done for the King of Spain in Charles Town, but also for what I have refrained from doing to him upon the seas. I carry letters of marque, as you doubtless know, but since my bargain with Montiano, I have touched no Spanish ship."

"And your work in Charles Town?"

NEW CHRYSLER "52"

Still Higher Quality— Yet Lower Prices

LOOK at the car pictured here—the new Chrysler "52"—a big, roomy, full-sized automobile with typical Chrysler dash and beauty.

At its astonishingly low price—the lowest for which you have ever been able to buy a Chrysler—the new "52", beyond any question, completely overshadows and dwarfs any car of comparable price.

Through Chrysler Standardized Quality of scientific engineering and precision manufacturing, these big, roomy cars give you 52 and more unvarying miles an hour; pick-up of 5 to 25 miles in 8 seconds; power that purrs smoothly and silently; comfort beyond compare—all at the cost of an ordinary car, plus a beauty of line and coloring, a luxury of appointment, and the staunchness of wood and steel body construction that you have come to expect only in far more expensive cars.

That's why thousands and thousands have already bought the new Chrysler "52". That is why scores of thousands more will buy it. That is why, once you see it and try it, you will not even consider any other car of equal price.

Coupe $725; Roadster (with rumble seat) $725; 2-door Sedan $735; 4-door Sedan $795; De Luxe Sedan $875; f.o.b. Detroit, subject to current Federal excise tax. Chrysler dealers are in position to extend the convenience of time payments. Ask about Chrysler's attractive plan. All Chrysler cars have the additional protection against theft of the Fedco System of numbering.

$725

TO $875 F.O.B. DETROIT.

- 52 miles per hour
- 5 to 25 miles in 8 seconds
- Full-sized Bodies, for adult passengers

New Chrysler "Red-Head" Now Available for New "52"

The new Chrysler "Red-Head" engine, giving extra speed, pick-up and hill-climbing ability, is designed to take full advantage of high-compression gas. It is now standard in the Roadsters of the new Chrysler "52" and is available for all other "52" body types at slight extra cost. Any Chrysler dealer will gladly give you full particulars and an impressive demonstration of the "Red-Head" engine advantages.

MADE BY THE MAKERS OF WILLIAMS SHAVING CREAM

Lachlan asked, not too eagerly. Here was a new lead worth exploring.

"The time is not yet ripe," Falcon answered. "It is not ripe, but it is ripening. The defenses of Charles Town are weak and they are not being strengthened. It is rumored that the Cherokees are ready to move against the English. If Spain will rally the Indian nations to her side—But let that wait, Señor Ruy. I shall visit your commandant at St. Augustine within the fortnight. He can wait until then for the information which he desires."

"As you will, Captain Falcon," said Lachlan easily. "So short a delay can be of little moment—though, if you have nothing to tell me, I might have been spared this journey."

HE PUSHED back his chair and arose. "I think, then," he continued, "that I shall bring my visit to an end. My sloop lies in the River of Stono, and it took my paddlers two hours of steady work to bring me here. With the tide ebbing, 'twill take them longer to return."

"Aye," said Falcon, "and 'twill be well if you get to sea before daylight. Your Spanish sloops, no matter how disguised, still look like Spaniards."

He rose, put on his hat and took a step forward towards the door; but midway he halted suddenly. A murmur of voices came from the deck without. Lachlan heard them also, heard them with a thrill which set his heart beating a little faster.

"My men from below deck," growled Falcon irritably. "They are faithful scoundrels; but I prefer that they shall not see you."

He stood, his head cocked on one side, listening. A hail rang out from the deck and was answered from the river.

"Strange," muttered Falcon. "The time has passed quicker than I thought."

He turned to Lachlan.

"We will wait here a little, Señor Ruy," he said. "Apparently my crew are returning from the town, and when they have come aboard, perhaps I can get you off unobserved into your canoe."

Lachlan nodded, and for some moments they waited in silence. His keen ears told him when the approaching boat ran alongside the brig; but he listened in vain for the loud jests and laughter which he thought would mark the return of Falcon's crew. At last came the sound of footsteps, the footsteps of three or four men. They came straight to the cabin door and halted outside; then, after a moment, a loud knock sounded on the panel.

Falcon, frowning, muttered an oath.

"Come," he growled.

The door swung open. Without stood three men of Falcon's crew, evidently the men who had been sleeping below deck; while in front of them, framed in the doorway, stood a short, squat Spaniard, bearded and swarthy, one hand raised to his plumed hat, the other resting lightly on his rapier hilt.

He lifted his hat and bowed to Falcon. He did not see Lachlan because the latter was hidden from him by the door, which opened inward.

"I am an hour before the appointed time, Captain Falcon," he said suavely; "my paddlers made a swift journey from the River Stono. I am Don Ruy Ortiz of St. Augustine!"

Why *changed* motoring conditions demand a new margin of safety

To women who guard the family budget—1927 is a turning point

A BUDGET is a great responsibility. One unexpected pair bill due to faulty lubrication takes away the money ou hoped to spend on things e family needs.

In today's cars you have oted new colors, new lines, ew style. New driving comort, too. New ease in handling. ew power. New ability to peed up and slow down in affic.

But—

Higher engine temperatures nd faster working speeds acompany these changes.

And many oils which worked all right" a few years go are showing serious shortomings today. Raising repair ills. Increasing carbon deosit. Causing other troubles.

They *haven't the margin of afety needed* for 1927 driving onditions.

As you drive over today's mproved country highways, ou find faster speeds both comortable and safe. *But this puts new burden on your engine and on our lubricating oil.*

As you crawl through rowded streets remember this: A few blocks of frequent starting nd stopping *can injure your lubricating oil* more than miles of straight-away driving.

YOUR guide—If your car is not listed here, see the complete Mobiloil Chart at your dealer's and remember that . .

182 automobile and motor truck manufacturers approve it!

The correct grades of Gargoyle Mobiloil for engine lubrication of prominent passenger cars are specified below.

There is one oil which will surely keep your automobile bills at the lowest possible point.

That oil is the 1927 Gargoyle Mobiloil.

When you turn to the 1927 Mobiloil, you use the oil which is asked for by more automobile engineers than any 3 other oils combined.

The Mobiloil Chart tells you exactly which oil to use to meet the mechanical needs of your particular car. Every Mobiloil dealer has it.

We advise you to ask for the oil both by name and grade designation, thus: Mobiloil "E," Mobiloil Arctic, Mobiloil "A," Mobiloil "BB," Mobiloil "B," Mobiloil "C," Mobiloil "CC." The Chart tells which.

And Mobiloil is the most convenient oil you can buy—it is sold by more dealers than any other oil you can name.

Ordinary Lather

This lather-picture (greatly magnified) of ordinary shaving cream shows how large, air-filled bubbles fail to get down to the base of the beard; and how they hold air, instead of water, against whiskers.

Colgate Lather

This picture of Colgate lather shows how myriads of tiny, moisture-laden bubbles hold water, not air, in direct contact with the base of the beard, thus softening every whisker right where the razor works.

"Small-bubble" lather *makes shaving simple*

COLGATE bubbles are wringing wet; and water softens the beard, says science. These tiny bubbles get down deep where whiskers sprout out—soak them soft at base—razor whisks them off. See lather pictures above.

How "small-bubble" lather works

The moment Colgate lather forms on your beard, two things happen:

1. The soap in the lather breaks up and floats away the oil film that covers each hair.

2. With the oil film gone, millions of tiny, water-saturated bubbles bring and hold an abundance of water down to the base of the beard, right where the razor does its work.

Because your beard is properly softened at its base, your razor works easily and quickly. Every hair is cut close and clean. And your face remains cool and comfortable throughout the day.

Clean shaven—neat—trim

SOFTENS THE BEARD AT THE BASE

Five Cents for Luck

(*Continued from page 23*)

Not until she was met at her own door by incoherent mutterings did she allow herself to think ahead of the moment. Even then she put the future resolutely out of her mind as she ran to the wee baby nurse who, with arms outstretched on the table and head fallen forward, had gone to sleep on her feet.

Then followed hours of waiting. Nothing seemed to move—not even time. Only the disease lived and grew and tortured the moaning boy. Outside the wind whistled around the house, the snow beat on the windows and the voice of the prairie sang a wild, savage dirge.

Jean refused to listen; and after another eternity the doctor arrived, big, capable, kindly, and, oh, so cheerful! But Jean knew from his expression that there was a fight ahead, and silently, capably, she stood by his side, obeying his slightest move.

One hour — two — three — five hours passed before, white and shaken but triumphant, the doctor looked up. "Just in time. A close shave; but we've won!"

Jean couldn't speak after the blessed words, but she didn't need to—not with words. Her tightly-shut lips, her shining eyes as they rested on the sleeping boy, were enough. Then, with a shaky smile, she turned toward the doctor: "I'll get you a cup of tea and something to eat. You must be nearly dead."

"And what about you?" he asked. Their eyes met. Without a word more they shook hands.

AFTER that, time took wings to itself. Days and weeks passed in quick succession, until Harry was sitting in their one rocking chair, wrapped in a blanket. Jean came in with her apron bulging and opened it for him to peek at the contents. "Did you ever see anything like that at this time of year? If we only had a market for them—but—" she laughed. "I said that if you got better I'd never complain about anything again." She went to the cupboard to put away the eggs, humming a bar of "Red Wing."

"You shouldn't be doin' the chores," Harry spoke impatiently, and with one thin hand he flipped the blanket from around him. "When do you think McGregor will be here with the boots?"

"He should be back day after tomorrow. I hope he is, for I'd like him to look at Hughey. He hasn't been well since that trip for the doctor. I'm afraid I drove him too hard."

"Just as likely it was McGregor." Harry spoke irritably. "I hate to be lying around, when—"

"Now, young man," Jean stood over him, shaking her finger playfully, "you'll do just as I say. I have the doctor's orders. You don't think I'm going to pay good money for advice, and not follow it?"

"We haven't any money left, have we?"

Jean laughed. "I still have the five cents! Do you know, someway I feel I'm going to keep that."

"Hasn't Father—?"

"No, not yet; but he has a job now—in Regina. He'll be able to send us some-

Admired always *the engaging* MOUTH of YOUTH

A GAY carefree smile, pretty teeth, these belong to Youth. And to later years, when one has learned to keep the mouth glands active.

For your fine white teeth and hard, healthy-pink gums, your pure and wholesome mouth — all depend on natural fluids from active, youthful mouth glands.

But the modern soft foods, easily chewed, do not exercise the mouth glands, do not keep them young. The fluids gradually slow up, teeth start to decay, gums soften dangerously.

To correct this, Pebeco Tooth Paste was given an important additional ingredient which restores the mouth glands to their full normal activity.

Brush your teeth with Pebeco. It cleanses even where the toothbrush cannot reach, and its sharp tang leaves a healthy, tingling after-sensation. Your mouth feels young. Your lips take the upward quirk that so easily becomes a joyous smile.

Made by Pebeco, Inc., a division of Lehn & Fink Products Company. Sole distributors, Lehn & Fink, Inc., Bloomfield, N.J. Distributed in Canada by Lehn & Fink (Canada) Limited.

Where the tiny Mouth Glands are, three on each side

The mouth glands are 20 times more active when we chew. The fluids they produce wash away food deposits and counteract the acids in the mouth. But soft food makes them lazy. Pebeco contains the important ingredient to keep them always working.

How attractive, popular you can be

Everyone applauds your charm when your smile is gay, spontaneous. And how self-confident you feel knowing you have the lovely Mouth of Youth.

"Pebeco is splendid," happy users say. "Its salty taste is so refreshing and the clean, tingling after-sensation lasts and lasts."

PEBECO *keeps the Mouth Glands young*

STEEL plus Copper means service plus satisfaction from exposed sheet metal work. This alloy gives a new measure of endurance. It is to your interest to use

KEYSTONE

Rust-resisting Copper Steel

Sheets

AND ROOFING TIN PLATES

Better building construction, no matter how large or how small, is depending more and more each year upon the utility of sheet metal. For repairs, replacements, or for new construction, Sheet Steel has become an important factor with architects, contractors and property owners.

Columns, doors, metal lath, ridges, roofing, gutters, conductor pipe and spouting, ventilators, cornices, skylights, and sheet metal work are better and more enduring if made from KEYSTONE quality (alloyed with copper). Supplied in Black and Galvanized Sheets, and Roofing Tin Plates. Sold by leading metal merchants.

Send for booklet FACTS—It will give you some surprising information relative to the superiority of KEYSTONE Quality as determined by actual time and weather tests.

thing soon. He thinks we'd better go there to live."

"You don't want to?" Harry half rose from his chair as he asked the question, but quickly fell back.

"No, I don't; but—" She did not finish the sentence.

NEXT morning Jean was much longer than usual at the stable doing the chores. Several times Harry went to the window to look for her. When she did come in, he jumped from his chair, "Mother, Mother! What is it? What has happened? Is it Hughey?"

Jean looked toward him but not at him—her gaze seemed to go through him. "Yes; Hughey is dead." Her voice hard, flat, drained of all emotion.

"Dead! Hughey!" Harry looked in horror.

"Hughey dead!" Bess shrilled, and began to cry.

"What are you going to do?" The boy's anxious eyes followed his mother, who was going methodically about her ordinary tasks.

"Going to do?" she repeated. "There is nothing to do. We are through."

"You mean—?" He walked to the window and looked out at the snow-covered prairie.

Jean laughed shortly. She hummed the chorus of "Red Wing." She laughed again. "I'll use that five cents to buy stamps to let your father know we will go to Regina and do odd jobs!"

"But—Mother—"

"It's no use, Harry." Jean smiled, but not her old smile. Something had gone out of her. "Your doctor bill is not half paid. I shall have one; we would have to buy another ox; your father can't do it all, and keep us besides. Maybe it will all be for the best. I can keep boarders; perhaps your father can get—" Her voice trailed off. That night she wrote to Jim, telling him she would sell what they had and join him in Regina.

Next afternoon Mr. McGregor returned from his second trip to Swift Rapids. He had exchanged the boots.

"I examined them myself this time," he explained as he watched Harry try them on. Then he dug into his bulging pockets and drew out another parcel, which he handed to Jean. "I made that feller in the store give me them fur his mistake."

Jean opened the parcel with the eagerness of a child, "Oh, how good!" She held up a pair of slippers for herself. "Mr. McGregor, are you sure you didn't add a little persuasion out of your own pocket?" she demanded.

"Now, Mis' Carroll, don' you be askin' questions that ain't your business," he protested; but he flushed and shuffled from one foot to the other. "If I hadn't been such a danged fool before!"

"Don't say that," Jean spoke sharply. "You've been like— I haven't words to say what you've been to us this winter, and it makes me more sorry to leave. But—"

"Leave!" the little man shouted.

"Yes, Hughey's dead. We can't—Jim hasn't had much work—and—" Jean handed him the letter and the five cents. "Will you get that posted?"

"And the new road just startin'!" McGregor lamented as he put the letter and the money in his pocket. "I heerd the

This Mennen combination ~50 cents

all 3 for the price of one

Millions of men use Mennen Shaving Cream—and we want them all to know the complete Mennen shave. We are therefore making this demonstration offer—buy the shaving cream and get a tube of Skin Balm and a can of Talcum for Men *free.*

First, Mennen Shaving Cream brings you *dermutation*—which softens the beard, relaxes and levels the skin peaks around each hair, and provides a smooth, even surface for the razor. No little nicks and cuts left behind to smart and bite—but the sweetest shave ever.

Second, Mennen Skin Balm is a cooling, soothing, healing, antiseptic and mildly astringent face lotion in a handy tube—no bottle to break—for after-shaving use. Skin Balm is neither greasy nor sticky. It has a wonderfully refreshing and invigorating scent.

Third, Mennen Talcum for Men is a man's talcum, tinted the color of the skin—doesn't show—removes face shine after shaving.

To make you better acquainted with the last two your dealer will give you all three for the price of the shaving cream alone. Get yours today. The supply is liberal but not unlimited.

The Mennen Company, Newark, N. J., and Toronto, Ont.

superintendent's to be over it next Saturday; after that a train a day, with a dining car and everything. Dang it, that's hard luck!"

"A dining car?" Jean looked toward him. "Did you say a dining car?"

"Yes, so I heerd."

"Then they'll want eggs?"

"I s'pose so," McGregor agreed grudgingly, as if afraid to stir hope in the desperate eyes looking into his.

"Mr. McGregor, do you think they'd buy my eggs?" Jean was standing with tensely clasped hands, staring into his face.

"I—I—can't say as to that. But, Mis' Carroll, how'd you git them there? It's twenty-five mile to Cargill station, the nearest one, and Hughey being dead!"

Again Jean was oblivious to her surroundings. She was looking far beyond them. With a determined set of her shoulders she reached out her hand. "Mr. McGregor, give me back that letter and the nickel. I'm going to have one more try."

"But, Mis' Carroll," he began; then he stopped. McGregor knew when he met inevitables, like the coming of a new day, and pioneer courage.

ON SATURDAY Jean stood on the crude new platform at Cargill station. Her wind-whipped skirts betrayed her feet wrapped in sacking. She shivered uncontrollably and her teeth chattered, despite the red sweater that she pulled tightly around her throat.

In front of the platform stood the first through train, the engine puffing like a triumphant black monster, champing to bound on into its new domain. Jean was walking along, looking anxiously at the cars.

"I want to find the dining car," she explained to a man in the trim uniform of the road.

He looked curiously at her, as he pointed toward the end of the train; but his glance did not reach her. Jean was looking for a man in white. She thought chefs always wore white.

Presently she saw a car with tables, and a man wearing a white smock. She beckoned to him. He bent down and looked at her. Again she beckoned, peremptorily this time. He hesitated, then he walked away.

She met him at the bottom of the car steps, "Fresh eggs," she said. "You need eggs, don't you?" She wished her teeth wouldn't chatter. It made her sound so queer.

"Why! Why!" The man's eyes swept over her, right down to the sacking on her feet. "We use eggs; but we get our supplies in—"

"Yes—I suppose," Jean interrupted; "but these eggs are fresh and large. I wish you'd look at them—try some if you like. Twenty dozen—big, big ones; and they're not frozen."

She smiled her wide smile, "That's why I'm so cold. I came quite a piece, and I put the blankets and my coat over them. I was afraid they'd get frozen, but they didn't. They're awful big eggs. Will you look?" She pointed back behind the platform to Bob and the jumper.

"I'll—I'll ask the dining-car conductor." He sprang up the steps and disappeared.

Presently another man came out. He,

In Essex too—

the Exclusive High Compression Anti-Knock Motor That Turns Waste Heat to Power

ESSEX SUPER-SIX

2-pass. Speedabout	$700
4-pass. Speedster	835
Coupe	735
Coach	735
Sedan	835

All prices f. o. b. Detroit, plus war excise tax.

Today's Essex, like Hudson, has an exclusive high compression, anti-knock motor that, using ordinary gasoline, turns waste heat to power. These motors are the most powerful and efficient in the world per cubic inch of piston displacement, within our knowledge.

Thousands daily riding in the New Essex realize by what immense margins it holds its leadership—greater in power, performance and reliability—larger, roomier, more beautifully turned out and appointed. And the very public enthusiasm which acclaimed Essex world values of the past was the inspiration to this even greater Essex; while buyers by hundreds of thousands gave the broad experience and resources that made attainment possible.

James B. Graham

President of the Lycoming Trust Company and a leading citizen of Williamsport, Pa., calls The Dictaphone an indispensable convenience for modern executives

"A great saver of time"

"It is the greatest possible convenience to have at hand," declares James B. Graham, President of the Lycoming Trust Company

You need only read his testimony to realize how much The Dictaphone can help any executive. A trial (see coupon) will convince even the most skeptical

"IT'S the greatest time-saver I ever had the privilege of using. Available day or night, before or after hours. Convenience itself."

Sharp and clear comes this statement of facts from James B. Graham, President of Lycoming Trust Company, Williamsport, Pa., the largest financial institution in Northern Central Pennsylvania. Mr. Graham is Chairman of the Board of Lycoming Manufacturing Company (makers of Lycoming Motors), of Spencer Heater Company, President of Crescent Refractories Company (makers of high-grade fire brick), and President of the Williamsport Y. M. C. A.

Directness is characteristic of this forceful man. Too busy to tolerate the cumbersome and old-fashioned, he employs the modern Dictaphone method—and gives credit where due. He continues:

"The instant availability of The Dictaphone enables me to place dictation thereon at any time and save untold time. Its greatest convenience is at odd times, when I may be in the office alone. Then I am able to dispose of many matters which may be typewritten later.

"All our executives and secretaries are thoroughly sold on The Dictaphone and would not think of returning to shorthand."

Blanche A. Seward, Secretary to Mr. Graham, transcribes all his dictation, yet has time for other duties as head of one of the departments in his bank.

"Bank work must be completed every day," says Miss Seward. "With shorthand it was almost impossible to do that, as it was possible to take dictation only after banking hours. The Dictaphone ended that and enabled me to undertake other duties.

"I would not think of going back to shorthand. And I cannot believe any girl would, if she gave The Dictaphone a fair trial."

Blanche Seward

declares that, if it weren't for The Dictaphone, she never could handle her present positions as secretary to Mr. Graham and head of a department

DICTATE TO THE DICTAPHONE

REG. U.S. PAT. OFF.

and double your ability to get things done

What's Wrong With Shorthand?

Secretaries say:—

"He talks so fast, I'll be getting writer's cramp soon."

"No one else can read my notes."

"I'm nothing but a bell-hop."

"Yes, I do mind staying late."

"Those awful waits while he chats over the phone."

That's enough! I'll show him this trial offer right now.

too, looked from her red hood down to her awkwardly clad feet; but Jean was not conscious of his scrutiny.

"I have eggs," she began again, "fine fresh eggs. I know, for I gathered them myself—and they're large. I wish you'd try them; maybe if you do, you'd take some every week. They're not frozen, not cracked. I upset once, but I saved them. I held them up." She raised her arms to show him. "I fell down; but I saved the eggs."

"We buy our supplies in—" the man began.

"Yes; but if you need eggs—maybe those other people are near a railroad. You see, you're the only chance I have, and—"

"All aboard!" Away up toward the front of the train the conductor's voice rang out, as if he too enjoyed man's conquest over distance.

The man to whom Jean was talking stepped back into the train; the great mass began to move forward.

"But, I say," Jean spoke to the passing cars. "I say I have twenty dozen eggs—fresh and large. What—what?"

On and on the train moved. Jean turned her back to it. In her hand she held the five-cent piece. "I'll have to spend you, spend you to send a letter to Jim. Spend you to tell him—"

"EXCUSE me, madam. One of the dining-car men told me you have some fresh eggs for sale." Jean looked around at a gentleman in plain clothes who was standing regarding her. Vaguely, she noticed that the train had stopped.

"Yes." She was too dazed to be coherent. "Did you ever have eggs for sale—nothing in the world but eggs—and nobody wanted them?" She looked hard at him, demanding an answer.

"No," he said, "I never did. But I remember hearing my grandmother tell about living away out in the bush Down East, and not having anything to sell but butter, and no market for it."

"Yes, my grandmother was a pioneer Down East too," Jean agreed, with interest. "They had it awfully hard." Her teeth were still chattering. "I'm thankful we've never had to go through what they did. But, sir, would you buy my eggs? They are large and fresh, and I—"

"How far did you come?"

"Twenty-five miles straight; but, Bob—" she looked toward the ox—"Bob gets lost every few miles. I guess I traveled about fifty."

"Yes; we'll take your eggs." He motioned to the man in white to go for them. "How many have you?"

"Twenty dozen." Jean's voice was hoarse with excitement. "Perhaps you'd better count them."

He put his hand in his pocket and drew out a roll of bills. "Let me see—they are forty cents a dozen." He held a ten-dollar bill toward her.

Jean looked at it, but did not take it. "I—I can't give you the change." She opened her hand and showed the five-cent piece. "That's all I have." She laughed unsteadily. "I was going to spend it for a stamp to tell Jim I'd given up. But if you'll take some eggs every week, I'll get the mail carrier to bring them here for you. If—if—you could do that—I'll not write

Why spend yourself on what a *machine* can do?

Every woman has been through it—that thankless job of housecleaning—that wearisome and joyless toil that faces her spring and fall.

Dragging dust-cloths and stepladders through the house, stooping and straining to reach under furniture and over moldings, wrestling with smudged draperies and such.

Some women suffer it still, and more's the pity—needlessly spending their energy and charm on work a *machine* can do, easily and with *all the furnishings in place.*

The light, deft, efficient dusting tools of The Hoover take all this sort of labor off a woman's shoulders; they bring all the hard-to-get-at places within easy cleaning reach.

You want The Hoover because of the time and labor its dusting tools will save you in housecleaning, but you want it more because of

"POSITIVE AGITATION"

and the *faster, easier, deeper* cleaning it performs *regularly* on carpetings and rugs.

The Hoover is easy to buy. If you already have an electric cleaner, your Authorized Hoover Dealer will make you an allowance on it in trade, delivering you a new Hoover, on easy payments if you like. Cash price, the Model 700 $75.00, or the Model 543 **$59.50.** Dusting Tools $12.50. Prices slightly higher west of the Rockies and in Canada

THE HOOVER COMPANY, NORTH CANTON, OHIO

You can make mine P. A.

THAT'S my standing order. Anywhere. Any time. Prince Albert gives me what I want in a pipe. Morning to midnight. Seven days out of seven! I get a brand-new thrill every time I open a tidy red tin and breathe that rich, rare P. A. aroma. There's no other fragrance like *that,* Men. Appetizing! Tantalizing!

And when I put a load to bed in the bowl of my pipe and light up . . . *there's* a thrill that takes a better man than *I,* Gunga Dhin, to put into words! Cool as a creditor calling a loan. Sweet as the thought that you are able to pay. Fragrant as you smoke it, too. Fragrant and long-burning. What a smoke, Men!

Prince Albert is so mild you can smoke pipe-load after pipe-load. It never bites your tongue or parches your throat. Yet it has that full-bodied richness that reaches *deep down* and satisfies your pipe-hankering as nothing else can. P. A. is what I call a *balanced ration.*

Get this one, big, fundamental fact: You haven't scratched the surface of pipe-pleasure unless you have smoked Prince Albert! There are joys you will *never* know until you pack that old pipe of yours with P. A.! That's my story. It will be *your* story, too, when you know good old P. A.

P. A. is sold everywhere in tidy red tins, pound and half-pound tin humidors, and pound crystal-glass humidors with sponge-moistener top. And always with every bit of bite and parch removed by the Prince Albert process.

PRINCE ALBERT

—no other tobacco is like it!

Already dreaming of the years you cannot share

She cannot know how much she needs your care in little things like this

HOW much you do for her day in and day out—planning and working for the years when she must face the world for herself. Years of which she, too, already dreams.

Not perhaps until she has children of her own, will she realize fully just what her mother's care has meant. Care not only in the big things, but even more in that endless round of little things which count for so much.

It is one of these seemingly small points which is now the center of interest in a nation-wide school movement. The American Medical Association and the National Education Association are pointing out the importance of school day breakfasts. They have found that children's grades and health are vitally influenced by the kind of breakfast they eat. This slogan is now displayed on the walls of over 50,000 schools: "*Every boy and girl needs a* hot cereal *breakfast.*"

Only a *hot* cereal can furnish the boundless energy which children need to meet the strain of school work.

You already know well that one *hot* cereal which authorities have for years recommended for growing children—Cream of Wheat. You probably also know why it is recognized as ideal:

First, it brings a remarkable store of mental and physical energy—just the elements needed most by little minds and bodies. Second, Cream of Wheat is so easy to digest. Third, children enjoy its delicious creaminess.

It is so simple to safeguard your children in this little thing. Begin now! Tomorrow morning start them off to school, ready for a good day's work. Give them a *hot* bowl of good old Cream of Wheat.

© 1927, C. of W. Co.

This little girl has learned to read well because she eats the right foods. Every school morning she eats a hot cereal breakfast—*Cream of Wheat*

MY RECORD

For a girl aged.....*For a boy aged*.....

Name and address.....

greatly aggravated by microbic toxins from diseased tonsils, abscessed teeth, and so on, as well as by emotional excitement, nervous stress, eye strain, overwork, loss of sleep, indigestion, chronic constipation, and possibly by certain disturbances in the ductless gland system.

If you are a sufferer from periodic sick headaches, I would advise you, between attacks, to exercise daily in the open air; play golf or some other outdoor game, take tonic baths, and get ten hours of sleep nightly. Relax an hour or two in the middle of the day. Avoid alcohol, coffee, and too much meat. Eat regularly—at least three times a day. A daily sweat is good, but change of climate is of no value.

WHEN you get up in the morning with a dazed or dizzy feeling, pressure on one side of the head, and you feel you should step very carefully in order not to jar or move the head unduly, you know that before a few hours have elapsed you will be the victim of a headache attack. Although you are not hungry, you should eat a light breakfast of bland food, such as cornflakes and cream, toast and butter. After breakfast, go quietly about your usual duties. Do not attempt anything unusual that day. In one or two hours, if the stomach becomes highly acid, take a scant teaspoonful of ordinary baking soda in one-half glass of water, and while busy with your day's duties drink a glass of cold water every thirty minutes until you have taken at least eight glasses. Eat a light lunch, such as whole wheat bread and butter, or crackers and butter, and in the evening take your usual meal.

When threatened with an attack avoid concentrated proteins such as meat, eggs, nuts, cheese, baked beans, and the like. During an attack, it would also be well to avoid these protein foods, as well as rich gravies, pastries, tea, and coffee. If not too greatly nauseated, take food during the attack. Buttermilk and green vegetables are especially recommended.

Naturally, you will ask: What can I do to help myself during the migraine attack?

A hot foot-bath for ten or fifteen minutes, commencing with a temperature of 105° Fahrenheit, and rapidly adding hot water until 115° to 125° Fahrenheit has been attained, will do much to relieve you, especially if hot compresses are applied over the forehead and eyes and an ice bag to the back of the neck. After three or four minutes, reverse the procedure and apply the hot compresses to the back of the neck and the ice bag to the forehead.

Hot compresses applied to the spine and stomach, hot leg-baths, or hot tub-baths, are also of value in averting an attack of migraine.

People subject to migraine headaches should make every effort to lead an even, regular, and tranquil life, free from nervous strain, mental worry, emotional excitement, and unusual physical stress.

Neurasthenic headaches: Next to migraine, probably the most frequent headache is the neurasthenic or "pressure" headache. In many cases there may be a toxic side to these headaches—the patient suffering not only from nervous exhaustion, but also from auto-intoxication. However, I think this the exception rather than the rule. More often these headaches are due to erratic

Is Your Town Safe?

© 1927 M. L. I. Co.

These boys and girls are being taught to save their lives! They are learning the meaning of the "Stop" and "Go" traffic signals. In many schools the children make their own semaphores, and the teacher appoints different members of the class to act the part of a Traffic Officer so that the lesson of caution at street crossings can never be forgotten.

EVERY five minutes someone dies from cancer. Every six minutes someone is killed by accident. One death in every 13 is caused by cancer—one in 15 by accident. One—a tragedy foreseen weeks in advance when beyond hope of prevention. The other—swift annihilation that could have been prevented.

Most fatal accidents need never happen; 90,000 a year in the United States—240 a day—deaths from various causes that could be prevented. One half of the children who are killed are the little untaught ones less than five years old. And accidents claim all too many persons past middle age—who have not adjusted themselves to the swift pace of passing vehicles.

In cities where public caution and protection are taught, the deathrate from accident is far less than the Nation's sad average. Modern scientific Safety Campaigns are organized in these cities. The Mayor, the Police Department, local associations, clubs, societies and citizens of ability and initiative are working together for safety in industry, in the home and on our streets. The newspapers which help to promote Safety Campaigns find a quick response.

These continuous safety programs are as carefully and skilfully planned as a great battle, but with this difference—a battle is planned to end as many lives as possible and a Safety Campaign is planned to save as many lives as possible.

No longer has one a right to say, "Accidents are bound to happen. You can't prevent them." Today accident prevention is neither a beautiful dream nor a vain hope. It is a splendid reality. In cities which have said, "It can be done" — it has been done. In some cities the deathrate from accident has been reduced more than half.

Do you know how many people were killed by accident in your town last year? You will find, again and again, that a little forethought or a little more care would have avoided many tragedies. Help to prevent such deaths.

700,000 Americans seriously injured last year; 23,000 killed by one cause alone—motor vehicle accidents.

Appeals to individual caution have failed to stem the constantly rising tide of accidental deaths. Last year the New York State conference of Mayors decided to conduct an "entire city" Safety Campaign. Albany, N. Y., was selected for the test, and the Metropolitan Life Insurance Company was invited to send safety engineers to co-operate.

A vigorous educational program was undertaken. Every stage of this campaign was carefully mapped out in advance. During the first six months of the demonstration, while practically the entire city supported it, accidental deaths of all kinds were reduced 31%. Fatal accidents to children were reduced 33⅓%. Fatal accidents in homes were reduced 71%.

Based on the results in Albany, the Metropolitan has prepared two booklets, "Promoting Community Safety" and "The Traffic Problem", which outline practical ways and means for accident prevention. Send for two copies of each, one for personal study and one to send to your Mayor. If your town has a working safety organization, support it whole-heartedly. If not, help to establish a local Safety Council.

TRADE **YALE** MARK

She just knows they'll be safe in a Yale-locked closet

A YALE LOCKED CLOSET—such an inexpensive, yet sure way of protecting personal property!

We Americans are away so much—motoring or yachting; at the theatre or the club; that we simply *must* have Yale protection.

Your silver and jewels, your furs, your cigars, your valuable papers—put these behind a Yale Deadlock or Deadlatch and you'll know they'll be guarded every moment of your absence.

Yale features several distinct types of auxiliary locks for home-closet use—

Yale No. 42RB and No. 042RB Deadlatches
Yale No. 44RB Automatic Deadlatch
Yale No. 2F Deadlock
Yale No. 10F Steel Bar Deadlock
Yale No. 193 Rotary Bolt Deadlock
(the one pictured below)

Each one of these offers effective modern improvement over the ordinary lock—the *safe* over the *unsafe*.

Go, yourself, to a hardware dealer who has the Yale line. He will advise you and help you select the right lock for installation on your Yale Locked Closet. *Printed directions for applying packed with each lock.*

Send for booklet just published—"You may not have a skeleton in your closet but—"

YALE MARKED IS YALE MADE

nervous behavior. Auto-intoxication has become a fad with many neurasthenics. The best proof that these headaches are not generally due to so-called auto-intoxication is the fact that they can often be completely relieved by a warm soap-suds enema. If the headache resulted from the system being flooded with poisons, how could flushing the colon immediately cure the headache? The fact is, the headache was a reflex nervous manifestation, and, of course, was promptly cured when the cause was removed.

Nervous patients also suffer—many of them chronically—from cold hands and feet. The least excitement causes them to break out in a cold sweat; they sometimes also suffer from excessive blushings.

Quite often the headache of neurasthenia, nervous exhaustion, or brain fag is hardly a pain; it is an unpleasant feeling of pressure or constriction, the feeling usually being strongest in the region of the forehead and top of the head, although it is sometimes felt at the back of the head.

Prominent among the underlying causes of these exhaustion headaches may be mentioned worry, grief, fear, anger, anxiety, introspection, psychic strain, overwork, nervous tension, overstudy, and all other influences which are contributory to nervous exhaustion and brain fag.

Prevention is the main thing in the management of these nervous headaches. If we permit nervous exhaustion to creep upon us, headaches are certain to follow.

If you are a victim of neurotic headaches, you must live a regular life. Have set hours for eating, working, and playing, and see that you get eight or nine hours of sleep. Avoid alcohol and tobacco; drink sparingly of tea and coffee, and also avoid all forms of excesses or overexertion.

Neurotic headaches are sometimes relieved by eating; but the food should be limited to hot liquids, toast, or crackers.

Cold compresses, if persistenly applied, will cure most of these headaches. Other methods of relief are alternate hot and cold compresses to the head; alternate hot and cold sponging of the entire spine; rubbing with menthol ointment, five to ten per cent, to relieve the sensation of pressure; a very hot colonic flushing of three or four pints of water at 108° to 110° Fahrenheit; warm foot-baths at 110° Fahrenheit, or hotter, given for ten minutes, followed by a short cold foot-douche.

Neurasthenic headaches are usually greatly benefited by change of climate, new scenery, or other diverting influences, but sometimes the only cure is several months of absolute rest in bed.

Indurative or rheumatic headaches: The majority of sufferers from this form of head pain seem to be women of middle age. They give a history of being free from headaches in their younger years, but of having these irregular attacks come upon them as they grow older. The pain, as a rule, covers the whole of the head, with the exception of those cases where it begins about the back of the head and the nape of the neck, sometimes radiating down toward the back and shoulders.

This form of headache does not cease at night. In fact, occasionally it is even more severe when the patient assumes a

"NERVOUS, MISERABLE . . . *I had to give up every outdoor sport*"

Philadelphia, Pa.

"Riding, swimming, tennis—I was forced to give up each of my beloved sports. And my dancing, too . . .

"The doctor's words sounded hopeless! 'Auto-intoxication' had become chronic! I feared I would be afflicted my whole life long.

"I led a miserable existence. Something had to be done. I tried medicines. To no avail. I was terribly weak—oppressed by an overwhelming desire to sleep continuously.

"Then one day my mother handed me several cakes of Fleischmann's Yeast, saying, 'You have tried everything else.' It was with a mere flickering ray of hope that I began eating it—three cakes a day.

"Today I can snap my fingers at the word 'chronic.' For in 5 months my auto-intoxication had *disappeared*. I've never felt better in my life. I'm riding again, and fit for any strenuous sport. And I am thinking of starting my dancing again, too." —*Mrs. Cyril E. Allen.*

WHEN the body is depressed by intestinal poisons, Fleischmann's Yeast gets surely at the source of the trouble.

Fleischmann's Yeast is a food as fresh as any vegetable from the garden. It cleanses the digestive tract of accumulated wastes, strengthens the intestinal muscles. With elimination regular, the assimilation of food becomes normal, the blood is purified — the tone of the whole system is raised. Indigestion, skin disorders yield to the action of Fleischmann's Yeast.

Start today on this easy, natural road to health. You can get Fleischmann's Yeast from any grocer. Buy two or three days' supply at a time and keep in any cool dry place. Write for a free copy of the latest booklet on Yeast in the diet. Health Research Dept. J-45, The Fleischmann Company, 701 Washington St., New York.

This modern, natural way to health

Eat three cakes of Fleischmann's Yeast regularly every day, one cake before each meal or between meals. Eat it plain, or dissolved in water (hot or cold), or any other way you like. For stubborn constipation physicians say it is best to eat one cake with a glass of hot water (not scalding) before meals and before going to bed. (Train yourself to regular daily habits.) Dangerous cathartics will gradually become unnecessary.

ABOVE, MRS. CYRIL E. ALLEN, *of Philadelphia*

RIGHT

"THREE YEARS AGO I was told that, to avoid a nervous breakdown, I vitally needed a rest. My whole system was run down from overwork. On returning from my vacation boils started to break out upon my face and neck—the result of the condition of my blood. Ointments and poultices seemed only to alleviate—not overcome—the disorder.

"Numerous friends advised Fleischmann's Yeast. I began eating it regularly at meal times. Soon the boils simply faded away and I have had none since. I still eat Fleischmann's Yeast daily to keep 'fit'."

LEIGHTON M. REID, Detroit, Mich.

LEFT

"I WAS under the anxious responsibility of starting my own business and nursing it along the road to success. Of course my hours were long, and I overworked. Soon my system was run down. At the same time I began to suffer from constipation. My digestion, too, was impaired. One day someone recommended that I try Yeast. . . . I did try it. Today, after taking Fleischmann's Yeast regularly for two months, I find myself, to be brief, 'enjoying the best of health'."

reclining position. It is seldom associated with nausea and never with vomiting.

The rheumatic headache is brought on by exposure; it often starts with a chill following excessive perspiration; in the case of women, chilling as a result of washing the hair. The first and most important thing in treating it is to avoid all forms of chilling and sudden exposure.

The next step in the treatment is the application of heat. Hot compresses followed by proper massage is the surest method of gaining relief from this serious affliction. The first few treatments may aggravate the headache, but if the patient will persevere, the vast majority of cases can, in time, be relieved. Generally speaking, these headaches require persistent daily massage during four to eight weeks.

Blood-pressure headaches: We now come to the headaches which owe their existence to variations in the blood and the blood pressure. Headaches are known to result from both high blood pressure and low blood pressure. In this group of headaches will also be included those associated with hardening of the arteries, as well as the headaches which result from anemia.

Any influence which can cause blood to accumulate in the head can produce a *congestive headache*. The return of blood from the head is many times interfered with by the wearing of too high and too tight collars as well as too heavy hats.

Women around forty years old, who have high blood pressure, with slight kidney involvement, suffer inordinately from headaches of this type. The head is hot; face flushed; arteries of the neck throb; the eyes are red; and the patient complains of a bursting feeling, as though the brain were too large for the skull; the hands and feet are generally cold.

This form of headache, where the brain is overfilled with blood, is not due to the popular notion that the "blood is too thick" or that one has "too much blood."

A good illustration of this type of headache is that which almost invariably occurs in the early stage of a fever or other acute infection, such as influenza. The patient's face becomes red, the eyes are bloodshot and abnormally bright, and the pulse rapid and full.

The congestive headaches of school children are usually due to stomach and bowel complications. High altitude and extreme solar heat are also productive of conditions which predispose to congestion.

Headaches of this nature usually yield to those measures which relieve the congested blood vessels of the head by mechanically drawing the blood into the large vessels of the trunk and lower extremities, such as the hot foot-bath, the hot full bath, hot-blanket packs, electric-light baths, and hot-water bottles to the extremities—used in connection with ice bags or cold compresses to the face and head. Mild friction to the scalp is also helpful. These patients should rest with the head and shoulders elevated.

When we come to the *headache* of *high blood pressure*, we encounter a more persistent form of head pain—but one in every essential very similar to the congestive type we have just considered. The pain of high blood pressure is generally of a throbbing nature, and is accompanied

Now - An even *better* car at even *lower* prices

Since its first day before the public, the Pontiac Six has been scoring a series of triumphs. First came the triumph of its introduction, which resulted in world record sales for a new make of car! Then came a steady succession of important improvements in quality, luxury and convenience—

—improvements that resulted in smoother operation and greater handling ease, in greater comfort, greater economy and greater owner pride—in higher standards of quality and higher levels of popularity!

And now Pontiac Six again represents a sensational new standard of value—the result of this notably finer quality, combined with beautiful new Duco colors on Bodies by Fisher, at lower prices on all body types.

This history-making announcement has turned all eyes on the Pontiac Six.

It has created a known standard of what buyers have a right to expect in a low-priced six. It is causing thousands to make *comparison* the basis of their buying—

—and because no other six at or near $745 offers so many luxury and quality features, Pontiac Six sales continue to establish new high levels. Visit your nearest dealer. See and drive the finest low-priced six in automobile history!

New low prices announced July 15th on all passenger cars

Two-Door Sedan	$745	Sport Cabriolet	$795
Sport Roadster	$745	Landau Sedan	$845
De Luxe Landau Sedan	$925		

Pontiac Six De Luxe Delivery, $585 to $770. The New Oakland All-American Six, $1045 to $1265. All prices at factory. Delivered prices include minimum handling charges. Easy to pay on the General Motors Time Payment Plan.

PRACTICE MAKES PERFECT

The 22,000,000th *Western Electric telephone*

IT was finished only recently.

But it began well over a generation ago. It began, not in the shape of a telephone, but in the shape of an idea strong enough to be repeated in 22,000,000 telephones – the idea that every Western Electric telephone must be as good as human ability coupled with efficient machines could make it.

This ideal of the founders of the business still inspires the workers of today. That it will continue to be their aim is one assurance that telephone service in America will continue to maintain its supremacy.

Back of your telephone

Western Electric

Since 1882 Manufacturers for the Bell System

by a fullness of the head, especially marked, and made more severe, by coughing or by any other sudden exertion.

The eye is often affected—almost bloodshot in appearance, the face is flushed, and a general nervous irritability accompanies the malady. The sufferer often complains of a sense of pressure back of the eyes—which appear to bulge slightly forward.

Stooping, lifting weights, sitting up suddenly, lying down quickly, hard straining at stool, physical exertion, all are factors in producing or aggravating a high blood pressure headache.

Dizziness and vertigo often accompany headaches of this sort, as also does another group of sensations, such as numbness, tingling, and twitching, weakness in a limb, or in one half the body.

The treatment of high-blood-pressure headaches, in addition to these remedies already suggested for the relief of congestive headaches, consists in keeping the *feet and legs warm, the bowels open, and the head cool.*

Almost immediate relief may be obtained by immersing the body in a full bath at 98° Fahrenheit. This neutral bath will bring the blood immediately to the skin, lower the blood pressure, and greatly relieve the pain in the head.

Rubbing the skin with cold water, or with coarse salt slightly moistened with cold water, will help equalize the circulation; a hot enema is also helpful.

However, for most of these blood-pressure headaches, rest, fasting, and sleep are vastly superior to any other treatment.

HEADACHES due to impoverishment of the blood—*anemic headaches*—are produced by either an anemic state of the blood stream, or result from the fact that too little blood is sent to the head by the circulatory apparatus, as in the case of low blood pressure.

Before these headaches can be permanently cured, the condition of the blood must be improved. Owing to a deficiency in red corpuscles, the blood is crippled in its oxygen-carrying capacity, resulting in under-nourishment, digestive disorders, and poor circulation. If possible, an outdoor life should be led: abundant fresh air and sunshine are of paramount importance. A liberal diet—rich in fats and proteins—cream, butter, eggs, olive oil, nuts, oranges, spinach, and tomatoes, should be used in addition to ordinary foods. Short cold baths, if the reaction allows them, or hot baths followed by a brisk cold rub should be taken every morning; and, if possible, frequent sun baths. Moderate physical exercise and special exercises designed to deepen the breathing and quicken the circulation of the blood are all good. Concerning the treatment of the headache proper, I would recommend the following method: Apply a hot-water bottle or bag of hot salt to the back of the head and neck, and very hot compresses to the painful points in front, or on top of the head. Keep this up for ten to twenty minutes—depending on the severity of the pain. Great relief is often obtained by following these hot applications with cold friction to the head, given by dipping the finger tips in ice water and rubbing the scalp.

Toxic headaches: Most of the headaches that used to be called toxic I have

Those Winning Smiles

That come when teeth are film free

Dentists urging NEW-FOUND WAY to tooth beauty and adequate protection against tooth and gum disorders

Send Coupon for 10-Day Tube Free

(*Above*) THE ANCIENT SPORT OF ARCHERY is immensely popular among Long Island summer residents, among whom are Misses Cabot, Deane and Morrissey. This pictures another situation where Pepsodent-bright smiles are quite apparent.

(*Above*) "THE AMERICAN COLLEGE GIRL," says Consuelo Flowerton, "has come to realize that on glorious health, beauty depends. And on healthy, film-free teeth, as gained by Pepsodent, rests the radiance of one's smile."

(*Above*) SUSAN TALBOT is winning unusual recognition by the excellence of her work. And through the brilliance of her smile, made gleaming white by Pepsodent, she's won innumerable friends.

IF your teeth are dull, lustreless, "off-color," discard old ways of brushing for a while. Try cleansing them of the dingy film ordinary brushing has failed to combat successfully; of the film to which present-day dental opinion charges many serious tooth and gum disturbances.

In other words, do as thousands are doing on dental advice; turn to Pepsodent. Not simply a medicated dentifrice, but a special Film-Removing Agent compounded in collaboration with world's dental authorities to REMOVE FILM FROM TEETH.

Run your tongue across your teeth. Note the film that you feel; that slippery, viscous coating. Note whether your present brushing method is failing in its duty.

Film is the great enemy of pretty teeth and gums, a chief enemy of *healthy* teeth and gums. Film clings to teeth and forms a breeding place for germs. It invites the acids of decay. It is the basis of tartar. And tartar, with germs, are the dentally *proved cause* of pyorrhea. You must remove film thoroughly *twice* daily, say dentists, from your teeth.

Pepsodent is *made* by its makers for that purpose, and urged by dentists. It removes film. It firms the gums. It multiplies the alkalinity of the mouth's saliva. It meets the dominant dental opinion of today in a dentifrice. It is the kind of dentifrice you want in your home.

Motor Protection Must be AUTOMATIC

If you would effectively combat cold—destroyer of motor life and efficiency

SCIENCE has developed—in *automatic* motor protection — a positive and effective means of putting an end to the great annual repair bill now caused by cold. *Automatic* so you *can't* guess—you can't forget.

Your car needs this vital protection at 60° Fahrenheit. That's when cold strikes its first blow.

"Over-choking" warns you

Coughing, spitting noises and delayed starting are the danger signals. Out comes the "choke"—flooding cold cylinders and cylinder walls with raw gasoline. Excessive dilution follows, fouled spark plugs, high gas consumption, extreme carbonization, corrosion and rapid cylinder wear. These are the troubles that bring *big* repair bills—troubles for which cold alone is responsible.

Winterfront regulates motor temperature

The radiator on your car was put there to waste heat—thus to prevent overheating in hot weather. An efficient radiator throws away 35 to 40% of the heat of the fuel. At 60° Fahrenheit there is no heat to spare, yet heat-waste continues through the radiator. Obviously, therefore, there is only one place to efficiently control motor temperature—that's at the radiator, where heat-waste occurs.

Pines Automatic Winterfront completely covers the radiator, and remains closed until the motor is warm enough to operate without damage to vital parts. The shutters then begin to open, *automatically*, allowing the entrance of exactly enough cool air to maintain a scientifically correct temperature.

Closes Itself when your motor needs heat.

Opens Itself when your motor needs cool air.

Important— When your motor stops, Winterfront shutters start to close and are fully closed while your motor is hot.

With a Winterfront on your car, you "warm-up" in seconds. You lose the dangerous "choke" habit because Winterfront eliminates the need for it. Your motor starts quicker and easier with less battery strain. You enjoy a noticeable increase in gasoline economy—snug warmth inside your car — summer-time smoothness and flexibility in your motor.

Put on any car in ten minutes

Pines Automatic Winterfront is sold by automobile and accessory dealers everywhere. It is installed in less than ten minutes without changes of any nature to your car. *Models for all cars—priced $22.50 to $30.00. Special models for Ford, $15; Chevrolet, $17.50; Dodge Four, $20. Slightly higher prices in the Rocky Mountain area and West—also Canada.* Pines Winterfront Company, 424 North Sacramento Boulevard, Chicago.

Pines Automatic Winterfront is the Only Automatic Radiator Shutter on the Market

It is automatic because—

There is no other way to assure you of timely, constant protection against the destroying force of cold. When cold strikes, Winterfront is *always* ready. You can't forget to operate it. There's nothing to remember. Its results are possible *only* because it is *Automatic.*

The motor car dealer who recommends and sells you a Pines Automatic Winterfront is considering your interests first. Take his advice. Your dealer will supply you.

135

PINES WINTERFRONT—*It's Automatic*

come to regard as neurasthenic. Still, we do meet—every now and then—a case that seems to be real toxic headache.

A woman patient of mine, thirty-four years of age, suffers from irregular attacks of this form of headache. In describing it to me she said:

> My headache is not always the same. I usually have pain in the forehead, most severe just above or back of the eyes. It is a sensation of fullness, and sometimes it is more painful when I jar my head, as in walking. The pain often extends up from the forehead so that the whole top of my head hurts, and occasionally I suffer from a painful constriction band extending around the head. Sometimes, when I have a bad headache, the pain is diffused—extending over the whole head.

That is a pretty accurate description of the headache of toxemia. When the blood is toxic the tender nerves and blood vessels of the brain and scalp are much irritated by these poisons.

It makes not the slightest difference how the poison gets into the blood, or what is its origin. A piece of tainted meat, or salad made from some spoiled vegetables, will produce a headache just as promptly and effectively as an overexposure to the July sun or an attack of influenza.

Poisons entering the body from the outside, such as lead, morphin, arsenic, alcohol, ether, and so on; or those poisons resulting from such intricate and complicating conditions as the toxins of pneumonia, typhoid fever, chronic Bright's disease, diabetes, all result in the head pain which may be classified under toxic headaches.

Deficient elimination by the kidneys, together with chronic constipation, is perhaps among the chief causes of the toxic headache. Headache is also often associated with gout.

FATIGUE is often accompanied by headache, partly toxic in character, and partly nervous in origin. The same is true of the headache which results from sitting too long in a stuffy room.

These poisons, of course, go all over the body, wherever the circulation goes, but they produce their promptest and loudest pain outcry in the region where the nerves are most exquisitely sensitive. When your head aches, nine times out of ten your whole body is suffering, but other regions are not able to express themselves so promptly and so eloquently.

Sometimes these headaches result from the gradual accumulation of acid substances in the blood stream, and are promptly relieved by reducing the amount of bread and meat in the diet, and by the temporary use of soda or other alkalis.

Toxic headaches, when due to tobacco, alcohol, tea, coffee, or other poisons, demand, first, cessation of the intake of such articles; and, second, profuse sweating measures, followed by a brisk cathartic. The patient should take copious drinks of water. The diet should consist exclusively of vegetables, fruits, cereals, bread, and milk. Meat and eggs should be temporarily avoided.

People who have a tendency to toxic headaches should employ some form of sweating bath, followed by a cold spray or rub. Immediate relief during an attack can be obtained by the application of cold compresses to the head and a hot

Pipe Smoker Applies Medical Training Selecting Tobacco

Some folks act on "hunches," some on emotion, some on pet theories, and still others on cold logic.

Here is a pipe smoker in the "logic" class. And the reason, as he explains, is that for three years he has been taught to take nothing for granted, but to prove his way as he goes.

427 Lyons Avenue
Newark, N. J.
Oct. 16, 1926.

Larus & Bro. Co.
Richmond, Va.

Gentlemen:

Most medical students by the time they reach the third year of their work have absorbed the scientific spirit. That is, we take nothing for granted unless it has been confirmed by experiment or other reliable means. Prove it, we say!

Some time ago I decided to start smoking a pipe. Choosing the pipe was easy enough, but finding the tobacco to go with it was not so easy. I experimented, trying one tobacco after another. Some would have a fragrant aroma, but oh—what a taste they would leave! Others left my mouth like a furnace. A few reminded me of a poorly ventilated chemical laboratory.

I had almost decided that what I was looking for—a cool, sweet taste and a pleasant aroma—was impossible. Finally, I took the advice of one of the fellows and tried your good ole blue can. Eureka! You can't get me away from it now.

You should call Edgeworth—"money's worth."

Sincerely yours,
Irving H. Plaine

To those who have never tried Edgeworth we make this offer:

Let us send you free samples of Edgeworth so that you may put it to the pipe test. If you like the samples, you'll like Edgeworth wherever and whenever you buy it, for it never changes in quality.

Write your name and address to Larus & Brother Company, 3 S. 21st Street, Richmond, Va.

We'll be grateful for the name and address of your tobacco dealer, too, if you care to add them.

Edgeworth is sold in various sizes to suit the needs and means of all purchasers. Both Edgeworth Plug Slice and Edgeworth Ready-Rubbed are packed in small, pocket-size packages, in handsome humidors holding a pound, and also in several handy in-between sizes.

To Retail Tobacco Merchants: If your jobber cannot supply you with Edgeworth, Larus & Brother Company will gladly send you prepaid by parcel post a one- or two-dozen carton of any size of Edgeworth Plug Slice or Edgeworth Ready-Rubbed for the same price you would pay the jobber.

[*On your radio—tune in on WRVA, Richmond, Va.—the Edgeworth Station. Wave length 254.1 meters.*]

foot-bath. When the bowels are inactive, as they generally are, the patient should take a large dose of castor oil and a warm-water enema.

Reflex headaches: We now come to the pains in the head which are produced by some specific irritation or general disturbance occurring in some part of the body remote from the head—referred pains—or sympathetic headaches.

The behavior, intensity, and location of the pain, in reflex headaches, varies greatly and is, of course, more or less dependent on the offending organ or system which is responsible for these manifestations.

1. SEDENTARY HEADACHE: Many highly nervous and hereditarily predisposed individuals suffer from vague head pains, and distressing head sensations, as a result of sedentary living and the habits of modern civilization.

In other cases it is luxurious living associated with physical idleness and intellectual indolence that brings about that state of body and nerves which is so frequently characterized by chronic headache and backache.

Several years ago, I was completely baffled by a case of persistent headache occurring in a man around forty years of age. All the tests of an exhaustive examination had failed utterly to disclose a single clue to the nature and origin of this man's head pains. He was not toxic and he was not nervous. After a year's study I came to the conclusion his headaches were simply a result of the unnatural sedentary life he was leading. I became more insistent about his getting out of doors and engaging in active exercises. In six weeks his chronic headache disappeared—and it has not returned.

2. HEADACHES OF WOMEN: The periodic headaches of women are best treated after the methods already discussed under the head of congestive head pains.

While headaches of this sort are relieved by cold applications to the head accompanied by the hot foot-bath, they are more intelligently treated by directing remedial efforts toward removing the underlying causes found in the anemic and nervous states, as well as those abnormal anatomical conditions which may be responsible for the unnatural and unnecessary suffering occurring at these times.

3. STOMACH TROUBLE: Chronic indigestion, no matter what the cause, never fails to produce recurrent headaches in certain types of nervous individuals. No doubt these headaches are sometimes more or less of a toxic nature, while at other times they are simply reflex—stomach ache in the head.

Sometimes headaches occur when the stomach is allowed to go too long without food, or if it is denied food at the customary meal hour. In other cases, where there is too much gastric secretion—too much acidity—we have a very definite form of reflex or toxic headache which is close kin to migraine in its general behavior. A tablespoonful of milk of magnesia will frequently relieve a headache of this sort.

These headaches are also greatly relieved by drinking an abundance of hot water; by hot foot-baths and general cold applications to the head, and by copious hot enemas.

4. CHRONIC CONSTIPATION. While the distressing headache so often associated with chronic constipation has been heretofore regarded as a part of the toxic picture of so-called auto-intoxication, nevertheless I believe that much of this constipation headache is purely reflex in nature. That this is true is shown by the already mentioned fact that a warm soapsuds enema is able immediately to cure the headache. Now, if this headache were toxic in nature, the result of poisons circulating in the blood, it is obvious that the blood stream, as well as the bowel, would have to be cleansed in order to effect a cure. The fact that emptying the bowel produces a radical cure is sufficient to prove that the headache was purely nervous or reflex.

5. DISPLACED INTERNAL ORGANS: Many times a sagging stomach, a displaced kidney, or a tumble-down colon may be sufficient to start up reflex headaches.

Many times a headache of this sort is cured by putting a patient to bed for three months on a fattening diet and rest cure; a proper-fitting abdominal support will also cure many of these cases.

6. CONSTITUTIONAL DISEASES: There are a number of constitutional disorders which are often attended by headaches; while among the more common organic disorders which may cause headache the following should be mentioned: Adenoids, diseased tonsils, crooked nasal septum, nasal polypi, sinus infections, ear disorders, eye troubles, diseased teeth, neuralgia, kidney disorders, brain tumors, syphilis, epilepsy, goitre, and pituitary compression.

It is obvious that their cure consists in improving the constitutional defect or the organic disorders which produced them.

IN THE real treatment and permanent cure of headaches, drugs are practically worthless. While they afford temporary relief, they do not get to the root of the trouble. In fact, drugs cure headache in about the same way that chloroform kills the pain attending a surgical operation.

The majority of headache sufferers have a more or less irritated condition of the nervous system, and most drugs only serve to aggravate and perpetuate this condition. The headache remedies which guarantee to cure in a few minutes must certainly contain very powerful drugs, and should be looked upon as exceedingly dangerous compounds. Occasionally a large dose of "headache" medicine kills suddenly by overwhelming the heart or the vital nerve centers.

As a matter of fact, the frequent use of so-called "headache remedies" is no doubt in itself responsible for many cases of chronic and persistent headaches.

VACATIONS are over; the fall with its stimulating weather is here, and most of you feel as if you were sitting on top of the world. Next month, in "Getting Ready for Winter," Dr. William S. Sadler tells you how you can continue to sit pretty all through the artificial life of winter, with its attendant colds and other minor ailments. The article is full of valuable and timely health hints.

DON'T let Headaches cost you money

WATCH a man trying to work when he has a headache—

He fusses over trifles—he snaps at his secretary. Routine tasks he manages to struggle through somehow—but anything of importance he pushes aside till the morrow.

Don't let headaches slow you up. It's expensive and it's unnecessary.

To really correct a headache you must get at the condition that causes it. The simple, natural way to do this is by the use of Sal Hepatica, the standard effervescent saline.

Congestion in the stomach or intestines is a common cause of headaches. Congestion produces excessive blood pressure. The result is dizziness and headaches. Sal Hepatica relieves a headache because it promptly removes this congestion.

Sal Hepatica contains the same health-giving salines as the famous European spas. Not only does Sal Hepatica relieve headaches but it is the approved treatment for many other ills as well.

For Sal Hepatica sweeps away the poisons set up by foods retained too long within the intestines. These poisons may result in indigestion or poor complexion, in hyper-acidity or rheumatism; they are at the root of kidney and liver and other organic disorders.

Keep free of headaches—keep free of the poisons of waste. Take Sal Hepatica promptly when you need it.

Send for the free booklet which explains more fully how Sal Hepatica relieves headaches and other ills.

For booklet please address

In Her Own Country

(*Continued from page 41*)

Eleanor looked into the child's shy eyes, and then caught the woman's work-roughened hands in her own.

"Oh, I'm so glad you came!" she said impulsively. "Did you bring anything Mary has done?"

The woman reached for the basket. From layers of protecting newspapers she drew out the well-thumbed drawings.

Eleanor leafed through them. Childish of course and out of perspective, but the sure, subtle lines and curves that proclaimed skill *were there*.

She looked into the woman's anxious eyes.

"They're good," she said. "She has the gift. If only—"

Then she stopped with a small cry. As she had glanced down again at the papers, another, unnoticed before, had slipped into view. She picked it up. It was a strong, crude drawing of the old Black Oak! The woman laughed nervously.

"It was foolish of me to put that one in. That's one I drew myself long ago. I just brought it, I guess, to show you I liked the old oak too. But my, I can't bear to look at the spot now since it's been cut down."

Eleanor's throat felt tight.

"You *knew*, you recognized it!"

"My, yes! Who wouldn't? The minute I set my eyes on it in the paper I said, 'Well, who'd ever have thought that the old Black Oak would hang in a picture gallery in Paris!' It just seemed somehow to bring me nearer to . . . to . . . oh, everything I've thought about, and couldn't ever have. . . . It made me feel almost as if I was there too."

ELEANOR leaned forward, her dark eyes caressing the older woman's face.

"Would you like me to tell you about it, just as I saw it, just as it looked to me?" she breathed.

"Oh, if you *would!*"

And Eleanor told them. There, in the big quiet kitchen, she poured out the story of beauty that she had longed to tell.

There was no effort. She forgot her outline. It was as though all the scenes her own artist soul had feasted upon were now spread out afresh to satisfy the hunger of her listeners.

"Look—Paris dreams—nocturnal, nebulous,
Under the blue moonbeams hung from wall to wall—
Yonder, behind her veil of mist, the Seine,
Like a mysterious and magic mirror,
Trembles. . . ."

She quoted the words with her heart in them, and the woman's face grew alight and the child's deep eyes were like stars.

She poured out her stored memories, gay and somber, but all shining now with the glory of another's understanding.

Time was forgotten. The woman's shabby hat slipped over her ear; the child's dusty hands clasped Eleanor's Paris gown. What were externals? They were living together the three golden years in the city of artists!

When Eleanor stopped at last, breathless, apologetic, the woman rose to her feet. Her eyes were full of tears.

"You don't know. . . . I couldn't ever tell you what you've done for me to-day. I'll have something now to think about as I go 'round at my work. I'll have something now all my life long to—to wonder about. And Mary, she'll never forget this day. I can't thank you."

"Wait," Eleanor said gently, and hurried up the stairs. From the bottom of her trunk she drew out her finest sketch, washed in dim colors. It was exquisite. It would have brought a price in New York. She had saved it to show to Willetsburg.

She carried it back to the woman, who gave an involuntary cry of delight.

"It's for Mary," Eleanor explained, "and here," catching up a pencil, "I'll write on the back of it something she must read every day. *You* will understand what it means."

She wrote in her high, clear hand:

Beauty! Old yet ever new.
Eternal voice and Inward Word.

She showed them out the front door as though they had been of the blood royal, and as she spoke her last good-by to the woman, she whispered:

"And when Mary's old enough, I'll see that she gets her chance!"

WHEN they were gone, Eleanor stood on the porch marveling at the change in herself. All the hurts had gone from her heart as though they had never been. All the warm gladness of life was leaping once more in her veins. For she knew what she must do. She must leave Willetsburg to-morrow. She would come back often; but never again for long.

For she had work to do! Blessed work! All that that poor woman's coarse and roughened hands had not been able to do, was now hers to accomplish. All that hundreds of others like her had been denied—they who felt the beauty in their souls and yet could not create it—all this was hers now to give to the world. It lay upon her like a sweet and glorious burden.

Suddenly up the walk came Bess Laird.

"I just blew in," she said, "to say I'll take you 'round to Belle's to-morrow in the car."

Eleanor roused herself.

"I'm very sorry, Bess, but I'll have to cancel all the rest of the parties. I'm leaving for New York to-morrow."

"Why, Eleanor, are you *crazy?* And Helen's luncheon on Thursday! Why, you . . . why, you *can't* go!"

"But I must. I *must* go in the morning."

The rest of the conversation was duly reported to all the old crowd before Bess slept that night.

"And, you know, I think Eleanor's *getting queer!* They do sometimes, artists and writers and things. I said to her, 'Well, why did you just decide now you had to go back? Did you get word?' And she looked straight past me, honestly, as if she didn't see me, and she said, 'Yes, I did. The *inward word!*' Now can you make any sense of that? I ask you!"

How I Tamed My Temper

(*Continued from page 15*)

This rule has at times been very difficult to follow. There is nothing harder for a man to bring himself to do than apologize, especially if he knows he was only half or less than half to blame, and that properly his antagonist ought also to apologize for his share.

But it is this very unpleasantness connected with the humiliation of a public apology that gives the rule its greatest value. After a few experiences, you will remember subconsciously, during any argument, that if you let yourself go you must apologize for it by and by. And knowing in advance that you are going to apologize if your speech becomes too intemperate makes for great temperance in language.

The very first time I applied this rule was of course the hardest.

I was in a public billiard room, playing pool. My opponent named a shot, drove his cue-ball into a difficult combination, and the ten-ball dropped into a corner pocket. I picked it out and started to "spot" it. "Here!" he said, "what are you doing that for? I called the ten-ball in the corner."

"You called the two-ball," I answered.

There was no money at stake save the price of the game, and no reason for me to take it seriously, except that I had been playing in "hard luck"—meaning I wasn't playing as well as usual. He had beaten me two or three games.

"You may have meant the ten," I insisted, "but you said the two."

"No;" he replied; "you may have misunderstood me, but—"

I dropped the ball into the pocket whence I had lifted it and said, pointedly, "Anybody can win a pool game that way!"

He was several years older than I and had good control of his temper. To all intents and purposes, I had publicly accused him of cheating. He flushed, looked at me hard for a second, then said, very quietly, "If that's the way you feel about it, we'll call it off."

He racked his cue and paid for the game, although I was behind him in the score.

I left the pool-room and went for a walk.

The square in which that place of business stood was very long on two of its sides, and I walked completely around it, passed the pool-room door, and went around again. I still believed he had announced his intention of pocketing the *two-ball*. My reason, however, told me that, if he had done so, it was a slip of the tongue of which he was not conscious. He meant the ten, and he honestly thought that he had said "ten."

To apologize before all those acquaintances who had ceased playing to listen to our dispute was hard. And for precisely that reason, if no other, it had to be done.

I went into the room, raised my voice sufficiently for everybody to hear, and asked them to take note that I had not meant to imply that Frank Smith was not a square player, and that I apologized.

"Why, that's all right," said Frank. "You needn't have done that. We all get hot under the collar once in a while. I ought to call my shots more clearly, anyway." Then I insisted on reimbursing him for the game, and he was wise enough to let me do it without more than the most perfunctory protest.

And that was that. Frank Smith was my good friend for as long as I remained in that town. And if I lost anybody's respect by that *amende honorable*, I never saw any evidence of it.

When I was only partly to blame, and apologized, either the other man had to apologize also for what he had said, or the sympathy of the innocent bystanders, who may have more or less sided with him in the beginning, tended to shift and be with me. American men, by and large, are likely to be fair and just in their verdicts. And most of them, whether or not they ever themselves apologize for error, are inclined to think no less of the man who does.

There frequently, of course, is some little man present who, if you do not recognize an opponent by getting angry with him, will say you were a coward and "took it;" or, if you do get into a row and later apologize for your share in it, will call you "yellow" and a "quitter." But my observation, which is based on a wide acquaintanceship over a long stretch of years, is that those men are persons whose opinions count for very little.

I once gave a Boston editorial room, where I was managing editor, the shock of its life by apologizing to a desk editor whom I had unreasonably called down the night before. Sharp words are not uncommon in the heat of a newspaper work day, and no experienced newspaper man resents them, provided they are just; but mine had been unjust. I knew how I had felt when a boss whom I couldn't answer back had called me down unfairly, and I saw no reason why, because I had a little brief authority, I should not make public apology to a subordinate.

My editor-in-chief, when we went out together to supper at midnight, had heard of the incident. He said, mildly, "That little speech you made to the staff was of course very honorable, but I'm afraid you've shot your discipline all to smithereens."

I was managing editor of that paper for several more months, and after that I was city editor in charge of the second largest editorial staff in the city of Boston, and if any boss ever had more enthusiastic, hard-working, loyal workers than I had, with a greater *esprit de corps*, I have never come in contact with him.

Beating an ingrained tendency of disposition takes a long time of course; I was no "changed man" after that night of bitter self-appraisement following the fight with the young thief in my room. No miracle was worked. However good rules may be, they won't carry themselves out.

Few men have more than three or four real friends, anyway. But control over one's temper will give every man a far

A COLLEGE education is estimated to be worth $150,000 to the man who has one. Will you be able to afford a college education for *your* son or daughter? This page tells how you *can*.

How to get the things you want

THOSE children of yours—how your hopes and plans are wrapped up in them! You want to give them the best chance in the world for happiness and success; you want to be sure that they will have an education adequate for the demands of modern life.

But a college education costs money. When the time comes, will you be able to afford it?

You can make certain *right now* that your children will go to college! All you do is deposit a few dollars a month with us—so little, really, that you'll hardly miss it. And when the time comes, your boy or girl goes to college and it's all paid for.

We have just published a little booklet that tells all about it. It's rather an unusual book for a life insurance company to put out. For it talks, not about death, but about *life*—about getting the things you want *while you live;* about having the most possible fun with the least worry.

Wouldn't you like to have a copy? Sending your children to college is only one of the things it tells about; some of the others are listed at the bottom of this page.

Read the list. These are things you want, aren't they? The booklet tells you how to get them.

Send for it today.

PHOENIX MUTUAL LIFE INSURANCE COMPANY

Home Office: Hartford, Conn. • • First Policy Issued 1851

TO GET THESE . . . MAIL THIS

HERE are just a few of the things you can do under the Phoenix Mutual Plan:

1 RETIRE with an income when you are 60 or 65.
2 REALLY own your home.
3 SEND your children to college.
4 CREATE an estate.
5 MAKE sure your income will go on even though you become totally disabled.
6 LEAVE an income for your family.

PHOENIX MUTUAL LIFE INSURANCE CO.
293 Elm Street, Hartford, Conn.

Send me by mail, without obligation, your new book, "HOW TO GET THE THINGS YOU WANT."

DATE OF BIRTH .....

wider circle of friendly acquaintances. Friendship, or the close acquaintanceship that passes for it, is half made up of overlooking or forgiving the human failings of those one likes.

After these years, being now the governor of my temper, I will not be drawn into any quarrel unless the issue is so certainly a question of right and wrong, as I see it, and the right so completely on my side that I am willing to have an irrevocable breach. And such a situation doesn't arise in the life of the average man once in a decade.

Let no one understand this to be an argument for not being as violent as necessary when there is no other honorable or practical way out. Even the Founder of Christianity once became angry and hurled the money changers and merchants out of the great temple that had been called a house of prayer and had become, as he put it, "a den of thieves."

But His anger was not over any petty matter of personal precedence or prestige.

One of the greatest of Americans could keep his temper when a group of citizens came to him with the tale that his Secretary of War had said, "Lincoln is a fool." He could smile and say, "Well, Stanton may be right; he often is." Because Stanton was a valuable servant to his country, and in Lincoln's mind that was the important thing.

I KNOW a man sixty years old who boasts that he has "always said what he meant"—meaning he has allowed his temper to ride him masterfully—and that he has never once in his life apologized to anyone. Not a month ago this man's closest and most friendly business associate for a dozen years said to me, regretfully, "So far as I know, he hasn't one friend in the world." And the speaker did not except himself.

I have known for some years another man, who once said to me, "No man can say anything I don't like in my hearing and get away with it, whether he's my boss or anybody else. That's the kind of man I am! I tell 'em all where they can get off."

He is in many respects a likable man, and he has friends. But he ought, with his education, experience, and ability, to be earning, at the age of fifty, at least eight or ten thousand dollars a year. Instead, he is holding with discontent a job that pays him perhaps sixty dollars a week.

Well, it is seven years now since I have experienced a brain storm, and as that was a justifiable one and therefore shouldn't count against my score, I can truthfully say that I haven't been licked by my temper for sixteen years.

And during the past year, since the record stood at fifteen, I have thought several times of writing this little piece, with the hope that it might prove helpful to someone else who was finding his or her disposition hard to control; but each time I have hesitated.

"How do you know you've really got it under control?" I would ask myself. "As the years pass you aren't tempted as much as you used to be. How do you know, if you really had occasion to lose your temper—if something should happen which almost, but not quite, ought to make you lose your temper—how do you know that

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

you wouldn't blow up with a loud crash? Suppose you were to write an article like that, and then something should happen to prove that you couldn't keep control of yourself after you had boasted about it, how ridiculous you would be."

And then, several weeks ago, I had the test. It wasn't at all an important matter, but it was an exceedingly exasperating one, and in the old days I would have exploded spectacularly.

I thought of all the smart and cutting things to say that would have given me momentary satisfaction and turned a small matter into a big one—and I didn't say one of them. My pulse didn't increase one heartbeat above normal. In the face of really great provocation, I kept my temper absolutely and completely.

So now I know that I have it mastered. I know now that when one says his temper is "ungovernable," he is mistaken. Any man can learn to control any temper he may have.

The king who is reputed to have said more wise things during his lifetime than any other man in all the thirty centuries since, included this in his proverbs:

"He that is slow to anger is better than the mighty; and he that ruleth his spirit than he that taketh a city."

My Worst Fault and How I Overcame It

Prize Contest Announcement

"OPEN confession," says an old proverb, "is good for the soul." J. Frank Davis has started the ball rolling with his article "How I Tamed My Temper." We may not all be hot-tempered, but, being human, we all have our faults. The contest this month, therefore, is "My Worst Fault and How I Overcame It." Maybe you remember stammering and blushing and wishing to crawl into a closet when the spotlight shone on you for a minute. Or perhaps you used to be always late for appointments, until your pocketbook, pride, or feelings got a severe jolt and you decided to cure yourself of that habit. Maybe you had the habit of being evasive and dodging issues, before you learned that it pays to meet a situation squarely. Cast back in your memory for your worst fault, and tell us how you overcame it. If you haven't overcome it, tell about the fault, anyway, and what it has cost you in happiness.

For the best letter of not more than four hundred words we offer the following prizes: $30, first prize; $20, second prize; $10, third prize. Competition closes October 20th. Winning letters will appear in the January, 1928, issue.

Address "Fault," Contest Editor, THE AMERICAN MAGAZINE, 250 Park Avenue, New York City.

Contributions to this contest, and any enclosures, cannot be returned, so you must make a copy of your contest letter and of any enclosures, if you want to preserve them. Manuscripts and inquiries not connected with the contest must be sent under separate cover to the Editor of THE AMERICAN MAGAZINE.

"—this luncheon will cost you more, Bill!"

"I've Said Good-bye to Indigestion!"

Both buyer and salesman had often lunched together before, but this time the buyer said: "Today I'm going to eat heavily."

"Great—but where did you get the new appetite?"

"Well, Bill, I've found a way to enjoy bigger and better lunches."

"How is that?" said the other.

"Why you see I now know how to fix my old enemy—indigestion. I just eat a few Life Saver Pep-O-Mints after each meal and presto—no more discomfort and suffering. I've said 'Good-bye' to indigestion."

* * *

Why suffer from indigestion when you can relieve it so easily by using the same old method that our grandfathers used—peppermint?

Use it in this delicious new form—Pep-O-Mint Life Savers; the little candy mints with the hole.

Try them after meals when you first feel that heavy logy feeling coming over you or to relieve the irritating distress of indigestion. Pep-O-Mint is displayed at all good stores so that you may help yourself.

Six popular flavors: Pep-O-Mint, Wint-O-Green, Cinn-O-Mon, Lic-O-Rice, Cl-O-Ve, Vi-O-Let. Five cents a package everywhere.

They are "life savers"—

—as an aid to digestion

P. S.
Have you tried LIFE SAVER FRUIT DROPS? Three refreshing flavors—Orange, Lemon and Lime. 5c a package.

Remember

You can't paint a house with *"apple-sauce"*

SOME folks say that "apple-sauce," the popular term for blarney, is a blessing. It makes one feel good even though it is obviously untrue.

But when someone tells you that a "cheap" paint will do a wonderful job—save you money—outlast good paint and so on—*that* kind of "apple-sauce" *is no blessing.*

As a matter of fact, "cheap" paint isn't cheap at all. The *low price* is possible only because the paint is poorly made *of poor stuff.*

Compare the formulas

If you want to save money, demand to see the formula of any "cheap" paint you are tempted to buy. Compare it with the ingredients of SWP House Paint—the world's standard of quality for half a century.

Note that in SWP Outside Gloss White, for example, there is 90 per cent of *white lead carbonate, white lead sulphate* and *zinc oxide,* in a scientifically *"balanced"* formula.

To assure superior quality and unvarying uniformity, Sherwin-Williams mines and makes its own special white lead carbonate, white lead sulphate and zinc oxide exclusively for SWP House Paint.

There's a **Joker** *in the "cheap" Paint can*

Now examine the "cheap" paint formula. Note that it contains only 50 per cent or less of the basic ingredients—white lead and zinc oxide. Note the *large percentage* of useless material—fillers—mere "apple-sauce" used to fill the can.

There you have the reason why "cheap" paint can be sold at a low price, also why it is so costly on the wall.

The Master Touch

But quality of ingredients alone does not make a fine house paint. Formula alone does not

Digitized by Google
Original from
STATE UNIVERSITY SYSTEM OF FLORIDA

Up-to-date painters everywhere are using SWP House Paint. They realize that its beautiful colors—creamy smoothness—brushing ease—covering ability—and durability—can only be produced by scientific processes and modern machinery.

make a fine house paint.

Even formula and ingredients combined do not assure a fine house paint like SWP.

The SWP "balanced" formula is openly printed—and has been for years. Every paint manufacturer in the world, we imagine, has studied it.

Yet today there is only one SWP House Paint—the accepted leader throughout the world.

Why is this? Because there is an element in every can of fine old SWP House Paint that cannot be duplicated or imitated successfully.

It is the *Master Touch*—that inimitable touch of superiority with which the few great scientists of the world have been endowed.

Edison, the wizard of electricity, has it. Burbank, the great American horticulturist, was blessed with it. Marconi, discoverer of wireless, has it.

And so, too, the scientific men at the head of Sherwin-Williams' laboratories add to the fine materials of SWP House Paint the Master Touch that has set it above and apart from *all* others—as the leading house paint of the world.

This Master Touch of science is evident in the quality of the raw materials made by Sherwin-Williams. In the delicate "balancing" of ingredients. In the wonderful power-driven machines which mix and grind SWP to its creamy-smooth texture. In the critical analyzing, testing and proving which daily guard and control each step in the SWP process.

This is the vital element of SWP which no "cheap" paint even *attempts* to have—and which no paint regardless of price can successfully imitate.

Naturally, no individual can equal, by hand, the scientific skill and modern machinery that produce the creamy texture of SWP.

Gallon price no guide to cost

When you hear or read that some "cheap" paint will save you more money than SWP House Paint put it down as "apple-sauce."

Cost of paint is figured by the job—not by the gallon. A gallon of SWP House Paint covers 360 square feet, two coats.

Will a cheap paint do this? *No*, Sir. If you get 250 square feet per gallon, two coats, you will be doing well.

SWP costs more per gallon. But by the job—it costs no more and often less, *because fewer gallons are needed.* And think of the difference in the *quality* of the paint film.

Greater beauty—two to five times longer life

As to permanence there is no comparison. SWP House Paint, due to the extra-fine quality of Sherwin-Williams Linseed Oil, forms a tough, durable film *that weathers very slowly.*

SWP colors, famous the world over for rich beauty, *do not fade or* wash out.

On the wall SWP House Paint lasts two to five times as long as the average "cheap" paint. And it costs only about half as much for repainting.

"See Paint Headquarters"

Before you let "cheap" paint get the laugh on you, see your SWP dealer—"Paint Headquarters."

Get his advice. Compare his estimate with an estimate of any "cheap" paint. Decide by what you learn.

If you want color cards, or a copy of the famous Sherwin-Williams Household Painting Guide, write us.

At noon—each day

JAPAN TEA

Relax as you enjoy it

At luncheon, when you've had quite enough to eat, give yourself just ten minutes more to *linger* over a cup or two of steaming, fragrant Japan Green Tea.

Drink it slowly. Relax as you enjoy it. Taste with leisurely appraisal its fine full-bodied flavor.

Then, all through the afternoon, note the result. You're fresh and wide awake.

No mid-afternoon slump of energy. No four o'clock fatigue.

Japan Green Tea is tea at its best—tea in its natural state, uncolored, unfermented, with all the flavor-laden juices of the fresh leaf preserved by immediate sterilization.

Specify Japan Green Tea when you buy. Packaged for the home under various well-known brands. Several grades and prices. The best you can buy will cost you only a fraction of a cent a cup

The Biggest Thing That Lindbergh Has Done

(*Continued from page 16*)

or even more. It is a conservative statement to say that the offers he received within the first few weeks alone amounted to more than eight million dollars.

"This includes only the propositions in which he was guaranteed a fixed sum by responsible individuals or companies. He had dozens, perhaps hundreds, of other invitations to join in business enterprises of all kinds.

"Of the definite contracts offered him, the largest ones, in the amounts guaranteed, were from motion picture producers. One firm went as high as $750,000—and probably would have gone higher. The most amazing offer was one for $2,500,000 for a flight around the world.

"HE COULD have made several million dollars of 'easy money'; yet he let these chances go, without apparently feeling a pang of regret. For instance, a movie concern offered $240,000 for not more than forty minutes of his time!

"They asked him to do a very simple and not undignified thing: merely to stand in front of a camera, which would register both sound and motion, and to read the first account of his flight as it was published in the New York 'Times.' It would be hard to find an easier way of making a quarter of a million dollars! Yet Lindbergh unhesitatingly declined to take it.

"He never even looked at most of these movie offers. When they were read to him he would make only one brief comment: 'I'm an aviator; not a movie star.'

"He knew what he was and what he wanted to be. And, like a good golf player, he everlastingly 'kept his eye on the ball.'"

MacDonald's estimate of the business offers which Lindbergh received covers only the first few weeks after the flight to Paris. I was told of a later one, of half a million dollars, from a national organization of women.

This also was a motion picture contract, but quite different from the purely commercial ones. The women, it seems, wanted a picture which would be an inspiration to the boys and the young men of America. This new world hero, clean, modest, courageous, and victorious, was the ideal they wanted to set up in the mind of youth. But Lindbergh, who had refused to be made into a movie sheik, declined also to pose as the ideal hero.

The first contract he did sign was with G. P. Putnam's Sons, Publishers, for the publication of "We," the book in which he tells his own story. Commander Fitzhugh Green, who obtained this contract for Putnam's, told me what happened.

"We knew we had to meet strong competition," he said. "Other publishing firms were bidding for the story and some of these bids were superficially more attractive than we were willing to make. Nevertheless, I went down to Washington, hoping for a chance to present our case to Lindbergh after he reached there.

"When I arrived at the place where the 'Memphis' was to dock, I found a crowd composed of distinguished government officials, diplomats, army and navy officers, and famous people from all over the country. I began to realize then what I was up against; and I didn't try even to speak to Lindbergh.

"But I knew that MacDonald had crossed with Charlie on the 'Memphis.' I knew that he had been very close to Lindbergh and that Lindbergh liked him. Fortunately, I was acquainted with Mac, so I waited to greet him when he came ashore.

"We had barely shaken hands, however, when he practically 'passed out.' The strain and overwork had made him really ill. For forty-eight hours I stayed with him, missing all the big events and not even laying eyes on the man I had gone down there to try to sign up.

"Lindbergh had given MacDonald a card bearing written instructions that Mac was to be allowed to see him whenever the card was presented. As soon as my patient was able to be up, we drove to the temporary White House, showed this card, and were admitted.

"After Mac had finished his business with Lindbergh, he introduced me. We had a fifteen-minute talk, and I came away with Lindbergh's promise of the book. When he reached New York the contract was signed.

"The way in which the whole business was put through gives an interesting slant on his character. The reason he gave me his attention in the first place was because he had confidence in the man who brought us together. That was the best passport I could have had.

"Neither then nor later was there any argument about money. He accepted, without discussion, the terms we offered. But before signing the contract he had his representative investigate the standing of our firm. He wanted to be sure of being associated with a company which had a dignified and honorable reputation.

"YOU will laugh when I tell you what were the only things he did discuss. They were syntax, unity of paragraphs, and style! He hated the idea of writing a badly-constructed book just as he would hate to fly a badly-constructed plane.

"'I'm not a writer,' he said. 'But when I was in school, I was taught that a sentence must have a subject and a predicate. I was taught that all of a paragraph must be about one thing. And I was taught that there is something wrong with the style if you can't read a thing aloud and take breath at the same time.'

"Lindbergh didn't seem to be thinking of what he was going to get out of the job. His only concern was to make it a *good* job of workmanship.

"He is quick to catch an idea; but he doesn't waste words talking about it. When we went over the plan of the book together, our conversation—if you could call it a conversation—was a queer one.

"After an airplane has been put in condition, two men go over the list of all

ll the mechanism is in here

It's all in a single hermetically sealed casing inside these coils . . . . . there's no machinery underneath, none in the basement

OU will notice that the unit of the new General Electric frigerator is on top of the cab-t. There are many important sons why it should be there. neral Electric engineers, in fifteen rs of intensive research, found t the top-unit design was most icient . . . and most economical.

ith this arrangement, no heat is nerated under the refrigerator. It rises above. This cuts down cur-t consumption. And the air-oled coils also play an econom-l part in the running of the neral Electric Refrigerator.

e top-unit means no installation oblem. All the mechanism—th a permanent supply of oil—enclosed in one hermetically aled casing. This is merely low-ed into the top of the cabinet. ere is no plumbing or assem-ing. There are no belts, pipes, drains or stuffing boxes. There is a constant circulation of air through the coils which actually prevents dust from settling.

This simplified refrigerator is unusually quiet. It is very economical. It is generously roomy because, with a given over-all size, a minimum of space is occupied by the freezing chamber. Even the smallest model—the five cubic foot size—has a shelf area of nine square feet. Each refrigerator is guaranteed by General Electric. There are many models. You will want to see them before you decide. Let us send you the address of the dealer who has them on display and booklet 10-A which is interesting and descriptive.

Old Briar

TOBACCO
THE BEST PIPE SMOKE EVER MADE!"

"My happiest discovery in fifteen years Old Briar Tobacco!"*

Here are words of sincere appreciation that reach right out to every pipe smoker. Every day, from everywhere, men are writing that Old Briar Tobacco is bringing back to them all of the old pleasure, solace and contentment of pipe smoking.

It is the superior quality of Old Briar Tobacco that makes men—thousands of them—enjoy their pipe smoking as they have never enjoyed it before.

Light up your pipe filled with Old Briar Tobacco. Draw in the ripe, blended fragrance and aroma of its selected leaf. Taste Old Briar's full natural flavor, its rich body. Smoke it awhile. Then notice how cool it is—and how smooth!

It has taken years of scientific knowledge in the art of mellowing and blending and generations of tobacco culture to produce Old Briar Tobacco. Step by step Old Briar has been developed—step by step perfected!

Of all the pleasures man enjoys, pipe smoking costs about the least.

*The above unsolicited praise is from a pipe smoker who has tried *"them all."*

TO DEALERS: *Old Briar is sold in sealed Pocket packages at 25c and sealed boxes at 50c, $1.00 and $2.00 If your jobber has not supplied you, write us and we will send you a supply by prepaid Parcel Post at regular Dealer's prices.. Every box and package of Old Briar has our unlimited guarantee.*

IF YOUR DEALER DOES NOT HAVE OLD BRIAR

Tear out this coupon and mail to:
United States Tobacco Co., Richmond, Va., U. S. A.

SPECIAL OFFER: So many thousands of pipe smokers have found so much extra enjoyment in a pipeful of Old Briar, it is a guarantee to you that you, too, will find it is the best tobacco you ever smoked. On receipt of this coupon with your name and address, we will mail you the regular 50c size of Old Briar Tobacco. In addition we will send you a 25c package of Old Briar—extra—if you send us your dealer's name. Send no money, but pay the postman only 50c when he delivers the tobacco.

the parts. One man reads the list, item by item. To the reading of each item, if it has been properly taken care of, the other man responds, 'Check;' and this is indicated on the list.

"That was what Lindbergh did. As he went over the points in the outline for the book, he responded to each one with this brief 'Check;' the workman's way of saying, 'That's all right.' It was all he said, but it was enough.

"It had been planned, for two reasons, to have an experienced writer help in getting the story on paper. In the first place, early publication was desirable; and nobody believed that a man who was scarcely allowed time to eat and to sleep could possibly manage the slow business of writing thousands of words.

"In the second place, an experienced writer might be able to turn out a more readable book. Charlie could *tell* the story in a quarter of the time he would need for the mere act of writing it. The experienced man could get it all down and would know just how to handle it. He would be a kind of super-secretary. The story itself would be Lindbergh's and he would sign it. This is the method usually followed in similar cases.

"At first he agreed to it. Then, although he realized that he might lose money by his decision, he changed his mind and determined to write every word of the book himself.

"He admitted that this would delay publication, and that this delay might make him lose thousands of dollars. He knew he couldn't write as brilliantly as the man who was to have been his collaborator. But it was contrary to his instinct to claim, as his own achievement, something which was not absolutely and entirely his.

"Every word of 'We' was written by Lindbergh's own hand. I have sat in the room with him while he worked. During the terrific first week in New York, in the midst of that unparalleled excitement, he would snatch every possible hour, shut himself up, and write.

"In another room, a score of important men would be asking to see him. Many of them wanted to offer him positions which the average young man would consider the chance of a lifetime. Lindbergh didn't even want to be told that they were there.

"Once, when I was talking of the difficulty of his finding time to write the book, he replied: 'Don't worry! I said I'll do it—And I *will* do it!'

"A GOOD many people were disappointed because he and his mother made no public display of feeling when they were together. In reply to a comment, almost a complaint, about this, Lindbergh merely replied: 'Mother and I understand each other.' He seemed to think that was all that was necessary.

Commander Green had been exceptionally close to Lindbergh, so I asked him to sum up his impressions.

"He is a clean chap," said Green thoughtfully; "clean, courageous, modest, honest, and with remarkable concentration of purpose. He instinctively wants to stand on his own feet—and he keeps his feet on the ground."

In the amazing details of the Lindbergh affair must be included an unprecedented eruption of poetry. One New York news-

"You Must Have Spent *Years* on Shorthand"

"No; *I Learned it in 6 WEEKS!*"

HER employer laughed aloud. "Six weeks! You're joking, Miss Baker. No one could learn shorthand in six weeks."

"But I *mean* it, Mr. Chapman. When I came here to work for you I had only studied shorthand for *six weeks*."

The president of the large corporation hesitated; the girl was evidently sincere; she expected him to believe her. But *six weeks!*

"You're fooling, of course, Miss Baker. You have been with us not more than a month and you are by far the most competent secretary I ever had. Surely you don't expect me to believe that you gained your present speed and accuracy in only six weeks! Why—a great many young ladies who have been here with us, had studied shorthand for ten months or a year or more and still they made a great many errors."

"That wasn't their fault, Mr. Chapman. That was the fault of the system they were taught. Old fashioned shorthand requires months of hard study and practice and even when it is mastered it is difficult to read. But Speedwriting is very easy. I—"

"Speedwriting!"

"Yes. Haven't you ever seen my notes? You can almost read them yourself. See—"

The big business man took his secretary's note-book.

"Why, this is remarkable, Miss Baker. It's in simple A.B.C.'s!"

"Yes, surely. That's the secret. That's how I learned it in so short a time. *Anyone* can learn Speedwriting. There are only a few easy rules. There are no hooks or curves; every 'character' you use is a letter you already know—one that your hand needs no special training to make."

"And it's called *Speedwriting?*"—Mr. Chapman was more than interested.

"Yes. Isn't it simple? Can't you read that? See—here is the first letter you ever dictated to me. Those notes are a month old, but I can read every word of them. That is another advantage Speedwriting has over all other systems—notes *never* get cold. And my notes are just as plain to another Speedwriter as your handwriting is to one of the salesmen."

"Well, that's the most remarkable thing I ever heard of. I could use that myself at board meetings and a dozen other places—You can write it rapidly too!"

"You have never dictated too fast for me yet, and I haven't had to retype a single letter since I've been here. One boy I know who studied Speedwriting *in his own home*, took *court testimony* at the rate of 106 words a minute after only 15 hours of study."

"Miss Baker, where can I get some literature on Speedwriting? I am very greatly interested. I really believe I'll take it up myself!"

"I answered an advertisement in a magazine and Miss Dearborn sent me a booklet. I'm sure she will send you one if you want it."

"I certainly do. Will you take care of it for me!"

"Yes sir!"

Two months later every stenographer in Mr. Chapman's organization was a Speedwriter!

Speedwriting
The NATURAL SHORTHAND

Tens of thousands have been freed from the drudgery of the old fashioned methods of learning and writing shorthand by this marvelous new system. Speedwriting may be written with a pencil or on a typewriter; it can be learned in a third the time needed to master any other system; it is more accurate, and it can be written with amazing rapidity.

A FREE Book
Describes *Speedwriting* Thoroughly

Put this coupon in the mail tonight. It will bring you an illustrated book full of examples and stories of successful Speedwriters all over the world. No matter *what* your need for shorthand may be—you can fill that need *better* with Speedwriting.

Never mind looking for the scissors, just *tear* the coupon off and mail it to

Could you use an extra $1000.?

An extra thousand dropped in your lap! . . . How many wonderful ways to spend it! A new car! A trip abroad for two! . . . Of course you could use that extra thousand. So, right now, make up your mind to be one of the winners—

1001 *cash prizes* *in* POSTUM'S $10,000 *Contest*

Three big contests in one! Three first prizes of $1,000 each! 998 other prizes! No tricks! Just a little easy writing! Read the details. They may mean a $1,000 to you!

The 30-day-test contest

THOUSANDS have made this famous test—used Postum in place of caffein beverages for a month and noted their progress—and become regular Postum users forever after! Hundreds had written us about it before this contest started. How wonderful it was to find a hot drink that gave them everything except regrets! Now we want to hear from *you*—whether you are a life-long user of Postum, or only a beginner. The best letter wins $1000! 333 additional cash prizes!

The Instant Postum made-with-milk contest

Teachers and mothers throughout America tell us Instant Postum made with milk is the best hot drink for boys and girls. A drink made of whole wheat and bran, plus all the body-building nourishment of milk! Healthful—easy to make—and loved even by the children who "don't like milk!" Tell us why *you* think Postum is the best hot drink for children! $1000 for the best letter. Hundreds of other prizes!

The "How I make Postum" contest

Some people are enthusiasts for Instant Postum, prepared instantly in the cup with boiling water or hot (not boiled) milk. Others swear by Postum Cereal—prepared by boiling, or in a percolator. Then opinions differ on the proper strength of the drink—whether it should be strong, weak, or "medium." As with other hot drinks, a little experimenting is needed to suit the individual taste. Hundreds of cash prizes for the best letters on this subject—beginning with a $1000 prize!

Read the rules on this page—then enter the contest while there is yet time!

Subjects and Prizes

1. **"What the 30-day test of Postum has done for me."**
2. **"Why I think Instant Postum made with milk is the best hot drink for boys and girls."**
3. **"How I make Postum—and why I like it best made *my* way."**
   (Letters on any subject not to exceed 300 words in length)

For the best letters on *each* subject: First prize, $1000; second, $500; third, $250; fourth, 3 prizes of $100 each; fifth, 4 prizes of $50 each; sixth, 5 prizes of $25 each; seventh, 10 prizes of $15 each; eighth, 25 prizes of $10 each; ninth, 35 prizes of $5 each; tenth, 35 prizes of $3 each; eleventh, 68 prizes of $2 each; twelfth, 146 prizes of $1 each for first and second subjects, 145 prizes of $1 each for third subject.

RULES

1. You may write on any one or all of the subjects, and submit as many entries as you care to.
2. Write the subject at the top of the first page of each manuscript you submit.
3. Write plainly on one side of the paper only. Neatness counts.
4. Write your name and address on each manuscript.
5. In case of ties, each tying contestant will be awarded the full amount of each prize tied for.
6. Contestants agree to accept the decisions of the judges as final.
7. No communications will be acknowledged, and no manuscripts will be returned.
8. Employes of the Postum Company, Inc., are not eligible.
9. Address envelopes to "P. O. Box 584—F, Battle Creek, Michigan."
10. Manuscripts must be received before 5 p.m. December 31, 1927.

(Prizes will be awarded, and the names and addresses of prize winners announced as early as possible in 1928.) This contest is not limited to residents of the United States—it is open to everyone everywhere.

THE JUDGES

U. S. Senator Royal S. Copeland, M. D., former Health Commissioner of New York City; Alice Bradley, Food Editor, Woman's Home Companion; Sarah Field Splint, Home Economics Editor, McCall's Magazine.

© 1927, P. Co., Inc.

Postum is one of the Post Health Products, which include also Grape-Nuts, Post Toasties, Post's Bran Flakes and Post's Bran Chocolate. Your grocer sells Postum in two forms—Instant Postum, made instantly in the cup, and Postum Cereal, the kind you boil. If you are not one of the millions who now purchase Postum, you may obtain a sample of either Instant Postum or Postum Cereal by addressing the manufacturer.

paper alone received about fifteen hundred poems! In these, he was called the Columbus of the Air, the Lochinvar of the Skies, the Ambassador of Good-will, the Winged Crusader, and a dozen other literally and figuratively high-flown titles. Some of these efforts had genuine literary merit. All of them burned with an enthusiasm as sincere as it was intense.

The New York "Times" attempted to classify the hundreds of letters it received about Lindbergh. It was found that most of them expressed simply "wild enthusiasm." Some were incoherent, as if the writers' emotions could not find words.

Others were clearly expressed and came from persons of high standing and, ordinarily, of dignified conservatism. But even these were filled with superlatives.

One letter, from the dean of an Eastern college, a sound economist of international reputation, was as extravagantly enthusiastic as any of his young students might have written.

Many suggested various gifts for "Lindy." Some asked that funds be raised by popular subscription, so that the aviator and his mother would be spared financial worry. One demanded the raising of a sum "so big that even Lindy wouldn't have the nerve to refuse it."

Others suggested that the Government grant lifelong annuities to both Lindbergh and his mother. Seventeen writers were worried lest the young man be obliged to pay income tax on his twenty-five thousand dollars prize money.

There were letters asking that statues be erected to him. The preference seemed to be for bronze ones; and it was specified that they were to be "life-sized."

THOSE who wrote about giving things to Lindbergh needn't have been worried on that score. Hundreds of people were not only thinking of it; they were actually doing it.

Of the gifts sent to him in Paris, those which had permanent value were packed and forwarded by express to this country. On these alone, a valuation of one hundred and fifty thousand dollars was placed.

When he finished his flights at St. Louis, several armored trucks full of gifts were waiting for him there. These did not contain the most valuable presents, for they were sent to the safe deposit vaults of a bank.

Neither did they include the two automobiles which were presented to him: one a sports sedan, the other a roadster, painted silver gray, the color of the monoplane which was his famous partner in the "We" combination.

Among the Lindbergh gifts were an exquisite diamond airplane and a golden key. The former was presented by French aviators, the latter was "the key to the city of London" and was presented by the Lord Mayor of London himself.

There were gold medals, gold plaques of honor, loving cups, crosses and decorations, given by kings, presidents, cities, and distinguished societies.

In contrast with all this magnificence were the humble offerings which ranged from candy to pajamas. A good deal of this generosity took a practical turn. People sent him overalls in which to work at his engine; soap with which to "wash up," liniments for the healing of tired or

Restored Enchantment

This is the Eveready Layerbilt that gives you Battery Power for the longest time and the least money.

THERE is no doubt of it—radio is better with Battery Power. And never was radio so worthy of the perfection of reception that batteries, and batteries alone, make possible. Today more than ever you need what batteries give—pure DC, Direct Current, electricity that flows smoothly, quietly, noiselessly. When such is the current that operates your receiver, you are unconscious of its mechanism, for you do not hear it humming, buzzing, crackling. The enchantment of the program is complete.

Batteries themselves have improved, as has radio. Today they are so perfect, and so long-lasting, as to be equal to the demands of the modern receiver. Power your set with the Eveready Layerbilt "B" Battery No. 486. This is the battery whose unique, exclusive construction makes it last longer than any other Eveready. Could more be said? In most homes a set of Layerbilts lasts an entire season. This is the battery that brings you Battery Power with all its advantages, conferring benefits and enjoyments that are really tremendous when compared with the small cost and effort involved in replacements at long intervals. For the best in radio, use the Eveready Layerbilt.

Radio is better with Battery Power

At a turn of the dial a radio program comes to you. It is clear. It is true. It is natural. You thank the powers of nature that have once more brought quiet to the distant reaches of the radio-swept air. You are grateful to the broadcasters whose programs were never so enjoyable, so enchanting. You call down blessings upon the authority that has allotted to each station its proper place. And, if you are radio-wise, you will be thankful that you bought a new set of "B" batteries to make the most out of radio's newest and most glorious season.

injured muscles; goggles to wear while flying.

He received enough lotions and other toilet articles to stock a beauty parlor. There were even patent fish hooks, evidently intended for use on a vacation, in case—as one man put it—"the poor guy ever gets a chance to rest!"

There were drawings and paintings, many of them made and sent by children. And several manufacturers offered to furnish the materials with which to build a home for him.

Speaking of homes, there were letters from girls who were eager to join Lindbergh in another "We" partnership; this time a matrimonial one. But his correspondence contained surprisingly few of these "mash notes." Most of the letters from girls were dignified expressions of congratulations. Only in rare cases did they ask for a personal meeting.

Not that they wouldn't have given a year of their young lives for the chance to know him! Standing in one of the crowds which gathered in New York wherever it was rumored that Lindbergh would appear, I happened to be within a few feet of the young man as he waited for his car. In front of me stood a woman; with her was a girl of perhaps eighteen.

When Lindbergh came out, there was a shout of welcome, but it quickly gave way to silence. I had seen him several times, so, instead of watching him, I watched the crowd.

No one could have doubted their enthusiasm. There was affection, almost tenderness, in their faces. But my strongest impression was of something else. They seemed to look at him with a searching wonder, in which there was a trace of fear. Not fear of him! But fear lest they be disappointed in him. They were afraid their idea of him had been "too good to be true."

While he stood there, head and shoulders above us, we were packed close about him. Yet no one pushed or jostled him. It was in the courtyard of the huge apartment house where he and his mother were staying with friends. The open windows were full of people watching him. There was the crowd below. Yet, after the first shout of greeting, it was so still you could almost have heard a pin drop.

After he had gone, speeded by another great shout, the girl in front of me turned to the woman beside her and said breathlessly: "I touched his sleeve, Mother! He didn't know it, but I touched his sleeve!"

THE men who were closely associated with Lindbergh, in those days of feverish excitement, tell some astonishing stories of people's eagerness to meet him.

On one occasion in New York, a man offered MacDonald *one thousand dollars* simply for the chance to shake hands with Lindbergh! He apparently had no motive except an overwhelming desire to meet the boy who had aroused his profound admiration.

"I promise I won't try to talk to him," he said to MacDonald. "I won't speak a word to him. All I ask is to be allowed to shake hands with him."

It will interest you to know that this offer was not accepted. To have taken money, under such circumstances, would have been contrary to MacDonald's ethics, both personal and professional.

This family saves $12 a year on tooth paste—*and has whiter teeth*

Now with 50 years' experience to guide us and new methods of manufacture to cut costs we are able to produce a perfect dentifrice at a price that appeals to all.

The name is Listerine Tooth Paste. Your druggist has it. The price is 25c for a large tube.

Using a tube a month, you pay $3 less per year than you do for costlier dentifrices that accomplish no more.

Think of what a saving there is when there are several in the family.

Listerine Tooth Paste contains sixteen ingredients to meet every requirement for healthy teeth, gums and a sweet condition of the mouth. It whitens teeth as never before—with less effort and in less time because of a new polishing ingredient contained in no other paste.

Because of its marvelous results and its amazing economy, thousands now use it in preference to older and costlier dentifrices.

Get a tube at your druggist. Note its large size. Try it. See how it makes teeth gleam. How good your mouth feels. How little polishing is necessary. You will be delighted.

LISTERINE TOOTH PASTE

Resinol Soap for the woman who travels

gives a sense of exquisite cleanliness, while its Resinol properties protect the skin against dryness and roughness.

YOU are thrilled at the thought of the coming trip. For weeks—perhaps months—you have been studying maps and schedules. Gowns, hats and all the accessories have been selected carefully to make you look your best on all occasions, but how have you planned to protect your skin in the strenuous days to come?

There is no space to give to an array of cosmetics, and no time to use them if she had them so the experienced traveller safeguards her skin with a product that will meet all the requirements for thorough yet quick and gentle cleansing. She is wise when she selects Resinol Soap because—

It quickly yields a rich sparkling lather in practically all kinds of water, thoroughly cleanses the tiny pores, and rinses easily.

It gives a delightful feeling of cool and refreshing cleanliness, because of its distinctive Resinol fragrance.

But, most important of all, it contains the specific Resinol ingredients so favorably known through the other Resinol products—those ingredients which soothe the skin under all conditions, protect its natural oil, and keep it soft and velvety.

All druggists and toilet goods counters sell Resinol Soap. Buy a cake today—try it a week, and you will want to enjoy it always whether at home or abroad.

For the annoying little blemishes which sometimes mar the complexion use a touch of Resinol. This ointment has been prescribed by doctors for more than thirty years in the successful treatment of various skin disorders. Excellent for sunburn and chafing.

Prove these statements. Send 10c with the coupon below for the new and larger size samples of the Resinol products.

Send 10c for the new Resinol combination

Resinol, Dept. 12-H, Balto., Md.

For the enclosed 10c please send me the larger size samples of Resinol Soap, Ointment and Shaving Stick and the Resinol Soap booklet.

It is worth mentioning here that he might have made a good-sized fortune for himself, out of his association with Lindbergh, if it hadn't been for these inhibitory ethics. At least he might have tried. He was offered commissions, running as high as twenty per cent of certain contracts, if he could get Lindbergh to sign them. He might have made $200,000 during the one week he was in New York; but he refused to commercialize his friendship with the young aviator.

Many of you know, from your own experience, that one of the things people did was to cry over Lindbergh! I have seen women do it. And I have heard men acknowledge that they did it.

What kind of men? Well, they were decidedly not the crying kind, at any rate. One was the booking agent for a prominent theatrical firm; and I can assure you that theatrical booking agents are about as "hard-boiled" as any human being you can find anywhere.

I know other men—shrewd, dignified and usually unemotional—who admit having found themselves shedding unaccustomed tears over "that boy," as they call him.

At least one radio announcer was compelled to break off his broadcasting during the arrival of Lindbergh in New York, because his emotion made it impossible for him to control his voice.

DID you read about the dinner given to Lindy at the Hotel Commodore? It was the largest public function of its kind that has taken place in the country's greatest city. The list of guests was almost a metropolitan roll of fame.

When the young guest of honor entered the banquet hall, scarcely a man was standing on the floor of the immense room. And the very good reason was that they all were standing on the chairs! Standing—and almost raising the roof with their cheers.

When these excited gentlemen "came to," some minutes later, a good many found themselves in queer company. Perched on the same chair, clinging to each other, even hugging each other, were coupled men who were total strangers, men who were business rivals, men who were bitter political enemies, men who were separated by racial antagonism.

There they were; young and old, Jew and Gentile, Republican and Democrat! Some in smiles and not a few in tears. But all of them, for once, swept together by a current of overwhelming and mutual emotion.

I could go on indefinitely, recounting these details of what Lindbergh did; and, more particularly, of what we ourselves did. But the real point at issue is: *What did he do to us?*

We know that he set the world on fire with excitement. But what was the fuel that fed the flame of our enthusiasm?

To answer that question, we shall have to dig down into our own hearts; even into our souls. If we will do this, and if we will take a good look at the treasure we bring up, we shall know what I think is the biggest thing that Lindbergh has done.

I have asked a good many people how they accounted for the unprecedented furor over this one human being; and I have received various answers, each containing its kernel of truth.

The PAVEMENT *of Lasting Distinction*

PAVEMENT of portland cement concrete adds a lasting distinction to any street. On fashionable boulevards or busiest commercial arteries its true, rigid surface remains unmarred by traffic year after year—indefinitely. No concrete pavement has ever worn out.

When the concrete street *must* be cut through for underground piping or conduits it may be quickly and easily patched with no unsightly blemishes left to mar its even surface. Thus concrete provides a pavement of *enduring* beauty.

Firm, rigid, unyielding concrete is the ideal paving material—the engineer's answer to the challenge of modern traffic. It requires little maintenance. And it is the safest street, wet or dry.

More than 3,500 cities and towns have built portland cement concrete streets within the last five years. Their experiences with the beauty, durability and economy of concrete pavements have been compiled in booklet form for those interested in modern street improvement. If you would like a copy write to the headquarters of Portland Cement Association, Chicago.

it's leather

Some say we were stirred by patriotic pride. First, because an American had performed so splendid an act of daring and of skill. Second, because he then had borne himself so creditably in the spotlight of world-wide admiration.

I know there is truth in this. I was in London when Lindbergh arrived there. I saw him as he left Buckingham Palace after his audience with the king. In spite of the rain, a crowd was waiting to cheer him.

It is hard to describe how I felt. After months of travel abroad, I knew that foreign nations were none too fond of Americans. The crowd was waiting to see Lindbergh. But I was waiting to see whether, in the eyes of a foreign people, Lindbergh would do credit to my love of my own country and my pride in it.

His car drove very slowly, so that we had a good look at him. Young, handsome, modest, dignified, but without a trace of affectation, he instantly won all hearts. After he had passed, there was a confusion of excited comments; exclamations of wonder at his youth, of admiration over his appearance and his manner.

I remember that, as Lindbergh came out of the palace, the sun came out of the clouds. I am not exaggerating when I say that it "came out" also in my heart as an American. I was so proud of him.

Yes, there was a strong element of patriotic satisfaction in our enthusiasm. But that wouldn't account for the response in foreign countries.

When I have pointed this out, people have replied that the British admired his sportsmanship and that the French were captivated by his courage.

These explanations, too, have their kernel of truth. But they are a long way from the whole truth. If Lindbergh had been arrogant and conceited, if he had been a mountebank, if he had said and done the wrong things, even if he had been himself, but twenty years older, the whole story would be different.

It is curious that everyone seems to recognize the comparative unimportance of the thing which riveted our attention on him. I have not found a single person who gave the flight itself as the real cause of our enthusiasm. Everyone admits that this achievement merely "turned on the light." The thing that did "get us" was what we saw after the light had been turned on. And that was the man himself.

One woman put it in this way: "He is a sort of symbol; a universal son. We love him with the same pride and happiness that a father, or a mother, would feel toward their own boy, if he was all that they wanted him to be."

Another said: "He is the modern 'perfect knight; without fear and without reproach.' He has all that we want for ourselves: youth, honor, romance, victory. He is the dream that is in our own hearts."

WHILE I was writing these words a letter was brought to me. It had been written by a man who saw Lindbergh in Washington and who watched the crowds that gathered to greet him. The whole letter is extraordinary; but there is one paragraph in it which is so pertinent to this story that I am going to quote it here.

"These multitudes," he wrote, "seem as if they were driven by an inner and overwhelming desire, the desire to get one clear view of the man himself. After one deep, possessive look at him, they turn away with an expression of complete satisfaction."

In that phrase, "a deep, possessive look," there is a world of meaning. He is the dream that lies more or less hidden in our hearts. And we "turn away with complete satisfaction" because, in him, we possess our dream.

WE ARE getting very close now to what I think is the biggest thing that Lindbergh has done.

Ever since the war there has been an outcry against "modern" character, ideals, and morals; especially against those of the younger generation. Most of us have contributed our share to the chorus of denunciation. All of us have had to listen to it.

You hear it in every stratum of society. The high-brows talk of the "moral degeneration of the age." The low-brows say: "Ain't it perfectly awful!" The old folks raise their eyebrows in horror—and the young folks defiantly raise Cain. The professional reformers bewail the passing of "the good old days." The professional cynics shrug their shoulders and reply: "*Autres temps, autres mœurs.*" Or, if they don't speak French, they say: "Get it into your bean that times have changed, old thing!"

And this is the big thing Lindbergh has done: He has shown us that this talk was nothing *but* talk! He has shown us that we are *not* rotten at the core, but morally sound and sweet and good!

At the time Lindbergh made his flight a particularly atrocious murder was the leading front-page story in the New York newspapers. They were giving columns to it every day. There were other crimes and scandals on the front pages.

Lindbergh banished these to almost complete oblivion. Not exactly that either. We ourselves banished them! For if it had not been for the things *we* did, the Lindbergh news would not have demanded much space.

There wouldn't have been much to write about, if there had been no public demonstrations; no parades, dinners, receptions; no tidal wave of letters and telegrams; no truck-loads of gifts; no reams of poetry; no songs; no cheers and shouts; no smiles of pride; no tears of joy; no thrill of possessing, in him, our dream of what *we* really and truly want to be!

When, because of what we believe him to be, we gave Lindbergh the greatest ovation in history, we convicted ourselves of having told a lie *about* ourselves. For we proved that the "things of good report" are the same to-day as they were nineteen hundred years ago.

We shouted ourselves hoarse. Not because a man had flown across the Atlantic! Not even because he was an American! But because he was as clean in character as he was strong and fine in body; because he put "ethics" above any desire for wealth; because he was as modest as he was courageous; and because—as we now know, beyond any shadow of doubt—*these are the things which we hold most* in life.

To have shown us this truth about ourselves is the biggest thing that Lindbergh has done.

Freeman's Whale

(*Continued from page* 33)

lling himself this, and also that it uld not endure . . . of course it could t!

This last took him out of his repose and t him ransacking the place for disrded equipment. He found waders at could be patched, a good old rod, a are reel; and when the youngster owed up the next day he was equipped wn to fly dope—speechless with gratide, and faced with an absurdly small ries of tasks to pay for what he had ceived.

When this trouting thing takes real ld it usually assumes the virulence of a sease, and it had hit Mickey with the ll force of its infection. He was on the ream every hour that he could be away om camp. The headway he made was markable, and if more time lay before m, Manners predicted at the end of his st week, he would be a great fisherman r his years.

"Time enough," growled Jim. "I fixed at. This boy needs the woods. He's me too strong. They tell me his family's or as church mice. We need a boy ound here sometimes. Hank can use m, he says, and the scout master anged it with his mother by wire."

He looked around the table defiantly en, as though daring any one of the oup to suggest that he was being sentiental, or was taking an interest in the y. . . . And, of course, none dared.

So young Mickey came to live with ank, the caretaker, over the garage, as e had come to live in the heart of old m Freeman. The incredible had happened. The shell had cracked; the long ears without admitting affection, without a vital interest in anyone, had ended his complete surrender to this boy!

THE man believed that he kept the strange, precious thing a secret. He as gruffer than ever, even with the boy; e spoke no word of Mickey to the others, nd when the lad was mentioned he either ept a dour silence or changed the subject.

But they knew, those old friends of his. le could not hide the gleam in his eye, ould not always wholly conceal the ellowness of his mood which invariably ollowed a day on the river with Mickey. nd so, this night, when he talked again f his Whale, and grew voluble as he escribed how the fish had escaped, Manners waited, ready to make his try.

The rest drifted off to bed; but Manners ngaged Jim in argument and, in the first ap in the talk, shot it at him:

"Jim, you think a lot of this young Mickey."

No use to palaver with Jim Freeman. Ie hated indirect methods. But now Manners's assertion gave him a jolt, and e checked his cigar on its way to his lips.

"Seldom you'll find a boy who wants to o *anything* well," he grunted.

Manners nodded. "Maybe, though, here are others," he suggested. And hen the publisher did not respond, he eaned forward to lay a hand on Freenan's knee. "There's no use fooling ourelves, Jim. You've reached that time when you need what we all need—someone to be fond of, someone to watch over and bring along and take pride in."

Jim got the cigar to his lips somehow.

"Your interest in this strange kid proves that. It's fine of you to take him up. But, Jim . . . Jim, old friend, you have one of your own blood to—"

Freeman got to his feet with that.

"No, no! *Not* my blood!" he said through shut teeth, suffering. "No, Manners, it's no blood of mine. It's a rat's blood! She's Regan's wife; her brat is Regan's!" He stopped suddenly and dropped his cigar into the fire. "Don't, Dick," he said flatly. "The boy would be impossible. Regan's brat!"

SO THAT was that; and, more than that, because Manners's overture had stripped old Jim's need bare, and made way for the realization that he was asking something of the life that had left him only fishing. He faced himself that night as he lay staring into the darkness. After all these years of listening to him growl defiantly at life, these men *knew!*

He ground his teeth and tossed under the torture. They knew he had to have something, somebody, after all, and were feeling sorry for him, knowing his weakness. . . . Wel', he'd show them! He'd show them he could stand alone!

He went to Detroit and stayed four days, each one agony. He came back, more surly than ever, and when young Mickey greeted him he took no notice. He fished alone, savagely, flogging the river through the last days of a hot, dry August.

Late one afternoon he sat on a log below the pool where lived his Whale. So intent was he upon himself that for a long time he did not hear the splashing downstream, and when he looked up the boy was casting within a hundred feet of him. Old Jim got quickly to his feet, impelled to flee. He did not want to be near Mickey, did not want to sense that boyish charm. . . .

There was one of his own . . . one of his own. But Mickey saw him, and he could not run away under fire. So he began changing a fly, and when Mickey called out to ask his luck he merely growled into his mustache.

"Waiting for the Whale to show, sir?" the boy asked as he came up, and Jim grumbled that perhaps he was.

"Pretty slow, now." Mickey looked at the setting sun. "Last few nights, though, there's been a big hatch about this time. Fish went crazy last night; but I couldn't make 'em take what I had. I thought—"

Gentler impulses were clamoring in Jim again, but he would not heed them. He was trying to thread a fly, and his hands shook until he was in a rage.

He made the knot finally, sprayed oil on the hackle, and looked glumly at the pool above, wondering how he could send this boy on his way, and quiet his disturbing emotions.

It was very still and the river murmured drowsily. A dance of gnats filled the air and a hatch of small flies had suddenly come on, winging up-stream.

All Outdoors is *Yours!*

SLIP away from traffic jams—byways are highways for a motorcycle! Follow trails over happy miles. Distant towns or hunting grounds are just a pleasant jaunt away!

Ride comfortably, for only *one cent per mile*, on a Harley-Davidson Single—the famous motorcycle that travels 80 miles on a gallon of gasoline! New 1928 model has Fore Wheel Brake—doubled safety. And 12 other outstanding improvements that make this mount the world's greatest motorcycle value.

Hair getting a bit thin?

Yet it *needn't!*

Just try this simple treatment—see how quickly it works:

EVERY MORNING wet your hair and scalp thoroughly with Pinaud's Eau de Quinine. Then with your fingers pressed down firmly, move the scalp vigorously in every direction, working the tonic into every inch of the scalp. Move the scalp, not the fingers! Brush the hair while still moist. It will lie smoothly just the way you want it.

The Pinaud treatment is so quickly effective because it directly attacks the *causes* of thinning, falling hair.

Dandruff—poor scalp circulation—these, specialists say, cause most hair loss, most baldness.

The Pinaud treatment destroys dandruff—makes the scalp fairly tingle with active circulation.

Get Pinaud's Eau de Quinine *today* at any drug or department store. Always look for Ed. Pinaud's signature in red on the bottle. Pinaud, Paris, New York.

PINAUD'S

Eau de Quinine

The river was flecked with them, and yet, for many minutes, no fish showed.

Then a vicious little plop sounded across the river, and another from below. A small fish jumped in the riffle and, between breaths, the river teemed with activity!

"Here it is!" cried the boy, breaking short. "Dog-*gone*, it's on!"

He turned and waded across, and began casting. And old Jim, wholly against his will, followed with his gaze, beset by conflicting desires, by need and pride and prejudice and weariness. And then—

Above him, the deep hole under the alder-cloaked bank was purple velvet—dark, and so still that one could see, even in the fading daylight, the submerged log across its bottom. Dark and deep and still, yes—but now its surface was swollen and broken by a mighty surge. The water bulged upward, broke slightly, and a shadowy hulk slid back beneath the log.

FREEMAN forgot Mickey, forgot the battle within him, and moaned. Then he began to cast, expertly and swiftly.

His fly rode the velvety pool erect and natural, dropping with no more disturbance than a spent insect would make, not retrieved until it had entered the eddy below. Once, twice, a dozen times, the fly went across that sheet of placid water. Again the line sang through the false casts, again the fly settled, and once more the pool bulged as the great fish rose.

The man's right arm drove backward and the trout settled to his lair. He had not been within his own splendid length of the lure. Jim muttered sharply and cast again. Once more the trout rose, this time on the outer edge of the hole, six feet from where the concealed barb dallied, and Freeman drew in his leader to break off that fly.

Across the river Mickey was chattering to himself.

"Won't take it!" he cried. "Wasn't even after it! It's your big one!"

Old Jim was threading on a Grizzly King, and only nodded.

Again the trout rose and the boy, who had left off his own fishing and come close, whimpered.

The fresh lure took the water and the Whale surged upward, unfrightened by the drawn-gut leader above his home, uninterested in its fly. Again and again he fed, ignoring the Grizzly King. And while old Jim changed to a Wickham's Fancy, the boy stood in mid-stream, breath catching audibly each time the huge trout disturbed the tranquillity of his pool.

"What you got on?" Freeman asked, voice husky, all other emotions wiped away now by the excitement.

"The one I made myself. See?"

"It's a Drake," muttered the man. "Might do. Try it."

Mickey gawped. "You mean, you want me to try *your* fish?"

"Go ahead; we'll get him between two fires."

The boy edged away as the Whale's dorsal fin flashed in the dusk. He took his stand out in the stream, made his false casts to dry line and fly, and then dropped the lure in the riffle. It came out of the rough water to the glassy pool, lying on its side, a draggled, unimpressive creation of the novice, and—

The fish swirled!

The lad cried out as he struck. "Missed!" he gasped. "Missed, but I think—" He did not say what he thought. He dried his fly and put it down. Again the tiny fly, made to imitate a Drake, floated across the pool on its side. Again . . . and yet again. . . .

His next words came in a shrill scream: "*I got him on!*"

On, indeed! The great trout, sulking for the moment, had shot from his retreat and smashed that badly tied fly. He smashed as Mickey shrilled the word. And the boy drove the strength of his small arm into the butt of the rod as the fish sounded, diving for the log which had been the Waterloo of seasoned fishermen. But now he drove downward at a new angle, and pitted against him was a green boy, wholly rattled, disregarding the frailness of his tackle in that frenzied instant.

Against the butt, then, went every ounce of which Mickey was capable. It went sharply, frantically, inviting disaster. But the tackle did not give, and the pull, at right angles to the trout's canny course, turned him sideways and upward and he missed his log! Old Jim, floundering out of the way, could just make out that streak of shadow sweep across the greeny-yellow of the snag, swing toward his feet, pass outside by inches and rush for midstream.

"Look out!" the man croaked. "Look out! You got him out of his back yard!"

Out, and charging across and down the current, the line laying back a fin of water, humming as it tightened!

"Give it to him! Give him line! . . . Slack! *Slack* him!" Freeman roared as Mickey screeched again that he had him on.

He stripped line from his reel, then—panting through parted lips, edging downstream as the trout swirled and doubled and hesitated in the riffle. That pause gave Jim time to reach Mickey's side.

"He's coming to you, now; but that's because he wants to. Watch him, now. . . . . Careful. Now! Give it to him!"

Again the fish had rushed, this time for the far bank, angling with the current, and Mickey followed, thigh-deep, floundering over slippery stones, yielding line a foot at a time.

"Give it to him; keep on!" Freeman urged. "Give him all—"

"BUT that jam!" panted the boy with a nod. Freeman had nothing to say, then. The slash of line through the water was swinging that way, swinging in a majestic arc toward the tangle of submerged stuff. "If he gets there—"

Yes, if he reached there, it would be over. A crisis had come, and Mickey braced himself, one foot far forward, water tugging at his hips, and gave the Whale the butt again. He leaned back, and his right arm trembled and gave with the strain. His rod slowly straightened. He had not strength in that wrist to hold it bowed. He moaned, and let go the small slack of line. Then with two hands he jammed the butt against his side and shut his eyes. Gut held, line held, noble old rod held—and Freeman's Whale, with a mad swirl, swung short of his sanctuary, doubled and drove down the river, straight through the next riffle.

How *dare* you say, "I have no opportunity"

—*when men and women, thru home-study training, are making records such as these?*

J. L. Aldrich, District Manager at Fargo, N. Dak., for the Monroe Calculating Machine Co., Inc. "At the end of six months my income was 158% per cent greater than during any six months before I enrolled with LaSalle."

Harry J. Williams, Accounting Engineer, Lehigh Valley R. R., Wilkes Barre, Pa. Mr. Williams chose the Accountancy route to lead him out of a "blind-alley" job, and within comparatively few months won a 60 per cent "raise" and promotion to a position that spells—opportunity.

Charles W. Sheldon, Sheridan, Wyoming. At forty, Mr. Sheldon, then telegrapher and station agent on the C.B.&Q., left railroad work and took up selling. He increased his income 500 per cent.

Ralph H. Berndt, Treasurer and General Manager, W. C. Du Comb Co., Inc., Detroit. "LaSalle has been the instrument to my success."

Annetta L. Koch, Assistant Manager, Hotel Secor, Toledo, Ohio. "When I enrolled with LaSalle, I was a bookkeeper of average ability. The results of my training soon became apparent. I was promoted to Auditor and then to Assistant Manager. My salary was increased substantially—which increase in several months completely paid the entire cost of the training."

YOU seek a better opportunity to get ahead in business—and you don't want "promises;" you want a definite program for advancement, backed by positive proof that that program *works!*

Listen, then, to these actual experiences—and when you have heard them, tell us, if you can, how you *dare* to say, "I have no opportunity!"

Mill Man Becomes Auditor —then Treasurer and General Manager

At sixteen, Ralph H. Berndt—his schooling ended with the eighth grade—entered the Carnegie Union Steel Mills, at Youngstown, Ohio. His wage was $2.15 a day, and his working day was twelve hours long.

Six years later he was assistant roller—drawing good wages and with prospect of promotion.

Looking ahead, however, he saw himself "an old man at fifty—and with nothing then to look forward to but retirement and probable poverty."

"Realizing that hands and feet would do for me no longer," he writes, "I decided to give my brain a business training. Accordingly, I enrolled with LaSalle for home-study training, gave up the mills forever, and made a humble start in my new profession."

His apprenticeship was short. Almost before he knew it, an opening came with W. C. Du Comb Co., Inc., Detroit, and he got the place—as Accountant, then Auditor! Raise followed raise.

Late in 1925 he was made Treasurer and General Manager of this company; and so highly does he value his LaSalle training that he is now on his second course—in Business Management.

Clerk Becomes Accounting Engineer Wins 60% Raise

"You've picked a blind alley." That was what many good friends of Harry J. Williams thought when he took a job as clerk with the Lehigh Valley Railroad.

"Blind for some, perhaps," said Harry Williams, "*but not for the man with specialized training!*"

Acting on his conviction, he enrolled with LaSalle for Higher Accountancy training—and soon won advancement to the position of Accounting Engineer, with an increase in salary of better than 60 per cent.

"Mr. Williams proves exceptionally competent in his new capacity," writes Francis N. Loughnane, Division Engineer. "He shows marked ability and is a very creditable product of your great university."

Send for These Free Books

You are eager to get ahead? Then you will find it of vital importance to learn more of the success-methods which Berndt and Williams and thousands of others have employed so profitably.

We have therefore prepared a special 64-page book which outlines these methods in detail. It also points out the big opportunities in the field you are in or wish to enter—shows you how you can fit yourself to grasp them.

The coupon brings this book to you without cost or obligation—also a copy of "Ten Years' Promotion in One," the inspiring story of how one man, after many wanderings, found the path to responsibility and power.

Measure your will to succeed by what you do with this coupon—NOW!

Reaches all
Cleans all
&
Pro-phy-lac-tic
protects
every tooth

STUDY the picture of the Pro-phy-lac-tic Tooth Brush, shown here. Notice how the bristles are arranged. See how they form a curve ending in a large pyramidal tuft. This curve is sensibly shaped to fit snugly against the outside and inside profiles of *all* your teeth. The molars in the rear, so hard to get at with an ordinary tooth brush, are easily reached by this convenient end tuft.

Sold in three sizes by all dealers in the United States, Canada, and all over the world. Prices in the United States and Canada: Pro-phy-lac-tic Adult, 50c; Pro-phy-lac-tic Small, 40c; Pro-phy-lac-tic Baby, 25c. Made in three different bristle textures—hard, medium, soft—with white handles or colored transparent handles—red, green, orange. (A larger Pro-phy-lac-tic with four rows of bristles is priced 60c.) Pro-phy-lac-tic Brush Co., Florence, Mass.

"Good lad! Now—give it—"

No need to counsel yielding. The boy had yielded, with wrists and hands and body and feet. He was running down the shallows, water flying about him, stripping off line as he ran. He ran through water made wine by a sunset, ran with old Jim Freeman lumbering after, panting.

Mickey gave ten feet . . . twenty . . . thirty. Sixty feet beyond, froth showed where the great square tail broke the surface. Another fifteen feet, and the reel would be bare. The boy began to grudge it as he floundered along . . . another five feet . . . another three—then stopped.

Somewhere down there the Whale had paused, and Mickey moved with caution, drawing line in through the guides with his left hand now, letting the slack float on before him. Jim caught up, but they did not speak. Was the Whale free? Had he snagged the leader? Was he gone?

Ah, no! He was not gone, but he was doing his best to go! He took them into deeper water, where Mickey was powerless to check the rush. But that maddening pull on the trout's jaw set him frantic. He rolled over, again and again, churning the water to bubbles, slapping with his tail as though to smite and break the leader. But he did not, and nosed on doggedly again.

SUCH a fish; such a fight! Every trick in his big bag was used, and with variations. But the things Mickey had learned from Old Jim, combined with the audacity of youth, met and mastered them.

No running, now. When they moved with the fish they walked slowly. Mickey gave line no more, and at intervals took a few inches . . . a foot or two. When the fish sulked he held the rod in both hands, and when, for the first time, the Whale's belly showed as he worked across the riffle the youngster grinned and spoke the only words that had been uttered in long:

"Cryin' out loud, but I got your fish on!"

Old Jim pulled his mustache.

"Tired?"

"Nah!"—with more strength of spirit than of voice.

"You're half through . . . maybe."

Half through! Those slender hands half through that tough pulling, that sudden yielding, those adroit maneuvers!

The boy commenced taking line again, and the fish showed a fresh burst of vigor. He waited, patiently for one so young, tooling the Whale back and forth; then took again . . . so slowly, so carefully.

He began leading the trout about, across stream, back; into the current a few feet; then let him float down. . . . After a long, long interval he raised the tip of his rod slowly. The great fish, lying on his side, followed with only a slow wriggle!

Mickey fumbled for his net.

"Not that!" warned the man. "Not that dinky. . . . Here, I'll net him."

He disengaged his long-handled, deep net and shook it out.

"I'd—If you don't mind, I'd rather you didn't," the boy said, and Jim Freeman looked sharply at him. "It'd be better for me to, wouldn't it?"

For a moment the man frowned, hurt and offended, and then a strange warmth expanded his throat. Silently he handed over the net, and the boy slipped it quietly into the stream, down below the wary fish. Then, with a swoop and a lift and a gasp, he dragged it through the current and, dropping his rod into the water, stumbled for the bank with a gleaming burden writhing heavily in the mesh!

AFTER it was all over, after the Whale had been weighed and measured and handled reverently by the Whirling Duns; after the boy Mickey, so white, so silent, so graciously humble in his achievement, had been saluted with all the extravagant praises that the group could conjure, old Jim Freeman sent Hank for his chauffeur.

"Why shouldn't I?" he demanded when questioned. "I'm a newspaper man, and if this isn't a story, I don't know one!"

He went, with the constrained boy beside him, and in the ticket office of the tiny station the old man seated himself before a pad of telegraph blanks.

Express, Detroit, Coll NPR., [he wrote.]

Note to Worthington: Set full-face in box Page One Must. End Note.

The largest brook trout taken from the famed Au Sable River within the memory of the present generation of fishermen was captured to-night by a—

"How old are you, young man?" he asked.

"Fourteen," came the boy's voice from the shadows behind him.

—fourteen-year-old Detroit boy. The fish weighed four pounds one and one-half ounces, and measured twenty-one and five-eighths inches in length.

The boy is—

He hitched about in the chair.

"Mickey, what's your name?" he demanded, suddenly aware that he had never known it. Queer—he had been just "Mickey" to everyone around the club.

For a moment the boy did not reply, and old Jim turned further so that he might see. The partly shadowed face behind him was set in a curious expression.

"Jim," he said faintly.

"Jim. That's James." He wrote it so. "What else? James . . . ?"

A queer sound, and then the boy spoke again, rather stoutly:

"James Freeman Regan, sir."

The pencil began:

F-r-e-e—

It stopped and the old man stirred slowly in his chair.

"James Freeman Regan," he repeated aloud dully. "Regan . . . James . . . Freeman . . ." He closed his eyes, and all manner of emotions went rampant within his breast. James . . . Freeman . . . Regan. . . .

He straightened with an effort and wrote it out then:

—man Regan, son of Marjorie Freeman Regan and grandson of James Freeman. The latter was with the boy when he made his capture, which was only accomplished after an hour's grilling battle.

Young Regan has demonstrated that he is not only a fisherman of parts but a youth of character, determination, and great promise.

No right to that next-to-last paragraph, perhaps, but he took it. He took it. And the style of the final sentence was archaic,

STATE UNIVERSITY SYSTEM OF FLORIDA

To make our food delicious, modern cooks and chefs have stripped it of roughage and fibre. There is nothing in our diet to exercise the gums—nothing to stimulate them to health.

Rouse your gums from their life-long lethargy

The soft foods you eat have put them to sleep; IPANA and massage will stir them to health

THE troubles that assail our gums today are troubles brought upon them by the "easy" life they lead—a life of too much luxury—too little work and exercise. For the gums, like every living tissue, need activity and use.

But the gums of most of us get very little. The dentists lay the blame upon the soft foods we eat, which, they say, deprive the gums of the exercise and stimulation they were meant to get from our diet. And so our gums become lifeless, dull and dormant. They lose their tone and health.

It's all very simple. Nature put fibre and roughage in our food to massage and rub the gums—to offer resistance to the teeth. But to give us dainty and delicious things to eat, our wives and our cooks have stripped out of our food all these coarse materials. We subsist upon a soft and creamy fare. In short, as one famous dentist puts it, "We live in an age of pap."

How Ipana and massage offset the harm that soft food brings to gums

Our gums no longer receive the brisk stimulation that speeds the fresh, revitalizing blood through their walls. Deprived of the sustenance they need, the tissues grow weak and flabby. "Pink tooth brush" is the warning that commonly betrays the onset of more severe, more serious troubles.

The dental profession tersely informs us that we may hope for improvement only if and when we make up to our gums the stimulation so vital to their health. But the method the dentists propose—massage, with the fingers or with the brush—is both simple in performance and effective in results.

And today thousands of dentists recommend Ipana Tooth Paste as the medium for this massage, as well as for the ordinary cleaning of the teeth. For Ipana contains ziratol, an antiseptic and hemostatic agent which strengthens and stimulates the gums. Its presence in Ipana is perhaps the strongest reason for the professional support that has made Ipana so widely known and used throughout the country.

Make a 30-day trial of Ipana

Even if your gums seem entirely sound, start today to give them the benefits of Ipana. And in fairness to them, do not be content with the ten-day trial. True, the sample tube is gladly sent on receipt of the coupon, and it will prove both Ipana's delicious taste and its remarkable cleaning power. But the full-size tube from your nearest drug store contains over a month's supply—a better test of all Ipana can do for the health of your mouth.

Even for healthy gums a twice-daily brushing with Ipana is a wise protective measure.

IPANA Tooth Paste

—made by the makers of Sal Hepatica

BRISTOL-MYERS CO., Dept. J-107
73 West Street, New York, N.Y.

Kindly send me a trial tube of IPANA TOOTH PASTE. Enclosed is a two-cent stamp to cover partly the cost of packing and mailing.

"MAN O' WAR"

A Limited Train *for four-footed passengers*

"Man O' War" is one of the most important trains in the great fleet of 60 named Pennsylvania freights that have set remarkable records for regularity and dependability of on time arrival. Month after month these "Limiteds of the Freight Service" have held to their schedules rigidly

TODAY ocean liners are like magnificent floating hotels. Passenger trains offer the traveler anything from a sumptuous dinner to a shave and haircut.

This being the case even live stock can quite properly expect to ride in de luxe fashion.

That is the Pennsylvania's reason for running "Man O' War"—a limited train for live stock. This big freight, named and scheduled like any passenger limited, brings in its cargo of cattle and hogs on time.

And though the best of service is rendered to patrons—there's no extra fare.

"Man O' War" swings out of the Chicago yards every evening to begin its run to Eastern Markets. All its four-footed passengers are comfortably settled in large well-equipped stock cars of the most modern type.

"Man O' War" doesn't carry a diner, but everybody eats together the following evening at the Pittsburgh Union Stock Yards where the cuisine is unsurpassed.

And there's a five hour rest period here, after which the stock hops aboard again and "Man O' War" pulls out on the final lap of its journey.

Shower baths for "High Hat" hogs

When the weather's sultry and "Man O' War" has hogs aboard, the institution of the shower bath comes into play. At watering stations along the route the cars containing hogs are drenched frequently. Could even the most particular hog ask more?

Live stock coming off the Chicago Market as well as shipments from other Western Stock Yards routing through the Chicago Gateway are carried by this dependable Pennsylvania freight train. And "Man O' War's" consistent on time arrivals at Eastern Terminals have won for it a big reputation with the live stock trade.

Shippers:

Are you giving the man who routes your freight the time and opportunity to effect the economies, contribute to the new business strategy which in many industries is considered the most important development since Mass Production?

The Industrial Traffic Managers of many organizations have been instrumental in the speeding up of turnover—in the reduction of inventories—and in the opening up of new selling territories to which improved freight transportation has given them access.

Such trains as "Man O' War" and other named Pennsylvania carriers are materially aiding the Industrial Traffic Managers in their constructive tasks of building business for their organizations.

Carries more passengers, hauls more freight than any other railroad in America

PENNSYLVANIA RAILROAD

obsolete. He would have fired a reporter who wrote so for his "Express." It was the style of newspaper reporters of another day, of the men who wrote news when Jim Freeman was young and not an old bear; when life lay invitingly before him, when he had tolerance and kindness and tenderness.

He signed his name laboriously and shoved the sheet toward the operator. Then he rose and faced his grandson.

"You knew?" he asked in a whisper.

"Yes, sir; after you gave me that line."

"And your mother knew?"

"No, sir. I . . . I didn't tell her."

Pause. "Why not?"

The boy twisted a pants button with nervous fingers.

"Well, she's always *said* you were a . . . a fine gentleman. But everybody else's always said you were a . . . a kind of an old bear. And I got intrusted in what you could teach me before I knew . . . and then I . . . I wanted to find out why a fine gentleman wouldn't like . . . like my" (swallow), "my mother, sir."

Jim Freeman raised a hand to tug at his mustache.

"And did you find out?" he asked; but before the boy could reply, went on: "Never mind. I'll tell you why. I'll *try* to tell you how . . . how a surly old bear can . . . hurt himself and others. . . . I'll do it on the way down." He slipped an arm through Mickey's, and they started out for the waiting car. "We can get to your mother's by breakfast time, and . . . and maybe she'll help us understand about me, James Freeman Regan!"

Strange Comrades

(*Continued from page 28*)

study nature, trying to fathom its ways, we realize that the way of it is the art of God; and we realize, also, that the Bible has satisfying answers for almost every problem that we raise. For example, here is this matter of the unaccountable affinity of representatives of different families or species. What lies behind it? Is it not a faint but tangible evidence of the certainty of a coming millennium? The Bible declares that the lion and the lamb shall lie down together; that a child will some day be able to play safely by the deadly den of the asp. I never see an odd companionship but I think, "Here is a faint but thrilling glimpse of what shall be the way of the world when the millennium comes. There shall be no more *fear*, which is always a severing force between hearts."

One day, while I was casting a net for perch and bream in an old canal, I heard a curious rustling and elfin trampling coming toward me out of a dense strip of marsh. I thought an otter might be coming through the reeds toward the canal. To my surprise, however, out there crawled, in very excited childish wriggles, about twenty tiny alligators. Doubtless they had just been hatched, back on the mainland edge of the marsh, and were now making a break for their favorite element. Almost before I could collect my wits they were in the water, paddling delightedly, and floating luxuriously. I threw the net over the entire

WHERE LIFE IS BETTER

What *every San Franciscan* owns:

Climate: Average 59° in summer; 51° in winter. Less rain falls in San Francisco's wettest month (January) than in Atlantic Coast cities in July. No extremes of heat or cold.

Recreation: San Francisco is America's coolest summer city. At the middle of a thousand miles of seascoast, and the hub of railroads and highways leading to four national parks and millions of acres of mountain playgrounds.

Markets: Geographical and commercial center of Pacific Coast. The chief seaport, carrying 40% of all imports and exports. Over 1,000,000 people in the San Francisco metropolitan area.

Industry: San Francisco Bay District's annual manufacturing production exceeds a billion dollars a year.

Growth: Seven times as great, from 1921 to 1926, as the rate of growth of the country at large—seven times as many new customers each year for San Francisco business.

Art, Music, Literature: The cultural capital of the West with a widespread artistic, musical and literary life among its people. One of the three colorful "story cities" of America.

Crop Wealth: The outlet and commercial headquarters for the bulk of California's $700,000,000 annual farm production.

For every San Franciscan, here or on the way, these advantages spell *opportunity*

Californians Inc. has published a beautifully illustrated 48-page booklet *"California, Where Life is Better."* Your copy is ready—send for it with the coupon below.

Many California schools are built like early Missions

Vacation-time in 30-century-old giant redwood groves near San Francisco

Growing-up Californians go to schools equaled only by those of Massachusetts . . . . . graduate to the great beautiful colleges on San Francisco Bay . . . . .

THE urge to go farther and farther West has been in America's veins for generations. Your children, too, will feel it when they grow up.

Bring them now! They will grow strong and sturdy in California's glorious outdoor life, and make their permanent friendships and associations while they are young.

California's five million people strike an average of prosperity which is almost unequaled in America. They enjoy life because life is enjoyable, twelve months in the year—and because in average per capita wealth, average savings deposits, ownership of automobiles and all living comforts, they are about twice as well-off as the average American family.

Come and see for yourself

For the man with capital and ability there are opportunities in plenty throughout northern and central California, and in the fast-growing San Francisco metropolitan area where more than a million people now live. Come and see!

San Francisco is America's second seaport, the business and financial capital of the West, the rail and water and market outlet for the Great Valley, of which a famous economist and engineer has said: "If we were to scan the whole nation for the greatest opportunity of national development we would find that it lies right here in the Great Central Valley of California."

This family came—and stayed

Read this authentic letter from a new San Francisco family—then come out to California on your next vacation and see for yourself.

"*San Francisco, July 10, 1927.*

"Our three children started school in one of the largest cities in the East. Now they are in school in a beautiful California city—a suburb of San Francisco—and the improvement in their schooling is just one more reason why we are glad we live in California.

"When we first drove past their school, with its palm-bordered walks, its roof of red Spanish tiles glowing against the soft background of our wooded hills, we could not doubt that cities with the vision to build schools as lovely as these must be equally far ahead in teaching methods. After four years, we know that is true.

"In time, our boys will enter Stanford or the University of California, and they can still be at home. In the meantime, they are growing strong and sturdy in their all-year-round life out of doors. It makes us wonder, when we see them playing tennis or baseball in midwinter, whether we ourselves can fully realize all that California is doing for them in building up their minds and their health for the years of opportunity ahead. *(Name on request)* C.F.O."

San Francisco is your starting-place when you come to look California over. And here are the headquarters of Californians Inc., a non-profit organization of business institutions and citizens active in the sound development of their State. Californians Inc. is equipped and ready to give you free information on any business or agricultural inquiry, to plan your trip through California and up and down the whole Pacific Coast.

Come and see—Now!

As the first step, send this coupon for the 48-page illustrated free booklet, "California, Where Life is Better."

Southern Pacific Lines

crowd. When I drew it ashore, I found that I had caught twenty 'gators at a cast—no mean record. But as the little things were a size smaller than the meshes of the net, all but three of them crawled away safely. They were back in the canal in a twinkling.

My three captives I took home. They were made comfortable in a huge half-hogshead in the yard, nearly full of water, a receptacle in which we were wont to keep terrapin. At that time there was a large terrapin in the tub. I had two boards across the width of the tub, and flush with the water, so that the captives could sun themselves. I marked the tiny alligators in order to discern whether any difference in behavior could be detected. One of them was decidedly smaller than the others; it must have been a runt. It was this baby that established a comradeship with the fresh-water turtle.

Among creatures so cold-blooded, and apparently so cold-hearted, friendliness would seem unusual; and it does strike one as odd, especially when it is displayed by a member of one species for one of another. But over a period of months, during which I kept and observed these pets, I became assured that what we call sympathy and affection can be felt even by the most taciturn and phlegmatic creatures. If it were not so, why was it that, while the two stronger alligators always basked on the boards, the forlorn little one would never be content unless he lay high and dry on the back of the drowsy terrapin? If they were not friends, why was it that, while the two strong brothers fed voraciously and without any regard to table manners or the rights and feelings of others, the baby, when meal-time came, would climb down from his perch on the terrapin's shell, and would eat with the terrapin?

AMONG wild creatures there are cases of strange comradeships for special purposes at certain times of the year. Leaving out wholly the perfectly normal matter of the mating of the sexes, we shall find that, from the close of one season to the mating time that follows, perhaps nearly a year later, the old males have a way of consorting. I have long noticed that with the whitetailed deer two old stags are very likely to be found together between February and September.

Two bucks that may be the bitterest rivals and enemies during the mating season become old cronies during the summer months, and are often to be seen evidently on terms of the most intimate friendship. As deer have an exceedingly limited range, and as they are very fond of their home woods, individuals can be observed frequently. I remember two grand old stags that I roused on a half-dozen occasions. I saw them feeding together, running together, standing side by side, and lying down together. This last observation I made in the depths of a pine thicket when the deer suspected no intruder in their sanctuary. Far under a glimmering canopy I saw them lying on the brown pine straw.

Each one was lying on his right side; and they were lying back-to-back. Thus each old strategist could watch through a certain arc for the coming of enemies. I believe this posture in which they were couched was by design; they were double-teaming it on the sentry business.

There is something of deep and poignant appeal about an unexpected comradeship; for there is manifested a freedom of trust, an absence of fear that are the testimony of the presence of affection. We are off our guard with them we love; and I find that strange comrades enjoy a spiritual relaxation that only mutual sympathy and faith can give. For one heart to have faith in another is a beautiful thing. Even among human beings whose love for each other is natural, it is a beautiful and a great thing, for love means utter confidence, the utter risking of all. As Beaumont and Fletcher so touchingly put it:

They have most power to hurt us whom we love;
We lay our sleeping lives within their arms.

ONE April morning when a shower was falling, and when the songs of robins were mingling with the rain; when the pine trees were hanging in a mist; and when all nature seemed to be sweetly submissive to the fragrant ministration from the clouds, I wandered out into a pasture in search of two odd comrades of which a farmer-friend had told me. He said that he believed that either the pig or the turkey was demented; perhaps both. At any rate, during the winter, when both had spent much time in the sunny stable yard, an intimacy had sprung up between them; and as soon as they had been turned out into the meadow, instead of separating they had apparently sealed a compact of fellowship. I wanted to see these two friends together.

Under a hawthorn bush in a sheltered part of the meadow I found them, partly sheltered from the misty drizzle. The hog was half buried in a loamy bed; the turkey stood near, very slim and glistening in the rain. The pig eyed me with a pig's drowsy but bright-eyed insolence; the turkey beadily watched me. I decided to make them perform for me. I stooped, pretending to pick up a stick. Both started from beneath the shelter, the pig with an awkward rushing gallop, the turkey with a stately waltzing gait. When they had gone about thirty yards, both stopped and looked back at me with undetermined bright eyes. Then they moved off together, contented in their strange fellowship, two creatures utterly dissimilar yet bound by some mystic attachment, some unaccountable tie of kindness and good will.

How mysterious, indeed, is all attachment, all sympathy, all devotion! When I ponder the strange comradeships I have seen, life seems richer, more exciting in its promise; I feel that there are myriads of veils which we should lift so that we may catch fleeting glimpses of divine meanings and purposes in all our relationships. I find life full of arras marginal to mystery. And I find that we have in us strange, perhaps divine, reservoirs of strength; but these are never tapped until we ourselves throw the joyous levers of trust, of comradeship, of unselfishness. Then only can we feel the very strength of God moving in us gladly. Only when we love another can we feel vital and immortal.

Make Somebody Happy

Cinderella's Sweetest Day

There is a little, lonely Cinderella lurking in the heart of every one of us who is gladdened by acts of kindness that change the drab, grey world of everyday into a land of love and happiness.

In order that everyone may have an opportunity to express his appreciation of kind thoughts and deeds, there has been set aside one day out of each year—a special time for making others happy—known as "The Sweetest Day in the Year."

October 8 is Sweetest Day—the day when we should stop, look and listen—the day to check up—to see if we are sacrificing the finer feelings of the human heart to the rush of modern living. It is the day to show our family and friends that we still care. They will not know this unless we show them.

In the complex life of today, do we not owe it to those we love and to ourselves to pause for at least a little while to show that we are grateful? Sweetest Day gives us the opportunity to prove our affection—our appreciation for the good things that have come to us.

America's own flag service to Europe

When you go to Europe the American way, you are sailing on one of your own ships in luxurious comfort.

From the time you step on the gangplank until you walk off, your trip is like a delightful visit in America's finest hotel.

Your trip abroad will be a complete success if you select one of these fine ships of the United States Lines.

S. S. GEORGE WASHINGTON

A luxurious colonial home on the sea that carries you in steady swiftness on a trip of constant pleasure. First class rates from $210, second class from $136.25 and third class from $87.50.

S. S. LEVIATHAN

America's largest, fastest ship and flagship of the fleet. Every provision for unusual comfort, service and enjoyment. First class rates from $265, second class from $147.50, third class from $92.50.

S. S. REPUBLIC

The great 18,000-ton Cabin Ship. Modern and comfortable in every detail—exceedingly popular with experienced travelers. Rates from $140, third class from $85.

S. S. PRESIDENT HARDING and S. S. PRESIDENT ROOSEVELT

The fastest Cabin Ships on the North Atlantic, plus everything you desire in accommodations and cuisine. Rates from $145, third class from $85.

On a Farm in the Hills She Built a City of Trees

(*Continued from page 34*)

agreed. The farm would have to be sold as Major Smith had sold the farms before it. The money would then belong equally to the two girls. There was no other way.

No other way?

Something tugged at Evelyn Smith's heart. For the first time in her life she stepped from the background; it happened that she was never to return there.

"There *is* another way!" she said quietly. "Father wanted the farm at Amawalk to go on. He saw a future there, a business in trees, something bigger than we can understand. It is true that Mabel and I know nothing of trees, but we can learn. It is true that growing trees may be a man's work, but women have done men's work before. We won't sell the farm. We'll sell the trees as Father planned!"

It was a long speech for Evelyn Smith, but she held to every word of it. No arguments, no pleadings could move her. To every objection she returned one answer, "Father believed it could be done." It was in December of 1908 that Major Smith had died. In the spring of 1909 Evelyn Smith came to Amawalk with her sister. And Evelyn, the older, came to stay!

Few women, or men either, ever have entered into a venture more poorly prepared for it than were these two girls. They were products of the drawing-room who had never so much as washed a dish. They did not know a pick from a spade, a king bolt from a singletree. And they were to work in the dirt, with sweating horses and foreign labor from the employment agencies of New York, with foremen prejudiced for generations against "taking orders" from women, and at a time when women in business were subjects of criticism.

THERE is no more exacting a culture than tree culture. It takes years of painstaking, skillful cultivation to grow what the nurseryman designates as a specimen tree, which is a perfect tree. So rare are these trees that invariably only a few are listed in a nursery catalogue, subject to special request price quotations. Many nurseries do not list them at all.

At Amawalk, ignorant of trees, and therefore ignorant of the impossible, Evelyn Smith put a literal interpretation upon her father's dream. *Every* tree sold was to be a specimen, a perfect, unblemished tree! Every tree grown was to be a perfect tree at maturity or it would not be permitted to live!

Not only did this girl, who was not yet twenty, propose to turn a hobby farm into a commercial enterprise; she proposed in addition to do something which the most experienced nurseryman had not as yet even dared to attempt.

And then, as if this height of audacity were a mole hill, she leaped still above it. Tree nurseries were, in truth, nurseries of young trees. They grew and sold only small trees. A tree ten feet in height was considered big, one twenty feet a monster. The bulk of the business was in tiny trees—two, three, and four feet high. It was considered impractical, if not commercially impossible, to ship and transplant really large nursery trees.

"A tree must mature before it can attain perfection," said Evelyn Smith. "If we are to sell only perfect trees, we must sell only mature trees. Henceforth no small trees will be sold at Amawalk! We will sell big trees exclusively!"

And while they laughed she started to work.

She *did* grow perfect trees, not by the dozens but by the hundreds of thousands. What once were the biggest trees sold by nurseries became her smallest, while her biggest trees, transplanted and thriving, lifted their tops in undisputed supremacy seventy and eighty feet toward the stars.

To-day, in the realm of trees, this woman is spoken of as a genius and recognized as one of the greatest living authorities on arboriculture. The Amawalk Nursery—exclusively hers since 1919 when she bought the controlling interest—stands first and unique among tree nurseries. Its nucleus of 30,000 trees has grown to a multitude of more than eighty times that. The old farm of 249 acres has expanded into a property that covers two square miles.

GO TO Amawalk. There, in the course of a season you will meet a varied and distinguished company. Landscape gardeners and architects from all over America and foreign countries; celebrities of the theatre and famous artists; leaders in business and the professions; home experts, garden experts, and tree experts; park commissioners and public officials; writers, editors, publishers; aviators, orators, and preachers—figures whose interests and callings embrace the whole gamut of human activities, these you will meet there. For the lonely hill farm of nineteen years ago has become a shrine; the white farmhouse has become a salon of the noted. Jog your imagination, and at Amawalk you indeed will see a city and feel its throb—the Capital City of Trees, where a queen rules.

I found Evelyn Smith a listener, a thinker. When she does speak, she condenses a paragraph into a sentence, a sentence into a word. The impression she makes on you is one of detachment; you feel that she is seeing, thinking, beyond you.

Her associates at Amawalk are trained and able men. One of them told me: "The work we are doing here now she planned three or five years ago. What she is now planning, we will do five years hence." Said another: "I don't believe I've yet suggested a move or a policy that Miss Smith had not long ago foreseen, and was waiting for the time when I also would see and propose it."

The manager, as we drove over the nursery, stopped his car beside a field of tiny trees. "It will be twenty years," he said, "before those trees will be sold.

Is there no hope?

hen the clock hands aren't where ey ought to be . . . . .

When time and trains are up to eir old tricks of waiting for no an . . . . .

When she-who-gets-the-breakfast ows signs of getting hysterics . . . . .

What then? What then? Is there hope?

es! For there's a food already oked to crisp perfection. ape-Nuts! It stands on the elf in its cheery yellow pack-e, ready to serve. Pour a lib-al helping of these delicious lden kernels into a bowl. en milk—the top of the bot-is best. And there's a meal!

Grape-Nuts is made of wheat and malted barley. It supplies dextrins, maltose and other carbohydrates, for heat and energy; iron for the blood; phosphorus for teeth and bones; proteins for muscle and body-building; and the essential vitamin-B, a builder of appetite. Eaten with milk or cream, Grape-Nuts is an admirably balanced ration!

Grape-Nuts is prepared by a special baking process. This brings out to perfection the tempting flavor—makes this food easy to digest—and makes it crisp.

You'll like this crispness. It makes you enjoy the flavor more—and it makes you chew. Few modern foods require thorough chewing. That's one thing that ails modern teeth and gums.

Crispness—flavor—food value—digestibility—convenience. These are the five virtues that have put Grape-Nuts on millions of breakfast menus. Put it on yours. Get a package today from your grocer—or accept the following offer:

Two Servings of Grape-Nuts and "A Book of Better Breakfasts"—free!

When to install new Spark Plugs

Dependable Champions are built to last longer than any other spark plug made. They have perfectly plain, easily recognized points of material and structural superiorities, including sillimanite insulators, special analysis electrodes and two-piece construction which insure long life. And yet Champion—selling nearly 70 per cent of all the spark plugs used the world over—Champion out of its experience says this to you:—*Change your Spark Plugs every ten thousand miles if you want to get the utmost out of your motor and the greatest good out of your car for less money.*

CHAMPION
Spark Plugs
TOLEDO, OHIO.

Styles in trees change just as do styles in clothes. Yet when those trees are ready for the market they will be in style."

"How do you know?" I asked.

His eyes registered implicit faith. "Miss Smith had them planted," he said. "She knows."

Turning, he let his arm sweep in a semicircle that took in hills and woods and a town or two in the distance. "See that outer fringe of farm lands?" he demanded. "That land is between us and the towns; it cuts the towns off from us. It belongs to Amawalk and Miss Smith bought it for $150 an acre, which was only a few years ago. To-day that land is worth $3,000 an acre! Real-estate developers are all about it, running streets through the farms and dividing the fields into lots. Miss Smith saw that coming, and it came."

THE manager's gaze came back to the field of newly-planted trees, and in his eyes I saw a gleam. More than 300,000 new trees were put into the ground of Amawalk last year, and as many more will have been planted by the end of this year, to be sold fifteen, twenty, thirty years hence.

"Last year," he explained, "we sold 20,000 big trees and planted fifteen times as many little trees for the future. Again it is the same this year—sell 20, plant 300. She sees that need coming too!"

Yet Evelyn Smith does not pose as a seer. Just a little bit conservative, in her hair, in her dress, in her manner; still shy and somewhat puzzled why people should make such a fuss over her. She is genuinely amused when anybody alludes to her foresight, and vastly so when called a genius.

"If the truth were known," she told me, "I am slow-witted. I must feel my way step by step, sure of one step before I take the next."

"Yet more than a dozen years ago," I reminded her, "you foresaw and provided for the needs of to-day. To-day you are making provision for 1950."

"I am simply making such provision for 1950 as 1927 indicates should be made," she protested. "The population is increasing. More people means more homes; more homes means more trees. Every time a city or a town adds a new street, that street will need trees. The country is just awakening to the value of trees. I am guided by a hundred signposts, and I plant trees that will always be popular and not in and out with fashion."

But suppose we go back to that first spring at Amawalk and follow down the years that alone reveal the woman. She did not know one tree from another. Most of us, I think, would have turned at once to books had we been in her place. From what others, the experts, had written, we would have studied trees.

Evelyn Smith went to the trees themselves. She went to the half-dozen men who were attending them, who likewise had gained their knowledge direct from trees. The laborers were foreign-born—Italians, Poles, Russians, whatever the New York employment agency happened to send. Her shocked friends protested, warned her that it was dangerous for two women to be alone on a farm with such helpers.

The men did not disturb her. They helped her, as they were able, for she said frankly, "I know nothing. I want to learn."

They told her the names of the trees. Often, when they did not know them, she went to her father's records—the receipted bills he had left, the rough record he had kept of planting, and to tree catalogues found in a drawer of his desk. Before that first year was out, she was able to name every tree, describe it, and tell its use.

She destested method. She hated detail. For this very reason she schooled herself until she became as methodically exact and precise as a clock. There are a number of varieties of the Norway maple. One of these, known as Schwedler's Norway, is blood-red in the spring and changes later to a dark purplish green; but when not in leaf it is not unlike some other maples.

"Mark it," directed Miss Smith. "Put an 'S' on its base. Then we'll know it, whatever the season."

A trifling detail, yes; but few nurserymen of the day had thought of it. As the shipping season of trees is before they leaf, Schwedler's maples often were sent to buyers when not ordered, and vice versa. Miss Smith by a detail insured herself against mistake. The incident is typical of a thousand others.

"I was not penniless," she explained to me, "for jointly with my sister I owned land and trees. Nevertheless, when Father died it was necessary for me to do something."

There was no choice other than work. With whatever it entailed, work was a necessity. Therefore, at the very outset she accepted work for what it was, a thing which tried mind and body, which was frequently distasteful, which demanded sacrifice and sweat. She expected and committed herself in advance to effort, as a ship captain does to bad weather.

And consequently she mastered work. When the job demanded, the demand was met. She learned that the only joy in work comes through mastery of it, that mastery must come before love!

"No," she confessed, "in the beginning, I can't say that I loved trees. That came as I grew to know them."

SHE learned, both work and trees, through her mistakes.

One day the men transplanted some evergreens. Weeks passed, and some of the newly transplanted evergreens were living and others were dead. Why had some lived and some died? Like a detective solving a mystery she searched for the reason, checking again each move in the progress of the transplanting, interviewing the men who had performed the labor, pondering and piecing together the clues.

Finally she felt she had the reason, but before being sure she must test her theory. A thriving, healthy young evergreen was uprooted but no especial care was taken to protect its roots. The roots were left exposed to the air, and then the tree was transplanted, just as had been those others which had died. A second evergreen was put through this process, but with this tree every care was taken to protect the roots. She had the men keep the earth packed about them so that no air by any chance would get to them.

Side by side stood these two trees, and

for those who really mean "HEALTH FIRST"

Holland Vaporized Warm Air Circulating Systems supply the kind of air that protects the health of the whole family. Those who really mean health first know how important it is that the air should be continuously circulated, evenly warmed and tempered with moisture as is done by the Holland System. Any physician will tell you how important these features are.

The Holland Humidifier—an exclusive patented Holland feature—automatically vaporizes sufficient moisture and tempers and cleanses the air as it circulates. The Holland system itself is installed by the trained Holland men who operate the 522 Holland Factory Branches according to the standards established by this company.

Thus Holland service is uniform from coast to coast. It makes no difference whether you deal with a Branch in Boston or Seattle—Duluth or Atlanta. In every case you deal with a trained man and with a company which assumes undivided responsibility for the satisfactory operation of your heating system, no matter which branch serves you.

To make doubly sure of your satisfaction, every Holland Heating System is directly guaranteed by the Holland Furnace Company. That is why our business doubled every second year until we became the Largest Installers of Furnaces in the World and are now growing faster than ever before. Plan with a Holland man for your home heating system. Phone the nearest branch or mail the coupon for our book on home heating. We have a special proposition for contractors and builders. Write today.

Discover Your Fortune in the Field of Fire Prevention

Men Like This Needed In Every Community

FIRE Prevention Experts are needed in every city, town and community—and there is no reasonable limit to what you can earn. We furnish complete data and manual. Learn while you earn. Fire prevention is a fast-growing field of wide-open opportunity with almost no competition. It offers you a business of your own—without capital. It is a field where you can perform a real, genuine service to every property owner—where you occupy a position of respect and confidence—and where you can spend the next ten or twenty years and make more money each succeeding year. And this opportunity is yours now for the asking.

Consider These Facts

America's fire loss in property alone exceeds 570 million dollars! You will be amazed to learn that 75% of this loss could be avoided: how few have adequate insurance, or any at all—how many businesses are wiped out—how little of the real loss insurance covers. The need for first aid fire extinguishers is probably fifty times greater than you realize.

A Wonderful Opportunity

We are the world's leading makers of fire extinguishers. As a Fyr-Fyter Representative, everyone is your customer—every home, farm, factory, store, auto, hotel, theatre, school, etc. Every new building. You have a complete line—every kind of extinguisher, approved by the Underwriters' Laboratories. You often sell 10 to 50 at one time. You often make a week's pay in one day. Everybody fears fire. Everybody wants protection. Most property owners recognize the need for Fyr-Fyters instantly. Often Fyr-Fyters pay for themselves in lowered insurance rates. You can make big money recharging extinguishers of *all* makes—and replacing obsolete machines. Fyr-Fyters sell easily. Every fire speeds up your sales. One sale leads to another.

Note These Earnings

This is just a glimpse of the opportunity. Send for complete facts. See how easy it is. How Payne, Iowa, averaged $20 a day his first 200 days. How Mendenhall works half time and earns around $100 a week. How George, Ill., earns $1000 a month, and how hundreds of others earn $75 a week to $10,000 a year.

Send For Details

We will train you to do the same. If you are sincere, earnest and really ambitious, act at once. Simply mail the coupon, or write.

again after weeks one tree was alive and the other dead. The dead tree was that whose roots had been exposed to the air!

"It is as I thought," said Evelyn Smith. "The roots of the evergreen must be kept from air in transplanting. They are unlike those of other trees."

And then the inevitable question, "Why?" Why did air affect the roots of the evergreen and not the roots of the maple, the elm and the oak?

More thought, and she had the answer to this question: The deciduous trees were transplanted when they were bare of foliage and before the sap had started to course, at the end of the winter's sleep. The roots during this period in effect were dead. The evergreens, on the contrary, were persistent, always green, and sap was always in their roots. That meant that a root in which sap flowed must be protected.

UP TO that time, no nursery had thought of transplanting a deciduous tree when in leaf. The rule was that when this was done the tree died.

"But suppose we *protect* its roots in this period just as we do those of the evergreens?" the woman asked.

She tried the experiment, treated elms and oaks and maples in leaf as if they were evergreens. They lived, and she had made a discovery new to the business! Deciduous trees in leaf *could* be transplanted, even could be sold and shipped to customers, *if* the roots were protected from the air!

A square board called a platform was used in transplanting the evergreens. The uprooted tree was stood upon this square platform for support, its roots covered with dirt and burlap covering, and the whole secured to the base of the tree. Because of the awkward shape of the platform, the tree had then to be carried bodily when moved. It could not be rolled.

"Cut off the corners of the platform," directed Miss Smith. "Make the square into an octagon, and it *will* roll."

The idea was new to the nursery business. Now one man could move a tree that two had moved.

As a girl, on some of her rare excursions to Amawalk, Evelyn had watched her father prune the trees. He had not stopped with the usual pruning of the branches; periodically he also had pruned the roots! Here was another mystery. *Why* had he done it and *how* had he done it? What roots should be cut off and what ones left? The men did not know.

"Prune the roots exactly as you did for Father," Miss Smith said to her men.

And she watched. To her astonishment the biggest, strongest roots of the tree were cut off by the men. When they had finished with a tree, only a mass of tiny fibrous roots was left!

"I think those big roots should be left on," spoke up a workman. "They are the food gatherers of the tree."

So on some of the trees only the smaller roots were pruned, and on others only the biggest. The two lots were marked and replaced in the ground, like test tubes in a laboratory incubator, while patiently Evelyn Smith watched.

Presently the trees from which the smaller roots had been cut began to wither and die, while those on which only small roots had been left began to fl[illegible] She had two of the trees dug up [illegible] each lot. Only a few months ha[illegible] but already the tree with small [illegible] started to replace the big roots [illegible] been taken from it, whereas the [illegible] with the big roots had died in its [illegible] tempt to replace the small roots [illegible]

Not in a day or in a few m[illegible] Evelyn Smith see the answer to [illegible] once again, when she did under[illegible] inaugurated a new era in the [illegible] tree growing. The *little* roots [illegible] feeders of the tree; the big roots [illegible] its anchors to hold it in the grou[illegible] wind and storm. Remove the sm[illegible] and you destroyed its means [illegible] sistence; but leave it its fibrous [illegible] and it would quickly grow new [illegible] roots!

Now she had the secret of transp[illegible] big trees and of cultivating big tre[illegible] transplanting. By a periodical prun[illegible] the anchor roots she kept the root are[illegible] the tree reduced and increased its numbe[illegible] of small feeder roots. These small roo[illegible] penetrated the ground only a few feet [illegible] depth and only a few feet outwardly fro[illegible] the trunk. The tree and its entire roo[illegible] system, therefore, was susceptible to eas[illegible] removal from the ground. Once plac[illegible] in a new location the small feeders im[illegible]mediately grasped the dirt and b[illegible] to function as food gatherers, and [illegible] tree now left to itself began to send ou[illegible] larger roots that in a few years' [illegible] would anchor it there permanently.

When Amawalk Nursery began sen[illegible] out these root-pruned trees there [illegible] from customers and landscape me[illegible] howl of protest and derision. "Your trees won't live," they cried, "because they have no big roots. The root structure of a tree should be equal to its branch structure."

"Plant the trees," challenged M[illegible] Smith. "Put beside them trees with [illegible] sort of roots you like. Give all of the t[illegible] the same care, and we'll abide by [illegible] result."

The results established Amawalk [illegible] nursery!

IT IS one thing, however, to learn [illegible] principle and another to put it into p[illegible]tice. At Amawalk were more than [illegible] varieties of trees, as different in charac[illegible] and habit as in name. Soils suitable [illegible] one kind did not suit another; some tre[illegible] flourished on high, dry ground, other[illegible] ground low and wet; some in one exposu[illegible] some in another. The roots of ma[illegible] varieties grew rapidly, others slowly, [illegible] a dozen stages of growth were betwe[illegible] The root pruning had to begin with [illegible] young sapling and be continued, un[illegible] just the proper conditions and at just [illegible] proper intervals, until the trees [illegible] reached maturity and were on the way [illegible] a buyer. There was a similar maze [illegible] complexity involved in branch prun[illegible]

Miss Smith, who detested method, [illegible] came a disciple of it. She jammed [illegible] head with detailed information, exact [illegible] cause every minutia of it was first te[illegible] by experiment; and every scrap of [illegible] was gathered, not from books, but fr[illegible] hand from the trees and men on [illegible] ground.

"I learned from the men," Miss Smith told me.

"We men learned from Miss Smith."

Is the fire drill enough?

In progressive schools today, training with regard to fire does not stop with the fire drill.

School children are being taught a respect for fire—how to prevent it as well as what to do in case of fire wherever they may be. They are learning to recognize common fire hazards and to appreciate the dangers of carelessness. There is need for this appreciation, among adults as well as children. More than 50% of the nation's appalling fire loss, in lives and property, is caused by carelessness.

Is your school progressive? Local fire authorities and the North America Agent in your community will gladly help plan a practical program of education in fire prevention and protection.

Do You Make these Mistakes in ENGLISH?

Free yourself of embarassing mistakes in speaking and writing. Wonderful new invention automatically finds and corrects your mistakes; gives you a powerful mastery of language in only 15 minutes a day.

SHERWIN CODY

Many persons say "Did you hear from him today?" They should say, "Have you heard from him today?" Some spell calendar "calender" or "calander." Still others say "between you and I" instead of "between you and me." It is astonishing how many persons use "who" for "whom" and mispronounce the simplest words. Few know whether to spell certain words with one or two "c's" or "m's" or "r's," or with "ie" or "ei." Most persons use only common words—colorless, flat, ordinary. Their speech and their letters are lifeless, monotonous, humdrum. Every time they talk or write they show themselves lacking in the essential points of English.

Every time you talk, every time you write, you show what you are. When you use the wrong word, when you mispronounce a word, when you punctuate incorrectly, when you use flat, ordinary words, you handicap yourself enormously. A striking command of English enables you to present your ideas clearly, forcefully, convincingly. If your language is incorrect it hurts you more than you will ever know, for people are too polite to tell you about your mistakes.

Wonderful New Invention

For many years Mr. Cody studied the problem of creating instinctive habits of using good English. After countless experiments he finally invented a simple method by which you can acquire a better command of the English language in only 15 minutes a day. Now you can stop making the mistakes which have been hurting you. Mr. Cody's students have secured more improvement in five weeks than had previously been obtained by other pupils in two years!

Learn by Habit—Not by Rules

Under old methods rules are memorized, but correct habits are not formed. Finally the rules themselves are forgotten. The new Sherwin Cody method provides for the formation of correct habits by constantly calling attention only to the **mistakes you yourself make**—and then showing you the right way, without asking you to memorize any rules.

One of the wonderful things about Mr. Cody's course is the speed with which these habit-forming practice drills can be carried out. You can write the answers to fifty questions in 15 minutes and correct your work in 5 minutes more. The drudgery and work of copying have been ended by Mr. Cody! You concentrate always on your own mistakes until it becomes "second nature" to speak and write correctly.

FREE BOOK ON ENGLISH

A command of polished and effective English denotes education and culture. It wins friends and makes a favorable impression upon those with whom you come in contact. In business as well as in social life correct English gives you added advantages and better opportunities, while poor English handicaps you more than you now realize. And now, in only 15 minutes a day—in your own home—you can actually see yourself improve by using the 100% self-correcting method.

A new book explaining Mr. Cody's remarkable method is ready. If you are ever embarrassed by mistakes in grammar, spelling, punctuation, pronunciation, or if you can not instantly command the exact words with which to express your ideas, this new free book, "How to Speak and Write Masterly English," will prove a revelation to you. Send the coupon or a letter or postal card for it now. SHERWIN CODY SCHOOL OF ENGLISH, 910 Searle Building, Rochester, New York.

said old "Andy," the boss of the diggers, who was there from the start and still is.

In that terse statement old "Andy" paid Evelyn Smith as fine a compliment as she has had. The men taught her as she watched them at their work; she saw the spirit and the soul of the work, which they failed to see, and relayed it back to them in improved methods.

The place was a farm, not a nursery. Roads had to be built on which tree-laden wagons would not mire in spring. Fields had to be cleared, plowed, and cultivated, for in the second year 20,000 new young trees were set out. Fertilizer had to be put into the ground robbed by thoughtless farmers; buildings repaired; implements bought.

Automobiles were coming into use for trucking. Miss Smith saw the advantage they gave over the wagon, but she knew nothing of them, of their upkeep and repair. Nearby, in the town of Mt. Kisco, she discovered a class in automobile mechanics being held in a garage. She enrolled in the class, completed the instruction course, and *then* bought her first truck.

AS THE business grew, accurate financial records became a necessity. Costs had to be known before prices could be fixed. Miss Smith went to New York and engaged an instructor of Columbia University to give her lessons in accounting and bookkeeping. Then she devised her own record system for Amawalk, so simple and yet so complete that facts could be had at a turn of the hand.

Not a tree had been sold up to the time that she and her sister, Mabel, took over Amawalk. There was no such thing as a price list, a customer list, or a single sales precedent to guide them. First, naturally, they went to their friends as possible buyers of trees. But next came strangers, many of them tree experts. I asked Miss Smith how she, a novice, had sold trees to these experts.

"I didn't try to sell them trees," she replied. "I simply made it easy for them to buy. I reasoned, 'These men know trees, so I'll show them all we have, and if we have what they want they'll order them.' I let the buyer do the talking."

The buyer-expert talked and Miss Smith, the salesman, listened. Here and there she picked up a new fact to be added to her increasing store. The experts unconsciously became her teachers. And in turn, to their amazement in many cases, she taught them.

A city park commissioner was going through the nursery one day making some purchases. He paused before an oak. "And, of course," he said, "you will sell me this tree at half price. Its top is poor and it will be five years at least before it will deserve to be called a perfect tree."

"You couldn't have that tree," flashed Miss Smith, "at treble the price. It isn't for sale."

"Not for sale?" repeated the expert. "But you profess to be growing only specimen trees. This tree is not a specimen. You should be glad to get rid of it."

"It isn't a specimen now," Miss Smith returned, "but in five years, as you have said, it will be a specimen. Then it will be also a larger and older tree, worth five times its present price. I am going to hold it for that price. That is our price and it is also good business."

"Suppose," challenged the commissioner, "that it does not become a perfect tree in five years."

"We'll keep it ten, twenty years if necessary," was the answer, "and then as a specimen, it will be worth ten or twenty times more."

A LANDSCAPE artist wanted to buy several hundred small trees, but Miss Smith refused to sell small trees. The artist argued that it would be fifteen years before the trees were matured. "By that time," he argued, "this particular kind of tree may be so out of style that you won't be able to give them away, whereas if you sell now you are certain of a good price."

"I am certain only," was the reply, "that if I sell my little trees I never will have big ones. What if these trees are not in demand fifteen years hence? They can stand here and grow until there is demand, though it takes fifty years! Each year of growth will add to their value against that day when the demand returns, as it will."

It is because Evelyn Smith refused to sell the small trees that Amawalk is in the big tree market to-day and almost without competition in that field. Eventually Miss Smith bought the controlling interest of her sister. When she attained to the dignity of having a manager, he as a business man at first disagreed with her.

"If you buy a wheelbarrow for two dollars," he insisted, "and sell it for two and a half dollars it is good business. It is good business to sell anything salable that can be sold at a profit."

"Yes," smiled Miss Smith, "excepting trees, and possibly real estate, and a few other things—Ford stock, for instance. Ford stock, like my small trees, could be bought for a few dollars a share not so many years ago. It's worth two or three hundred times that to-day, and *so are the little trees I wouldn't sell.*"

"I see," said the manager; and he did see. Every man at Amawalk "sees" the policy to-day.

I asked Miss Smith to tell me her philosophy.

"It is to do my best," she said.

"But there must be more to it than that," I insisted. "I mean, what is your outlook on life and on your work, the creed that guides you?"

She smiled. "I try to do my best."

"But suppose a young man, or a young woman, came to you seeking advice, hoping to get help from you that would make his life richer and better. You would tell him something?"

"Yes, gladly."

"What?" I asked again.

She was earnest. "I'd tell him to do his best."

EDGAR A. GUEST writes feelingly next month on "Gossip—the Meanest Habit in the World." His article, vividly illustrated with incidents out of his own experience and environment, shows the enormous amount of harm an uncontrolled tongue can do.

I Feel as Young as I Ever Did

(*Continued from page 55*)

had learned our lesson. We were with the folly of leaping before we but our mental reactions were ent. My friend went home. I took in the other direction and, by and turned to my father's house with dollars in my pocket which I had ed. That victory was important to

metimes, things that seem very us to others strike me as being merely y. This is often most unfortunate for ybody concerned.

ne day, a young man who had just en a pathetic novel came and began ead it to me. He went on and on. d much to do. The young man was a fellow. I didn't know how to stop

sympathized with him, knowing important a work of the imagination s to its author. The trouble was us enough to provoke my wayward who came to my relief and I began hing. I was even more embarrassed the young man.

fear that I amuse you," said he. No," I replied; "but I had an apment fifteen minutes ago, and I am king of the remarks that are now g made about me."

EARS ago these two persons in my breast came to a compromise. Now they at peace, the one exercising a wholerestraint upon the other. When the us fellow is inclined to worry, the r says:

Cross no bridge until you come to it."

he light-hearted fellow has been right ost always. He has the better credit me. I accept his counsel. I do not ow trouble from the future. All the e, now and then I have to reckon with serious man. He keeps me fairly lent. But it is the merry-hearted lad eath my vest who has taught me to v younger with the years.

or many years I have had better th than I had in my youth. I have n two hours and a half of each day to rful exercise in the open air. I rarely s my work out of doors, even if I have o it in storm clothes. This has given almost perfect health. The love of ve fun—hunting, fishing, canoeing, —has done much to keep me in the ngth and joy of youth.

lext to a reasonable amount of outr exercise, the work that a man loves make and keep him young.

t was a curious adventure which ed me to discover my own task—the reciation and portrayal of differing es of human character.

had made my first journey out into world. I traveled on the cars to the zing city of Burlington, in Vermont. ave since seen the capitals of many ions but none so appallingly magnifit as Burlington. I ventured on to ldlebury, with very little money in my ket. At the Addison House, I got the of tending the billiard tables for my rd.

ne evening after the players had left the room, a distinguished gentleman about sixty years of age, with white mustache and chin lock, who had been watching the games, tarried. He wished to know my name and where I came from. I told him.

"YOU are wasting yourself on this plebeian task," he told me, with a lordly air.

I told him that I was doing it for food and shelter.

He put his hand on my shoulder and spoke with classic enthusiasm.

"Son of Peleus!" he exclaimed. "No longer shall you vex the shades of noble sires with such employment. Come to my house, and there be an honored guest until you return to that of your father."

I went with him to a comfortable house. His wife had gone away on a visit. His daughter, a pretty girl of about my age, opened the door for us.

"Gertrude," he said cheerfully, "here's a high-stepper from Saint Lawrence County who has come to visit us."

Gertrude made me welcome. We had supper, after which the old gentleman excused himself on the pretext that he had an errand in the village. Meantime his daughter would entertain me. She did. She sang and played the guitar and talked delightfully of her school days. At eleven, her father had not returned. It was bedtime. I was shown to my room, the spare room. I got into bed and blew out my candle.

Some time in the night I was awakened by a loud voice calling my name. The sound awoke me. I arose to a sitting posture with cold perspiration coming out on me. My door opened. The light of a candle wavered in the darkness. My host stood in the doorway.

In a tragic voice he whispered: "How ill this taper burns!"

He picked up my shoes and flung them into the hall. He gathered my scattered garments.

"Noble youth, I have need of your company," he said.

I perceived that he had need, also, of my support. I got out of bed.

He added, "Sir, I wish you to sleep with me."

It looked like a difficult undertaking. I walked with him, burdened with shoes and clothing, through the dark hall. As we proceeded, he sang in a loud voice this line of the old ballad:

"When you and I were young, Maggie!"

We reached his room. There I pulled off his boots. When he was ready for bed, he picked up a walking stick and began to thrust at me in the fashion of a fencer, one hand lifted gracefully behind him. He backed me against the wall with the point of his stick pressed hard against my breast. He shouted, "Die, false friend!" My only defense was a night shirt, but I was having a good time. The farce-comedy aspect of the situation tickled my funny-bone and appealed to my dormant sense of the dramatic.

We went to bed. My host was a poet in need of an audience. For a long time, he

DID YOU GROW UP WITH IT?

HOW old is your watch chain? Are you as sure of its style now as when you bought it? Or is it really a relic that you are privately ashamed of? . . . Does it *add* to your appearance, or *detract* from it?

We suggest that you stop at your jeweler's today and compare your chain with the new Simmons Chains.

Whether you prefer a Dickens, Vest or Waldemar chain, you will find Simmons designs that completely satisfy your needs. Modern, authentic designs . . . ranging from the smallest link-sizes to the heavy, over-sized Bond-streets that are setting a new style this year.

The Simmons process of drawing natural, green or white gold over a stout base metal means years of service. The chain illustrated here is No. 28,974. Price, $12.75. Others range from $4 to $15. R. F. Simmons Co., Attleboro, Mass.

lay repeating blank verse to me. I have met many poets since that night, but this is the only one I was ever compelled to sleep with.

When I told others of this adventure, I laughed, and all who heard me laughed. In recreating the comic character of my host for an audience I had discovered a new kind of fun. I had taken the first step toward making a writer of myself.

I HAD entered the gate of the great show of human character. Thereafter, I was like a boy at the circus.

I had begun to have a deep and increasing interest in men, and to find amusement in their peculiar traits and follies. I saw, as I had not seen before, the richness of my background—lonely people of the edges of the forest, mighty hunters, brawny rivermen and lumberjacks—French, Irish, Yankees—who had their own way of thinking. They were the people of whom Lowell said, "They have the divinely illiterate fashion of speech." Before I was eighteen, I discovered what he called the blood warmth, the vigor and originality of their idioms, and I began to have some command of them. Their talk thrilled me.

I was possessed of a love of life and joy which kept me through years heavily shadowed with loss and sorrow. Yet I was about the slimmest and most solemn-looking lad that ever set out to seek his fortune, when I went to New York.

Still, under my vest, was that other fellow with his natural and unimpaired capacity for fun, and some ability to express it. That fellow got my job for me. The shadows began to recede. I enjoyed my work. A new light came into my heart and face.

At last I found the task for which my losses and gains, my friends, reflections, ideals and work and all the curious adventures of my life had seemed to create in me—a certain humble talent. Wind and tide had been pushing me toward it. If I headed my ship for another port, it was quickly crowded back into its own course.

For me, writing rapidly became an absorbing recreation. I sit with it, unaware of weariness or of the flight of time. I really play at my desk and work on the golf course.

There is a line in one of Whitman's poems which has always deeply impressed me. It is this:

> Do you know what it is, as you pass, to be loved by strangers?

If an author, who has kept a due sense of responsibility to his readers, may believe half that is written in the many letters that come to him, he must answer "Yes" to the eloquent query of Whitman.

To have become a philosopher, friend, and comrade to unknown tens of thousands is to have experienced the greatest joy and satisfaction that a human being may know. It is like the hand of the Lord to renew and refresh the spirit of man. Therein is the "more abundant life."

I know a writer who at eighty-seven is still young. No youth has a keener interest in fun. He has given hundreds of millions to the relief of human suffering and to the building up of agencies to promote the welfare of man. I sat at play with him the other evening, and his merry laughter, his mental vigor and keenness were like those of a boy. I think that it comes of having won the affection of millions.

I can say for myself that there has been so far no charging off for wear and tear or depreciation in my little plant. It is, I am aware, an unusual and a striking fact due largely to my love of my task.

One thing I had in my youth which has been, I think, a most important factor in keeping me young and free of worry. It was a sense of chivalry—an inviolable regard for decent womanhood. Many boys of my time had it. There is nothing so sure to bring the shadow of death into the heart of man, nothing so certain to cloud his sky and humble and debase him, as the lack of chivalry. It is really a lack of respect for human dignity and decency. Therein is the trouble which shall dog his footsteps and, at last, lie down with him in the dust.

In time, I met the girl that I wanted to marry. I was not blind to the far-reaching importance of this step—that my future must depend largely upon her character. Many boys go wrong at this point. The currents of emotion are apt to be stronger than the decisions of the intellect. I was fortunate in finding a mate of like tastes and character. We fared along together through good and bad times, comrades in spirit through days well filled with failure bravely borne, with success joyously, gratefully shared, and welcomed; through years each happier than the last had been. Therein is the chief reason why I feel as young as I ever did. Life was growing richer and dearer to me.

If my young wife and I were guilty of extravagance, it was in building up a home as beautiful, restful, and inviting as we could. A certain friend of mine has said that though I have often felt like a pauper, I have always lived like a prince.

The truth is, a man's home is his gate to happiness. The making of a beautiful home is one of the noblest occupations in which human beings can engage.

THE statisticians have noted a growing number of suicides among business men beyond sixty-five years of age. Is it not possible that these men grew weary of living because they never found anything better than money-making to engage their interest? Every man should try to discover the other fellow in himself, the one who loves beauty and fun, and give to this other self the nourishment he needs in some art, craft, or line of study which will return a definite satisfaction. When business ends, every man should have some beloved task to keep life dear to him.

In short, the secret of growing young lies in putting away the things that produce wear and tear and depreciation of plant. I used to enjoy a fight; but I have learned that I have to pay too much for this sort of fun.

Franklin has said that one should make a wise use of his enemies. Envy and misunderstanding are a necessary part of living in this rather imperfect world. The greatest change that my life has brought to me has come in my attitude toward this kind of thing. For years I have been careful to give it no cause of action. No enemy is as bad as one thinks.

it is easy to find something good to of the worst of them. That is the edy.

nother change I note in myself is my tude toward the opinions of other ple. I do not let them worry me. n my own opinions are now subject to rovement. I have no life tenure in n. I am more tolerant. I rarely argue any man. I have learned the wisdom olding my tongue save when it is in iest.

ne day in my young manhood I was ng a bicycle through a deep valley in mont. It was that time when the ikee was cheering up and his humor at its best. I was passing a field of n growing out of a steep hill, when I e upon a farmer walking hurriedly by roadside with a scythe on his arm. did not turn to look at me as I disunted and walked beside him. He had time to waste on idle travelers. To n conversation, I inquired:

Is there anything of interest in this t of the country?"

or the first time he turned his eyes n me, asking:

Did ye notice that I look kind o' ly?"

No," I answered.

'Try ag'in. My face ain't what it ght to be. It's like a foundered hoss. weak an' nervous."

'Why?"

'Cause I live next to the knowin'est n in the world. He owns that house on hill yonder. When ye git nigh it, take look, and run. He's told me everyng that ever happened an' his opinion out it. He comes an' calls me out o' l nights to tell me suthin' he forgot to the day before. His tongue is breakin' n down, an' me too. Don't give us time sleep. He's got a mortgage on my farm intellect. He's just sucked the vitality t o' me. His memory is a reg'lar amp. He gits mired in it. His wife has pull him out an' clean him off every y. He ain't an ass. He's a morass."

I have never forgotten the lesson of that y, and others like it. I have been much and before the rostrum, and I know ll how talking and listening "sucks the ality" out of men.

WOULD say that one's education is nearing a respectable standard when he quires modesty and self-distrust. They e a help in keeping the heart young and e from worry.

A potent factor in keeping me young has been faith.

A growing faith in my fellow men and in a just and wise Ruler of the Universe whose will and character were in some part revealed by that Divine Missionary whose sayings and example set a standard of sublimity unequaled in all the ages, and before which the wisest men have bowed their heads in wonder.

Mine is a cheerful religion. To my mind, the Great Teacher was a man of good cheer. He was constantly bidding his friends to cheer up.

He taught the divinity of common sense. That love is better than hate is the veriest common sense. So I have faith in my share of that great possession of men. I apply it to my religion. How many things I have cut out of it which offend my common sense!

WHAT bearing has all that on the success I have had in keeping my heart young? Just this: the Great Fear has not laid its hand upon me—thank God! I do my best in the present and worry not over the future.

How may one avoid fear and worry who feels that his ship is drifting helplessly toward the rocks and annihilation?

No man can grow young whose anticipations are not enriched by every year that he lives. He must have faith that he is still, and always, a mere boy in school, slowly preparing himself for better things, for going forth to adventures more amazing and beautiful than any he has known.

A man of advanced years may be as young as he ever was if he has been a fairly faithful student in the school of life wherein he has learned to have and to hold the following:

An understanding of himself and of his talents.

A correct placing of his faith.

The love of men.

A courage which shall be equal to sorrow or failure or malice.

Good health and good friends.

A wife who is a constant challenge to the best there is in him.

An increasing appreciation of beauty and the love of work and play.

Now, looking backward across the plain of my life, I see many failures which gave me some distress when they came upon me. But the wonderful thing I see is this: Every failure was the barrier needed to turn my feet into a better way and to give me strength to follow it.

OCATED at last—*the* Average Man! Through a system of unique calculaons, he was run to earth by William S. Dutton, and next month he marializes in the person of a Fort Madison, Iowa, merchant. Will you e something of yourself in him? Does he speak for you? Whether he oes or not, you will be interested in what he says, for he talks of church, lvertising, business, politics, prohibition, home—and other subjects which all of us are interested. A unique article; you shouldn't miss it!

"Scotch Valley"

(*Continued from page 61*)

ou're fine. Mrs. Pelgram is the sort of oman who poisons cats and dogs with senic, people with words. I'm glad you ld me. There is only one thing to do. ll go away!"

His impulse was to go at once. He rose. The look in Bertha's eyes held him where he was.

She was staring beyond him at the door. She had ceased to tremble. Rigid, white

Krementz Gift JEWELRY FOR MEN

AT affairs where correct attire is an inflexible requirement, there is a noticeable preference for Krementz Correct Evening Jewelry. That appearance of quality and refinement, expected of well-dressed men, is ever present in dress sets by Krementz. Designs are stylish, in a most gratifying variety. The well known bodkin-clutch back has made the erstwhile troublesome task of inserting shirt studs a matter of ease. Each set handsomely cased; wonderful for gifts.

Dealers everywhere. Illustrations of designs and Correct Dress Chart sent free upon request.

Hosiery MUNSING *Wear* *Underwear*

Munsingwear union suits, because of the correct manner in which they are designed, the satisfactory way in which they fit and cover the figure and the unusual service and comfort they give the wearer, are for sale by one or more of the leading merchants in practically every trading center of importance in the United States.

Munsingwear hosiery like Munsingwear underwear is a quality product made for every member of the family. If you want the utmost in underwear and hosiery value ask for Munsingwear.

Munsingwear Quality Assures Comfort and Service

THE MUNSINGWEAR CORPORATION
MINNEAPOLIS, MINNESOTA

as a ghost, the very breath of her spirit seemed to be checked by what she saw. She raised her hands to her mouth, beat on her lips with frantic fingers.

"What on earth's the matter?"

Gladden swung around.

He had not heard anyone come up on the porch. The door was open, and a man stood carelessly, yet with a certain wary inner watchfulness, on the threshold. He was a small, squat man, broadly, compactly built. He jerked his shoulders and came into the room.

"How are you?" he said. "My name's Fred Smith. Hello, Bertha! Glad to see your dad?"

NOTHING had ever happened to Gladden just like this. He was stumped. The revelation of Bertha's parentage burst upon him full-fledged; he had had no preparation. Now, in the flash of a second, he remembered all the lost cues, the forgotten promptings. He had been fathering the wrong Smiths!

His Fred Smith, the cocky little Smith who had died at Beaumont in the hospital tent, was Olive's father. He had inherited not these helpless five, but the stalwart and cheerful five at the other end of the Valley!

The ironic madness of the thing struck him like a blow in the body; he felt winded.

"And who in thunder are *you?*" Bertha's father asked politely.

He moved into the room with the square tread of one who is at home and, putting his hat on the kitchen table, seated himself comfortably.

Gladden explained. The same old story. Bertha listened, without seeming to breathe. She made no move toward her father. In her dilated, curiously fixed eyes there was both dread and terror, the flicker of hatred. And now, for once and for all, she was no longer a child; disaster involved her in mature decisions, adult realities, unescapable. She could never retreat again into her bright dreams.

Fred Smith listened to Gladden with a smirk of disbelief and mockery. His eyes, small, colorless, moved restlessly. Repeatedly, he made a characteristic gesture of contempt: a shrug of his shoulders and an ugly curl of his lip.

Suddenly, out of his confusion and disappointment, Gladden thought of the children. He stopped short and said:

"You didn't die, after all, over there."

"Not I." Fred Smith smirked at the memory of Death cheated. His was a very personal victory over a powerful adversary. "I was a prisoner. They sent me back to a camp, and then to a hospital. I was sick, all right. But I didn't let 'em kill me. I was too smart for that. Trust me! I stayed sick. And when I got out, after the Armistice, I stayed right in Germany. I figgered on staying there four or five years."

"Well," Gladden thought, "you didn't particularly care what happened to your family! I suppose you're what the modernists call a free soul. You don't admit impediments." Aloud, with impatience, he said, "I suppose you know both your wife and the Mexican are dead."

"So I heard. I stopped off in Vaccatown. . . . What was this cock and bull story you were telling me?"

"I'm not going to tell it again. Now

that you're here, I'll go back to New York. There doesn't seem to be anything more I can do."

"Easy! Easy!"

Smith rose heavily. He went to the door. "Seems you've made yourself pretty much at home."

"Pop!" Bertha spoke at last. "Pop! He's been good to us!"

"Never mind, Bertha," Gladden said quickly. He sensed the impending disaster. A blind and jealous anger was gathering behind Smith's mask of stolid contempt and indifference. The success another man had made should have been his. He stared at the yard, the fences, the barn, beyond to the derrick on the hill.

"MADE yourself free and easy with my kids and my property! Leased my land! From what I heard up in the town, it was high time I came home. How about it?"

He hesitated, caught by the sound of voices. Pete and the children were coming across the yard, Billoo trotting behind them, detached and bored in the manner of trusted family dogs. Gladden had an impulse to shout at them, to turn them back from their fate, to save them, anyhow, from what awaited them. This man might be their father; but he was not a parent, he was a calamity.

Lily saw him first. She did not remember him. He was just another man. She came straight toward him, stumbling up the steps with her hands full of wilted flowers.

Gladden heard Bertha moan. She was close beside him. "Don't, Lily," she whispered. "Go back!"

Then Pete. He flushed. Frightened, he stood his ground. With a gesture, he held Nancy and Henry back. They brought up at his heels, staring. And Billoo growled. A low rumbling vibrated in the dog's throat; the hair along his back rose stiffly.

"Pop," Pete faltered. "They said you were killed! They said so, honest."

"Ain't you glad to see me?"

"Yes," Pete said politely. But he looked at Gladden.

"I can't help you," Gladden thought. "You poor kids! I've got to go away and leave you to fight it out alone—victims of a biological mistake, an accidental destiny."

They should have been his children. Now he knew how much he had grown to love them, haphazard little urchins sprung so clean and bewitching from the loins of ignorance. He suffered already the pangs of separation, the hurt of loneliness. To have his work taken away. So much left undone.

And Bertha, setting out with bitterness to refute a lie that had its roots in the mud of slander. Ill-equipped. Tripped at the start. When he had wanted to make, and to keep, the way clear for her!

"Pete," Gladden said, "tell your father what we have been doing here." He turned to Smith. "I'm going now."

"Hold on! You don't get off as easy as all that. There's some accounting yet. How about the oil lease? And the crops? How about the talk that's going around?"

"Shut up!" Gladden said sharply.

Smith came back into the kitchen. The children followed, clinging to Pete. Some day, Gladden thought, he would return, armed with cash, to buy these children

Cruel burns soothed . . .

Life-long scars prevented—no infection—with this famous surgical dressing

TO every family the need comes—and the danger: burns are so easy to infect, their livid scars so horrible! . . .

Keep a tube of Unguentine always in the house.

For nearly forty years the medical profession has used Unguentine as the standard dressing for burns both slight and severe.

Apply Unguentine liberally: at once the pain stops—throughout the swift healing process the wound is kept disinfected—and it heals, almost invariably *without even a scar!*

For severe burns and open cuts, apply Unguentine to the wound spread on gauze, and bandage lightly. You will find many uses for Unguentine. You need it especially for active children. Made by The Norwich Pharmacal Company, Norwich, N.Y. At your druggist's, 50 cents.

From a fire chief: "The fire was out—but the housewife was severely burned in fighting the flames. I myself applied Unguentine to the wounds. Our trucks carry tubes. She slept well that night . . . soon was healed smoothly."

This case might have been tragic: "While my little son was dressing before the fireplace, sparks caught his dressing gown. A great strip along his side was burned. I applied Unguentine. His screams stopped. Miraculous . . . Now I can't find the slightest trace of a scar."

Scarring from burns that mar for life can almost invariably be avoided. Unguentine has saved thousands. Festering is prevented; the new skin forms quickly, smoothly.

back again. . . . But he had to attend to the bitter business of the moment.

"Hansen will explain everything to you. We'll give you a complete account, of course. I'm not trying to run away!"

"You'd better not. I've got it on you, young fellow, good and plenty. And, what's more"—he jabbed at Gladden with a stiff forefinger—"I'm boss here now. You'll take orders from me!"

"Is that so?"

Gladden put out his arm and shoved Smith out of the way. The gesture satisfied him for the moment; it had been surprisingly easy, weak as he was. He went to his room and began to pack his things. He sat on the bed to change his shoes. He heard Lily crying down-stairs. But then she always cried.

"I'll have to curb my imagination," he said. "He won't beat them! He'll only neglect them and bully them, and make them into his own image. They will forget me. There's nothing for it but to go away. I'd only make it worse for them if I stayed. Worse for Bertha. . . . Bertha. . . . Bertha. . . . I must see Calabri."

Then he remembered. He hadn't a cent.

Calabri was waiting on the porch when Gladden came down with his bag.

"Thought you might need me." He jerked his thumb over his shoulder. "Other boss home, eh? What you do?"

"I'm going to New York. You keep your eye on these children, will you? Maybe, some day, I'll be coming back."

"Sure. Sure thing. No more pipes, eh? No more job. How about that fellow?"

"Pelgram? Oh, I'm not worrying about him."

"You watch out. He's pretty mad."

"Well, it isn't likely," Gladden said, "that he will follow me to New York. Besides, he got the best of me."

Calabri laughed. "Anyway, I stay here to-day. You get out. If he starts any funny business—"

"Remember what I said! We don't want any vendettas. . . . Where are the kids?"

"They follow the old man. Up the hill."

"Already!" Gladden thought.

He clasped the Italian's hand, that coarse, broad paw with the calloused palm, the short, facile fingers. "I'll go along before they see. I'd rather not say good-by."

"Take my car, boss."

"No. I'll walk. That is, unless you'll drive me back to Vaccatown yourself."

"I stay here. I watch those kids!"

GLADDEN was already across the ford when he discovered Billoo at his heels. The dog had come on the run from the top of the hill; he was grinning with satisfaction. Gladden touched the big square head briefly.

"Go home, Billoo," he ordered. "Go on back home!"

Usually an obedient dog, Billoo hesitated. He pretended not to hear Gladden or to be aware of orders. Indifferently he explored the roadside, but his eyes were wary and self-conscious.

Gladden picked up a stone and shied it into the bushes where the culprit scratched and snuffled at an imaginary gopher. "Go on home, do you hear!"

—when the crown stands or falls....

"—You're *there* with a Crosley..."

The Crosley Radio Corporation.
Folks who buy radio are vitally interested in what they get for their money. Why don't you radio manufacturers stop talking like a lot of doctors and tell us what it's all about in one cylinder words? What's this "shielding" business anyway?
Yours truly,
AITKEN RADIO, Toledo, Ohio.

Shielding is necessary in a modern radio receiver. The more sensitive the set is, the more you need it. Some sets are merely housed in a metal

case. This helps to keep strong local signals from breaking through, but it is even more important to keep them where they belong after you get them the proper way from the antenna.

A set has tubes, condensers and coils. Here is a coil. The lines around it are the magnetic field. You know the earth's magnetic field will work a compass down in a mine, or up in a plane (it certainly worked for Lindbergh) and the fields around unshielded coils get all mixed up and the set howls and squeals and has to be choked off by turning down the filaments in the tubes.

Now if the coils are housed in copper shields the fields can't mess each other up, and the tubes can do a real job of amplifying. The coils in Crosley sets have these copper shields, and there isn't anything better.

Then there are the condensers, and if it wasn't for the shield around them, the fields would act like those in the coils, and the results would be just as bad, or worse.

It isn't enough to shield the coils and the condensers, because even the wiring of the set has fields around it. This too is shielded, as it is in all really high grade sets.

Of course, it's all in knowing how to do it, but that's why Crosley sets can be as good as the best without costing half as much.

APPROVED CONSOLES
Selected by Powel Crosley, Jr., as ideal, acoustically and mechanically for the installation of the Crosley "Bandbox" Genuine Musicone built in. Crosley dealers secure them from their jobbers through

The BANDBOX

A 6 Tube Receiver *of* unmatchable quality at $55

LIGHT SOCKET MODEL $65

Price slightly higher west of the Rocky Mountains.

Many features of this set have been found heretofore only in the most expensive radio. Since Crosley is licensed to manufacture under nearly all important radio patents, this combination with Crosley leadership and experience, naturally produced an amazing radio, the remarkable value of which can be judged by the following features incorporated and by seeing it and hearing it at your dealers.

1. Completely shielded coils, condensers and wiring. 2. Acuminators for sharper tuning. 3. Completely balanced genuine neutrodyne. 4. Volume control. 5. Single tuning knob. 6. Illuminated dial. 7. Single cable outside connections. 8. Designed for easy installation in consoles. 9. Beautiful frosted brown crystalline finished cabinet.

AC model using new R.C.A. AC tubes and working directly from electric light socket through Crosley Power Converter is $65. Power Converter $60 extra.

Hear this wonderful new contribution to the enjoyment of radio. If you cannot find one of the 16,000 Crosley dealers near you, write Dept. 2 for his name and literature.

IMPROVED MUSICONES
Musicones improve the reception of any radio set. They are perfect affinities in finish, beauty and reproductive effectiveness for Crosley Radios. A tilt-table model, with brown mahogany finish, stands 36 inches high, $27.50—16-inch Super-Musicone as pictured above with "Bandbox", $12.75—12-inch Ultra-Musicone, $9.75.

CROSLEY RADIO

NEUTRODYNE

The Crosley Radio Corporation, Powel Crosley, Jr., Pres. Cincinnati, Ohio.

Crosley Radio is licensed only for Radio Amateur, Experimental and Broadcast Reception.

Crosley recommends the use of five 201-A Radiotrons and one UX-171 power tube or Cunningham equivalents, which are furnished at standard tube prices, with each Bandbox. While Radiotron UX-171 is 180-volt tube, it gives a superior performance for 135-volt "B" batteries.

Even this outrage passed unnoticed. Billoo emerged, bland and grinning, to trot a safe distance behind the master he had adopted for better or for worse. This passionate devotion caused Gladden more suffering than desertion or indifference.

In the end, he submitted to being followed. There was nothing else for it. When a man takes unto himself a dog, he belongs to the dog. Gladden thought of turning back, of delivering Billoo to Pete. But it took more courage than he was at the moment possessed of. So he whistled to the dog and went on, not daring to look back.

The thought of the children, following their father with the unwilling curiosity of scared little birds trailing a snake across a meadow, tempted him to turn back, if only to ease the painful restriction of his own heart. He did not doubt that they had grown to be very fond of him. There had been times during the past eight months when he had been overwhelmed by their faith, abashed and burdened.

Now, without apology or explanation, he was leaving them. The more he thought about it, the worse it became. He had seen enough of this resurrected parent of theirs to be sure that within a year poverty and despair would creep over their lives like lichen on a wall. Not even Bertha, not even Pete, could save them.

IT WAS a day of washed sky and luminous clouds. Ryder painted such clouds: Great puffs of vapor full of light, swift, crystal, incredibly white. Now the valley was in bloom. Blossoming trees as far as the eye could reach. Blue shadows beneath sprays of pearl and ivory. A scent of honey, delicate, pervasive.

Gladden remembered what Bertha had said, that parched day of their first pilgrimage: "Poppies to make wreaths of. And larks."

Not an English lark, spilling notes from the apex, but a wayside burst of song, sudden, sweet and thrilling. Across the plowed fields blackbirds swarmed with a whir of wings. Gladden was dwarfed by the height of the sky, the circling blue of hills.

He saw himself, a small, ridiculous figure, pursuing a destiny of importance to no one but himself, going about his vast business in silence and alone. Now, he'd have to wire Uncle Steven, "You were right. Broke. Returning."

The main street of the town was full of people, Saturday idlers. Gladden walked through them quickly, hoping to find Hansen in his office.

He had reached the bank when he became conscious of someone at his elbow. He had a startled instant of recoil; he was gun-shy. Something had gone out of him during that week of unconsciousness.

Finally he turned his head.

It was Bertha.

Bertha, hatless, her hair tumbled about her face: "I followed you. All the way. Only you didn't see me."

"No," said Gladden. "I didn't."

He was ashamed of the way his heart beat. He was excited. At the same time he was embarrassed. He supposed that to feel like this was a symbol of something or other. He didn't quite know what—sport perhaps! He had won, on one count. He couldn't help feeling that she

Digitized by Google
Original from STATE UNIVERSITY SYSTEM OF FLORIDA

wouldn't have followed him unless she liked him a little.

"Pop made us go with him up the hill. I saw you going along the road. So I ran!"

"You'd better go back," Gladden said seriously. "Your father—"

Bertha shook her head. "No. I'm going with you!"

"You can't."

A stranger, passing, grinned: "Hello, Bertha!" And turned to look at the pale, agitated girl who caught suddenly at Gladden's arm.

Feeling sick at heart, Gladden parried the look with a scowl, and said, "We'll go up to Hansen's office. We can't talk here, in the street."

But Hansen wasn't there. When Gladden opened the door, he found the dusty room empty. The window stood open, and a bedraggled curtain trailed back and forth across the sill. The telephone began to ring, with that insistent, irritating buzz which demands an answer. "Wait," Gladden said. He lifted the receiver.

He heard Hansen's voice: "That you, Gladden? I'll be there right away!" And before he could pin the voice down, it was cut off by a click, closed into space, lost. "How did he know," Gladden wondered, "that I am here in his office? Have people reported already that Bertha followed me?"

He turned to her: "Bertha, you must go back!"

"No."

"Well, then, sit down until Hansen comes. He'll drive you home."

Disturbed by the look in her eyes, Gladden attempted an absurdity. "You followed me because you wanted Billoo!"

"No."

"Then why?"

SUDDENLY she held out her hands. Gladden caught them and went down on his knees before her. He slipped free of her hands and put his arms around her. He leaned his head against her dear smallness, her incredible light grace.

This tumult of heart and blood was painful, satisfying, new. He was silent. Meaning and utterance escaped him, because he clasped love in his arms: child, woman, soil, ambition! Would it always be like this?

He felt Bertha shivering against him.

"You've got to take me, because I love you. More than Olive loves you. More than anyone!"

"This *child*," he thought. But what was time? Why pretend that years and dates—

He turned his face against her. Every second made past and present more irrelevant and perishable. It was only the ridiculous need to speak that could break the spell, dissolve this thrilling, unconscious, mastering emotion. This *child!*

As though down a long shaft of light he saw her; brave, resolute, infinitely precious, coming toward him; he wondered at his obstinacy. She was pitifully innocent, gloriously wise—and for the taking, his own.

He held her more gently.

He loved her. He had perhaps loved her from the beginning. It was a fool's love, because even now he shrank from its fulfillment. So it was not desire. It was not selfishness. It was not cowardice.

WASH ONCE . . .

WASH AGAIN . . .

AND . . .

Then . . .

watch this massage roll out hidden pore-dirt!

IT'S startling . . . the amount of dirt that hides in your pores.

Only when men see this pink cream turn gray with pore-dirt after a few seconds' massage, do they realize why their faces seldom show the healthy glow of a really clean skin.

Pore-dirt gets grimed in under the skin of every face. The wash cloth doesn't budge it. To prove this we urge you to send for the FREE tube offered below and to wash your face —twice—before using it.

Then prepare your pride for a real shock!

Rubs in* pink. *Rolls out a dingy GRAY!

Squeeze a little cream from the sample tube. Rub it onto your face around the chin, where the nose meets the face, over the nose itself. Continue rubbing.

In a few seconds the dried cream rolls out. Pink? No, a dingy gray! Dark with the pore-dirt that grayed your complexion!!

Then look in the mirror. Clean! No unsightly blackheads now. Your pores are freed. Your skin a-tingle with a healthy, fresh glow that causes folks to say, "Gosh, you sure look well today . . ."

FREE test convinces thousands

You can buy a jar of Pompeian at any toilet goods counter for 60c. We'd rather you tested it FREE. Fill in the coupon and mail it to us—right now, while you are reading this message.

Photograph taken under the lens of powerful microscope showing section of skin before using Pompeian Massage Cream. The light area at the right shows the cream spread on the skin.

Photomicrograph of the same section of skin after using Pompeian Massage Cream. Compare the skin tone. Note the dried pellets of cream, dark with the pore-dirt that has been rolled free.

He loved her because she had in her the essence of beauty: the will to serve and the heart to play. She was so young, so dear, so unattainable!

He lifted his head.

"Jim," she said quickly, "you can't go without me. You can't! If you'll marry me, we can take the kids and go away. All of us!"

"Marry you! You aren't eighteen."

"I will be, in October. I'm old. I've lived a lot. I'll take care of the kids and you, too. Pop won't dare—"

"Bertha, you're crazy."

"Then I'll follow you!"

GLADDEN was swept by a gust of feeling. He got up, bewildered, a little unsteady.

"Bertha," he said gravely, "you don't understand. Marriage isn't as simple as that."

"I love you," she said again. "I'm going with you!"

"First, you must finish school."

"School!" She blazed at him. "School! I know enough! I don't want to know things. I want to think them out for myself. But I'll study. I'll do everything you say, I'll work . . ."

"You never told me—"

"About Pop?"

She laughed. "Jim! I knew we were the wrong Smiths! I didn't tell you Pop was mean, because I was afraid you'd find out it was the other Smith, not us. I told Pete to shut up. I didn't want him to tell you. Nancy and Lily couldn't remember Pop. Henry couldn't. But Pete and I remembered! We hated him. He used to lick Pete. He went to war to get rid of us. Jim, don't you see, he'll be mean to the kids? You've got to stay!"

"Is that why—"

She sprang up. Her arms went around him again and she pressed her face hard against his breast. He began to kiss the top of Bertha's head, suddenly released from indecision, elated and reckless.

They were standing so, clasped together, when Hansen opened the door.

He said, "Oh!"

"It's all right," Gladden said. "Come in. Bertha and I are going to be married."

Hansen closed the door carefully. The face he turned to them was a fat mask of anxiety. "I think you'd better come back to the ranch then. I've been out there. Bertha's father is going to make trouble."

"How did you know—"

"I saw him on the street this morning. He had been drinking. I don't mind saying, he was publicly noisy and vituperative. And a lot of Pelgram's friends were helping him along. For Bertha's sake, you'd better go back and explain. He is a man—forgive me, Bertha—who carries both his liquor and his honor badly. He wants to shoot you. And I dare say he'll do it, unless you satisfy him. He's dangerous, because he had taken it into his simian cranium to be proud."

"We'll go out there, of course," Gladden said.

Hansen hesitated. His eyes were clouded with a friendly bewilderment. You could see his mind darting in search of the truth. He did not want to blurt out anything awkward. It was a difficult question to ask. "You're sure, you're perfectly sure, both of you—"

"You can't *explain* love," Gladden said.

Hansen's eyes cleared.

"You're both so young," he said.

"We've lived a lot." Gladden quoted Bertha. "And we know what we want!"

In the car, with Billoo, Gladden took Bertha's hand. "I have no idea what has happened to me," he thought. "Whether it is for good or bad. I only know that it is better not to ask questions."

He sensed the need for recklessness. The whole of life could be purified, saved from bewilderment, if he could only hold the absurd and beautiful audacity of this moment. He was frightened too. Her hard, calloused little hand! Her shy, strange eyes, eyes light-flecked and shadowy, peering out from the retreats of childhood into the crowded open ways of maturity. Bertha. His. It looked like forever and forever.

They drove across the new bridge at the ford with a clatter.

"Square it with Smith," Hansen advised briefly. "Then we'll talk business to him. Only, go easy. He's mean!"

He stopped the car with a jerk. "Here! What's this?"

Calabri was running toward them. He yelled and waved his arms. "Stay back! Stay back!"

Conquering a fundamental dread of being shot, a distaste that made his flesh prickle, Gladden stood up. Then he saw what the Italian meant. Pelgram was crossing the yard, not toward the car, but toward the barn, where the open door gaped black and empty like the grinning open mouth of a mask of tragedy. He carried a rifle in the crook of his arm.

Before Calabri gained the bridge, a man appeared in that blank space, with Lily at his side. He paused there, illumined by the greenish, level light of the setting sun; a figure remote but terribly real. He looked off at his acres. He raised his hand to push his hat back.

"Watch out!" The warning was split in two by a detonation that sent him spinning, ridiculously out of balance, twice around, before he fell to his knees, bent over, collapsed on his face, and lay still.

"Stay here," Hansen said. "I'll take Pelgram. Come on back, Calabri!"

"Stay in the car, Bertha," Gladden said.

"He killed Pop! Jim! Pop's dead! He shot him!"

"Perhaps not. Stay where you are. It isn't safe—"

"But Lily!"

Bertha brushed Gladden aside. She ran. "Lily! Lily! I'm coming!"

LATER, when Fred Smith had closed his eyes forever on his forfeited possessions, Gladden had a moment of bitterness. It was his bad fortune that this Fred Smith, too, had died in his stead.

When Hansen's hand fell on the murderer's shoulder, recalling him from revenge to punishment, Pelgram had said, "I thought it was Gladden!"

There was this to regret. But there was this to be thankful for: Gladden's twice-given life belonged not to himself, but to the tribe of Smiths. Lily. Nancy. Henry. Pete. And Bertha. Forever and forever his! (THE END)

"I'd Rather Build a Mansion Than Merely Live in It"

(*Continued from page 51*)

ing Brooklyn churches. So I had ething to think of besides my work. ook me into a different atmosphere; e me a common interest with people otherwise would have been strangers. t is a good experience for any man. I was paid money for plastering and I paid money for singing. I was glad ave money, because I don't know a of living without it. But if I worked for money, nothing else, I shouldn't well paid, no matter how much I ived."

his was interesting! I have heard very men—bankers, railway presidents, ds of great corporations—say the same of thing. They claim that they care e for the "game" itself than for its ards. Some people question their erity. I don't. Yet there is always loophole for doubt: They can afford alk that way, because their "game" s pay them big money. How would y feel if they had a less interesting and lucrative job?

ut here is a man who has such a job, he says the same thing. He talked a d deal about it and I know that he was olutely sincere.

s nearly as I can sum them up, the of his ideas is this: A man should e two paymasters. From one—his oyer, his boss, or the people who buy atever he has to sell—he gets the ney he earns.

ut if he works only for them, he is a e hireling. His other paymaster must himself! If he does not earn, from self and for himself, pleasure in his k and pride in doing it well, then he is hty poorly paid.

ohn Jones says that the man who ks first and foremost for his own asure and satisfaction is not a hireling *a free man.* Certainly John Jones self looks and acts free.

HAVE interviewed some of the most amous men in the country, men who are ernational figures in industry and nce. But not one of them bore himself h greater dignity and quieter self-confi- ce than does John Jones the plasterer. Not one of them seemed to have a ater respect for his job, nor talked of it re interestingly. Have you any idea of knowledge, experience, and skill uired to make a first-class plasterer? ertainly had no conception of it until I t John Jones.

ven the average workman who plasters plain walls of an ordinary house must ve training and ability if the job is to be e right. And when it comes to costly vate mansions and splendid public and siness buildings, the plasterer must be able of doing the most intricate and borate work.

In referring to one of his employers es said: "He knew almost as much out plastering as I do."

He said it with unaffected warmth. It s the highest compliment he could pay. He was equally unaffected when he said: "I could tell the architects and the builders a good many things that would help them. The architect's blue print is more or less theoretical. The practical workman has actual knowledge, based on experience.

"His orders are to follow the blue prints. Sometimes he has to do this, knowing all the time that the job won't be right when finished. If the architects and builders would consult more with the workmen, a great many mistakes would be avoided.

"My own employers for a good many years past have been willing to do this. It benefits both parties. People give what you ask them to give. If you ask only routine work from a man, you can't blame him if that is all you get from him. Ask *all* he has to give, and you will probably get it.

"IN RECENT years, especially since the war, fine workmen have been growing scarcer in the building trades. By fine workmen I mean those who do work of the highest quality and integrity.

"That is the reason why I won't accept the job of foreman. I'd feel responsible for the way a job was done; and the worry of trying to get it done *right* wouldn't be worth the extra pay. I'll take the responsibility for my own work, for I know I'll make it as perfect as the conditions will allow. But I can't supply conscience and skill to other men who haven't them, or who won't use them.

"You mustn't think that the men themselves are entirely to blame. At the close of the war there was a building famine. The supply was so far short of the demand that it hasn't yet caught up.

"The result has been that the builders have been insisting on one thing above all others: Speed, speed, speed! Take the big structures here in New York, for example. With the work going on night and day, enormous sums are paid for overtime labor. It seems as if the owner doesn't care *what* the building is going to cost.

"I can't understand this. It is cheaper to rush it through so that he can begin to get a return on his investment. But the effect on the workmen is disastrous. Quality is sacrificed to speed. Why, thousands of houses have been built since the war which, in ten years, won't be fit to live in.

"What is the result? The younger men—those who have learned their trades during the past ten years—don't even know *how* to do the finest work, because they haven't been given the chance to do it.

"The New York Building Congress, by recognizing and rewarding capable and honest craftsmanship, is helping to fight this condition. I believe it has given about three hundred and fifty certificates like the one I received. Also a gold button to wear in the coat lapel.

"When one man to whom the award was made showed the certificate to his helper the helper read it all through and

Now *before* WINTER Comes

MAKE THIS *one* SIMPLE CHANGE —save ⅓ of your fuel

BEFORE winter cold sets in, before you begin wasting 1 out of every 3 tons of coal (or gallons of oil) *unnecessarily*—call your local heating and plumbing shop and have them make this one simple change in your steam heating system. Have them replace the air venting valve on each of your radiators with a Hoffman No. 2 Vacuum Valve. You will get amazing new comfort.

You can have hot radiators 3 hours (not 30 minutes) after fires are banked. You can get up steam in 15 minutes (not an hour). Think what this means in comfort and convenience. You can bank the fire after dinner and still have piping hot radiators when you go to bed at 10 or 11. You can have three quarters of an hour more sleep in the morning—and get up steam by the same hour—7 or 8—as before. What is more *you cut your coal or oil bills* ⅓.

By this saving, you earn 50% to 65% on your investment in Hoffman Vacuum Valves—*the first year.* At the end of the second, you get your investment back—plus a profit. Every year, after this you receive a gift of approximately $5.00 for each radiator in your home.

SEND FOR BOOK—Like any investment, this one is worth studying. Send for interesting 48-page book, "*How to Lock Out AIR—the heat thief.*" It explains the invention that makes this amazing comfort and fuel saving possible. Just print your name and address on edge of this ad. and mail to Hoffman Specialty Co., Inc., Dept. P-10, 25 West 45th Street, New York City.

NOW FREE!

Raised My Pay 700%

This Book Showed Me How

How would you feel if your salary suddenly jumped seven times greater than before? That is exactly what happened to O. A. Jones of Charleston, Missouri after reading this amazing book—now sent free to everybody. An unusual case? No. E. L. Palmer went from $3 a day to $4000 a year. F. G. Walsh went from $20 a week to $7286 last year. C. V. Champion became President of his company at a salary exceeding $10,000 a year! And all of them started by reading this free book!

The Secret of Big Earnings

All successful men in the world today are master salesmen. And every man is a salesman. If you want to make big earnings, you must learn to sell yourself. You must absorb the methods of saying and doing things that make men act as you want them to act. There is no more false statement made than the old saw about "salesmen are born—not made." Salesmen are made—not born! This free book shows how!

Big Demand for Master Salesmen

Master Salesmen are at a premium in American business today. They are never out of work. They can command their own salaries and their own time. They travel and see the country—the world. They dress well, live in the best homes, drive their own cars. Aren't these rewards worth going after?

How We Help You Succeed

For twenty years, N. S. T. A. training has been developing Master Salesmen. The National Demonstration Method—an exclusive feature—gives you the equivalent of actual experience while studying at home. Our success in training inexperienced men into powerful salesmen is so world-famed that thousands of leading business houses have called on us to supply them with salesmen. This service is free—and we have placed thousands of men in good-paying positions.

Send for This Free Book

Don't say "I can't sell" until you find out whether you can or not. This free book, "Modern Salesmanship," proves that master salesmen can be made, regardless of personality, education or previous selling experience. Send for this free book right now.

said: 'I'm going to get one of those for myself inside of a year!' And he did it, too.

"That was all right. But if he was working only for praise and recognition he had a poor motive. I never had heard of the certificate until it was given to me. If I had, it would have made no difference in my work. I was already doing my best, simply to satisfy myself. I won the certificate by my work on one job. But I have to earn my own approval every hour of every working day. To succeed in doing that is worth a hundred certificates."

"How did you happen to come to this country?" I asked.

"Well," he said, "I was the oldest of twelve children. Counting my parents, that made fourteen mouths to be fed. Wages were low; and in a country like Wales there wasn't a great amount of new building.

"Years before, my father had befriended a poor boy; taken him out of the almshouse and given him a start. That boy had grown to manhood, moved to the States, and become a building contractor in Brooklyn. Good workmen were scarce over here, so he wrote to my father and offered to give me a job. I came to Brooklyn and worked for him for a year.

"He wanted to keep me as an apprentice, at apprentice wages, until I was twenty-one. That was not fair, for I was already a capable workman. So I left him and hired out on my own account. That was forty years ago; and in all that time I have not lacked employment.

"I own my home in Brooklyn. It isn't pretentious but it is pleasant and comfortable. People who pay $20,000 a year for a New York apartment don't have as large a bedroom as mine is. And you ought to see my garden! It is the beauty spot of the neighborhood. Instead of working overtime to earn extra dollars, I spend those hours in tending my garden. It doesn't bring me any money, but it brings the health and happiness which money couldn't buy.

"And think what it means to my family! My little granddaughter is three years old. Even here in the crowded city, she is growing up among flowers. That's more than most of our richest city folks can say for their children. I've worked on their great mansions and I know."

"WHEN you are helping to build these magnificent houses," I said, "don't you envy the men who own them?"

John Jones looked at me as if I had started a new train of thought in his mind.

"You are making something beautiful," I went on. "Other people, just because they are rich, will possess it. And just because you are *not* rich, you *can't* have it."

"No," he said slowly, "but I *made* it!"

"You mean," I asked, "that you would rather be able to create something fine and beautiful than merely to pay somebody else to create it for you?"

His face lighted with understanding.

"That's it!" he said. "It's a greater satisfaction to make things than to own them. In one sense, I do own whatever I create. There are monuments of my work all through the city of New York. I know more about some of the mansions on Fifth Avenue than their owners ever will know about them. I have had more pride and pleasure in helping to build them than their owners will have in living in them.

"In other words," I suggested, "you get your greatest satisfaction out of what you do, instead of out of what you have."

"That's it!" he said again. "That's it exactly."

"I suppose you are not a rich man," I said.

"Far from it!" he replied.

"You are not a rich man, but you have had a rich life. Is that true?"

For a moment he did not answer. He was thinking it over.

"Yes," he said finally; "I call my life a rich one. I have done the work which I liked and which I was fitted to do. I am proud of the way I have done it. It has earned me respect and recognition.

"I have had other interests and pleasures; and they have enabled me to give pleasure as well as to feel it myself. I have had far more of health than most people enjoy. That, in itself, is better than a fortune.

"I have had a home and a family. I have had a wife with whom I was happy and children of whom I was proud. I have had sorrow, but never shame.

"I guess that's about all," he said, smiling; "but I don't think anybody could add much to the list. Not much except wealth; and even in money I am not really poor. I have lived to see the day when the workman is better paid than ever before. I believe this is a good thing and I'll tell you why.

"YOU and I were talking, a little while ago, about the white-collar class. Now don't misunderstand me when I say that we, the skilled and highly paid workmen, *look down* on most of these white-collar jobs.

"Why shouldn't we? In the first place we earn more money. I pity the average salaried man, for I don't see how he manages to live on his pay.

"Most of them don't have the same pride in their jobs that a good plasterer, or carpenter, or bricklayer, for example, has in his. Our work seems more important. If a bookkeeper makes a mistake, he or somebody else will ferret it out and correct it. But if we make mistakes, the result may be a disaster. In any case, the mistake will cost more to correct. Or, if it isn't corrected, it will stay there and stick out like a sore thumb for everyone to see.

"But a man cannot help respecting a thing more if other people seem to value it highly. Consequently, we workmen feel prouder of our jobs, now that we receive better pay for them. That is *human* nature. And it is human nature, too, for other people to have greater respect for us as a class, than they had when we earned less money.

"Self-respect and the respect of others make a man a better citizen. Not only that, but a man who has money to spend is *worth* money to his community. He makes a bigger market for business. He is an asset instead of a liability.

"I may be mistaken; but I believe that if the millions of people who depend on workman's wages had to cut down their buying, it would be a worse blow to business than if only the rich people started to retrench.

"That's why I think that high wages are a good thing all around. I know that

Distinctive Paint Finishes

for modern home interiors

Charming one-color wall finishes rich—figured effects—soft, subtle blends of color

Almost any room can be decorated successfully in the striking, unconventional Sponge-Mottle finish illustrated below. Tamping the paint on with a sponge gives this unusually interesting effect, whose great charm lies in the irregular pattern of the mottling which may be in several colors if desired.

The Tiffany is the aristocrat among paint finishes. Its beauty is the rich subdued beauty of subtly blended colors. Here is no finish that you tire of, but one whose loveliness seems to glow anew each day, making it an ideal background for many types of interiors.

Crumpled paper, rolled over wet paint, is responsible for this finish of distinctive and individual beauty. The Crumpled Roll finish is characterized by a beautifully soft and feathery design and is an effect which lends itself to many interesting color combinations.

The Wiped Stencil is a delightful decorative touch often used in connection with the Tiffany. The stencilled design may be either sharply defined or left beautifully soft and indistinct. It lends an additional charming note to the Tiffany much as it does to the one-color wall treatment.

One-color treatment of the interior, with striping to add distinction. This paint treatment is one of the simplest and yet most charming obtainable for average-sized rooms as well as larger, more formal interiors. But there are many cases where special finishes, also shown here, are in equally good taste and sometimes even preferable.

ALL are yours to choose from when you use pure lead paint to form backgrounds of beauty in your home.

With pure lead paint, made of Dutch Boy white-lead and flatting oil and mixed and tinted by the painter specially for every painting job, the possibilities for colorful decoration in modern good taste are limited only by the imagination and by the harmonies of the complete decorative scheme.

Paint with this lead paint and you paint for beauty, cleanliness and durability. It is the most durable, economical, washable paint for interior decoration that you can buy.

We have a booklet on decorating the home which shows in color the unusual wall treatments possible with lead paint. Let us send it to you together with a decorator's data form from our Department of Decoration for your use if you want help in selecting a color treatment for your home. Write our nearest branch for "Booklet V".

they have made workmen more conscious of their value and therefore more self-respecting. I look up to a man who does any job, no matter what it is, honestly and as perfectly as possible. I'm willing to wager that he takes pride and satisfaction in what he does. And that goes a long way toward making him a happy man."

IT WAS a Friday night when I had this conversation with John Jones. We talked late; and I knew that he would have a long trip back to his home in Brooklyn.

"I'm afraid you won't feel much like getting up and going to work to-morrow morning," I said as he was leaving.

"Oh, I don't work on Saturdays," he reminded me. "I shall spend the morning in the garden with my little granddaughter. In the afternoon I shall go to the cemetery. I have made my lot there almost as beautiful as my garden. Sunday I'll go to church. I'm not a member of a choir now; but there are still plenty of chances to sing and I get a great deal of pleasure out of it.

"Monday I shall be fresh and ready for work. Just now we are remodeling one of the handsomest residences in New York. I'm doing some beautiful ceilings and cornices in it. After that, I may be employed on some great apartment house, or a theatre, or one of the bank buildings which are the pride of New York City. It's a wonderful thing to have a job like mine; always new and always interesting. I wouldn't change work with any man I know."

So there you have John Jones and, I hope, an understanding of what he gets out of his job. No "back to the tread mill" for him. No desire to "take a drink and forget it." A man proud of his working skill and working integrity; believing in the importance of an honest job well done; having an honorable ambition and happy in the knowledge that he is achieving it.

Patterson Helps to Edit Twelve Thousand Newspapers

(*Continued from page 37*)

was born fifty-seven years ago in Kirksville, Missouri, the son of a circuit-riding Methodist minister. He was thirteen years old and living with his parents in Ainsworth, Iowa, when he started a newspaper.

"A boy friend," he explained to me, "had a tiny printing outfit. Ainsworth had no paper. With my friend's type, I started one. That paper had four pages, with three columns to a page, and achieved a circulation of some two hundred copies.

"In a couple of years my father's ministry called us to another town. But the paper had made a place for itself in Ainsworth, so the principal of the school took it over, enlarged it, and it has lasted under various proprietors to this day."

Patterson left school at sixteen, and worked in various printing shops and country newspaper offices until he was twenty. Then he went to Chicago, where he got a job on a newspaper; but within a few weeks he joined the Kellogg Newspaper Company, which he had known as a friend in the country offices where he had worked. In a few years he succeeded to the editor's job; and when the Kellogg company was merged with the Western, in 1906, he became editor-in-chief of the combined companies.

"In the early days," Mr. Patterson said, "most editors referred to ready print as 'patent insides'! Two pages in the Malta 'Times,' for instance, might be exactly the same as two pages in the Mt. Vernon 'News.' The editor had no choice, but took the whole of what was printed for him, whether or not it had any special interest for his readers.

"But that period of development of the country newspaper is past and over. Today an editor gets some of his paper ready-printed if he wants it that way, or he chooses the kind of news, articles, features, serials, pictures, cartoons, that go into it. This was made possible by mechanical improvements, and by a more elaborate service plan. You'll be interested to know that, although we print on our own presses parts of between three and four thousand papers, no two of them are just alike. Furthermore, the service is so organized that papers in the same town, or nearby towns, never are embarrassed by both getting the same material.

"This, I know sounds complicated; and there *are* a million details to be considered. But these are now systematized to the point that everything runs as smoothly as a new baby buggy."

THE editorial office of the Western Newspaper Union is in Chicago. You can get some idea of the task confronting the editors when you learn that the material which is sent out to thousands of papers deals with nearly every subject under the sun, and must be without bias, since the same articles and stories are read in Protestant and in Catholic homes, by blacks and by whites, by Republicans and by Democrats, by young and old, by the well-educated and the poorly-educated.

How is the material chosen? How edited? What do these twenty-five *million* people read? What offends and annoys them? What interests them most? What makes them laugh? What stirs them? What sobers them? These and kindred questions I asked, and Mr. Patterson, out of his years of rich experience, answered.

"People," he said, "are as many-sided as a falling cat. There are folks who will read any side of any question with open minds; and there are others who cannot read anything on certain subjects without becoming angry. A man's bringing-up and education have a great deal to do with what he will read and how he takes it. The foreign-born often likes one sort of thing, the native-born another. An entire community, for some special reason, may have likes and dislikes. Some people have hobbies and pet peeves; if they see anything in print on these subjects, they instantly become highly critical. The great majority are not, consciously, very critical; and yet, subconsciously, they are the

"A woman customer proved it for me"

W. T. DAVIS, *of the* Victor Talking Machine Company, gives his personal experiences in using his firm's national advertising as a sales argument

FOR ten years Mr. Davis has been selling for the Victor Company. Therefore his experiences n using the local value of Victor's ational magazine advertising as a sales rgument will interest every man on ne road who carries a nationally adertised line—and every sales manager vho believes that the advertising argunent is one of the strongest he can give is men.

Knowing the standing which The American Magazine has among the salesmen of the nation—and its efforts to provide them with useful down-to-the-ground facts with which to back up their advertising arguments—Mr. Davis has given us the following personal statement of his experiences and methods:

"It's mighty hard to get away from the power of national magazine advertising when you travel around the country the way I do—and watch the people reading magazines in hotel lobbies, on street cars and railroad trains.

"If I could take a dealer on a trip with me and show him all this—show him people reading Victor advertising, I'd have one of the strongest sales demonstrations it would be possible to make.

"Of course, I can't do this—so the next best thing is to try and paint a picture of it for the dealer—and then back it up with figures on the extent of our advertising right in his own locality.

"I remember though, one very interesting experience I had a while ago.

"I walked in on a dealer just as he was setting the stage to demonstrate another product by appointment.

"A few minutes before the arrival of the customer I launched into the facts about my firm's advertising and the value of tying up to it. The dealer was only partly interested. He had his appointment in mind.

"And then the customer entered—a woman. She was carrying a magazine. And in it she had marked the Victor advertisement.

"Immediately the scene changed. At her request, the Orthophonic Victrola held the center of the stage and in a few minutes the sale was made.

"After that it didn't take long to convince this dealer of the power of the advertising behind our product and the value of tying up with it. Using this woman as an example, I showed him how she was only one of many hundreds in his city actually looking for a chance to buy our product!

"So I say, watch The American Magazine readers in their homes, on the street cars, in hotel lobbies, on trains. Paint this picture in detail for the dealer. Give him facts and figures. That's my policy—and I continually point out to dealers that advertising such as the Victor Company has carried on in The American Magazine every month for the past fourteen years, finding its way into hundreds of homes in his locality, is the reason why our Company's trade-mark is so well known.

"Furthermore, I can say that The American Magazine's Vest Pocket Sales-Maker will enable you to give information that sells."

The Vest Pocket Sales-Maker will help You sell

[SEND FOR IT]

The Vest Pocket Sales-Maker is a booklet prepared by The American Magazine to give salesmen just the facts and figures on the local value of national advertising which, as Mr. Davis points out, are so helpful in selling a dealer.

It translates into local terms these four fundamental facts about The American Magazine—facts which establish The American Magazine as the greatest single force for increasing merchandise consumption in America today:

1. The American Magazine's circulation of 2,200,000 at 25 cents a copy insures strong local coverage in every dealer's town.

2. Every issue of The American Magazine, containing your firm's advertisement, is alive for 30 days in 2,200,000 homes.

3. The American Magazine is read by *all* members of the family who influence sales—fathers, mothers and young people.

4. Editorially The American Magazine influences these 2,200,000 families to do more, have more, want more—and therefore buy more.

19,005 salesmen, representing 740 companies and 117 lines of trade, are now using the Vest Pocket Sales-Maker. Also more than 11,000 reprints of American Magazine newspaper announcements are being used by these concerns every month

The Switchboard

An Advertisement of
the American Telephone and Telegraph Company

A WEB of cords plugged into numbered holes. A hand ready to answer signals which flash from tiny lamps. A mind alert for prompt and accurate performance of a vital service. A devotion to duty inspired by a sense of the public's reliance on that service.

Every section of a telephone switchboard typifies the co-ordination of human effort and mechanism which makes possible America's far-reaching telephone service. Its cords link for instant speech those who are separated by a few miles or by a continent. Its guardian operators are of the telephone army—men and women vigilant to meet a nation's need for communications.

In plant and personnel, the Bell System is in effect a vast switchboard serving a nation that has been transformed into a neighborhood through telephone growth and development.

keenest of critics—they know what they like, what is helpful to them, what rings true. Nothing worse can happen to anything we print than to have it fail to interest, to help, and to appear true. The number who will write to the editor and kick about something they don't like, is very small. The others have a subtler method: they *let it alone*, do not read it. That is the deadliest criticism!

"One thing wanted is variety, never too much on a particular subject. Here is a little story that gives an insight into newspaper making and reader interest. An editor in Buffalo, Minnesota, was eager to increase his circulation.

"Now, each local editor is a sort of readers' representative for the people of his community. He knows, or should know, better than anybody else, what his particular folks like to read. It is through what he decides to buy or leave alone that we, in this organization, can feel the pulse of reader interest. This Buffalo man's subscribers lived about twenty-five per cent in town, and seventy-five per cent on the farm. Thinking about this made him go off half-cocked: he wanted to devote about three fourths of his space to agricultural topics.

"'What about the farmers' wives,' I asked, 'and their sons and daughters? Don't they want to read anything except how to make the back forty acres produce more wheat?'

"He guessed probably they did.

"'What *one* thing, then,' I asked, 'will come nearest to interesting one hundred per cent of your readers every time?'

"'Fiction.'

"We started with fiction. Whatever else he had in his paper, there'd surely be stories. In this way we went through the entire list of possible subjects, sizing up the readers' interest in each one, so far as the people in *his* community were concerned.

"When we finished, he had reached the conclusion that one column was all he could devote to agricultural topics. In addition to fiction, he had chosen education articles, recipes, household and fashion news, jokes, editorials, comic strips, and other features.

"The sequel shows what readers' interest stands for. The editor had about a thousand subscribers when he made his analysis. He added the new features, and announced them in a simple circular—that was all. In one week, following the change, he added four hundred new subscribers.

"WHEN people see something they want to read, they read it. If it doesn't look interesting, or if they fail to see how it will profit them, they simply pass it up. It may be something that somebody feels devoutly they ought to read. No matter! If it lacks reader interest, it stays unread. That's the first, last, and greatest fact about these readers. Without saying a word, they can kill anything printed!

"He'd be a bold man," said Mr. Patterson, with a smile, "who would attempt to define reader interest. I've tried it, but never succeeded. You recognize it by a feeling, rather than by logic. It's there—or it isn't there—and you can hardly say why. It may be there for one group of readers, and not for another: towns that seem as alike as two tacks may not stomach

the same story. And sometimes when you think reader interest simply isn't in a piece or a picture, it turns out that your readers think differently!

"About ten years ago a young fellow named Sughroe came to my office to sell an idea for a one-column cartoon which he called 'Mickie Says.' Mickie was a freckle-faced printer's devil who wise-cracked about any subject under the sun, but always with a grin.

"The country was in the midst of war just then. I was thinking war, and not much else. Therefore, instead of looking for reasons why Sughroe's idea might be good, I looked hard for a way to turn him down nicely.

"'You've got a good idea,' I admitted; 'but this isn't a good time to spring it. People want war stuff. We'd just spoil it for you if we tried to put it out now. Come back later, when peace is declared.'

"But Sughroe was bound and determined we should take his idea right away. Finally, I said:

"'There's only one possible way we could think of using it. That's for you to take part of the gamble: Get your pay as a percentage of the net receipts—if there are any.'

"He literally jumped at the chance.

"Well, Mickie went like wildfire. Inside of two weeks we were sending young Sughroe—he wasn't yet of age—a check for more than five hundred dollars as his share to date. The feature is as popular to-day as ever; more popular, in fact, because almost everybody knows Mickie. That lad can tell subscribers to pay their bills, and he gets a smile—and a check—when a formal statement of account would go into the wastebasket.

"There was another case that didn't turn out so happily. A literary agent brought me a story by a man whose name was unfamiliar to me.

"'I have an offer for this,' the agent said, 'from the American Press Association'—one of our competitors at that time—'but,' he said, 'you have first call if you want it.'

"I was just leaving for Minneapolis, and promised to read the story on the train. I did so, and wired back:

"'Accept the American's offer before they change their minds!'

"I thought the story would be a flop, and wanted it to be their flop. Instead, it proved one of the greatest serial successes ever put over. It was the first 'Tarzan' book, by Edgar Rice Burroughs.

"OUR readers are a rather special audience, in a way, since most of them live in smaller cities or towns, or on farms. They average a high degree of intelligence: witness that when we were running cross-word puzzles, the complaints we received were that they were too easy, when the same puzzles brought the opposite complaint from big-city readers! They pack a huge amount of curiosity about all sorts of subjects. But they lack some of the nervous strain found in cities, and their taste is not burned up with the desire to feed incessantly on the sensational.

"They want to see themselves and their interests in what they read. Stories with a tang of adventure, the thrill of action and emotion; articles that tell how to do interesting or useful things, describe interesting places and events, interpret

Lysol Disinfectant

REG. U. S. PAT. OFF.

"I asked *my* mother those very same questions—

she didn't have this little book"

IN THIS enlightened age, the superstitions and misinformation about the vital matter of feminine hygiene are fast disappearing.

The modern mother is able to talk with the utmost frankness to her daughter . . . . giving her accurate information, not hearsay, guess-work, or old wives' tales . . . . saving her from the mistakes which in the last generation so often led to premature old age and needlessly unhappy marriage.

But be sure you get the *facts* about feminine hygiene. "Lysol" Disinfectant is the safe, certain antiseptic for this vital use. It has been the unquestioned standard with doctors, hospitals and fastidious women for over 30 years.

Fads in personal antiseptics come and go. But the number of women who use "Lysol" Disinfectant is increasing *at a greater rate today than ever before!*

Don't experiment. Make no mistake. Only a poison can kill germs.

But, in the meantime, be safe, be sure. Buy a bottle of "Lysol" Disinfectant today. Complete directions with every bottle.

Increase Your Brain Power

the common life they know and understand, whether in a humorous or serious vein; these, broadly, are the kinds of things they demand. They want simple statements of facts, and the chance to form their own conclusions.

"Fiction is in very great demand, whether in the form of short stories, novelettes, or serials. It's a little surprising how much fiction the American farmer and his family will read. There are certain well-defined tastes in this demand, too. Some things go big, others fall flat. The story that depends chiefly on salacious incidents, or sex interest, doesn't go at all. The mushy love story wins little or no interest. The 'misery' story, showing unhappy people with sufferings long drawn out, and ending gloomily, isn't wanted; nor, except in rare cases, is the story with a foreign setting.

"The stories that go best usually have plenty of swinging action, much of it out of doors, in interesting American settings. They represent clean-living, clean-thinking, successful people, worth emulating. The love interest is manly and womanly, and never too obtrusive. Familiar kinds of people are seen doing adventurous and romantic things—such things as the readers like to imagine themselves doing.

"OUR readers do not care much for caricature and sarcastic humor, particularly if it is edged and aimed at themselves. This explains why one of the biggest-selling novels of recent years, 'Main Street,' would not go at all in the syndicate. It caricatured small-town people.

"There is one woman novelist reckoned by some critics one of the leading writers of the day whose books we can't serialize successfully, in spite of the fact that she writes quite a bit about farm life. The trouble is, she writes *down* to the farmer, and when she gets down the farmer isn't there!

"Western fiction is in greater demand than any other single class. Stories of this sort that make the greatest appeal deal with characters and situations strictly American. Probably one reason for the demand lies in the fact that a large part of the romance in the building of the United States lies in the country's expansion westward. Furthermore, stories dealing with frontiers usually describe outdoor adventures, and these appeal to men and women who are a good deal out of doors themselves, or like the outdoors.

"Probably the most popular novel we ever distributed was Randall Parrish's 'Bob Hampton of Placer,' issued some years ago, in which the action culminated in Custer's last fight. Curwood, writing about the Far North or the Northwest, and Zane Grey writing about the West, are typical authors whose stories usually are popular. The best-selling story we have serialized recently was a Western yarn by Frank Spearman, called 'Selwood of Sleepy Cat.'

"Historial novels of American life have a wide appeal too, other things being equal. There was a big recent demand, for example, for 'Porto Bello Gold' and 'The Doom Trail,' which dealt with the romantic adventures of early New York people.

"Then there is a huge liking for a type of story written by favored authors about

Digitized by Google · Original from STATE UNIVERSITY SYSTEM OF FLORIDA

present-day life in America. For instance, we never had a failure with one of Booth Tarkington's books. Mary Roberts Rinehart's go equally well—even her mystery stories, although mystery stories as a general thing are not so much in demand among our readers as they seem to be in the cities.

"Our people like home folks and home-place names in their fiction. We do find, however, that we can sell E. Phillips Oppenheim's books, even with British or European settings; while Conan Doyle was always popular. Such writers seem to have qualities universally appealing, which outweigh unfamiliar settings.

"Curiously enough, *articles* about foreign countries, as contrasted with stories, are in great demand. Our readers are travelers. In fact, I doubt if many people realize how great a traveler the American farmer, as a class, is. He can usually arrange to have his winters off; and in winter you'll find him in numbers on vessels bound for Europe, for South America, for the Mediterranean and the Nile, or around the world. You'll find him at play and taking his ease in southern California. At St. Petersburg, in Florida, there is a large field devoted to nothing under the sun but pitching horseshoes; and most of the players are farmers from the Northwest. They are great automobile travelers too. This interest in travel is nearly universal, and we rarely have too many first-rate travel articles.

"FOR straight news we summarize and generalize the most significant news happenings—state, national, or international—in the various fields of interest. Controversial subjects must be handled as if we didn't have a single opinion of our own. Even so, any mention of some subjects is enough to arouse occasional animosity. A news item about the expulsion of nuns from Mexico brought two complaints from editors; one said the item was pro-Catholic, another said it was anti-Catholic.

"Once we published an article discussing the basis of Abraham Lincoln's greatness. A Democratic editor became very angry because we let it get into his ready-print section. His reason was that Andrew Jackson's name was not mentioned; and he was sure we had omitted it deliberately, in order to glorify the Republican Party!

"Such cases show how hard it is to appear unbiased to prejudiced readers. We take sides only in signed editorials by specialists or well-known people; and even then an editor sometimes gets blamed.

"A man's religion is one of the things he is touchiest about. We go far to avoid saying anything that could be construed by readers as reflecting on any religious belief. This is specially true in jokes.

"Prohibition, too, is another subject we do not joke about. Nine tenths of present-day humor, so called, seems to be built around bootleggers and illicit liquor.

"For that reason alone, such jokes are tolerably stale. Moreover, any joke on the subject offends a good many people, for the simple reason that they do not feel that good citizenship is promoted by ridiculing the law of the land.

"I'll admit that prejudices and preferences are hard to down; I have them, and know. A number of years ago we were publishing sermons by the famous minister,

1000 Hotel Positions Open!

Hotels, Restaurants, Clubs, Apartments, Institutions, Schools, Colleges, Hospitals, etc., Everywhere, Need Trained Men and Women. Over 70,000 High-class Positions Paying $2,500 to $10,000 a Year Are Open Each Year in the Hotels of the United States. Nearly One and Three-quarter Billions of Dollars' Worth of New Hotels, Clubs, Restaurants and Institutions Built This Year Will Need Over 200,000 Trained Men and Women.

I Guarantee to Teach You

In my home-study course on hotel work what the leading experts know about the business—men earning from $5,000 to $50,000 a year—and at any time there are over 1,000 hotel positions open in this industry.

I Put My Students in Touch with Positions

All over the United States they are eagerly sought by the biggest and best hotels. Hotels start you at salaries up to $3,500 a year with your living usually included. If you want a steady, permanent position, with quick advancement, big pay and fine living, which also usually includes free meals and apartment—you can find it in hotel work.

No Previous Experience Needed

You need no previous experience when you take the Lewis Course. We train you by mail in your spare time at home with the Lewis Simplified Study Plan, and put you in touch with big opportunities. All of your training will be under the personal supervision of Clifford Lewis, former U. S. Govt. Hotel and Restaurant Expert, now Managing Consultant for over 225 hotels throughout the United States.

Money and Thrills—

Both big in Aviation!

AVIATION as a business is filled with a thousand thrills. It is the great modern romantic adventure — the glory of the air—pioneering—seeing the world—meeting the finest people in all lands. It is work with a kick in it. And with the whole character of the industry on a high plane, it pays *big*.

Walter Hinton, First Trans-Atlantic Pilot, N. C. 4 fame, President of Aviation Institute.

You can learn the fundamentals of Aviation at home, in your spare time—no interference with your present employment. Our free book, "Aviation and You," tells you how you can get ready to cash in on the rapid growth of this rich new field of endeavor. Send for it now.

Many Opportunities Easy to Start

The fastest growing industry in the world is hungry for men and women who know its fundamentals. There are over 4,000 airports in America—6,000 privately owned planes—16 air mail lines—American Express air service starting — Guggenheim Foundation financing passenger lines—trans-oceanic service coming —giant factories building planes and parts. Big pay in the air and on the ground.

No experience needed to take course. No previous training in mechanics. Lieut. Walter Hinton and his staff guide your instruction—it is simple, workable, practical—easy to understand.

If you wish to become a pilot, final flying instructions are given at our own flying field here in Washington or at other fields in all parts of the United States in cooperation with the Institute.

Free flight to every graduate.

Get all the facts about the Institute course and the way it leads to Opportunity. Do it now.

DeWitt Talmadge. When Doctor Talmadge died, I was scouting for somebody to take his place, and a friend suggested a minister who has since made an impressive name of a certain kind for himself. My friend arranged for us to meet at the Press Club.

"The minister reached the club ahead of me. Upon my arrival, he was seated at table with a group of eight or ten men. Before him stood a stein of beer, which he sampled frequently, and he smoked one cigarette after another; but, worse, I noticed that he was rather the leading spirit in telling stories distinctly off-color. The group finally broke up, and the minister and I were introduced.

"'Ah, Mr. Patterson,' said he, 'I believe we have a little matter of business to discuss.'

"'Not that I am aware of,' I replied.

"'But our friend here said—I understood you wanted to suggest my writing for you—'

"'No,' I replied, 'I gave up that idea.'

"He wanted an explanation; I gave it to him—straight.

"'I'm not a prude,' I said. 'I like beer. I smoke. I enjoy a good story as well as the next man. But my father was a minister of the gospel. I learned a decent respect for the cloth by early training, and absorbed the idea that there are certain things which no minister can do and retain his self-respect. I, for one, will buy no sermons from a man who drinks, smokes, and tells smutty stories in private, and publicly advises his readers *not* to do those things.'

"ADVANCE pieces, of course, are written by all papers, to cover important events which are scheduled and almost certain to go off as planned. Once we prepared such a piece about President Taft's inauguration as it was *expected* to happen. The piece would have been highly accurate, but —on that day Washington had the worst snowstorm in history! Consequently, all precedents were upset. There was no inaugural parade. Taft did not speak from the Capitol rostrum, but took the oath of office and delivered his address in the Supreme Court chambers. Our piece, nevertheless, appeared in something like a thousand papers before we could stop it. Curiously, we never received a single complaint from any reader or editor.

"Sometimes," Mr. Patterson went on, "people say to me, 'What a wonderful medium you have for propaganda!'

"Offhand, it may appear so. Reaching millions of people as we do, it certainly seems as if it would be possible with our facilities to scatter the seeds of any opinion or belief, and make them grow. But this organization, great as it is, could be ruined in a few weeks if we took sides in the effort to foster private projects, or attempted to do anything else than tell the straight, honest news in as straight and honest a way as possible.

"While from our service standpoint we cannot have any part in propaganda, country newspapers, as a class, can. When they unite on any proper cause the editors of these papers have it within their power to sway twenty-five million people, and that is a tremendous thing.

"During the late war, the governor of the Federal Reserve Bank of Chicago called my attention to statistics of the first Liberty Loan. In the city, as a whole, the average subscription per capita was approximately sixty-seven dollars; in the country, only about eleven dollars.

"'I'm not sure it's worth while fighting this war,' he said, 'if it's to be paid for by city folks.'

"'Maybe,' I said, 'something can be done.'

"I figured out a plan, and took it to Washington. I managed to get the Treasury Department officials to give it their coöperation. I wanted them to prepare, or authorize us to prepare, advertising copy about the government loans. I was willing to undertake the job of getting these placed in thousands of papers, at no cost to the Government. When the plan finally was sanctioned, we had the beginnings of underwritten Liberty Loan advertising.

"The plan was presented to editors through our house organ. The copy was free; it was up to the editor to get the space paid for by patriotic organizations or individuals.

"In a sense, this was pure propaganda. But the cause was legitimate. In the next Liberty Loan campaign, per capita subscriptions in country districts rose to twenty-three dollars, and remained there, or above, through all later campaigns.

"TIMELINESS, as a rule, is a prime factor in reader interest. But some items seem to be timely at any time. A big Chicago paper failed financially. The receivers decided to continue operating, hoping to maintain circulation until a buyer could be found. But they insisted that practically no money be spent.

"The editor came to me.

"'Pat,' he said, 'most of my staff are fired, but I've got to get out a paper. What have you got that I can use?'

"Now, we print what I call 'snake stories.' They have some special thrill of human interest: describe a bandit queen; the drug addict who was sentenced to go to church or to jail; the woman whose hair was forcibly bobbed by jealous neighbors; the man who lost his own life saving his dog's—stories like that. Well, this editor dug into the files for 'snake stories.' He picked out dozens. Some of them were five years old. He sprinkled them through his paper; in fact, the first page for weeks was almost entirely made up of them.

"Did this nearly-dead sheet give up the ghost at the dose? Not a bit of it! In fact, it began to live again, actually picking up circulation.

"This work, this job,"—a smile lingered in Mr. Patterson's eyes—"it gets a grip on you. There's a fascination in it. Once the owner of a Southern newspaper asked me to become his editor. He told me to write my own contract, dictate my own terms, formulate my own policies, and name my own salary. I thanked him for the offer, and thought it over seriously; but refused. Later, he asked me why.

"'I'll tell you,' I said. 'I would make more money with you, to be sure. In some ways, the position would be more desirable. But on your paper I'd be talking to one hundred thousand people; here I'm talking to twenty-five million. That opportunity means something. That's why I refused.'"

Stop Run-over Heels

Keep shoes smart

IT IS the way you *walk* that makes your heels wear crooked, or shoes "run-over"—not the fault of the shoes. It mars your grace and spoils the otherwise good impression your appearance makes.

Crooked heels throw you out of balance, causing the whole weight of your body to bear on the *outside* of the foot, and the ankles to wobble. This is a severe strain on the ligaments, and thickens the ankles.

To correct this fault, wear Dr. Scholl's Walk-Strate Heel Pads. They make you walk straight by equalizing the body's weight, remove all strain, and make walking a pleasure. You save more than their cost in heel repairs alone, and preserve the shape of your shoes.

Dr. Scholl's Walk-Strate Heel Pads are soft, comfortable, and quickly attached inside any shoe. Sizes for men and women. At all shoe and dept. stores and leading drug stores. 35 cents per pair.

Dr Scholl's Walk-Strate Heel Pads

Made by The Scholl Mfg. Co., Chicago, World's Largest Manufacturers of Arch Supports, Foot Comfort Appliances and Foot Remedies.

Quick on the Draw!

(*Continued from page 54*)

my pistol in my right hand, caught him by the collar with my left, and told him he was under arrest. The poor woman whose shopping was rudely interrupted gave me one horrified look, and fainted. The other two customers ran to the street, screaming.

"In broken English, Baca asked where I wanted to take him. I answered 'El Paso,' and led him out of the store. I told him to climb up behind Lloyd. He climbed up. Then I jumped on old Dusty, and we were off.

"As we whirled out of the main street of the little town, spurring our horses to a run, the church bell began to ring rapidly. I could see men running out of the adobe houses, stop in the street, and look in bewilderment at this strange sight of two 'gringoes' on horseback, one with a man behind, racing out of town at breakneck speed. We urged our horses on. Now that the alarm was given, we knew that it would be only a matter of moments before we would be pursued. Also, we wanted to make as much time as possible before we struck the deep sand.

"We reached the sand soon enough, and Lloyd's horse, with its double burden, began to tire. 'My horse is playing out,' said Lloyd.

"'All right, we'll make a change right here,' I answered. We stopped short, Lloyd dismounted with Baca and made him get up behind me. Then Lloyd jumped back on his horse, and we were off.

"We could hear the oncoming posse now, and far down the road could see a cloud of dust. In another minute I distinctly heard the yells of our pursuers and, looking behind, I saw them coming around a bend in the road. I counted nine men.

"When they were within four hundred yards of us, the Mexicans began to shoot, and they kept it up all the way to the river. Their bullets were shelling down pretty thick all the way.

"When we reached the Rio Grande, our pursuers were two hundred yards behind. We took the ford at a sharp trot. The river here is almost a hundred yards wide and only knee deep, so the crossing was not difficult. But it *was* a relief, when our sweating, panting, footsore horses scrambled out of the water onto good old Texas soil. The Mexicans were now lined up on the opposite shore, yelling and taunting us in Spanish. I took off my hat and waved to them. '*Adios!*'"

THE capture had gone through without a hitch, exactly as planned. But Captain Baylor was furious when he learned that Gillett had kidnapped the prisoner from Mexico. He said that such an action was imprudent, and that it would be likely to disturb relations between the United States and Mexico. Finally, he announced, "I have a great mind to take this prisoner across the border and turn him loose."

"If you do that, Captain, I won't range another day," answered Gillett. "This man is a murderer, and he belongs over here, not in Mexico. I've caught him at great risk, and his capture means a lot to me. It may lead to something better than my Ranger sergeantcy."

even IF *you have escaped* DANDRUFF *. . . . so far*

NO scalp is safe from the dandruff germ. Your brush and comb—the dust-laden air itself—all carry this menace to the beauty of your hair.

Take this wise precaution . . rub Wildroot into the roots of your hair several times a week. For Wildroot not only *removes* dandruff, but *prevents* it—by killing the germ and by keeping your scalp clean and healthy. And it leaves your hair soft, silky and lustrous.

Get a bottle from your druggist today—and begin this preventive treatment. Whenever you go to the barber or hairdresser, always ask for a Wildroot treatment.

GONE are the tangled masses of keys that wear holes in pockets and handbags. In their place a Buxton Key-Tainer—flat, compact, convenient. Keys always together—easy to get at. And safely returned to you if lost.

Only the special features found in a Buxton give you complete protection. Made in all popular leathers—hand finished throughout. Price 50 cents up—a wide selection around $1.00. Sizes to accommodate from 4 to 16 keys.

Leading jewelers, department stores, leather goods and stationery stores carry Buxton Key-Tainers. If you don't find what you want write us for further information. Address BUXTON, Inc., 200 Main Street, Springfield, Mass., *or if in Canada, The Julian Sale Leather Goods Co., Ltd., Toronto, Ont.*

BUXTON
Key-Tainer

Eventually, Captain Baylor agreed that Gillett might proceed to New Mexico with his prisoner.

"We left on the northbound stage at eleven A. M.," continued Captain Gillett, "and when we reached El Paso I telegraphed the sheriff of Socorro that I was on my way with Enofre Baca. By sundown we had reached the town of Masilla, in New Mexico. As the stage did not travel after dark, I had the prospect of spending the night in Masilla.

"I was afraid to lodge my prisoner in the local jail. The hotel clerk looked trustworthy, so I took him into my confidence and asked him to give me a room on the ground floor. 'I've got the fellow who killed Conklin,' I told him; 'and I don't want to risk losing him. So I'm going to sleep with him. I'll give you my keys and my guns.'

"The clerk fell in with the plan at once. He said he would be on the job all night and that he would come to my rescue at the first noise.

"So we slept, the murderer and I, in the same bed, with my left foot chained to his right one. There was no disturbance, and I slept fine till daybreak.

"Next day we left Masilla at eight o'clock and rode in the stage until about two in the afternoon, when we reached the railroad. In another hour we were aboard a train bound for Socorro; but we had not traveled far before I received a telegram from the governor of New Mexico saying, 'On no account stop at Socorro, but bring prisoner on to Santa Fé.'

"The train was slow, and it made many stops. Finally, at one place, a dozen armed men came swarming into my coach. They announced that they were from Socorro, and that the deputy sheriff, Colonel Eaton, had sent them to help me escort the Mexican. I told them I could manage him; but they answered, 'Well, we're here to help you,' and they sat down and rode with us the rest of the way.

"IT WAS past midnight when we reached Socorro. Fifteen or twenty more men boarded the coach, led by Colonel Eaton. The deputy sheriff said, 'Well, Sergeant, I'm mighty glad to see you've got this murderer. We'd better get him off. The train'll be starting in a minute.'

"I showed him the governor's telegram. 'Naw, sir!' he answered, decisively. 'This man belongs right here where he committed his devilment.'

"Three men in the crowd grabbed Baca, and I was on my feet in an instant, protesting. The crowd pressed so close that I couldn't draw my six-shooter. 'Come on, Sergeant,' said Colonel Eaton, and with that the crowd simply rushed everything before them, down the aisle, and off the car.

"I held on to Baca, and when we hit the ground, there, right in front of us, was a bus waiting by the railroad, the end door open. I pushed Baca inside, put the jailer in next to him, and then I got in and closed the door. We started up the steep hill for the jail.

"The full moon made everything outside as bright as day. Through the window, I could see men coming from all directions, running toward our bus, which was laboriously creaking up the hill. All at once some men ran forward and grabbed our horses.

"I cocked my rifle. 'Those fellows are going to try to take this Mexican,' I said to the jailer. 'You're an officer—can I depend on you?' The jailer muttered, 'Naw, we can't fight that mob.'

"By now, other men were at the door, trying to force it. I jumped up, and as the door burst open, I stuck the business end of my Winchester through the opening and yelled for the mob to stand back.

"'I'll shoot the first one that touches this prisoner,' I said.

"A second later, one of the mob reached around from the side of the bus, grabbed the barrel of my rifle, and with a jerk sent it spinning. Another man made a grab for me as I was reaching for my six-shooter. I braced myself against the frame of the bus, but a hand in my collar and a swift jerk sent me spinning to the ground.

"Before I could clamber to my feet, another member of the mob kicked me. 'What the devil do you mean, young feller?' said the man, helping me rise. 'We're not here to hurt you, but we're going to hang that murderer, and do it right now!'

"'BUT, gentlemen,' I protested, 'listen to me! I'm the man that captured this prisoner, and I've got some rights. I demand that you hear me.'

"Then I told them the circumstances of the capture, pointed out that I had risked my life, urged that it was a matter of conscience with me to deliver him to jail, suggested that I might be unable to collect my reward if I merely surrendered my man to a mob, and I called on them to disperse and let me proceed with my prisoner in accordance with the law.

"There was a brief consultation among the leaders, and then they announced that I was right. They handed me my rifle, and I climbed back into the bus, and we rode on to the jail without further incident. At the jail I escorted my prisoner inside and turned him over to the deputy sheriff, who immediately gave me a receipt for Enofre Baca delivered alive within the jail.

"Day was breaking as I came out of the iron-barred door, expecting to go to the hotel and get a little rest. But there in front was the waiting mob, bigger than ever. I stopped on the steps, and began to speak to them. I was immediately interrupted with hoots and yells. Several loud voices from the mob invited me to come on down to the community room if I had anything to say. I agreed, and we started off. But we had hardly traversed the block before the whole mob turned back and ran toward the jail. I ran after them, but two men put their hands on my arm and said, 'It's no use, old man; nobody can stop them.'

"In a few moments, I saw the mob moving from the jail to a nearby corral. The gate to the corral had posts ten feet high which were joined at the top by a cross beam. I saw the end of a rope thrown over this cross-beam. Then I saw half a dozen men grab hold of the rope and run rapidly to one side. The other end was tied around the neck of Baca—and there he was, swinging from the cross-beam!

"That is the only contact I ever had with a lynching. No man ever deserved punishment more than this young outlaw, for his crime was brutal and unprovoked—but I detest lynching.

"A few weeks after my return to the Ranger camp, the Socorro citizens committee sent word that a member of the Baca family had hired a gunman to assassinate me, and they cautioned me to be on guard. It was also common talk on our side of the Rio Grande that a reward of fifteen hundred dollars had been offered for the delivery of my body to the Mexican authorities at El Paso del Norte.

"Nothing ever happened to confirm these rumors. But the Mexican Government did make a complaint to the United States Government, and the Secretary of State in Washington called upon the Texas authorities for a full report of the incident. Captain Baylor wrote the report. All that ever came of it was an order from the governor that Rangers were never again to follow fugitives into Mexico.

"However, not all the outlaws on the Rio Grande border were Mexicans. We had plenty of our own breed. Maybe I can best give you an idea of those times and conditions," continued Captain Gillett, "by recalling a page of local history which I saw and took part in making.

"Early in 1881 the town of El Paso began to boom. Three railroads were building toward her, ranches were developing, and her strategic position on the Mexican border at the meeting point of three states marked her as a future metropolis. Adventurers flocked in, some of them on legitimate business, others to pick up easy money in easy ways. Within a few months, the number of saloons and gambling halls multiplied many times.

"George Campbell, the city marshal, soon perceived that he had a job on his hands, and he applied to the city council for a raise in pay. His request was refused, and Campbell resigned, leaving his deputy, Bill Johnson, to hold the bag.

"It was said that Campbell did not expect Johnson to be able to manage the job. His idea was that in a few weeks the council would come to him and offer him the office back on his own terms. But the council did not reopen negotiations with Campbell. When he saw that he was not going to be urged to resume his office he organized a group of his more boisterous friends, and at their head rode through the streets at two A. M., shooting up the town. It was a wild night; several hundred shots were fired, and the peace-loving element among the citizens was much alarmed.

"Our Ranger camp was at Ysleta, twelve miles south of El Paso, and early next morning a courier came with an urgent call from the mayor. The mayor wanted us to police the town until he could get a new marshal. Captain Baylor ordered five men to go to El Paso and take charge.

"THE Rangers had been in control about a week when a stranger arrived from New Mexico. His name was Dallas Stoudenmire. I have never seen a more impressive figure. He was six feet two inches tall, weighed a hundred and eighty-five pounds, and was a striking blond, with a long light mustache. He was always neatly dressed, and invariably wore a black long-tailed coat. He looked like a judge or a professional man.

"This stranger applied to the city

Does Your **Smile** *Say* **"YELLOW MASK?"**

WHAT does "the only girl in the world" see—teeth that flash white or teeth that are stained an unbecoming yellow?

That yellowish tint is the mischief of a "liquid cement" in your saliva. Glues to your teeth—then hardens. Becomes a mask which tobacco, coffee and foods stain yellow.

Fortunately that unsightly hue can now be removed. Dental science has discovered how to formulate a tooth paste composed of "Tri-Calcium Phosphate."

This is a substance leading dentists use for cleaning teeth, and is about the only one that can do this much-desired job without harm to the softest enamel.

The name of this marvelous dentifrice is ORPHOS TOOTH PASTE. As a scientific and safe whitener of teeth it is without equal. Buy a tube and try it. Banish that ugly yellowish hue on which no pair of feminine eyes can look with approval. If your druggist by any chance should not have ORPHOS, mail fifty cents to us or use coupon below which offers a 20-Time Tube FREE.

council for the job of city marshal, and was hired. He promptly called upon Bill Johnson, the deputy, for the jail keys. Johnson refused to hand them over. Stoudenmire seized Johnson by the collar, gave him a violent shaking, and took the keys from his pocket.

"A few days later, a ranchman named Johnnie Hale killed a man on El Paso Street in the presence of a small crowd which had gathered to listen to their dispute. Marshal Stoudenmire was on the scene before the smoke cleared away. He pulled his six-shooter, and at the first shot killed a Mexican, took another shot and killed Hale, and then turned quickly and put his third bullet through the head of George Campbell, the ex-marshal, who had a pistol in his hand when he fell.

"Three killings with three shots was a record, even for El Paso, and Dallas Stoudenmire leaped into the limelight, the most-talked-of man on the border.

"But his skillful shooting made him enemies. Especially did he incur the hatred of the Manning brothers, who were friends of Campbell and Hale. The brothers, Jim and Frank, were the proprietors of several places of business, and the Coliseum Theatre. There was also another brother, a physician, Dr. G. F. Manning.

"Men who wanted to get rid of Stoudenmire now rigged up a plot to kill him, and as their instrument they used Bill Johnson, the deputy whom Stoudenmire had shaken up and dispossessed of the jail keys. One night, as Stoudenmire came down the street, Bill Johnson rose from behind a pile of brick and fired both barrels of his shotgun at the marshal. Stoudenmire pulled his six-shooter and fairly riddled Johnson's body with lead. Other plotters were hidden across the street, and they now opened fire on the marshal. He turned on them, and though they wounded him slightly in the foot, he put the entire gang to flight.

"BY THIS time, I had left the Ranger service and had taken a job with the Santa Fé Railroad Company, as chief guard in their campaign against train-robber gangs. One day Stoudenmire asked me to be his deputy marshal. I told him that the Santa Fé was paying me one hundred and fifty dollars a month. 'Well, I can pay you that, Jim,' he answered, 'and in addition you'll get your fees for making arrests.' He urged me to come with him, and soon I resigned my railroad position and became Stoudenmire's assistant.

"Things went along fairly smoothly for several weeks. Then one day Stoudenmire announced to me that he was going away to get married, and would leave me in charge of the town. Two days after he left, I was suddenly stricken with a violent fever and had to go to bed.

"Stoudenmire had a brother-in-law in El Paso. As soon as he heard that I was sick in bed, this brother-in-law stuck two large pistols in the front pockets of his pants, took several drinks of liquor, and loudly announced that he was going over to the Coliseum Theatre and 'clean up the Mannings.' Word of this must have traveled ahead of him, for after he entered the Manning theatre he lasted less than a minute.

"When Stoudenmire returned from his honeymoon and learned that his brother-in-law had been shot down, he was in a

Digitized by Google
Original from STATE UNIVERSITY SYSTEM OF FLORIDA

rage. The bartender at the theatre did the killing, but Jim Manning assumed responsibility for it, and Stoudenmire vowed vengeance. 'If the Mannings are looking for trouble, they can have it,' he said. Conditions became so tense that a pitched battle was daily expected. Finally, some of the leading citizens of El Paso appointed a committee to wait on the Mannings and on Stoudenmire, and implore them to patch up their grievance. As a result of this plea, the four men eventually signed a written statement in which they agreed, 'that we will meet and pass each other on peaceable terms, and that bygones shall be bygones.'

"AFTER this, there was a semblance of peace; but it was plain that each side mistrusted the other. Stoudenmire was still a power in the city. His very presence on the street insured order, for the outlaw element feared his uncanny skill with a pistol. But this veiled enmity with the Mannings, this armed peace, wore upon his nerves. He became quarrelsome and overbearing.

"Finally, the city council asked him to resign. I was with him in the council chamber when he unpinned his badge, and handed it to the councilmen with a biting, scathing speech. 'You have failed to stand by me,' he said, after a torrent of accusations.

"I was appointed marshal immediately, and one of the first to wish me well was Stoudenmire. 'Young man, I congratulate you,' he said; 'and at the same time warn you that you've got more than a man-size job on your hands.'

"What he said was literally true—it *was* more than a man-size job. I was twenty-five years old when I took that office. And as I recall my three years as El Paso's marshal, I can look back through a kaleidoscope of Winchesters and six-shooters. Every day there was trouble. In ten months, I arrested ten hundred and sixty-four men for murder and other crimes, and I haven't count of the thousands I pacified and sent home.

"Stoudenmire was not long out of a job. Within a few days he was appointed United States deputy marshal for the western district of Texas. His headquarters remained in El Paso. He always treated me with the greatest friendliness, and on only one occasion gave trouble. That was one night when he and one of his chums were drinking and quarreled. I got wind of the row and started for them with a sawed-off shotgun, arriving just as they were going into action with pistols. They each paid a fine next morning, and that ended the affair.

"Several months passed. Stoudenmire went to New Mexico on a business trip. Returning, he reached El Paso after midnight. As he passed down the street from the depot, he stopped at one of the Manning places. What he said there was never known, but when I went on the street early next morning the first person I met was Stoudenmire. I could see that he had been on a spree, and I advised him to go home.

"When Jim and Frank Manning came to their place of business next morning, they were told that Dallas Stoudenmire had been there looking for them. They were mad in a minute. Jim Manning picked up his gun and hurried down to

Neal Nuland's Acme saloon, Stoudenmire had broken his agreement, and that he meant to [illegible] out with him.

"At this time, Stoudenmire was sound asleep at his home; but along in the [illegible]dle of the afternoon, he appeared at the Acme. Neal Nuland was an old friend, and Stoudenmire often dropped in there to see him. Neal immediately began to upbraid his friend for hunting the Mannings. Stoudenmire said that he had not hunted them. He claimed that he had merely stopped in as a customer.

"He seemed much concerned over the accusation that he had broken his agreement. 'I'll go right over there now and explain this to the Manning boys,' he said, 'because I don't want them to think I went back on my signed promise.' He asked one of his friends to accompany him, and the two went to the Manning place.

"As they entered, Jim Manning was at the bar, and Dr. G. F. Manning was playing billards. The other brother was not in sight. 'Somebody has been telling lies on me, Jim,' began Stoudenmire, 'and I've come to explain to you boys. Where's Frank?'

"Jim answered that Frank was next door, and volunteered to call him. 'Yes, I wish you would, Jim,' said Stoudenmire.

"Jim had hardly disappeared when Doctor Manning threw down his billiard cue with a loud whack, walked up to Stoudenmire, and said, 'Dallas, you have not stuck to your agreement.'

"The tall Stoudenmire looked down upon the short Doctor Manning for a moment, and answered, 'Whoever says that tells a damn lie.'

"IF THERE is another word that has caused more bloodshed and death on the border than that little word 'lie,' I don't know it. To call a man a liar was the most effective way of challenging him to a shooting affray.

"Doctor Manning jerked out his six-shooter and Stoudenmire pulled his. The friend who had accompanied Stoudenmire yelled for the two men to stop. But they were not to be stopped. Manning fired first. His .44 caliber bullet hit Stoudenmire in the breast but it was caught by a thick wallet of papers in his pocket. Manning fired again, and slightly wounded Stoudenmire in the left arm and breast.

"By now Stoudenmire had his .45 six-shooter in action, and his shot hit Doctor Manning in the right arm. The shock caused Manning to drop his gun. Before Stoudenmire could fire again, Doctor Manning leaped upon him and grabbed him around the body, imprisoning his arms.

"A terrible struggle ensued. Stoudenmire was trying to shake off the clench that rendered his pistol useless; Manning was trying with all his might to hold on. As they struggled, they waltzed around the floor and out through the door onto the sidewalk.

"I was standing in the entrance of a store talking with one of Captain Baylor's Rangers when I heard the first crack of a pistol. I guessed that the long-expected fight was on. The Ranger and I raced down the street. We heard the other two shots as we ran, and we bowled into dozens of people who were running away from the shooting.

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

when we were within twenty-five yards of the struggling men, Jim Manning came hurriedly out of the door of the gambling room. His pistol was leveled as he came. Without a second's pause, he fired at Stoudenmire's head. The bullet missed, struck a barber pole, and smashed one side of it to splinters. Doctor Manning still had the struggling Stoudenmire in his clinch, so Jim Manning had to be careful lest he hit his brother. Quicker than it takes to tell it, he leveled his gun for a second shot. When he fired, Stoudenmire just crumpled."

"Doctor Manning lay on the ground, bloody from head to foot. I told Jim Manning he was under arrest. 'All right, Marshal,' he said; 'but please help me to get my brother inside. I'm afraid he's dead.' We examined Doctor Manning, and found that he had fainted from the excitement and from loss of blood. (He recovered and lived to a ripe old age.) Just then a deputy sheriff came up, and I turned my prisoner over to his custody.

"I went back to Stoudenmire's body. He lay within fifty feet of the spot where he had killed Campbell, Hale, and the Mexican in that first shooting scrape which had brought him fame for his brilliant gunmanship. I picked up his bloody pistol in the street, and in his hip pocket I found its twin—he always carried two.

"Stoudenmire is the nearest I ever saw to a two-gun man, for I have seen him draw two pistols at once, though he fired them singly. However, in his critical fights he pulled and used only one six-shooter.

"Jim Manning was indicted for murder, tried and acquitted. And that ended one page in the history of the Texas border."

Gillett remained city marshal of El Paso until 1885, when he resigned to go into the cattle business. He had already invested twelve hundred and twenty-five dollars' savings in cattle, and had a herd of one hundred head. He now went into partnership with one of his ex-Ranger friends, and together they developed a small ranch. Eventually, Gillett bought out his partner, enlarged his herd under his own name, and in 1907 bought his present property near Marfa—the Barrel Springs Ranch.

To meet Captain Gillett to-day on this modern ranch, where white-faced Herefords graze over a range of thirty thousand acres, you would scarcely imagine him as the Indian fighter of the border and the intrepid peace officer of Ranger days and of El Paso's booming 80's. But friends who knew him then tell me that he hasn't changed much; he was always soft-spoken, they say; his brown eyes were always friendly and confiding, his manner always hospitable.

Does a politician have an easy row to hoe? Read Brand Whitlock's article next month on "What a Man in Politics is Up Against." For four terms Brand Whitlock served as mayor of Toledo; and his work during the war, while he was minister to Belgium, won him the admiration of the world. Whitlock knows politics, he knows politicians, and he writes with the skill and artistry of a man who is sure of his subject.

Plug In-and Tune In

Now! A Real Electric Radio Set

Three Year Guarantee

Shipped direct from our factory at ROCK BOTTOM PRICES
Cost Less Than Most Battery Sets

No Batteries, Chargers or Eliminators
No Acids; No Liquids—Plug In—Press Button—Tune In

Sent on 30 Days Trial

Metrodyne
ALL ELECTRIC RADIO

7 Tubes—*Single Dial Set*

At last! The radio you've dreamed about! If you have electricity in your home you can now enjoy **coast-to-coast** reception without the care, bother and muss of batteries, chargers, eliminators, etc., with this genuine **batteryless** radio set. Simply insert the plug in socket, press switch button and "tune in." You would not want a better radio set than the **Metrodyne All Electric.**

Beauty—Efficiency—Dependability

100% Electric Radio. Only the highest quality low loss parts are used throughout. Solid walnut cabinet, beautiful two-tone effect, with handsome gilt metal trimmings. Has electrically lighted dial. Log stations in the dark. Only one dial to tune in all stations. Excellent tone qualities—wonderful volume—very selective. Size of cabinet, 28x13x10.

Costs Less Than Most Battery Sets

Do not confuse the Metrodyne electric radio with ordinary light socket sets, because the Metrodyne is truly an All Electric Radio — consumes less than 2c worth of power a day. Comes to you direct from the factory. Its low cost brings it down to the price of an ordinary battery set.

Agents! Dealers! Big Profits!
Make big money taking orders for Metrodynes. All or part time. Metrodyne All-Electric Radios are in a class by themselves. Unequalled for quality, performance and price. Demonstrate at home and take orders. Lowest wholesale prices. Your demonstrating set on 30 days' trial. Write today for further details.

Gorgeous Console
ALL-ELECTRIC RADIO
Genuine walnut cabinet, in beautiful, two-tone finish. Built-in genuine Metro Cone large size speaker. Brings in programs with great volume, reproducing the entire range from the lowest to the highest notes with remarkable clearness and distinction. All metal parts finished in old gold. Wonderful electric radio, in a cabinet that will beautify the appearance of any home.

Write Today! We are so confident that you will be delighted with this wonderful, easy-to-operate **Batteryless Radio** that we offer to ship it to your home for **THIRTY DAYS' TRIAL** – you to be the judge. A postal or letter brings complete information. **WRITE TODAY!**

WAISTLINE Too Big?

A new belt called Director gets at the *cause* of excess fat and quickly corrects the condition. With every movement of the body, during every working hour, Director acts as a massage on the abdomen and actually dissolves excess fat away. F. P. Cowan of Pinehurst, N. C. says, "Director is the finest thing I ever wore. I want another, but not so large, as I am 5 inches smaller around the waist now." Doctors endorse Director as the *natural* way to accomplish a permanent reduction.

Sent on Trial

Let us prove our claims. We'll send a Director to you for free trial. If you don't get results you owe us nothing. You don't risk a penny. Write now for free trial offer, doctors' endorsements and letters from users. No obligation. Mail coupon.

LANDON & WARNER
Dept. B-10, 332 S. La Salle St., Chicago, Ill.

Landon & Warner, Dept. B-10, 332 S. La Salle, Chicago
Tell me how I can reduce my waistline 4 to 6 inches with Director Belt. Send details of your trial offer. This places me under no obligation.

SHOW CARD LETTERING *Learn at Home*

Here is the very course you need if you want to get a good paying position as a Show Card Letterer or Sign Letterer, or have a business of your own. This course is complete and practical and especially arranged to meet the needs of the student who studies at home. It was written by E. L. Koller, Principal of the International School of Art, member of the American Federation of Arts, and The National Society of Craftsmen.

H. L. Wood, a clerk, made more than $700 "on the side" before he had completed this course and also won $125 in prizes. Harry Lord writes that he has more than doubled his salary as a result of studying in spare time. William Whitman, a former wagon builder, now has a sign painting business of his own and is earning *three times* as much as he did before enrolling with the International School of Art.

Lilac protects your skin

Open doors to infection

those invisible nicks

You can't see them—those invisible nicks of the razor that give germs and dust their chance at your skin!

So, apparently without warning, little infections develop.

Try this pleasant daily precaution: dash Pinaud's Lilac all over your face after each shave . . . Your skin is *always* smoothly clear!

For Lilac is a real antiseptic, yet it is healing, too. For a new process makes Lilac blander than ever before.

You can buy Pinaud's Lilac at all drug or department stores. Buy it today! The genuine Lilac has the signature of Ed. Pinaud in red on the bottle. Pinaud, Paris, New York.

PINAUD'S LILAC

[*Lilas de France*]

"To Grow an' Grow Forever 'n' Ever!"

(*Continued from page 25*)

my grocery bills rarely exceeded eight dollars a month."

For four years he preached there, and in those years the number of his churches grew to seventeen. In addition, he offered his services for three mornings a week to the Clay County High School at Ashland, and was made professor of English without pay.

It was a life as crowded with useful activities and good deeds as ever his mother had pictured it to the rapt little boy beside her, and in it he found complete happiness. Then, with the suddenness of a bolt from the blue, his ministerial work was brought to an end by the development of throat trouble, which proved so serious that he was compelled to give up the ministry.

"But though I could no longer preach, I could still work for the things in which I believed," he said.

"During the term of my pastorate, I had necessarily learned to know every man, woman, and child living among the hills of Clay County. I loved these people greatly, and had looked forward to spending my life among them; but I was especially drawn to the children and young people. Of these I found that an appalling number had no education whatever; others had attended only a few sessions of the short-term elementary schools.

"To these children, education seemed a doorway beyond which lay all opportunity. It represented to them their one means of conquering the poverty and hardships of their lives, and their yearning for it was like physical pain. 'Ef I jes' had schoolin' I wouldn't ask nothin' of nobody!' a wistful little boy, typical of many, burst forth, one day, as we touched upon this agitating topic. I knew something of the ache of that longing; and often I had thought that the greatest work which anybody, minister or layman, could accomplish there in those mountains would be to make it possible for these children to get an education. I now resolved that this work should be mine."

APPLYING for a position in the Clay County High School at Ashland he was made principal. He at once set about putting his school within reach of every child who could possibly come to it. As a first step in this direction, he rearranged his sessions so that the vacation time coincided with the busy farming months of early spring and summer. "For agriculture was the sole industry of this section," he explained, "and practically every child of high-school age worked in the fields."

Next he went through the mountains of the county on a recruiting expedition for pupils, seeking out every isolated shack where lived a boy or girl who, having attended a few sessions of the short-term elementary schools, was eligible for the next upward step.

Sitting about the doorways of these mountain cabins, he would discuss with the parents ways and means by which they could manage to send their sons and daughters to Ashland. "And as we talked,' he said, "the young people whose fates were in the balance, barefoot and clad in garments of homespun—which sometimes they had woven themselves on hand looms in their cabins—would draw near and listen, their eyes starry with visions."

Returning to Ashland, he canvassed the town for boarding places where bright young pupils, poor in worldly goods, but richer than Crœsus in ambition, could afford to live while they acquired knowledge.

"Stirred by the stories of these boys and girls," he resumed, "well-to-do families of that warm-hearted little town opened their doors and took in numbers of them as guests. Others charged only enough to cover the actual cost of the food. And still others agreed to accept, in lieu of money, farm products in sufficient quantities to counterbalance the appetite of a growing young student. In short, the whole village became a boarding-house, and down from the hills swarmed between three hundred and fifty and four hundred boys and girls, impatient to begin their thrilling progress along the high road that led to learning.

"I KNEW nothing, at this time, of methods of education," Mr. Sutton stated, "nor was I even particularly interested in these. My one purpose was to try to fit my school to the needs of these mountain children.

"Therefore, when a boy expressed a desire to learn bookkeeping or stenography or typewriting, giving as his reason, 'It would come in mighty handy if I ever get to college,' or a girl thought it would be a good thing if she knew how to make her own clothes or to cook properly, we held a faculty meeting to decide which of us was most competent to teach this branch of knowledge. And the one who was added it to his schedule. If a student didn't seem able to get the hang of a subject, his instructor took him in hand and wrestled with him, never giving up until light dawned. When that moment arrived, it would have been difficult to say which was the more jubilant, teacher or pupil.

"'P'fessor, I bleeve I'll bust if I don't let out a shout or two,' said a boy on one of these occasions.

"'Same here,' chuckled the teacher, and together they made the welkin ring.

"Our school was poor in equipment, having no laboratory or tools or maps, and no money with which to buy these things," Mr. Sutton went on. "But the mountains were full of minerals, and we went out and dug these up and studied them. We had all the land and rocks that we could use, and of these we made gigantic maps. We made one map of the United States that covered six acres. Upon it we outlined the great railway systems, and some of the enterprising students built miniature trains and set them upon the tracks and placed tiny ships along the coast in the white paths of steamers. 'I sure know this country,' one of the boys remarked, when this model was completed. 'I bet you couldn't lose me in it.'

A Sure Way To End Dandruff

There is one sure way that never fails to remove dandruff completely, and that is to dissolve it. Then you destroy it entirely. To do this, just apply a little Liquid Arvon at night before retiring; use enough to moisten the scalp and rub it in gently with the finger tips.

By morning, most, if not all, of your dandruff will be gone, and two or three more applications will completely dissolve and entirely destroy every single sign and trace of it, no matter how much dandruff you may have.

You will find, too, that all itching of the scalp will stop instantly and your hair will be lustrous, glossy, silky and soft, and look and feel a hundred times better.

You can get Liquid Arvon at any drug store, and a four ounce bottle is all you will need. This simple remedy has never been known to fail.

Gives Perfect Foot Comfort

There is no substitute for a body tingling with vitality. To have it you must exercise. To get any benefit from exercise you must have comfortable feet.

Massage your feet with Dr. Scholl's Foot Balm before you go out, and you will be able to stand, walk, hike, golf or dance to your heart's content without discomfort.

Apply it even after you have been on your feet for hours, and are suffering keenly from your feet and you will get immediate relief. It dispels all foot aches, pains and burning sensations like magic; reduces swollen feet and ankles. Relieves corns, callouses and bunions, too.

At all drug, shoe and dept. stores—35c per jar.

Dr Scholl's Foot Balm

"The subject which seemed to me of most vital importance to these young people was farming. Every plan affecting their existence hinged upon the success or failure of the crops.

"'All of you boys and girls have got to make the money for your education,' I said to them, one day, 'and you've got to make it out of the soil. Therefore, don't you think it would be the sensible thing for us to learn everything we can about this subject—become such expert farmers that we can take a few acres and by careful cultivation make them yield the harvest of many?'

"They thought so unanimously. 'You'll sure have your hands full, Preacher,' commented one of the boys, dryly, 'if you start out teachin' us farmin'.'"

WELL, that was what Willis Sutton wanted. So he made a school project of each pupil's farm work, and the entire student body launched out into scientific agriculture.

"Even those parents—and they were the rare exceptions—who would never hear to their children's going to school, feeling that it was a 'bardacious' waste of time and money, raised no objections to my teaching them farming," continued Mr. Sutton. "'Some sense in that,' they granted. A close-fisted old farmer, who was of this number, had previously informed me that his sons belonged to him till they were twenty-one, 'An' hain't nobody goin' tek em away fum me a day sooner,' he declared, with fire in his eyes. Now, however, he not only consented to my teaching the oldest boy, Sam, 'anything I mout know 'bout farmin',' but he even agreed that the boy should have all he made over and above what he considered an extra good harvest. This agreement, though, he considered a great joke. 'If he kin beat that,' he chuckled, 'he's welcome.'

"But the boy saw in this contract the opportunity of a lifetime. 'I'm aimin' to buy my freedom from the ole man,' he confided to me cheerfully. And after several years, he did just that. He learned to farm so well that he was able to hire a man to work in his place during the spring and autumn, while he went through school and college, paying all of his own expenses."

During the week-ends the principal of the Clay County High School got in his buggy and drove through the mountains to see about those children who were not in school. Often parents would send for him to discuss this important matter. A little boy trudged twenty miles over the hills to talk with him. "Me an' Ma can't stand fer me to grow up in igrunce," he said.

"Is there anything she can do to make a little money?" he was asked.

"She could make a sight of money if she jes' had a sewing machine," the boy replied eagerly.

The professor went to see the mother and found her equally confident, and two weeks later a highly varnished golden-oak machine was borne up the mountains in an ox-cart, and in its place a brand-new little scholar traveled down to Ashland.

As Mr. Sutton's throat grew stronger, he began to speak in the churches where once he had preached, only now his text was always education.

..results!

MORE people can be attracted for *less* cost with an electric business sign than with any other form of local advertising. Day and night an electric prominent-izes your location and, *significantly*, at the point of sale.

Results, literally in thousands of experiences, show you may expect never less than a 10 percent gain—and even 50 and 60 percent—as the direct return from Flexlume Electric Advertising. A fraction of even a small gain will cover the entire modest outlay.

Would you like to see, without obligation, color sketch of an unusual electric display to help make your business grow? Write us to send the nearest Flexlume Expert—address FLEXLUME CORPORATION (largest plant in America for electric displays), 1583 Military Road, Buffalo, N. Y.; or phone a Flexlume office in the chief cities.

One summer, there was a big camp-meeting in the mountains, and at the end of one of the services he was allowed to give a brief talk on this subject. "When it was over," he related, "as I was making my way through the hundreds of wagons, buggies, and old-fashioned vehicles of all kinds that were parked about the meeting place, I came upon a boy who was crying, and vastly ashamed of being caught at it. I stopped to inquire the cause of his grief, and he informed me that they got to talking about 'schoolin'' in the church. 'Hain't nothin' upsets me like that,' he blurted out, and added, desperately, 'Cause I hain't got no chance.'

"'Why haven't you?' I demanded. 'Everybody has a chance!'

"He shook his head. 'We-uns hain't,' he said positively.

"'Look here,' I exclaimed, impulsively, after I had talked with him some minutes, 'I'm going home with you.'

"Consternation showed in his face. 'You can't,' he discouraged me. 'Wouldn't be no place for you to sleep.'

"I WAS determined, however, and, seeing that he couldn't shake me off, he finally accepted a seat in my buggy and showed me the way.

"The house in which he lived was a flimsy shack of two rooms with a sloping shed in the rear. There were thirteen children in the family, which was poorer than almost any I had encountered in the mountains. The father was dissipated and shiftless; but the mother was a woman of fine character and some education. That night, after most of her big family had gone to sleep, I had a talk with her about this boy, David.

"'Could you and your husband contribute anything toward sending David to school?' I asked.

"She looked long at her little son, listening with his soul in his eyes, and shook her head. 'We ain't got nothin' to give,' she told me sorrowfully.

"'Suppose I lend him the money—would you let him go back with me?' I suggested, for no man alive could have abandoned that boy to the fate that already overshadowed him.

"She laughed excitedly, 'Nobody couldn't keep him from it,' she declared. For an instant, David's face was like the sun, then the brightness faded.

"'Wouldn't be no way to pay it back,' he said dully.

"'There'd be no hurry about that,' I explained. 'You can do it when you are grown.'

"'I know David'll do it if he lives,' broke in his mother.

"So we sealed the bargain, and I took David home with me. He went in his rough overalls, with never a pair of shoes to his name; but if anyone had suggested to him that life lacked anything to make it absolutely perfect, he wouldn't have believed it!

"After he was graduated from the Clay County school, David went to college in Atlanta and from there to a medical school in Tennessee. I lent him in all about sixteen hundred dollars, and long ago he paid me the last penny of this, with interest. Not only that, but he has educated seven of his brothers and sisters, and has lifted his entire family to a position of self-respect and comfort. For

"Since I Am Making My Own Money"

I OWE no bills and have never before been so happy. I am sure you know how much an unpaid dentist or doctor bill or any bill can worry one! I've had plenty of them lately but now—

"I am banking money—I have $57 saved! This may seem a small amount to you, but truly it looks like a thousand dollars to me for I've never been able to save a penny until now.

"You should see the smart dress I purchased for myself—the cunning rompers for Junior, the smart little dress I have made for Sister.

"My earnings as a member of our Club have made all these things possible. Indeed I often wonder how in the world I ever managed to keep house without the five and ten dollar bills I now earn so easily and in just a few hours' time doing our delightful work.

"I am so grateful to you and I hope this letter will in some way reach the many thousands of women who need money."

YOUR PIN MONEY CLUB, TOO

DOESN'T Mrs. M. B. S.—arouse your interest—inspire you to look into this Club of ours?

Surely you cannot have missed our talks here in The American Magazine, telling of our more than ten thousand happy members who are earning money working in their spare time.

Ours is really hour-a-day work, for all our members are busy folks who can only snatch an hour here or a few minutes there and yet many of them are making as much money as the woman who goes to business every day.

So if you are longing for your own money—write today. I am sure you are interested and I shall welcome you heartily. Our work is so pleasant that you will actually enjoy doing it. And just think of it, you'll make all the money you want and need, too!

For the EIGHT first aid emergencies we mothers face most often

"Handiest thing in the house"

Said 2000 women

"VASELINE" Petroleum Jelly is the favorite quick home treatment of thousands of women for:

Minor cuts—wash under running water and apply "Vaseline" Jelly.

More serious wounds—sterilize with an approved antiseptic, dress with "Vaseline" Jelly and bandage lightly.

Burns and scalds—Cover the affected area with "Vaseline" Jelly, spread on clean linen or gauze. Change dressing daily.

Blisters—Prick the edge of the blister with a sterilized needle, press out the water, and dress with "Vaseline" Jelly.

Sores—Apply "Vaseline" Jelly at frequent intervals.

Bumps and bruises—Apply cold compresses, immediately, then dress with "Vaseline" Jelly.

Chapped skin and lips—Cover lightly with "Vaseline" Jelly and leave on over night.

"Vaseline" Jelly is absolutely pure and safe. It protects the wounds, hastens healing, helps prevent scars.

Don't ever be without it. Get it from your druggist and remember when you buy that the trademark "Vaseline" on the package gives you the assurance that you are getting the genuine product of the Chesebrough Manufacturing Company, Cons'd.

Send for booklet containing all these uses and dozens besides. Keep it for reference. Address Dept. A 10-27, Chesebrough Mfg. Co., 17 State St., New York, N. Y.

Vaseline

Reg. U. S. Pat. Off.

PETROLEUM JELLY

the past few years, he has been at the head of an excellent hospital in the South.

"As a safe and sound business proposition," Mr. Sutton exclaimed, "I heartily recommend to the hard-boiled capitalist that of making loans to boys and girls eating their hearts out for an education—almost any boy or girl, with this burning ambition. The payments may be slow in coming in at first, but they are sure in the end—surer by far than any other financial venture of which I have any knowledge."

But Mr. Sutton's interest in children was not to be limited by the boundaries of Clay County. Soon he was making pilgrimages into the mountains beyond, and, after a time, he was devoting his summers to exploring the Talladegas. His objective was at least to establish in each little cove and valley one of the short-term elementary schools. Wherever he went, a new and wonderful hope stirred in the hearts of young folks, shut away from the world of opportunity. Here at their doors, miraculously, was one who cared what became of them, who was not concerned merely that they should go to heaven when they died, but that they should make the most of their lives on earth.

His activities became known among educators throughout the South, and in 1912 he was put at the head of the agricultural schools in the mountainous region of northeastern Alabama.

With six other men eager to blot out illiteracy in the Talladegas, he organized a whirlwind campaign, and during one summer he established sixty-seven elementary schools in those parts. To educate the children of the mountains had become a passion with him, and he was resolved to devote his life to it. But in his zeal, he refused to give in to fatigue, or to admit the need of rest, and the result was a physical breakdown which put an end to his work in the mountains, and left his dreams for the young people of those hills to be worked out by others.

It was thought, at this time, that he would never be able to engage in active work again, and the doctors sentenced him to an indefinite period of idleness and quiet. When at the end of six months, he was offered a position as head of the English department of Tech High, the largest public school for boys in Atlanta, he threw discretion to the winds and promptly accepted it. "I felt that this would allow me as much rest as I could endure," he observed.

IT WAS impossible, however, for him to be with young folks without becoming absorbed in them, and soon he was as deeply engrossed in plans for the youths of Tech High as ever he had been for the children of the Talladegas.

After two years, during which his health was entirely restored, he was made principal of this school, and when three years later he resigned to become head of the public school system of the city, the attendance of Tech High had grown, under his guidance, from 160 to 1,892. Women living in other sections of the town begged to have their sons transferred to this academy. The principal, they explained, had an extraordinary knowledge of what went on in the heart of a boy, and unfailing sympathy with what he found there.

"Oh but you're not fat!"

That is what Mrs. Houghton used to protest to friends who insisted that she eat sweets with them. Last year she weighed 268 pounds. (See picture above.) Now she weighs 160 pounds (a loss of 108), *without giving up sweets.*

This picture was taken in 1927—the same woman as above. If you wish to write her, her address is: Mrs. R. J. Houghton, 325 Cliff Drive, Logansport, Indiana.

Many overweight people think they're "made that way" and that it's dangerous to try to reduce.

—But just suppose—

You could be sure beyond the shadow of a doubt, that you would lose all the pounds you wanted to lose—
—without drugs of any kind
—without injury to your health
—without giving up the things you like to eat
—without exercise, or rubber garments
—without causing your face to become haggard or wrinkled
—without hunger

Wouldn't you see that the thing was done?

Most overweight people would because they can picture all it would mean . . . better health, more comfort, seeing new admiration in the eyes of friends, and experiencing greater personal success in every way.

Delle Ross, a woman of Bloomington, Illinois, promises you this priceless thing through a simple plan that is safe and sane and easy to follow.

Her experience with thousands of cases has proved that fat people become so—
—not from overeating
—not through heredity
—not because of so-called "fattening foods"
—but through the wrong *combinations* of foods.

Certain foods eaten at the same meal pile on more flesh without properly nourishing the body. Certain other combinations strengthen healthy tissues and reduce surplus flesh. Most people eat by guesswork—what is provided for them, or what happens to take their fancy.

Delle Ross knows the chemistry of foods and furthermore knows the infinite variations demanded by different individuals. She studies your peculiar difficulties, your tastes, your habits, your likes and dislikes, from a confidential questionnaire which you fill out upon enrollment. Then she selects the foods you like best and builds around them menus which make new combinations—different from your present habits, but far more healthful. The results begin to show almost immediately. Students usually report some loss of weight after the first day.

The coupon below will bring you more information. Send it in while you are thinking of it.

Students are accepted in order of application. This coupon, however, is not an enrollment—only an inquiry. You'll be glad you mailed it!

Delle Ross, Eddy Building, Bloomington, Ill.

If you can show me how to lose weight, simply by proper combinations of food, this is a happy day. Please tell me more.

Help Your Boy toward Self-Reliance

YOU often hear one man say to another, "I want my boy to have the kind of training that I had!"

A father invariably thinks of his son in these terms when rifle practice is mentioned. He appreciates the usefulness of his son's rifle as an instrument of boy-training and character development—as the best possible connecting link for making man and boy real comrades.

No other sport develops a boy's self-reliance so surely as target practice—and the Daisy Air Rifle is the gun he should begin with. Train your son the Daisy way—and keep young with him! Leading athletes say that target practice builds up quickness in body and mind, so be sure your son has all the benefit of this keen sport.

The rifle illustrated is the famous Daisy Pump Gun—a 50-shot repeater for $5. Ask your dealer to show you this and other Daisy models, a model for every age, from $1 to $5—or sent direct upon receipt of price.

BOYS! Get your FREE copy of the Daisy Manual from nearest hardware or sporting goods dealer. It tells how to be a crack shot!

THERE IS PROFIT IN WRITING

Gertrude Atherton, author of "The Immortal Marriage," "Black Oxen," and many other successful novels, said, "The subject (speaking of the Palmer courses) is about as fully covered as is within mortal achievement."

PALMER students are successful. Last month one sold a story to *Boy's Life* for $75. Another sold a story to the McFadden publications. Another writes regularly for *The Mailbag* and other publications. Many others turn their talents to profit. Some in full time, or in part time work.

If you have the ability and the urge to write, the personalized Palmer training, sympathetic criticism by experienced writers will help you too to produce stories that sell.

The coupon below will bring you complete information.

PALMER INSTITUTE OF AUTHORSHIP
Dept. 122-X, Palmer Bldg., Hollywood, Calif.

Please send me, without obligation, details about the course I have checked.

☐ Short Story Writing
☐ English and Self-Expression
☐ Photoplay Writing

No salesman will call on you

"Most of us older people," he went on, "make the mistake of imagining that in dealing with youth we are dealing with inferiors, whereas the very reverse is probably true. Practically all parents, in discussing their children with me, speak of them as if they were lovable, irresponsible young creatures, who, they hope, will become something some day, but are not as yet real people. It does not seem to occur to them that the characters and personalities of these boys and girls might be as positive and pronounced as their own.

"In our schools, we say over and over to our pupils: 'You are intelligent, responsible human beings, and we expect of you exactly what we would expect of all such persons, whatever their age.' And we always add this: 'Whatever is important in the world for grown people to know, is important for you, for you are a part of it all. There is no gulf between school and life. Your education continues until the end of your days. That's what makes it so splendid—as long as you live you can grow. Your seat here is your present office, and the work you do is as important, as rich in returns, as that of the biggest business man in the city. You are now learning to familiarize yourselves with the tools of knowledge, tools which, a little later, you will put to practical use.'"

IN THE past seven years, Mr. Sutton has linked up every part of Atlanta with the public schools. There is no industry or business corporation, no department of city or state that is not made to contribute its share to the education of the child. Great manufacturing plants, commercial houses, law courts, municipal and state offices, all throw wide their doors on occasions, so that multitudes of children—the men and women of to-morrow and the day after—may come in, begin to measure these things with their clear young eyes, and consider whether, when they are grown, they would care to be a part of these undertakings. The best lawyers, doctors, ministers, business men put aside from their crowded lives sufficient time to go to the schools and talk to the children, tell them about their professions and what each means to the man who follows it.

"During the years that I was with Tech High, I specialized in boyology," Mr. Sutton told me, "And by this I mean the science of the all-'round human boy.

"As a teacher, I didn't see how I was to do anything very much for my pupils unless I knew them, learned what kinds of human beings they were, and how to appeal to them individually. Therefore, I set myself the task of acquiring this information. As the best and quickest means to this end, I formed the habit of taking groups of them off with me on hikes and picnics during the week-ends, and in vacation time I accompanied them to their summer camps in the mountains.

"On these outings, we would tramp the country 'round for miles, swim the cold, invigorating lakes and rivers of north Georgia, cook our meals over beds of glowing coals, play, joke, get rid of all our pent-up energy, forget that I was a teacher and they my pupils. And in the course of the fine, informal comradeship

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

engendered by this healthy outdoor life even the most reticent youngster was bound to forget himself so far as to open his heart and speak of the things that meant most to him.

"Nothing is so fascinating as to study a normal, intelligent boy, from all sides, in this fashion—find out what he thinks about, what he knows, what he is. And then, having got his content, to set about enriching it, broadening his horizon, elevating his ideals, helping him to get his values straight, to distinguish between the things of importance and those that are not worth while; aiding him to understand himself, to find his place in life, and to begin fitting him for it. With wise and sympathetic guidance there is almost nothing that cannot be made of such a boy. And to watch him develop, in character and soul, brain and body, is like witnessing the working of a miracle.

"WITH the high-school youth, all topics lead inevitably to the absorbing one of 'What am I going to be when I am grown?' And sometimes, as we lay sprawled upon the grass about a blazing fire, matching stories of our earliest recollections, or of those incidents which stood out like mile posts down the long years of childhood and youth, these research expeditions, within ourselves, would clear the air surprisingly for a boy. Through them, he would be made aware of some talent or interest, the importance of which to himself he had not guessed.

"'Have a purpose in life,' I preached continually to these young people, 'It will give meaning and beauty to existence.'

"'Work tenaciously at whatever you undertake; but the moment you find that you are not growing in that work, give it up and get into something that will allow you to develop. The largest salary in the world is not sufficient compensation for work in which you cannot grow. In school, when you master one subject you go on to something higher. It should be the same with work, for life was not meant to be stagnation but a glorious progression.'

"'Whatever you will to do,' I assured my students, 'you can do.' And they saw the truth of this too frequently demonstrated in the lives about them to doubt it. For in every school, there is to be found some boy or girl who triumphs over all obstacles—ill health, physical disabilities, povery, unhappy home conditions—as if these were merely handicaps placed upon them to keep them from winning too easily. Courage, Pluck, Grit, these are the middle names of youth.

"When my school grew beyond the possibility of my establishing these close contacts with all my pupils," he continued, "I made lists of the questions I had found most helpful in giving me a line on a boy, and submitted them to all the students, asking them to fill them out as fully as possible, and let me have them again.

"In these very personal questionnaires, I not only sought to learn all that I could about the boy's home and interests, the subjects that most occupied his thoughts, the books he liked best, the amusements and occupations he enjoyed, but I also wanted to know what his religious beliefs were, and if he still said his prayers. I inquired particularly about the sorts of

Eat Yeast Foam Tablets and get the full energy of pure yeast in pleasant form

Here is the yeast you've been looking for: it comes in tasty little tablets that you can swallow, though most folks chew them. Everyone likes them. And remember they are nothing but pure whole yeast, having the full health-building value of *any* yeast—*plus* a much more convenient and palatable form.

Get the handy little 5c packet (6 full-sized tablets) at counters everywhere. Or the large 50c bottle for home or office use, containing yeast for 10 days. Northwestern Yeast Co., Chicago.

This is the standard yeast and is used regularly for experimental purposes in the leading universities, medical schools, research institutions and Government experimental laboratories throughout the United States.

Notice the improvement in the drawings of Art Nelson. He made No. 1 before he had Federal School training. No. 2 he completed recently. Today he is on a large newspaper at a big salary. He says, "The Federal Schools made this possible as I had only average ability before enrolling as a student."

Opportunities for artists have never been better. Magazines and newspapers pay millions of dollars every year for illustrations. If you like to draw, let your talent make your living. It's easy to learn the "Federal Way"—at home in your spare time.

The Federal Course includes illustrating, cartooning, lettering, poster designing and window card illustrating. It is prepared by over fifty famous artists. Why continue plodding along? Send for our free book, "A Road to Bigger Things."

Federal School of Illustrating

10017 Federal School Bldg., Minneapolis, Minn.

boys he selected for his friends, and even went so far as to ask the name of his best girl—though this information, I promised, should be held strictly confidential. I wished his private opinion about himself: was he alert and ambitious, or procrastinating and lazy, generous or stingy, even-tempered or fractious? 'What quality of greatness appeals most to you?' I asked, and, 'What is your idea of success?'"

"What was their idea of success?" I interrupted.

He went to his files, took out a number of the questionnaires and read me the definitions. "To win out above hardships, and in everything to acquit yourself proudly. This is what success means to me," a sixteen-year-old lad had written. "If at the end of my life I could feel that I had won the love and respect of men, women, and children, and that I deserved to win them, I'd feel I had made a pretty good job of it," another had summed it up. "I don't think any man is a success," wrote a third, "unless he lives in such a way that his life is a help and inspiration to others."

"These answers don't tally very well with the general opinion of modern youth," I ejaculated.

"Neither do my experiences with young people," Mr. Sutton returned.

"BUT of the many questions I asked them," he resumed, "the one which proved most far-reaching in its results was: 'Of all the people you know, whom do you consider the finest man in the world?'

"The answer to this gave me a most illuminating picture of that boy's ambitions and dreams. Here in flesh and blood was his ideal, the sort of man he longed to be when he was grown.

"There is no influence on earth so powerful in the life of a young person as the example of one whom he deeply admires and respects. I determined to try to use this great power in my pupils' behalf. Therefore, I wrote to the men these boys named and told them of the honor paid them.

"The human being doesn't live," observed Mr. Sutton, "who wouldn't be touched by so sincere and disinterested a tribute. And in replying, practically every man asked me to let him know if he could ever do anything for that boy. I took this request literally, and later, when one of my pupils got into any difficulty, seemed to be losing interest in his studies, or began going with hurtful companions, I wrote to the man who occupied this unique place in his life, told him of it, and asked if he could manage to see his young friend and have a talk with him. Invariably, the men were glad to do this. And the effect upon the boy was nothing short of magical. 'The finest man in the world thinks I am worth taking an interest in. Gee! I'll show him he is not far wrong!'

"But the friendships between these two did not end here. The man kept his young protégé in mind, had many talks with him about the work he wanted to do after he finished school. And when that time arrived, in numberless instances he had a place ready and waiting for him, either in his own office, or in the firm or company of a friend.

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

We now submit these questionnaires, more extensive form, to all our pupils n the fifth grade up, and we place e graduate students in positions ough the friendly assistance of these n than in all other ways put together.

Not long ago I was speaking to one he most brilliant lawyers of this city what his interest and influence had int to several of our boys, when he aimed, 'But have you never thought what these contacts mean to us men? en I was in the war,' he continued, e one thing that kept my feet in the nity of that straight and narrow path the knowledge that there were five ingsters back home who were looking me to set them a decent example. I in't a free agent. I *had* to keep faith h those boys.'

"HE best safeguard for youth of which I know," Mr. Sutton said, "is so fill the lives of young people with inter- s which are fine and upbuilding that trivial and the hurtful can have no eal for them.

'I have never known a child whom I ieved to be inherently bad," he as- ted. "When one appears incorrigible, reason is usually to be found in ill lth, or unhappy home surroundings, or warped attitude of mind. To expel a ld seems to me the worst thing in the rld, and I don't believe in doing it for y cause whatsoever. It is like branding n as a pariah at the beginning of life, sing against him the doors of respec- ility and opportunity. Once, however, veral years ago, I found myself faced th the necessity of imposing this sen- ice.

"The child in the case was a boy who d made life so unendurable for his achers that at last they struck and formed me that if I didn't expel him ey would resign. I knew what they'd d to contend with, how patient and rbearing they had been, and I had to hold them. So I sent for the child and ld him. To him, it was as dreadful a nishment as it was to me, and he knelt my feet and begged me to be merciful.

"'Can't you beat me instead?' he eaded.

"'I don't beat boys,' I told him.

"If you turn me out, where'll I go?' he emanded, 'I haven't a friend on this arth.'

"'You have your mother,' I reproved im.

"'She's dead,' he answered.

"'Your father, then.'

"'You wouldn't think he was my iend,' he sobbed, 'if you saw me.' And, xcitedly stripping off his shirt, he showed e his back, scarred and bruised by eatings. He was crying horribly, and as e did his lips drew back from his gums nd I saw his teeth black and worn down o the stumps. I began to wonder if this ondition was not in some measure re- ponsible for his outrageous behavior. cting on the supposition, I said, 'I'm oing to make a bargain with you, obert. If you will go to the dentist and ave your teeth fixed, and bring me a note rom him saying that you are doing this, ou can continue to come to school for six veeks longer. At the end of that time, f your conduct has shown marked im- rovement—well, you can stay.'

"I was a little afraid to meet my teachers after that," he admitted smilingly, "and I rather avoided them for the next few weeks. Finally, at the end of three months, I screwed up my courage and broached the subject at a faculty meeting.

"'What's become of Robert?' I inquired.

"'Never saw such a change in a boy in our lives,' they declared. 'What did you do to him?'

"'Nothing. Had his teeth fixed,' I replied.

"'Then, for mercy's sake, let's have a dentist in the faculty,' they laughed."

This was the beginning of Mr. Sutton's interest in good teeth for the children of Atlanta, which resulted in the campaign that ended some months ago, when the last laggard child of all the sixty thousand went over the top with one hundred per cent in oral hygiene, and the entire city indulged in a jubilation.

"As a young teacher in Alabama," Mr. Sutton went on, "the one object I had in view was to expand my school to meet the needs of my pupils. My aim is still the same, only, in the years that have passed, I have learned that there is no limit to the needs of young people, because their needs include all that can contribute to the enrichment of life.

"It is my firm belief," he finished, "that every child has within him some quality, which, if brought to light, would bless the world.

"And I can think of no higher mission than that of seeking to discover these divine attributes and bringing them to fulfillment. It's the greatest job in the world."

THE first of three articles on parents' problems by Angelo Patri will appear next month. Mr. Patri is one of the great educationalists of today, and has introduced methods of child training that have attracted attention throughout the educational world. He understands children and parents. He knows the trials of the former and the problems of the latter. These articles will be of incalculable value to all those who have dealings with youngsters—and there are few of us who do not.

I Have Never Been Turned Away From a Cabin Door

(*Continued from page 45*)

railroad, and then make my way inland. I looked at a map. The distance seemed short, and the map showed no obstacles in the path.

I went to the stub end of the puffy little railroad, only to discover that I was forty-two miles from my destination. How could I make them? Well, the mail was carried twice a week on horseback; but it would be necessary for me to walk.

I have not done many brave things, but the bravest of all was when I rolled up a few possessions and started into the mountains to live for weeks and months among a people whom I did not know and whose ways I did not understand. I ate food such as I had never before known existed, and it made me sick. I drank unwholesome water. I bathed and shaved in cold mountain streams by the side of the path. I learned how to go to bed with the whole family in the same room, and sometimes I occupied, against my will, the only bed in the house, while the others slept on the floor. But I never had anyone suggest that his cabin was so small or his food so limited that he could not care for a stranger who was in need of food or lodging.

To be sure, a stranger must establish himself, and he must answer some rather blunt questions; but once his good intentions are made clear, the best his host can offer is freely his.

I remember the day I walked up Big Sycamore for twelve miles, crossing and recrossing the stream on stones or fallen logs as the exigencies of the way demanded. Then I turned up Dog Run. On the other side of the mountain I came suddenly to a small clearing, in which stood an ancient log cabin surrounded by a high rail fence.

I was too wise to rush up and knock at the wooden door. Instead, I climbed to the top of the fence and hallooed loudly. My shouts and the barking of a much-agitated and threatening dog brought speedy succor.

Evidently, my appearance was not too forbidding, for I was invited to come down from my perch and enter the cabin. It was a one-room affair, with the inevitable fireplace, and a loose board floor which the razorbacks shook as they scratched beneath it. There were two bedraggled beds, a rickety loft with a crude ladder leading to it, and outside a sizable stone-and-stick chimney.

Three generations of children had caught their first glimpse of the world from the doorway of this cabin. The world which it now revealed consisted of a log shed, a patch of corn, the high rail fence, and beyond it the scraggly mountainside. There was not a neighbor's house in sight, nor a road or trail sufficiently traveled to be visible.

Supper time came and I shared in the simple meal of fat pork in grease, cornpone, black coffee and, in honor of the occasion, soda biscuits. As I ate, a large branch freshly broken from a tree was waved over my head, and a swarm of black flies disturbed at their feasting darted first in one direction and then in another.

Eating over, we settled back to visit. The doors were tightly closed. An old-fashioned kerosene lamp without a chimney poured its black fumes into the air. My host and I stepped outside. I located the North Star, and I taught him the trick. He had never known it before.

Bed followed. Part of the children in the loft, the younger ones on the floor

below, the father and mother near by, myself and a hanger-on of the family in a corner. He soon slept, and the others also. I alone was wakeful. I had encountered vermin before, but never such an army of them. I committed murder right and left, but the approaching hosts knew no defeat.

Cautiously, I climbed out of bed and made my way over the loose boards to the unbolted door. In fear and trembling I opened it and stepped out. The air was cool. The moon shone full. I made my way up the side of the mountain to an open ledge. I took my clothes off, garment by garment, and shook them out. I rubbed my body. Then I dressed and sat down to wait for dawn.

Toward morning, in order not to hurt my host's feelings, I slipped back to the cabin and climbed into bed. There I was when the snoring eased off and the smiling face of my host greeted me. He had developed something approaching affection for me and, had I stayed many days and nights, I would still have been welcome.

It was in West Virginia, too, that I "shantied" with Ben West. I enjoyed Ben, and I am sure he enjoyed me. I remember clearly the hard bed and the breakfast of corn bread, a slice of onion, and a cup of muddy coffee without sugar or milk. Ben liked those breakfasts. I did not. He was sure he should have been a telegraph operator, because it was natural for him to drum with his fingers. I have lost track of Ben. He was a real friend to me, and his cabin was my home when I chose to make it so.

WHEN later I moved to the sagebrush country of Montana I found that the law of the cabin still held.

Long live Jim Bird! He, too, had room. He slept in the kitchen of his homesteader's shack—the rest of the house was mine. Jim didn't work regularly; he didn't believe much in work, but how he loved to talk. His Scotch philosophy interested and entertained me. Our evening visits were prolonged long after we were in bed, Jim calling from the kitchen while I responded from my corner. Jim lived for the IMPORTANT DAYS—they were always spelled with capitals in Jim's thinking. He would sleep late, get up, stretch himself, and, as if apologizing for his comfortable laziness, remark, "Well, this is not one of the IMPORTANT DAYS." The big days to him were the Fourth of July, the round-ups, and the bronco-busting occasions.

Jim was a real character, and I have seen him, decked out in a clean shirt, plaid vest, and wide sombrero, preside over a bronco-busting *fiesta* with all of the finesse of a connoisseur. I hope Jim gets a rich reward in the hereafter. He had much of the grace of human goodness. He hinted at one time that his family connections were better than I might suspect, and that he was the one black sheep which the tribe had produced. I respected his reserve and did not pry into his past.

Then Jim went on a long journey, and I had the cabin alone. I wish I could picture those nights, but how could anyone understand who had not lived them—the moonlight, the unending miles of dry sage, the pervasive fragrance, the aloneness, the quiet, interrupted only by the occasional bark of a coyote or the chatter of a prairie dog. One has not really lived

Y DIAMONDS DIRECT

rom Jason Weiler & Sons, Boston, Mass.
America's leading diamond importers

over 50 years the house of Jason Weiler & Sons, Boston, has been one of the leading diamond import-concerns in America selling direct by mail to customers l dealers alike all over the world at worthwhile sav-s. "My banker

gave me this *letter of introduction to you-"*

"He said his bank had bought investments from your institution for twenty-five years, and that you would help select the right bonds for me."

Our officers often receive such letters. That is because a long list of American, Scotch, Dutch and British Banking Institutions have been customers of George M. Forman & Company for many years. They know this House, its principals and principles, and the kind of helpful, sincere investment service it renders.

As an introduction we suggest that you mail the coupon for descriptive literature on current offerings, yielding as high as 6½%. You will also receive a free copy of "The Science of Fortune Building," which charts the sure, straight path to financial independence.

LOW COST WAY

till he has spent nights like those, and had born within his soul a sense of the utter futility of jangling telephone bells, shrieking trains, honking horns, and all the mad rush which in our ignorance seems so essential to our well-being.

It was a lesson akin to this that I learned in a prospector's cabin in northern New Mexico. He had once known a different life, but the lure of the mountains had got him. His years had been spent in a gamble with nature. Some day he would "strike it rich." Nothing but the necessity of a grub stake could divert him from his real mission in life, and that but temporarily.

Having washed in the icy water by the side of the cabin after my night's rest and shared in the simple breakfast, I followed this pioneer up the steep mountainside. It was a hard, long climb, almost straight up. But at last I stood upon the chosen ledge. Before me was a large hole. Thirty feet in I could hear the steady striking of the hammer upon the steel drill. I entered. My friend showed me with pride how he had drilled and blasted day after day. There were "signs." Some of the quartz had been sent away to the assay office. A report was expected.

Then, like the fool I was, I committed the unpardonable sin.

"How many years have you been prospecting?" I asked.

The total was so large I could hardly believe it.

I blundered on: "Did you ever strike anything?"

Never shall I forget the hurt look which came into his face as he said, "Please, please, do not be so unkind."

I made my exit and went on my way, a sadder but a wiser man. I had met a gentleman; but my social heritage of practicality had kept me from a true appreciation of a great soul. He had compensations of which I had never dreamed.

MORE humorous was my experience in a peach orchard near Paw Paw, West Virginia, where I shared the hospitality of my friend Windzor Jones.

Windzor had assured me that there was "plenty of room." Most of the tents were full; but we found one with a single solid bunk extending around the two sides and one end. A dozen men had gone to bed. We climbed in. Later, others arrived. They were noisy. The toe of one sleeper protruded. Some practical joker burned it with a match. There was a near riot. The bunk was now full. Most of the men slept. I dozed.

Stumbling footsteps approached. The tent flap was thrown back. A strong hand grasped me by the calf of the leg, and a rough voice shouted, "Who's in my bed?"

I dug my elbow into Windzor. It was up to him to settle the affair. He mumbled something about the night watchman, whom we had not seen. The newcomer expressed in no uncertain terms his opinion of a watchman who would put a stranger in a bed already preëmpted.

To an extent the ruse had placated his feelings. We compromised. By squeezing together we made room where no room had been before. It was hot. The newcomer slept. I could not. At last I could stand it no longer. Again my elbow dug Windzor. We whispered. Then we wriggled out of the human mass. We gathered our clothes as best we could. One of my socks was missing. The newcomer was sleeping upon it. I had not the courage to roll him over. I had no substitute; but I left that tent never to return.

Such incidents are but the humorous spice of existence to the wayfaring man who tries to take life as he finds it, and who does not count the loss of a night's sleep one of life's major tragedies.

POSSIBLY it is in those humble homes where the "spare room"—at one time America's most characteristic institution—is still maintained that the stranger really fares best. And what a variety of experience they bring!

I have climbed up a narrow stairway so steep and crooked that to carry a lighted lamp up its tortuous spirals was a real athletic achievement, and lost myself in dreamless sleep in a puffy bed, content with the thought that my host was enjoying my visit as much as I.

And there are many little ways by which the visitor can test his welcome. The heated soapstone discovered in the voluminous folds of what would otherwise be a cold and clammy bed, the bucket of warm water placed surreptitiously inside the chamber door on winter mornings, the freshly-laundered tablecloth, and the opened cans of pickles and preserves are unspoken tokens which need little interpretation.

The guest in the humble home needs no alarm clock. The scraping of the ashes in the kitchen stove will be his signal that the family is stirring, and the smell of boiling coffee his final warning that he must move rapidly if he would not be late for breakfast. The cheery morning greetings and the friendly inquiry as to one's personal comfort and welfare warm the cockles of one's heart, and strengthen one's faith in the fundamental goodness and integrity of the human race.

When the "red wave" was supposed to be sweeping America I could not get greatly excited about it. I had bunked and eaten salt pork in too many American homes, and had swapped philosophy with too many people who think, but do not display their conclusions on bill boards.

A man may come to know America in many ways. He may visit our legislative halls and watch our laws in process. He may inspect the policies and achievements of our government executives. He may, if he will, travel on our swift and standardized Pullman trains and visit our standardized cities, from Portland, Maine, to Portland, Oregon; or he may satisfy his curiosity from the seat of a speeding flivver, with periodic calls at filling stations and tourists' camps.

But when all of that is done, let the would-be student put an extra pair of socks in one pocket and a tooth brush in another and say good-by to hard roads and automatic transportation. Beyond the cities and the railroads, up the mountain trails and through the dusty sagebrush he'll discover the meaning of genuine hospitality. And he will learn, among other things, that in the unpainted homes of America there is an unassuming kindliness of heart which makes it a little easier to believe in man's fundamental kinship with the divine.

nazing New Kind of DDING MACHINE

s all the work of big, expen- machines, yet OSTS BUT $10 COMPLETE!

s a marvelous invention worth twenty times st to everybody who works with figures! A kind of adding machine, called the ADDO-ER, that is a wonder! A practical, efficient ine that does every kind of figuring swiftly and perfect accuracy—at a price of only $10!

perates on Unusual New Principle

utionary in design, as well as in price, ADDO-ER is the neatest, most compact and ingenious g machine you ever saw. Works without keys or ard levers. ADDS quick as a flash! SUBTRACTS ntly! Even adds and subtracts FRACTIONS in of ½! Use it to total invoices, take inventory, ce ledger accounts, figure discounts, or for 1001 useful computations. ADDOMETER always the RIGHT ANSWER EVERY TIME—in a jiffy!

OOK at These Startling Features!

:—11½" long; 2½" wide; ⅝" thick! Weighs 14 oz. Can be easily carried in your pocket.
ACITY:—8 columns. Counts to $99,999.99⅞. s total visible at all times. Clears instantly.
IGN:—Unique. Amazingly convenient. Fits ight over figures being computed. Keeps place rds againt interruption. Embodies 11" rule.
STRUCTION:—Made entirely of metal. Prac- indestructible. Fully guaranteed for 2 years.

Days' Trial ABSOLUTELY FREE

ant you to have an ADDOMETER for 10 days E TRIAL in your own home or office. So we are offering it to anyone on our famous "No-Risk" Plan. We want NO money in advance—NOTHING on delivery—No deposit of any kind! Simply fill out and mail the coupon and we'll send you a machine postpaid. Try it! Test it! Use it for 10 days! Then if satisfied, remit only $10 in full payment. Otherwise return machine. That's all we ask. By all means mail the coupon for your machine NOW—TODAY!

re's ur an

E: This offer open only to residents of U. S. over 21 yrs. Residents of Canada and foreign countries please remit coupon. Satisfaction guaranteed or money back.

"Yes, I Am a Crank!"

(*Continued from page 43*)

the time. After working a year and a half under an incompetent farm manager, and putting the man I hoped to be in contrast with what he was, I had an enormously big opinion of myself. I felt I was an untried giant.

"Let us be frank in this talk. I have said we are all cranks. Likewise, most of us are egotists. We like to palm off our egotism as self-confidence; sometimes we call it 'faith in ourselves;' but, whatever we call it, it is the ego, the 'I' exalted. Purposeful, confident action *must* be founded on a belief in 'I,' for without that belief there would be inaction.

"Sheer egotism was all that bolstered me up when I came back from the farm, hunting work. Heaven knows I had little else to justify anybody in hiring me. If I didn't bear down on the capital 'I' orally, I did mentally. I charged myself so full of confidence—a purely mental operation—that confidence oozed out of me. And I found my job."

This man Kroger, I should explain, does not say always the things that people like to hear. He says what he thinks. Often he offends. But I discovered this about him: he does not exempt himself from what he tenders others. To me, at least, he made no pretenses. As he had stripped the wrapper from that can of corn, he was quick to strip it from himself. And I doubt if Kroger's worst enemy will dispute that what he has to say he says openly, face to face. He is not a "corner talker."

"Yes, I am a crank," he said. "Yes, I am an egotist."

Not every man would have the courage to say that publicly. Very many have not the honesty to confess it even to themselves. However, the fact stands that most of the so-called "big" men in business are and have been egotists and cranks, under Kroger's definition.

SO HE got his job in the city. It was with a store known grandly as the Great Northern Pacific Tea Company. One day Kroger went from house to house soliciting orders from housewives for coffee and tea. Next day he would take out the wagon and deliver what had been ordered the previous day. Paid on a commission basis, he was able to make nine dollars a week.

At the end of eight months, upon receiving an offer of larger commissions, he transferred his services to another coffee and tea company. The new position involved the same kind of house-to-house selling as the old, the same daily contact with people. But less than a month passed before Kroger learned that it was not the same kind of position.

With the first company, after once he had obtained the trade of a customer he was able to go back again and again. Once a customer, the housewife remained a customer. But with the second company the opposite was the case. Many women bought from him only once and, upon his next call, shut the door in his face. Few made more than two or three purchases before they, too, met him with a closed door. He was constantly getting new

"There's the *new* Ned Tyson"

He's making $6500 a year now

"I USED to know him when I was a kid—we went to grammar school together.

"Then his father died and he had to go to work. Got a job with Brooks & Watson as a clerk, but couldn't seem to get ahead.

"Then overnight something seemed to wake him up. He began making suggestions to the firm—helped them to save a great deal of money.

"Then Old Man Brooks became interested—wanted to know how Ned happened to know so much about the business. Ned told him he'd been studying at home at nights through the International Correspondence Schools. 'H'm,' said Mr. Brooks, 'I'll remember that.'

"He did too. Put Ned out on the road as a salesman for a year or so and then brought him into the main office as sales manager.

"He's getting $6500 a year now and everybody calls him 'the new Ned Tyson.' I've never seen such a change in a man in my life. The I. C. S. deserves a lot of credit."

An International Correspondence Schools course will help *you* just as it helped Ned Tyson. It will help you to have the happy home—the bigger salary—the comforts you'd like to have. Start today to make good. At least find out what this great school can do for you.

customers and just as constantly losing old ones.

One morning he stopped at a home, knocked, and announced his business. The housewife regarded him uncertainly. "I don't know you," she said. "I don't know your goods. However, I'm open-minded. What have you got?"

Kroger exhibited his sample packages. He invited her to smell of the goodness of the coffee. He stated the low price.

"Set that package down on the table here and open it up," commanded the housewife. "Show me what's *inside* of it."

The package opened, with a quick movement of her hands she spread the coffee grains evenly over the table. At once anyone with eyes could see that it was not a first-grade coffee. The grains were of varied sizes and shades of brownness.

"Poof!" said the housewife. "You're wasting time. Take it away."

"A crank!" was Kroger's verdict as he stepped back into his wagon. But as quickly he asked himself, "Was she a crank? Wasn't she after all a mighty shrewd woman?" The coffee wasn't good. Here, undoubtedly, was the explanation of why he was unable to keep customers.

"THE more I saw of people," he related, "the clearer became my realization that they could not be fooled! How I served a customer had something to do with why she bought. Price and appearance had something to do with it. These made a first sale. But what made re-sales was the satisfaction found in the article itself when put to use. If that failed, all failed, and the customer was lost.

"I began to visualize what I felt would be the ideal store. The formula for it was simplicity itself. The store merely would have to combine four things—service, fair price, attractive-appearing goods, and first quality. I felt I would like to work for such a store, though the possibility of owning one didn't occur to me then. Later, when I did own one, I found the formula was not quite so simple as it seemed in theory."

Kroger moved on to a third company, again as a salesman on the street. This company operated a single store, newly opened by two partners to provide a position for a relative, who was the store's manager. Almost from the first the new venture lost money, due largely to the manager's inexperience. By the end of a year only $600 was left out of the original investment of $3,500.

Disgusted and seeing no future in the business, Kroger applied to a New York wholesale house for a position. He was hired by telegraph and, that night, after delivery of his groceries, he returned to the store to resign. One of the owners was there awaiting him. He read the New York telegram. His reply to Kroger was an offer of the managership.

"My partner and I," he explained, "talked this matter over this morning. We have only $600 left in this store. We decided to offer you the management of it, on the condition that if you lose the $600 we will quit."

"Will you give me a contract," asked Kroger, "that will guarantee me full charge and a right to do as I please?"

After talking it over, the contract as finally drawn allowed Kroger a salary of $12 a week and ten per cent of the profits. There had been no profits, nor was there any promise of them; but here was the chance for which Kroger had been waiting. He *knew* he could make the store pay.

His first move was to discharge every employee excepting a delivery boy; second, to take $125 of the $600 capital that remained and buy a good cash register. The partners hinted that he had gone crazy.

"You've tried your way," Kroger reminded. "Now keep quiet while I try mine. The most I can lose is a little more than a fifth of what you lost."

Kroger and the boy conducted the store. The boy swept up, arranged orders and made deliveries. Kroger bought, sold, kept the account books, and solicited business. He arose with daybreak and worked until midnight. And to the full extent of his ability he became a crank.

I have told you what happened to the corn salesman and his canned corn. Every can of stuff, every bag, and every box that Kroger bought was subjected to the same rigid inspection. He did not stop with smelling but took a leaf from the book of the housewife who had said "poof" to the coffee. Like the housewife, before he bought coffee, or tea, or anything, he spread it out so it could be seen in detail, washed it, and even had it cooked for him on his own table. No customer on all the store's list was more particular and exacting than he.

"What was the result?" I asked him.

He smiled. "The salesmen with inferior stuff to sell called me a crank and stayed away. Those with really good stuff began to call around and invite inspection. I began to draw a particular class of trade by which I do not mean necessarily the wealthy class. One of the most particular women I've known was the wife of a wage earner.

"We began to make money, which, after all, was the real test of the policy. I saved time in dealing with customers because they learned to accept my word when I said an article was right. Eventually I didn't have to go out and solicit business, because it came to the store unsolicited, brought by word-of-mouth report. At the end of eleven months the store had earned $3,100 net."

Kroger's ten per cent of this profit was $310. He offered the partners to invest this money in the store in return for a one-third interest in the business. They countered with an offer of $15 a week, and fifteen per cent of the profits. An argument ensued, at the end of which Kroger resigned.

He had saved $62 from his wages. This gave him a total of $372 in cash. An Irish friend said he could borrow $350.

"ALL RIGHT," said Kroger. "We'll join up and open a store of our own. I know just the place."

The place was at 66 East Pearl Street, Cincinnati, and it rented for $40 a month. On top of this extravagance, Kroger bought a smart-looking horse, a set of gilt-mounted harness, and a shiny new wagon lettered in gold with the name, "Great Western Tea Company."

"Who owns that company?" demanded one housewife when the glittering equipage drew up before her door.

"I do!" said Kroger proudly.

"Humph!" snorted the woman. "I see nothing great about you. You'll have to do a bit of growing to fit that name."

A railroad train evidently had the same notion. Two weeks after the Great Western Tea Company had swung wide its single door, Kroger's Irish partner tried to beat an express train over a grade crossing. He got across, but the horse was killed, the wagon smashed, and $68 worth of groceries were strewn along the right-of-way—a total loss of $518.

Not long after, in January, one of Kroger's brothers who had gone to Denver died there. The funeral cost Kroger $400. In less than a month came the third blow: the Ohio River overflowed its banks, invaded the lower parts of the city and flooded the store of the Great Western Tea Company, causing a total loss of its stock, valued at $300.

"All we had left," said Kroger, were the fixtures, the cash register, and some mud."

Yet at the end of that first year when Kroger and his partner balanced their books, they found they had assets in the store amounting to $2,620. They had no bad debts and owed nobody. The store was a going, profitable business. The reliable concerns from which Kroger had been buying his goods had not hesitated to allow him credit when he most sorely needed it. That credit had enabled him to meet and beat threatened disaster.

"Here's my proposition," he informed his partner. "I'll sell out my interest in the store to you for $1,000; or I'll buy out your interest for $1,500. Take your choice."

The partner decided to sell and to set up a business of his own in Minneapolis. Kroger stayed in Cincinnati, now sole owner of the store; and immediately he was faced with a threatening problem.

THE store was located in a market place, considered one of the best sites in the city. Many, in fact, had attributed Kroger's success to the store's location rather than to any unusual ability on the part of the owners. The lease on his store was up and the landlord did not care to renew it except on what Kroger regarded as exorbitant terms.

"I'll move," said Kroger grimly.

"You'll lose your trade," warned friends.

"Not if the store's policy is right. It's a chance to prove that policy."

He left the market place entirely and moved back onto a side street, into a location which made every rival storekeeper smile.

What was their astonishment, even before the expiration of three months, to hear that Kroger had opened a second store. At the end of six months he had three stores; by the end of the year, four!

"Individual store owners," Kroger remarked to me at this point, "rail at the so-called chain stores. They forget that they are right on the line where the chain store man began with his single store. We have 3,600 stores to-day but we began with one store. I've told you of how much capital was in that first store out of which the others grew.

"What did I do? Simply duplicate and reduplicate what was demonstrated to be a successful thing. If a policy succeeds in one neighborhood there is no reason why it should not succeed elsewhere. The fact

DESIGNED for Luxurious Bathrooms

Yet priced low enough *for* modest homes

THOUGH designed for the bathrooms of luxurious homes, apartments and hotels, its reasonable price has made the Church Sani-White Seat a bathroom luxury everyone can afford. A dark-colored, cracked or old toilet seat can easily be replaced with a modern, clean, white, sanitary Church Toilet Seat. You can easily put one on any toilet in a few minutes with an ordinary pair of pliers. Its pure whiteness adds new beauty to any bathroom.

Its white surface is an ivorylike sheathing, as easy to keep clean as porcelain. It won't crack, split, wear off or change color. Phone or visit your neighborhood plumbing store today. They can supply you. Clip the coupon and mail for booklet and cross-section.

Wire coating represents years research

Delicate actuating parts of loud speakers are subject to rust and deterioration. The Crosley patented actuating unit is not affected by the climate. Special impregnable coating covers the wire in the coils. Impervious bakelite instead of cardboard bobbins prevents any retention of moisture. Higher voltage is possible with resultant louder, finer tones.

WORLD'S *fastest selling* SPEAKER

Pure Silk to the Top $1.00

HALF a century ago a little group of skilled men were making Iron Clad hose for customers who insisted upon a flawless, fadeless stocking that would wear—and wear—and wear.

Today the demand for Iron Clads has grown to such proportions that they are sold by over 14,000 merchants.

Today you can get an exquisite sheer silk Iron Clad—stronger than ever—pure silk to the top—double sole—4-ply mercerized heel and toe—in the season's latest lovely shades—with an Iron Clad guarantee on every pair—*for one dollar!*

It is hard to go wrong when you buy hose with features such as these—at a price as low as this—with an absolute guarantee of satisfactory service—and behind it all a 50-year-old reputation such as Iron Clad's!

If your dealer cannot supply you, mail us your remittance of $1.00 a pair with a request for Style 807, and we'll supply you direct. State size (8 to 10½) and color (black, white, atmosphere, skin, champagne, blonde, grain, parchment, moonlight, rose blush, sandust, French nude, mauve taupe, silver grey, Aloma, peach bloom, gun metal, flesh pink, pastel parchment, pearl blush.)

COOPER, WELLS & CO.

that we now have more than 3,600 stores merely means that we have started in business anew just that many times, and succeeded each time. We've never had a failure.

"Too many men starting in business are overprone to say, 'Oh, let it go!' when something is not as it should be. The little store-owner buys from a large wholesaler. A portion of the goods which are delivered to him may be just a trifle below standard. The store man knows and sees the fault, but he is conscious of his smallness. The fault is trivial, after all. 'Oh, let it go,' he says, because he doesn't want to appear to be a crank. He forgets that even a small fault is big in the eyes of a particular customer—and the majority of customers are particular.

"Think over your own experience. Do you continue to buy at the store where invariably some little defect is to be found in the transaction, or at the store where you find no cause of complaint?

"In the old days when we were small I personally investigated every purchase before it went onto our counters. I can't do that now. We have grown too big. But I have established a department in the business which does this work for me far better than I could myself. This is a chemical laboratory. In it the goods of manufacturers are subjected to test, for purity, cleanliness, quality, and other items of worth.

"And I've learned this from that laboratory: The big firms, the real profit makers in business to-day, are without exception the reliable firms who are cranks on quality. In all of my experience in this store business I can't recall one instance of a reliable company being a failure when properly managed; and I can recall no instance of an unreliable company being long successful, regardless of management. I use the word reliable as it applies to quality of product.

"'BUT that's all old stuff,' you say. "It is and it isn't. Our chemists could tell you many a story of the company which began right, permitted its goods to deteriorate, and eventually smashed. They tried to cheapen a little to increase profits, or to increase volume. They became over-confident in their success, with resultant carelessness in supervision. Finding it not easy to be constantly cranky they let down, perhaps unconsciously, and began to say, 'Oh, let it go.'

"It is human nature, after the first fine burst of enthusiasm, to 'let down' a little, to cease being quite so careful, to assume that because things are going well they will continue to do so by virtue of their own momentum. It is just as easy, and far more disastrous, to fail after success as it is to fail in attaining it. Once a crank you must continue to be one."

TWENTY years ago, when Nell Donnelly married, she resolved that she wasn't going to let housework make her look like a wielder of mop sticks and frying pans. That resolution finally led to the establishment of a factory in Kansas City which specializes in gay-colored work dresses. Next month, in "It's All Right to be a Wife if You Don't Look Like One," Mrs. Donnelly tells why she doesn't wear a "married" look.

I'm a Regular Old Omens' Home

(*Continued from page 57*)

ving off the general aroma of a garage. aving his share of sensibilities, he gave boy a dollar to hold the coat out on e sidewalk until he came out. Al-gether, he put in a most uncomfortable ternoon.

"Do you ever walk under ladders any ore?" I asked him recently.

"Very seldom under ordinary con-itions, and never when on my way to eddings," he replied.

You'll find a great many people who off at omens, embracing them in a show-own. Only last week on a fishing trip e conversation on the train drifted to e omen about its being bad luck to ght the cigars or cigarettes of three nokers with one match. One of the men eclared it absurd, and said, "All omens re the bunk. Only the ignorant pay any ttention to 'em."

Two hours later, at the hotel beside the ake, in paying him my share of certain xpenses I gave him a two-dollar bill mong others. The man let out a roar hat would have sufficed for an African on.

"Putting a jinx on me before we even et into a boat!" he bellowed. "Don't ou know any better than to give a feller ne of those things?"

"Thought you weren't superstitious?" remarked.

"Aw, I'm not," he replied; "but a two-ollar bill is always bad luck. Everybody dmits that."

I will not cross between the hacks or utomobiles of a funeral procession, take he third light from the same match, or pen an umbrella in the house.

Common sense ought to teach any nan that life is in no way controlled or ffected by so small a matter as the light-ng of Swedish matches. But it doesn't. know hundreds of men who turn pale nd become semi-violent at the prospect f being one of three to take a light from he same match, and I am among them. And they are not all sentimental goofs, morons, or half-wits. I could name a cientist, three eminent physicians, a college professor, an editor, a policeman, a burglar, two apartment-house janitors, any number of lawyers, a district court judge, a steeplejack, the head of a great publishing house, and a half-dozen hard-boiled business men who almost faint when anybody offers the same match to a third person.

ONE of the real old-fashioned omens is that it is bad luck not to see a new moon first over the left shoulder. At least, it was the left shoulder in my home town, although there are some localities where the right shoulder gets the call. So whenever it is time for a new moon I begin taking furtive peeks at the skies, so I can get my first eyeful over the left shoulder.

There was a time when the old saying, "Sing before breakfast, cry before supper" had me on its list. But that was back in the days when I was quite care-free, and the urge to sing before breakfast was

Keeps Hair Neat—

Rich-looking and Orderly

IF your hair lacks natural gloss and lustre, or is difficult to keep in place it is very easy to give it that rich, glossy, refined and orderly appearance so essential to well-groomed men.

Just rub a little Glostora through your hair once or twice a week—or after shampooing, and your hair will then stay, each day, just as you comb it.

Glostora softens the hair and makes it pliable. Then, even stubborn hair will stay in place of its own accord.

It gives your hair that natural, rich, well-groomed effect, instead of leaving it stiff and artificial looking as pastes and creams do.

Glostora also keeps the scalp soft, and the hair healthy by restoring the natural oils from which the hair derives its health, life, gloss and lustre.

Try it! See how easy it is to keep your hair combed any style you like, whether brushed lightly or combed down flat.

If you want your hair to lie down particularly smooth and tight, after applying Glostora, simply moisten your hair with water before brushing it.

A large bottle of Glostora costs but a trifle at any drug store.

acute. Now, with the responsibilities of life heavy upon my head, neck, and shoulders, my pre-cereal-and-coffee vocalizing impulses seem to have been badly blunted. And my voice being what it is, I think that if I sang before breakfast, or after it for that matter, I'd deserve bad luck, and certainly get it.

And I'm among the poor weaklings who knock wood after a boast of a good run of luck. You know the kind:

"Had any trouble with the flivver lately?" a friend asks me.

"No," I reply; "she's running great;" and then I proceed to knock wood with my knuckles to ward off the pink-whiskered hoodoo that is supposed to be hanging around waiting to swoop down with miscellaneous tire and carburetor troubles whenever you boast immunity from the same.

Recently I made a boast about something in an office in down-town New York, and was thrown into a panic by the discovery I was in one of the modern all-steel skyscrapers. Even the office furniture was metal.

Just when it seemed the old jinx had grabbed his war club and had drawn back for a full, free swing at me, I noticed an umbrella with a wooden handle on it, and knocked on that. It seemed to suffice. Anyway, it gave me immeasurable relief.

I STRING along with the omens about Friday and the number thirteen, too. I wouldn't begin a new venture, move to a new house, or begin a vacation on Friday if I could avoid it. I don't think that it would portend disaster if I did; but I just feel that there is no point in defying a good old-fashioned omen. I have begun many adventures on Monday, Tuesday, and Wednesday that turned out unfortunately; I have moved to a new house on Thursday, and met bad luck there, and I have begun vacations on Saturday that were a bust from start to finish; but I didn't feel the same way about them as I would have if the day had been Friday. That's the superstitious man all over.

Three years ago I sailed from Naples for the United States on Friday the 13th. I was so eager to get home that I didn't realize the day and date until the day of the sailing. It was too late to make any change, and I was filled to capacity with misgivings as I boarded the ship. Although under any other circumstances I should have regarded the ship as one of the ablest I had ever seen—it was one of the newest and largest liners in the service—I remember feeling a conviction that it was most inadequate. I walked around the ship as soon as I got aboard and gave it a critical inspection; but the more I looked the more I felt it was no ship for a Friday-the-13th trip.

To add to my uneasiness, a storm blew up just as the ship weighed anchor, and we were in a howling gale all the first night. "Friday the 13th" I kept thinking. "Any time you think you can beat that superstition, you're goofy."

The next day the storm ceased; but we ran into a fog, and the siren kept whining at three-minute intervals. There are few sounds quite so depressing as a ship's fog siren. Now and then another fog horn close by would answer. It was most ominous. I rehearsed getting into the

Digitized by Google
Original from STATE UNIVERSITY SYSTEM OF FLORIDA

e-preserver, and became resigned to a ash at sea.

To my great surprise nothing struck s, and after that we had a calm, uneventl trip. But I was never more relieved an when that ship finally docked at ew York and I had both feet ashore.

"Didn't that prove to your satisfaction at this Friday-the-13th omen is the unk?" you ask.

Not at all. Even an omen has spells hen it isn't up to its best form.

Moving men count Friday as one of eir dull days, and the clerks in marriage cense bureaus say business with them is ractically at a standstill on that day. or years I was bothered by the fact I roposed to my wife on Friday; but we em to have lived that one down.

A friend of mine who scoffs at omens ut who, I know, prepares for a day of reat luck in the hardware business whenver he puts his underwear on wrong side ut) belittles this Friday omen, and takes elight in pointing out to me that Friday as always been the luckiest day in Ameran history. Here's his data:

On Friday, October 12th, 1492, Columus discovered the Western Hemisphere.

On Friday, September 11th, 1609, the Half Moon" entered New York Bay.

On Friday, February 22d, 1732, George Vashington was born.

On Friday, June 16th, 1775, Bunker Iill was seized and fortified.

On Friday, October 17th, 1777, Buroyne surrendered at Saratoga.

On Friday, October 19th, 1781, Lord Cornwallis surrendered at Yorktown.

"What have you got to say after hat?" my friend demands.

I have nothing to say. But I continue o avoid any new ventures on Friday. After all, I'm no Christopher Columbus, Pilgrim Father, George Washington, or Bunker Hill.

I STRING along, too, with the omen about it being bad luck to break a mirror. Nobody handles a mirror more carefully than I do if called upon to transport t from one dresser to another; and every ime the wife buys a new wall mirror and isks me to hang it for her, I am a nervous vreck until I have it safely in place.

I believe that no good luck comes f rocking a chair in which nobody is itting; that thirteen people at a dinner ive no occasion for cheering, and that or two people to look into the same nirror at the same time is a sufficient ause for both of them to feel fidgety and watch their steps.

There was a time when I believed it ad luck to pass another person on the tairs, but I had to let this one go after I ame to New York and began running in and out of subways.

To this day the omen that it means a quarrel if the salt is upset at the dinner table is in good standing in my home. My wife and I don't really believe, of course, that we have to depend on this for our quarrels; we have lots of our very best battles with no help from the salt. Still, we feel that when the salt is upset when all is peaceful, it would seem like inviting trouble if one of us didn't nail the omen by picking up a pinch of salt and tossing it over the left shoulder.

The one about the falling silverware has a home with us, too. If a knife drops

to the floor a gentleman will call; if a fork falls a lady will visit us. Whenever I drop a knife and fork the same evening I get out the cards in anticipation of a bridge party.

I haven't disowned the good old prehistoric omen that if my right ear burns somebody is talking about me in a friendly way, and that if my left ear itches somebody is giving me a severe roasting; but I don't pay as much attention to these ear auguries as I once did.

Howling dogs at night make me especially miserable. Years ago this omen, that a howling dog means bad luck, reached me in some way and I have never been able to shake it off. The best I can do when I hear a howling dog at night is to drown it out by leaping to the radio and tuning into a male quartet.

A FEW years ago, during rehearsals and try-outs of a play on which I collaborated, I had a chance to discover that, as superstitious as I was, I was a mere amateur omen fancier compared with the average theatrical man or woman. Practically everything that happens in the show business before the opening of a new play is put down as for the best or worst. I was nearly lynched for whistling in a dressing-room in Wilmington, Delaware. I was talking with a comedian before the first-night performance there, and during a lull I turned to a window and began whistling softly.

He let out a war whoop, jumped up, clapped his hand over my mouth and pushed me into a chair. There was a look of horror in his eyes.

"Don't do that!" he cried. "Never whistle in a dressing-room!"

"Why not?" I asked.

"It means two-weeks notice!" he said dejectedly.

He told someone else about my whistling, and it spread among the other members of the company. They regarded me with supreme disfavor from that time on. Of course there was nothing to the omen that it would last only two weeks. I kept track of it. It lasted three weeks and four days!

Many of the biggest men and women in the profession are extremely superstitious, and this applies also to the hard-headed producers. It is an old and respected omen of the theatre that no member of a cast should speak the very last, or "tag," line of a show during rehearsals. To do so kills any chance of the play's success, the players are certain. Most performers believe it a hoodoo to applaud a song or piece of business during rehearsal. Knowing nothing of this, I was nearly tossed out of a Shubert theatre some years ago for clapping at the conclusion of a musical number that made a big hit with me. I was present as a newspaper reporter, and as a very unpopular one after this incident.

The superstitions of prize-ring fighters are many. Nearly all professional pugilists believe that a certain bathrobe, pair of trunks, belt, or cap brings good luck. Even such a cave-man as Luis Firpo had a gaudy bathrobe without which he would never enter a ring. One of the most amusing mascots of recent years in the prize ring was a little round hat that Kid Norfolk, a well-known colored pugilist, always wore in the ring

Martha Washington College For young women. Accredited Junior College. Music, Art, Domestic Science, Physical Education, Secretarial. 74th year. Catalog. C. D. CURTIS, Pres., Box A, Abingdon, Va.

TELEGRAPHY
(Morse and Wireless) and RAILWAY ACCOUNTING taught thoroughly. Big salaries; great opportunities. Oldest, largest school. Endorsed by Telegraph, Railway, Radio and Government officials. Expenses low—opportunities to earn large portion. Catalog free.
DODGE'S INSTITUTE Noma Street, Valparaiso, Ind.

up to the minute the bell for the opening round clanged.

Many horsemen are more or less superstitious, I have found, and I have yet to see a racing stable without a mascot of some kind, from a pig to a wildcat. A few years ago a well-known trainer saw a kangaroo in a Fourteenth Street animal shop window, and promptly bought it, to bring a change of luck in his racing affairs. He had it carted to the race track and put into a stall near his horses. He began winning races within a few days, and attributed it to the kangaroo.

Whenever anybody tells me I am too superstitious I think of men who go in for kangaroos and wildcats, and then I know there is a limit. Wildcats are absolutely out. And I wouldn't take on a kangaroo. Unless, of course, it was an exceptional kangaroo, and could show proof of jinxes subdued or exterminated.

ONE of the things that comforts me when my superstitions crowd me is the realization that I have so much company. I've yet to meet a man who would deny under cross-examination he had a few superstitions tucked away among his inhibitions. It is a well-known fact that many of our supposedly hardest-boiled industrial leaders have them. The president of one of the biggest business organizations in the country, a man who is supposed to be guided in every act by nothing but the hard facts and the cold figures, is said to be spurred to bold decisions in momentous questions by the presence of pigeons on the ledge of his office window in lower Broadway. If the birds are there in numbers he accepts it as auguring well. If they shun the sill, he takes it as a tip to be most cautious. It is said, however, that he is not above carrying cracked corn to his office and sprinkling it on the window sill as a special lure to the birds and to his luck.

It is said a famous banker who wears a massive watch charm that passed out of style with the cowhide boot and the flannel undershirt does so in the firm belief it is his "lucky piece."

Some of our Presidents have had their superstitions and made no great secret of them. Kings have been notoriously superstitious. Julius Cæsar and Napoleon Bonaparte were omen enthusiasts. I know a college president who runs a fever at the thought of thirteen at dinner. My caddy is superstitious. All my golfing companions have implicit faith in certain lucky clubs. Even my cold-hearted, matter-of-fact landlord believes in signs; he dropped in the other day as I was undoing a new shirt, and nearly got apoplexy picking up the pins!

President Coolidge wets his bait before he casts for pickerel.

So, why should I feel ashamed to be credulous?

P. S. If the Editor of THE AMERICAN MAGAZINE has any doubt of my sincerity he can test it by paying me off for this particular article in $2 bills. Two-dollar bills are among my pet aversions. He will get them all back by special delivery. Well, maybe he won't get them all back, but he will get half of them back, anyway, because, come to think of it, there is an old saying that it is bad luck to return intact a specific sum of money.

Let This Amazing Invention Keep You In Keen Razor Blades For Life!

Sensational New Invention Guarantees You 365 Slick Shaves a Year—No More Blades to Buy!

KRISS-KROSS marks such a radical advance in new shaving comfort and economy that it deserves to be called much more than a stropper. Rather it is a super-stropper—a blade *rejuvenator!* Almost literally, it makes a new blade out of an old one every day and makes hundreds of keen, quick shaves blossom where only one grew before!

Kriss-Kross strops your blade (any make) on the diagonal just like a master barber. Eight "lucky leather" grooves do the trick in 11 seconds. Automatic flip-flop action. Pressure decreases automatically every stroke. Nickel jig flies up to notify you when your blade is ready with the *keenest cutting edge that steel can take!*

Unusual Offer

Right now—to introduce KRISS-KROSS stropper, I will give you a surprising new kind of razor FREE! Really 3 razors in one. Instantly adjustable to any shaving position. Gives a *sliding* instead of *pulling* stroke. Simply *zips* through the toughest crop of whiskers. Comes with 5 special-process blades and is entirely unlike anything you ever saw before.

Write for Details at Once!

This astonishing offer is limited. Send the coupon for information on amazing KRISS-KROSS inventions today. They are sold only through authorized representatives—(or direct from the factory)—and are even more remarkable than I can tell you here. Clip the coupon today for full details. No obligation.

AGENTS Amazing Profits

Men everywhere are earning big incomes as KRISS-KROSS representatives. KRISS-KROSS is such an amazing self-seller that Tillotson made $114 in one day *on his vacation!* Vanderhof made $56 in one day. Emil Ham cleared $200 first 4 days. Even spare-time men make $10-$20 a day *extra* just showing KRISS-KROSS to friends and fellow-workers. Benson made over $50 in 3 evenings—Bradford made $40 on a Saturday afternoon. Gift razor boosts profits amazingly. Get details of our unique sales plan with generous commissions and bonuses. Simply check and mail coupon. No obligation. Do it now!

Scattergood Stirs Up More Than Rubbish

(*Continued from page 49*)

man jerked his head around suddenly.

"Elsie!" he exclaimed.

"Nobuddy else," said Scattergood. "Her and me, we been talkin' you over some. But mebbe you hain't int'rested in that."

"You've been talkin' to Elsie about me! How'd you know—"

"How long's it take a kitten to git its eyes open?" Scattergood asked. "W-al, I come with mine starin' wide. She calc'lates you got idees. Looks like you been talkin' big to that girl."

"Did she say that?"

"Uh-uh. Near's I could gather, she calc'lated you didn't do yourself justice. Um. . . . If this store busts up, what you figger to do?"

"Git me a job."

"On jest a job, it 'ud be quite a spell 'fore a feller could save up enough to git married on. But if a feller was to have, say, a partnership in with his grampa in a payin' store—"

Wade turned slowly and looked into Scattergood's eyes; then his gray eyes lightened and his straight lips twitched. "I calc'late you gen'ally git what you aim to git," he said. "You talk mighty convincin'."

"Calc'late to git my way as frequent as I kin. So you're willin' I should go ahead?"

"Go as fur's the tether'll let ye!" said Wade.

SCATTERGOOD did exactly that; but even Wade could not quite understand all the old man's maneuvers. That he should put plate-glass windows in the store was comprehensible, and that the stock should be sorted out and replenished, and a set of books bought and started. But just why the old hardware man was so interested in moving out the rubbish on the third floor and storing it in a vacant store building across the bridge, he could not see. Nor did he know at all how Scattergood and Mandy, his wife, labored at odd times over that stock, sorting it, arranging it on the two floors of the building, and making it ready, as if the place were to be opened as a new enterprise.

Wade did understand that Scattergood was finding money somewhere for the improvements and the new stock, but he asked no questions; nor was he present at the meeting of the Finance Committee of the bank when Scattergood, in effect, guaranteed Grampa Lumley's loans, and arranged for indefinite extension.

"Now, we got a set of books," said the old man to Wade, "seems as though we ought to have 'em kept. Kin you write up a set of books?"

"No."

"I got somebuddy in mind. Studied it in one of them business schools. Kind of dependable person, and can be got reasonable."

"I dunno what Grampa'll say."

"I kin imagine," Scattergood said.

"Who you speakin' about?"

"Young woman by the name of Elsie Fitch."

"Gosh!" said Wade.

"And," said Scattergood, "if you'n her was to marry, she couldn't quit to git a better job!"

So it was that the new store opened for business before Grampa Lumley's rheumatism set him at liberty. It was not merely an opening; it was a revolution. Nothing was the same from roof to cellar, but the greatest change of all was in the atmosphere of the place and the attitude it bore toward its patrons. There was a snap to it, an up-to-dateness, a desire to serve and to please. Even young Wade was a changed man. No longer was he careless of his dress, a thing which was due, no doubt, in part to the presence of Elsie Fitch, who occupied the cashier's and bookkeeper's desk, and was by no means a blight upon the scenery herself.

IT HAD not been a simple task to keep news of the revolution from Grampa Lumley, but Scattergood had managed it. He did it characteristically, by taking all and sundry into his confidence, and by making the village a party to the secret. Somehow, he succeeded in imposing upon everyone a feeling of responsibility for keep'ng Grampa in the dark. Which, besides being good psychology, was good advertising for the new store.

Even Wade was astonished at the volume of the first week's business.

"If 'twan't for the load of debts," he said to Scattergood, "we'd be ridin' high. If this here kin keep up we got a business wuth hangin' onto like grim death."

"If I was you," said Scattergood, "I wouldn't start worryin' over them debts till you git where they're worryin' about you."

"But this all has cost a sight," said Wade.

"Then stir around and earn it back agin," Scattergood said.

"What I can't git through my head," Wade said, "is why you went to all the trouble of cartin' that rubbish to your old store."

"Jest fer exercise," said Scattergood. "Mandy's been feedin' me too good. I'm gittin' too close to the two-hundred-and-fifty mark. Um. . . . When's your grampa goin' to be fit to git out?"

"He allows he's comin' down Monday, or bust," Wade said; "and when he gits in that frame of mind, you want to stand out of the road, or you'll git trampled!"

"This is Thursday," Scattergood said. "I calc'late we kin be ready fer him."

In order to be thoroughly ready, he sent no less than four long telegrams that evening, two to Boston and two to New York. Then he waited.

Monday was one of those glowing June days when the peonies are their reddest, and the mountains are their greenest. Grampa Lumley groaned out of bed and muttered into his clothes and, a little later than was his custom, hobbled down the street toward the store. Halfway there he met Scattergood Baines, for Scattergood had been lying in wait.

"Mornin', Wade," he said. "Spryer'n I expected to see ye."

"I still got two kicks and a stagger left

Digitized by Google

e," the old man said valiantly. ns like I couldn't endure another pent up there to the house. Wade's d boy and all, but he's young. I feel to keep an eye on the business."

ls old heads is still perty useful," ergood said.

backbone of the country," Mr. Lum- aid with a waggle of his head. "Can't what we could forty year back; but we lost in muscle we made up in ience of things."

est so," said Scattergood. "And the' t a day goes by but what we garner me more of it!"

HEY turned the corner and were ace to face with the new store front. npa looked, almost came to a full stop, blinked. But he gave no other sign. a word of surprise, not an exclama- of dismay. No, sir; he was not one to naken from his balance by anything. ertheless, he rolled his eyes to shoot ilating sidewise glances at his friend, his jaw set—set with determination to v the world it could wring no cry of zement from him, no matter what pened.

is pace increased and he forgot the aining twinges of rheumatism as he v nearer the door. Through it he ched without a word.

Mornin', boy," he said to Wade, and ded to Elsie as if she had been sitting ier desk for the past fifty years. He n made pretense that he was not bor- with his sharp old eyes into every cor- and seeing every new object and ration.

le walked to the back of the store, le Scattergood stood gazing after him h twinkling, appreciative eyes, and g up his hat. Then he stepped behind counter, puffed out his cheeks, and s ready for business. But all this had come to an end. Something had to hap- . Young Wade trembled in his shoes. en the explosion came, where would it ke?

Grampa Lumley craned forward sud- ly over the counter and pointed to a cant spot.

"Where," he demanded of his grand- , "is that there box of prunes that's en settin' right there?"

"Oh, yes. That there box of prunes. hy, Grampa, they was wormy, and we rowed 'em out."

"Huh! . . . Throwed 'em out! Huh! ormy. . . . Good enough fer the boys steal, I calc'late!"

That was the explosion. It had come d gone. Young Wade recognized it for at it was, and breathed freely again. attergood suffered from a fit of coughing.

"Calc'late I'll go up-stairs," said Gram- . "I got a chore to do up there. You nd store till I git back."

"'Fore you go up," said Scattergood, I want you should do kind of a favor r me. Got time to walk over to my d store—the one that's been standin' acant?"

"Guess I kin manage it," said Grampa; though I'm kind of pressed this mornin'."

"You too, Wade," Scattergood said. Elsie kin tend to anybody that comes in er a minute."

"Kin she?" Grampa said, and shot an ppraising look at the girl. "Um. . . . eems as though."

3 Drafting Lessons Actually FREE!

to prove you can learn at home in spare time!

We have invented a new, simplified way to teach Drafting—the first real improvement in Drafting home-instruction in history. We want you to see it, try it—without one penny of cost or obligation. We want to show you how we get away from the *copying* methods used in the past. See how we make you *think*, solve problems, do actual drafting room jobs *from the first lesson!*

I will make this contract with you:

When you enroll for our home-training in Drafting, we agree to give you:
1. Complete Drafting training, by the new Practice-Method.
2. Professional Drafting Outfit, as illustrated.
3. *We will help you get a good Drafting position* at a substantial increase in pay.
4. Or we'll refund every cent of your money.

O C Miller
Director Extension Work

The American School, a million-dollar Educational Institution, now offers men a *double* service—training for a specific job, then finding the job. Small price, terms of only a few dollars a month. Definite benefits, both in position and salary, are specified in our agreement with you, under money-back penalty.

Coupon brings complete details of this sensational offer!

Draftsmen WANTED!

70,000 fine jobs advertised this year, many at $60 to $125 a week. Get ready to fill one. Get out of the rut. Make something of yourself. Plan *your future* in Drafting. Even if you have only common schooling, even if you know nothing of Drafting, you can learn Drafting quickly by our simplified methods.

A new, rapid, simplified way

This new "Job-Method" gives you actual drafting-room jobs in a new one-step-at-a-time way. With *pictures* which you can understand almost without reading the "lessons." And that is why many American School-trained Draftsmen can qualify for a good job at big pay when they graduate.

5 HIGHWAYS TO SUCCESS!

The big money in Drafting goes to men who specialize in Machine Design, or Electrical Drafting, or Architectural Drafting, or Structural, or Automotive. It isn't enough merely to know *general* Drafting practice. You must know how to calculate and design and plan original work. You need many Engineering subjects to fill the kind of a Drafting position that pays $60 to $125 a week. The American School *now includes this specialized training in its Drafting course.*

COUPON
Brings 3 Lessons Free

Get them. Test your own ability to learn Drafting and get ready for a fine job and big pay. Coupon also brings surprise offer, and complete information about your opportunities for success in Drafting. *MAIL IT TODAY!*

Job Service *Free to Students and Graduates:*

THE AMERICAN SCHOOL now offers its students and graduates, without cost, the services of an efficient Employment Department which keeps in touch with the employers of Draftsmen all over the United States. *We have placed hundreds of men in good Drafting positions.* We have made this training so complete, so practical, so easy to master, that our students *have no difficulty to make good.* And, so, because the demand for real Draftsmen continues to exceed the supply and because this training actually prepares men for good Drafting positions, *we back it with a Free Employment Service, free to employers, students, graduates.*

Professional Outfit Given

Fine, imported instruments help you learn Drafting easily and quickly. These standard quality, full size instruments, including board, table triangles, T-square, ink, protractor, etc. given without extra charge to students

Pathé News

World events before your eyes!

Be on the spot when great events happen! Pathe News makes it possible, for there is a theatre near you where this pioneer newsreel is showing history just as it happens. Pathe News cameramen are everywhere, ready to catch for you every breath-taking detail of the things that count. Through the lens of their cameras your own eyes see what they saw. In a moment you have bridged oceans, annihilated space!

Typical of Pathe News achievement in speed and thoroughness was its covering, from start to finish, of Lindbergh's epic flight.

Pathe News put before your eyes the complete, authentic picture of this two-continent event as fast as it could be recorded.

All this is possible because of Pathe Organization—a vast, world-wide, highly-trained corps of experts—up-to-the-minute equipment — great film printing laboratories — split-second service—and sixteen years of pioneering experience.

Pathe News cannot be equalled because Pathe Organization cannot be duplicated.

Ask for Pathe News at your favorite theatre—watch for the Rooster!

"Sees all—knows all"

They walked the few steps to the other store, and entered. On the first floor, on tables, was arranged a marvelous conglomeration from the old third floor; remnants, tinware, bolts of cloth, hats, shoes, china—the loot of a thousand attics. Grampa stared sharply, but gave no sign. Scattergood led the way to the upper story, where, nosing about among chairs and tables and clocks and china and crockery and glassware were four strange gentlemen.

"Some folks I want you should meet, Wade," said Scattergood. He introduced the strangers: "Mr. Toms, and Scanberg, and DeVinne, and Walker."

"Howdy," said Grampa. "Hope you find yourselves in good health."

"In extraordinary good health," said Mr. Toms.

"Except the natural shock," said Mr. Scanberg.

"At my age," said Mr. DeVinne, "astonishment isn't so good."

Mr. Walker only shook his head, as one does who has experienced something unbelievable.

"DUNNO'S I foller you," said Grampa. "What kin I do fer you gentlemen?"

"First," said Mr. Toms, "you can tell us about it. Where has it been hidden that we never heard of it? I thought one of the four of us had everything important in the country spotted."

"I'd have taken my oath to it," said Mr. DeVinne.

"But, what I can't understand," said Mr. Walker, "is where Mullins is?"

Scattergood cleared his throat. "Mr. Mullins come up here a week ago," he said. "I kind of figgered we'd need some advice, so I paid him to make us an appraisal."

The four looked at Scattergood, and frowned.

"So," said Scattergood, "everythin' mebbe hain't so rosy as you fellers figgered."

"Say," said Grampa, staring, "what's this, anyhow?"

"You might," said Scattergood, "call it Salvation. It's dum close to it. Recognize any of this stuff, Wade?"

"To be sure. Seen most of it one time or another while I was pokin' around. Ought to of. Been over my head since I was knee-high to a grasshopper."

"Run a store, don't ye?" asked Scattergood.

"Calc'late to."

"Gen'al idee is to sell things out of it?"

"Allus figgered so."

"No objection to sellin' this stuff?"

"No objection to sellin' anythin'—if I kin git my money out of it."

"Money's been in some of this quite a spell," said Scattergood.

"Longer'n that," said Grampa. "But somehow I hain't never jest found the right day to git it out."

"W-al, this here's the right day," Scattergood said. "These fellers is customers, and they got a notion of buyin'."

"Buyin' this here?"

"To be sure."

"Go ahead then and pick out what you want. But what in tunket you want it fer's more'n I kin see."

Scattergood turned to the strangers. "Would you ruther set a price on the hull lot, or buy in piece by piece?"

"As for me," said Mr. Toms, "I want it all!"

"Me, too," chorused the others.

"I don't mind saying," added Mr. DeVinne, "that whoever gets those desks and that highboy and the Bennington away from me will have to travel some."

"Fair way," said Scattergood, "is for each of you to write down what he bids on a piece of paper, and then we'll open 'em up and see from there."

The gentlemen sought separate spots and nibbled on lead pencils while their eyes moved about the room in calculation. Grampa Lumley picked at Scattergood's elbow.

"What's goin' on, anyhow," he whispered. "What you expect to git out of this junk?"

"Whatever we git is that much ahead," said Scattergood.

"I hain't a-goin' to sacrifice. Agin my principles. No, sir, not for nobody. Them fellers needn't to think they kin buy all this here stock, even if it is old, fer nothin'."

"They don't think it," Scattergood said.

"I won't take a cent less'n two-three hundred dollars."

"Don't blame ye," said Scattergood.

The four gentlemen, having set down their bids and folded their slips, handed them to Scattergood. The old hardware merchant opened them and then handed them to Grampa, who looked at the first, then bent forward to look again.

"Calc'late suthin's on my specs," he said. "I can't seem to make this out. Don't make no sense."

"What's it say?" asked Scattergood.

"I dunno; but it looks like it says eleven thousand dollars."

"Um. . . . Mebbe you can read this one better."

Grampa peered at the next and shook his head. "That writin' looks like fourteen thousand, but—"

"And this one," Scattergood said.

"Eyes have most certain gone wrong. Calc'late the rheumatiz got into 'em. Twelve thousand five hundred, it looks like."

"Here's another."

"You read it out. No use my tryin'."

"Thirteen thousand seven hundred and fifty."

"It reads that to you?"

"Them's the figgers."

"Um!" Grampa was shaken but not staggering. He cleared his throat and elevated his chin. The world would not live to see him exhibit the weakness of amazement.

"'TAIN'T quite as much as I expected," he said. "Them's good articles, the furniture in special. Well made and all. No, them prices hain't satisfactory. If that's the best you gentlemen got to say, why, I got to be goin' back to the store."

Scattergood concealed a grin of delight. He did not look at young Wade, who was tottering on the brink of collapse, big eyes, and mouth dropped open.

"Jest what I think," he said to Grampa. "These gentlemen got kind of conservative. Want to think it over some more, or be you through biddin'?"

"Mullins appraised this?" asked Mr. DeVinne.

"He done so."

"Would you mind telling us what figure he set?"

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

He put a price on each piece. For ance, that there hunk of furniture, he down at fifteen hundred dollars, and n razor-back chairs, he called 'em—"

"Not razor-back," corrected Mr. Toms.

"Well, some kind of a back. Don't ter what. Said they was wuth up- d of two hundred apiece, and the's a en of 'em. And so on. Them brown gs and Bible bottles and what not, : he says was made in Bennington; he s the lot's wuth—"

"You needn't go on. You're posted, ight."

"Calc'lated to be," said Scattergood.

"Gentlemen," said Mr. DeVinne to his ipanions, "let's not make a massacre his. We all know this is something un- al, and not to be found again. Not one is is going away from here without a re in this, if we can manage it."

"You know it," said Mr. Toms.

"Then I propose we talk it over, but in tnership, and handle the lot as a syn- ate. We can send the whole to the tion-rooms and take a joint profit. at say?"

"Where can we talk?"

"Give ye the hull end of the store," d Scattergood.

The antique dealers withdrew and con- sed in whispers for twenty minutes. en they returned.

"MR. BAINES," said Mr. DeVinne, "we know pretty well what this l fetch in the auction galleries. It will d attention, crating, repairs, advertis- . And we're entitled to a profit."

"To be sure."

"So here's our offer. I tell you fair you l get more if you arrange for a New rk sale yourself; but it's out of your e."

"I know that perty well."

"So we think a fair offer is twenty-five usand flat. That's the best we can do."

"Gentlemen," said Scattergood, "per- lin' Mr. Lumley agrees, I calc'late you ught you a pig."

Grampa nodded. "The figger I had in nd," he said, "was that. Cash."

Again Scattergood concealed a grin. Cash," he said.

"Done," said Mr. DeVinne. "And I n't mind saying I thought the age of iracles was over. Since everybody in e country has taken to wanting houses rnished with antiques, and paying any nd of price to get 'em, we've been rough New England with a fine-toothed mb. Never did I expect to run onto an ntouched collection like this again. I ould say it was a good day's work for erybody."

"Fair," said Grampa Lumley, "fair to iddlin'!"

"Kind of set you on your feet," said cattergood. "And when we clean up the uff down-stairs in a week's rummage ile, we'll git enough to pay for most of e alterations out of it. Folks likes to uy at sales."

"What alterations was you speakin' bout?" he asked.

"Jest some little changes in the store ou hain't had time to notice yit," said cattergood.

Grampa breathed deeply once. "Jest e same," he said, "by dad, I'm a-goin' miss that box of prunes!"

A photograph of a Tarrytown, New York, home painted with 40-40-20.

40-40-20

"The Whitest Paint in 80 Years"

THE climate of the Hudson River valley is hard on paint. Severe winters and changeable summers test the durability of paint to the utmost.

For more than eighty years good paints have been selected to preserve the home shown above. Three years ago *40-40-20 paint* was used. Today the owner says *"Never before has our house been so white"*.

40-40-20 paint has all the characteristics of good paint—superior color—lasting brightness—long life—reasonable cost. The New Jersey Zinc Company does not make *40-40-20 paint*. It is made by more than 130 paint manufacturers.

40-40-20 paint is prepared in ready mixed form in beautiful tints as well as in white, or in paste form for the professional painter's use. It costs no more than other quality paints.

Send for our free booklet and read the interesting story of 40-40-20 paint.

New Jersey Zinc

Genuine 40-40-20 is made from the New Jersey Zinc Company's specified products according to its specially developed formula, and the manufacturers are authorized to use its registered trade-mark on their labels for paint so made.

Free Book for Dog Owners

EVERYONE who has a dog should read this famous book written by Dr. H. Clay Glover. Tells how to feed and care for dogs. Explains dog diseases, their symptoms and remedies. A handy reference book that will be mailed free if you write to: H. Clay Glover Co., Inc., Dept. A, 119 Fifth Avenue, New York, N. Y.

Teach Your Child How to Care for Dogs

IN one sense, all children care deeply for dogs. But most children, and grownups too, know little of the intelligent, vital care necessary to prevent and to remedy dogs' many ailments. Yet at your drug store or pet shop you can get Glover's Imperial Dog Medicines—used and endorsed by leading dog fanciers and kennel men for dogs of all breeds. These medicines are known the world over for their efficacy and tested safety.

The Care Most Essential

Practically all dogs at all ages, unknown to their masters, are infested with stomach worms. To eliminate them and keep a dog free from their dangerous effects give him Glover's Worm Capsules or the liquid, Glover's Vermifuge. Puppies should get this medical care monthly and older dogs regularly four times a year.

GLOVER'S
IMPERIAL
DOG MEDICINES

Here are a few of Glover's Medicines which dog authorities advise keeping on hand. Ask for them at your drug stores, or pet shop. And do not accept substitutes—when a dog needs medicine he needs the best.

Glover's Worm Capsules	65c
Glover's Vermifuge	65c
Glover's Distemper Medicine	$1.25
Glover's Mange Medicine	65c
Glover's Condition Pills	65c
Glover's Digestive Pills	65c
Glover's Laxative Pills	65c
Glover's Fit Medicine	65c

for fleas

Dogs and their owners alike will welcome this new improved flea soap. It not only does away with fleas, but keeps the dog's coat and skin in the finest condition. 25 cents a cake.

GLOVER'S KENNEL & FLEA SOAP

I Have Made a Million Dollars But I Haven't Got a Cent

(*Continued from page 13*)

until midnight. I wanted to make a big thing of my advertising work. Advertising held a great fascination for me then. It holds a greater fascination for me to-day.

The story as I have told it thus far covers a period of ten years.

I felt I had reached the peak of my earning power in Philadelphia, so I came to New York and got a job as advertising manager on the New York "Press." This paid me a very much larger salary, and a commission on all business done in excess of a certain figure. I established a home in Brooklyn.

With this larger salary, I should of course have kept a little money ahead, but I didn't.

Numerous opportunities came my way through my business friends to make investments. I recall in particular one opportunity. I was told to buy stock at eight dollars a share in a public utility, which advanced to one hundred and nine dollars a share in a few months.

Suppose I had kept that fifteen hundred dollars I got at one time in Bridgeton, New Jersey, instead of spending it like water, and suppose I had had in addition another one hundred dollars. I could have bought two hundred shares of this stock and made a profit of twenty thousand two hundred dollars. This is only one sample of the many opportunities I have had to pass up in my lifetime because of not having any money put by.

IN FEBRUARY, 1896, a big opportunity came to me to make and save money, without denying any comforts to my family or any serious checking of my desire to entertain friends in our home.

I was offered, and accepted, the advertising management of the New York "Journal," which had recently been purchased by William Randolph Hearst. I remained with Mr. Hearst for over twelve years, resigning to go into another business, which proved a failure and plunged me pretty deeply into debt.

Mr. Hearst paid me a fortune during this period. I was receiving more money than any other newspaper advertising manager in New York (or, as far as I knew, anywhere else). Larger salaries are the vogue to-day, however, for advertising is recognized as a greater necessity than it was then, and there is a great deal more of it.

Mr. Hearst knew of my penchant to spend money. He was very sympathetic, generous, considerate, and appreciative. He let me borrow a lot of money from the office, which finally amounted to a great many thousands of dollars. He never registered a protest because I did not pay any of it back.

Soon after going to work for the "Journal," the third child in our family was born—a second daughter. A few months later she was stricken with pneumonia, which left her in a weakened condition. The doctor advised me to send her South, which I did—her mother, brother, and sister going with her.

My employer learned that I was under pretty heavy expense at this time. Thereupon he sent me a substantial check, which was ostensibly given to me as an appreciation for getting an advertiser in the paper whose business he wanted very much.

Two years later the family moved to Montclair, New Jersey, again upon the doctor's advice, who said my daughter would thrive better in the country. My employer learned about this too. Along came another fat check, which he explained was a small reward for getting another contract which pleased him.

After having been on this important job for several years I obtained a contract from the John Wanamaker store which amounted to $157,600. I did not think it was an unusual accomplishment, but Mr. Hearst did, and he rewarded me in quite a wonderful way.

He authorized the cancellation of my total indebtedness to the paper (mind you, amounting to many thousands of dollars), and in addition I was given a check for one thousand dollars.

THAT was the time I should have put a brake on my spending—make up my mind to get out of debt, and to save at least ten per cent of my earnings. At that time I owed very little more money outside of the indebtedness I have just mentioned.

Heaven knows, I was making a large enough salary to pay my debts and save as little as ten per cent of it. My family and friends would not have been denied anything. The slight cut-down in expenses would not have been noticed. But I simply couldn't learn to save.

At Montclair, I continued to live beyond my income. I spent money like the proverbial drunken sailor. I was prosperous. I was full of good nature and good health. Nothing was too good for my family or my friends. Our home was open house.

In speaking of this period of my life to a woman friend of the family, whose husband in his lifetime was as foolish about spending money as I was, she made this comment:

"You were in your flaring forties then—the most dangerous period in a man's life. The period of flaming youth is nothing in comparison to it. A man in his forties, unless he puts a strong grip on himself, is apt to do the most foolish things of his career. In your case, you gave full rein to your extravagant tendencies."

"Flaring forties" was a new phrase to me, but it fitted my case exactly. The worst blunders of my life were made between forty and fifty.

Let me recite some of the absurd things I did:

From the time I was a boy on the farm I had always liked horses. My wife had always driven a horse as a young girl. In fact, while I was courting her she always met me at the station with a fine bay horse, and buggy just large enough for

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

). I wanted her to have a fine horse and nout. I also wanted my daughters to e a pony and cart, and I wanted my to have a riding horse. Then I ught I needed a team to take me und with the family, driving them to a sed coupé or an open trap. I got them Instead of one horse and a carry-all, perhaps a team, which would have been ficient for our needs and something we ld have afforded, I had to have a ble, with all that goes with it. This fit cost me nearly one fourth of my ual income.

Then I took up golf. This was in my ty-first year. I went at my play the ne as I went at my work—put my ole heart in it. I learned to play pretty ll. My son and elder daughter played h me, and they learned to play well too.

WAS necessary that my younger laughter should spend the winter in the ith and summers in the Adirondacks; instead of her mother going with her ne, I felt it would be fine if the son and er daughter went along with them. is arrangement was carried out. They nt to Pinehurst, North Carolina, every ter and to expensive resorts in the irondacks or in New Hampshire in the nmer.

All this took a great deal of money. y son and elder daughter were keen out golf and spent a lot of money on it. also disbursed quite a little on golf rses around New York. Between the ee of us we won 180 prizes, most of ich are now in storage. I sat down one y and calculated what these prizes had t me. I discovered that each trophy d cost me $250, or a total of $45,000, er a period of fifteen years, an average $3,000 a year. Ridiculous, wasn't it?

I entertained lavishly at my home. ontclair folks thought I was a million-e. I frequently invited groups of siness men to have a day of golf at the b, and then to have dinner with me in e evening. They would have been isfied with a plain home dinner, but, , I must serve them an elaborate affair ged by a famous caterer. These dinners ver cost less than ten dollars a plate, hich did not include the money spent for usic while they were dining. I had a gro quartet come to the house. Our ing-room comfortably seated twenty ople, and it was filled to capacity many nes.

It was all very lovely, and I was glad be their host. In fact, I was very ppy over it. I never stopped to think w rapidly I was piling up debts. The y came when they began to bother me a . I had entertained so many guests at e golf club one month, paying for ncheons, cigars, and greens fees, that y bill was four hundred and fifty llars. This attracted the attention of e directors of the club, who were all od friends of mine and very much terested in my welfare. They made it eir business to tell me that I was spend-g entirely too much money, and they shed for my sake that I could check my penses.

This gave me a bit of a jolt. It made e think seriously long enough to get rid my horses and traps—at a big sacrifice course. I gave up our home and moved ck to the city; but I did not leave any

Sound Sleep

—*its importance to* your *success*

Now over a million men enjoy instant, all-night sleep that brings energetic, wide-awake days . . . by using the new Swiss food-drink

We offer you a 3-day test

Ambition. Mental alertness. The power of concentration. The energy to accomplish big things. All these qualities, which are in the make-up of every successful man, are largely the reward of sound, *restoring* sleep.

This is the consensus of opinion of famous specialists who have been studying the contributing factors of success.

And now modern science has found a natural way (a way without drugs) to *instant*, restful sleep that restores your tired mind and body.

Morning finds you a new man. Fresh, clear-eyed, buoyant. You have the energy to carry you right through the day and into the evening. *That is the experience of most Ovaltine users.*

A 3-day test will show you. We urge you to make this test. It is well worth while.

Why Ovaltine brings restoring sleep

First—It digests very quickly. Even in cases of impaired digestion.

Second—It supplies your system with certain health-building essentials which are often missing from your daily fare. One cup of Ovaltine has actually more food value than 12 cups of beef extract.

Third—Ovaltine has the unusual power of digesting 4 to 5 times its own weight of other foods you eat. Hence digestion goes on speedily and efficiently. As a result frayed nerves are soothed because digestive unrest, the main cause of sleeplessness, is overcome.

This is why, when taken at night, a cup of hot Ovaltine brings sound, restoring sleep in a natural way. And as you sleep the quick assimilation of nourishment is also restoring to the entire body. Thus you gather new strength and energy for the next day.

Hospitals and Doctors recommend it

Ovaltine is a delightful, pure food-drink. It contains no drugs. It is the special food properties of Ovaltine—*and absolutely nothing else*—that bring its wonderful results and popularity. In use in Switzerland for 30 years. Now in universal use in England and her colonies. During the great war it was served as a standard ration to invalid soldiers.

A few years ago Ovaltine was introduced into this country. Today hundreds of hospitals use it. More than 20,000 doctors recommend it, not only for sleeplessness, but because of its special dietetic properties, they also recommend it for nerve-strain, malnutrition, backward children, and the aged.

A 3-day test

Just make a 3-day test of Ovaltine. Note the difference, not only in your sleep, but in your next day's energy. You tackle your work with greater vigor. You "carry through" for the whole day. You aren't too tired to go out for the evening. There's a new zest to your work; to all your daily activities. It's truly a "pick-up" drink—for any time of the day.

All druggists sell Ovaltine in 4 sizes for home use. Or they can mix it for you at the soda fountain. But to let you try it we will send a 3-day introductory package for 10c to cover cost of packing and mailing. Just send in coupon with 10 cents.

OVALTINE

© 1927 T. W. Co.

Builds Body, Brain and Nerves

I had not had real restful sleep in over five years. Since taking Ovaltine I sleep better and have more ambition to work. It makes sleep come naturally.

George Knox,
Burlington, Vt.

The first night I took Ovaltine I fell asleep quickly and slept better than for months past. Ovaltine is wonderfully soothing and it is also a very pleasant beverage.

A. L. Mulholland,
Albany, N. Y.

The Wander Company, Dept. A-2
37 S. Wabash Ave., Chicago, Ill.

I enclose 10c to cover cost of packing and mailing. Send me your 3-day test package of Ovaltine.

your dog

"The Last of Six"

Polk Miller Products Corp.
Dear Sirs:
Am writing to ask you to send your free book on the care of dogs. I have a white Collie dog, but as he is the only living one of six born last June, I am anxious to take the best care of him. One just died today. Trusting to hear from you."
(Name on request.)

All dogs should be wormed regularly. It may save their lives. Reasons are given on Page 15 in Polk Miller's Dog Book. Use Sergeant's Sure Shot Capsules.

Take Care of Your Dog

Yearly, thousands of valuable and beloved dogs suffer and die because their masters do not know how to take care of them. Yet it is easy to know how to care for your dog and treat his diseases. There are proven remedies for every dog ailment and it is a simple matter to find out when and how to use them.

Guard your dog against sickness with Sergeant's Condition Pills. Read carefully Page 20 in the Dog Book.

Famous Dog Book Free

Don't wait until your dog is ill. Write now for Polk Miller's Free Dog Book. In clear, non-technical language it explains proper methods of feeding and breeding. It tells the symptoms of dog diseases and gives full directions for the best treatment for each. A unique symptom chart makes it simple to tell what's the matter with your dog. This famous book, familiar to millions of dog owners, is revised yearly and kept strictly up to date. It has saved the lives of untold thousands of valuable animals.

Distemper kills many valuable dogs. Do you know the symptoms? Described on Page 21 of the Dog Book. Use Sergeant's Distemper Medicine.

Expert Advice, Free

If your dog develops a condition that puzzles you, do not hesitate to write us. Our skilled veterinarian and his staff will diagnose the case and answer personally. Full instructions for care and treatment will be sent you *without charge*.

Sergeant's Dog Medicines, standard for more than fifty years, are sold by dealers everywhere. If you cannot obtain them, write us direct. Address Polk Miller Products Corporation, 1566 W. Broad St., Richmond, Va.

Write for your free copy of Polk Miller's Dog Book.

unpaid bills in Montclair. I borrowed the money to pay them. It was always easy for me to get all the money I wanted, despite my well-known financial shortcomings.

HERE are two sidelights on my experience during my "flaring forties."

Besides spending money foolishly and perhaps recklessly, I loaned it with equal abandon. In cleaning out my desk at home before moving to the city I looked over a package of due bills, the total of which was over forty thousand dollars. That was money handed out to just anybody who came along. I tore them all up; but I realized that if I had that money in hand I wouldn't owe a dollar.

One of the prosperous business men I had entertained many times and who in turn had entertained me, said to me: "Billy, I've got to stop going on outings with you. You spend entirely too much money for me. I can't keep up with you."

Think of that coming from a man who was making more money than I was! It should have struck home, but it didn't. I went on spending just the same, and foolishly thinking that I was having a good time, and with no thought of the future. This man is now one of the vice presidents of one of New York's greatest financial institutions, and is reported to be worth many millions of dollars.

In the fall of 1908, after my disastrous experience of six months in another line of business following my resignation from the Hearst organization, I resumed newspaper work as advertising manager of the New York "Evening Mail." I had known Henry L. Stoddard, editor and owner, back in the Philadelphia days, when he was political correspondent for the "Press."

Despite the fact that I was bothered by debts, I did the best work of my life on the "Evening Mail," and made more money during the five years I was associated with it than I had ever made before. Moreover, Mr. Stoddard gave me the privilege of syndicating advertising talks, which ran in his paper for one thousand consecutive publication days, and earned for me more than fifty-five thousand dollars.

Mr. Stoddard was very generous in many other ways, and frequently paid me special sums of money for doing what he considered unusual things in the way of developing business. During this period, I was so deeply in debt that, in order to keep things moving as smoothly as possible, but without retrenching in the slightest way in my expenses, I borrowed money from Peter to pay Paul and from Paul to pay Peter. That item of fifty-five thousand dollars earned from syndicating advertising talks would have more than paid all my debts and left a nice nest egg besides. But all of it was spent as easily as though I hadn't a care in the world.

In 1915 I went on my own in the advertising business. From that time until the spring of 1922 my fees ran into very big figures. I was still making more money than I ever did, and was spending it just as fast as I made it, until finally my friends got tired of making me loans.

If I had shown the slightest inclination to curb my expenses to the extent of only ten per cent, these wonderful men would have been willing to divide fifty-fifty with me, letting me pay them five per cent of it and saving five per cent. They did not care so much about the return of the money they had loaned me, as that they wanted to see me pull myself together.

The crash in my affairs came five years ago. Two friends who had stood by me loyally became impatient, and told me frankly that I needed a drastic lesson. They gave it to me all right. I was forced into bankruptcy, which nearly broke my heart. I felt that every person I knew was pointing the finger of scorn at me. This was very foolish. While there was comment, it was not at all unfriendly. It was expressive of keen regret that a man who had attained so much prestige in his profession, and had earned so much money, should have allowed himself to get into financial difficulties.

Proud and sensitive to the core I felt the disgrace of bankruptcy so keenly that I decided to go to Florida, where I had once done a special piece of work for a client. It seemed to me to be the coming El Dorado. I figured that maybe I could make sufficient money in a few years so that I could return to New York, not only with a competency but with enough to pay all my debts in full. For a time it looked as though I would realize this ambition; but I was caught in the big real estate collapse. So here I am back in the old town where I once had big earning power and hundreds of friends and well-wishers.

ONE thing is certain: I have learned my lesson at last. I feel sure that opportunities will come my way to redeem myself, and that my earning power will be restored to me. And when that time comes I know that I shall be able to live as well as I ever did, on *forty* per cent of my income. Then I shall divide the remaining sixty per cent into two parts, setting aside thirty per cent to pay my creditors and thirty per cent for insurance and savings.

If I allowed myself to feel depressed over my past, or filled my mind with worries, I would not be capable of carrying on the fight to redeem myself.

Besides, I would be ungrateful to my Maker for having endowed me with wonderful health all my life. Is there any greater blessing?

I would be ungrateful to the memory of my parents, whose splendid training has kept me anchored pretty safely to moral standards. Slipping from moral moorings is infinitely more serious, in the end, than slipping from the thrift standard.

I would lack appreciation of the encouragement and support I have had in generous measure from hundreds of business men and to many good friends who helped me build a fine reputation in my profession.

These memories are the sunshine of my life. And I shall use them to pave the way to my future achievement.

With abundance of health, unfaltering faith, unflagging energy, unceasing optimism, and unbounded confidence that a man can win his fight, even though he commences late in life to realize the kind of fight he must make—is there anything but death to stop him?

Just 15 Minutes *a Day*

What it will mean to you is told in the FREE BOOKLET below

HERE are two men of equal position and busi-ss income. Which of them presents you?

They read about the same mber of hours each week. it one has no plan for his ading; at the end of the ar he has little or nothing show.

The other talks like a man ho has traveled widely, ough he has never been out-le of the United States.

He knows something of ience, though he had to op school at fifteen. He is home with history, and the st biographies, and the really eat dramas and essays. Older en like to talk to him be-use he has somehow gained e rare gift of thinking clearly id talking interestingly.

What's the secret of his ental growth? How can a an in a few minutes of pleas-it reading each day gain so uch?

Dr. Charles W. Eliot, om his lifetime reading, study, and teaching, forty years of it as President of Harvard University, answered that question in a free booklet that you can have for the asking.

"For me," wrote one man who had sent in the coupon, "your little free book meant a big step forward, and it showed me, besides, the way to a vast new world of pleasure." This free booklet describes the contents, plan and purpose of

DR. ELIOT'S FIVE-FOOT SHELF OF BOOKS

Every well-informed man and woman should at least know something about this famous library.

The free booklet tells about it—how Dr. Eliot put into his Five-Foot Shelf "the essentials of a liberal education," how he so arranged it that even "fifteen minutes a day" are enough, how in pleasant moments of spare time, by using the reading courses Dr. Eliot provided for you, you can get the knowledge of literature and life, the culture, the broad viewpoint that every university strives to give.

Every reader of this magazine is invited to have a copy of this entertaining book. It is free, will be sent by mail, and involves no obligation of any sort. Merely clip the coupon and mail it to-day.

This Free Booklet gives Dr. Eliot's own plan of reading

P. F. COLLIER & SON COMPANY
250 Park Avenue, New York City

By mail, free, send me the booklet that tells all about the most famous library in the world, describing Dr. Eliot's Five-Foot Shelf of Books (The Harvard Classics), and containing the plan of reading recommended by Dr. Eliot. Also, please advise how I may secure the books by small monthly payments.

Most Men Shave *the Wrong Way*

They use a blade a few times, throw it away and use a new one. That's wrong! They don't get nearly as good a shave with the new blade as they would if they stropped it before the first shave. Then they put up with a second, third and fourth rate shave on the second, third and fourth days. And finally they throw away a perfectly good blade with a lot of good shaves in it.

A Twinplex Stropper would completely change the shaving ideas of these men. (Maybe you are one of them.) A few turns and Twinplex puts an edge on a new blade that is a dream for smooth shaving. And ten seconds stropping each day before shaving will make that one new blade shave marvelously for weeks and weeks.

You'll find Twinplex will make shaving easier, quicker, cleaner and vastly more comfortable. You can now buy a Twinplex for as little as $2.50—less than a year's saving on blade purchases. Other Twinplex models $3.50 and $5.00.

Send For Stropped FREE Blade

Name your razor and we will send you a stropped blade free. We would just like to show you what Twinplex can do to a new blade.

The Most Valuable Citizen in My Community

FIRST PRIZE

"I May Be Prejudiced, But—"

EVERY morning he opens his store at six-thirty, while the other storekeepers in the town open their doors at seven-thirty and eight. He is a druggist in a town of five thousand people, and one of the old school.

He is his own prescription druggist and bookkeeper. Often, when he is working on a prescription, he has to stop and go to the front to wait on a customer who wants nothing more than a two-cent stamp. Again, it is a tourist who wants information, or a lady who wants a check cashed, or a child wanting samples. His telephone is the busiest in the town, and sometimes there are two or three people waiting to use it. These customers who buy nothing—and some of them are habitual—are greeted with the same friendly word that is given to all who enter.

His store is open until ten-thirty every night, and though he is now sixty-six years old he works regularly every other night. Sundays are no different from other days to him, save that the store is closed during church service, which he attends faithfully. He is subject to call at all times, and more than once I have seen him routed from bed at two o'clock in the morning to fill a prescription. Thirty minutes is the most he allows himself for each meal.

No one has ever been refused medicine by him for lack of money. Frequently he has worked for an hour on a forty-capsule prescription, and charged only fifty cents for it, because the person could not afford to pay more.

This man is the most valuable citizen in his community because he is rendering the greatest service. Perhaps I am prejudiced in his favor, but then I ought to be, for, you see, he is my father.

C. L. C.

SECOND PRIZE

Thirty-Eight Years of Devotion to His Job

PROF. SMITH, with sprightly step and buoyant manner, despite his thinning white hair and tired smile, is watching the third generation in Our Town progress through the intricacies of the A B C's, just as he has watched the past two generations travel from the first grade, on into the maze of Latin verbs and, finally, to the thrilling days of commencement.

For thirty-eight years he has been superintendent of the public schools of this little town of three thousand souls.

For thirty-eight years he has fought for our school system, worked unceasingly for its improvement and given every minute of his time unselfishly to the thousand-and-one duties connected with his position.

For thirty-eight years he has encouraged boys and girls through their difficulties, praised them for their good work, and helped them prepare for a useful place in society. Over and over again these former pupils refer to him for reference, and he is never too busy to respond. Never does one of them receive an honor or achieve success in his work without receiving a message of congratulation and good cheer from the "Prof."

Out of this little school, during these years, have come a millionaire banker or two, a noted writer, artists, missionaries and ministers, doctors and lawyers, clerks and secretaries. Each one remembers some individual help, good advice, or friendly service which the "Prof." gave so gladly.

At one time the life of the school was threatened in a court proceeding. Day after day he fought in the thick of the battle. In the end, the school was saved.

Active in the affairs of the town, as well as the school, he has stood out as a leader in the community through these many years. (His name isn't really Smith. He is so modest he objected to my using his true name.)

M. E. M.

THIRD PRIZE

The Best Loved and Most Hated Woman in Town

OUR town is small, with a population much smaller in summer than in winter. It is a community of large families, low wages, strong superstitions and prejudices. We have among us one of those human dynamos, a citizen who can and will turn her hand to any service, for friend, town, or surrounding country.

To begin with, she feeds, houses, clothes, and amuses her own family of three children, one of whom has been a semi-invalid for years.

As chairman of the health committee of the school last winter, she helped the district nurse establish eye, ear, and throat clinics, was instrumental in getting glasses, tonsil operations, and hookworm treatment for many children who would never have been able to afford them, often loaning from her own pocket, with small hope of repayment.

Though not a nurse, last year she treated for hookworm practically the whole of a bitterly poor little settlement a few miles away. She interested outsiders in donating clothes and other necessities, and found work for some of the men.

She raised money and donations for a community Christmas tree, took charge of buying and distributing toys, nuts, oranges, and candy for three hundred children, and arranged for a service of Christmas carols at the tree.

After the winter's activities she emerged quite tired out, countless gallons of gasolene to the bad, four tires worn to shreds, the best known woman in town, but, owing to her fight with ignorance and prejudice, probably the best hated as well. However, there are many who will rise up and call her blessed.

How to Protect the Throat When Smoking

What 9651* Doctors say on this subject

The signed statements of intelligent men and women whose voices are to them what the hands of the day laborer are to him—the means indispensable to livelihood or success in life—are convincing. Actors and actresses, great singers, men conspicuous in public life, radio announcers, testify that they like LUCKY STRIKE cigarettes because of their finer flavor and because they do not irritate the throat.

Before such statements by laymen were published, questions had been addressed to a number of physicians in various sections of the United States—many of them leading physicians—and some replies had been received. The following is the result of the questionnaire:

Q1—In your judgment is the heat treatment or toasting process applied to tobaccos previously aged and cured, likely to free the cigarette from irritation to the throat?

9651 doctors answered this question "YES."

Q2—Do you think from your experience with LUCKY STRIKE cigarettes that they are less irritating to sensitive or tender throats than other cigarettes, whatever the reason?

11,105 doctors answered this question "YES."

© Mishkin, N. Y.

Titta-Ruffo,
Noted Metropolitan Star,
writes:
"Like scores of others whose everything is their voice and a clear throat, I, when I smoke, prefer the toasted cigarette—Lucky Strike."

Titta Ruffo

* *WE HEREBY CERTIFY that we have examined signed cards answering Questions One and Two and that there are 9651 affirmative answers to Question One and 11,105 affirmative answers to Question Two.*

What Are You Afraid Of?

(*Continued from page 19*)

the thought. But these boys do it without *thinking* of being afraid. They also go out when necessary any hour of the night without fear."

"Well," I said, "maybe that is because they are naturally courageous."

"Oh no, you are looking at courage wrong end to. The kind of courage these boys illustrate is in my judgment utter absence of fear, due chiefly to the fact that they have rarely, if ever, heard of fear."

"But," I asked, "did not their parents sometimes have to frighten these boys with punishment?"

"They punished the boys when necessary by depriving them of privileges and the like, but never by whippings or dark closets or 'bogies' of policemen and things that would cause fear.

"Why, think of it!" the doctor said, with indignation in his voice. "The policeman out there on the corner tells me that mothers frighten their children so much with the bogy of a big policeman coming to get them that the city police have great difficulty in helping children who are in real danger. He says, when they go to help a child across the street or something, it is likely to run and scream, and possibly dodge under a passing automobile and get hurt or killed.

"And that's only a sample of the way parents actually *train* their children to a life of fear.

"HERE is a true story which illustrates how parents start their children on lives of fear. It is that of a woman who has the very common fear that she will find a burglar under her bed or some other place, when she returns home at night.

"Think how ridiculous this fear is," the doctor smiled. "Probably not one person in ten thousand ever saw a burglar more than once in a whole lifetime. Yet these people act as though at least three houses out of five were burglarized every night of the year. I know one small town where there has not been a burglary in over fifty years; and yet half the women and children, and some of the men, are constantly afraid of burglars.

"I have a number of these cases of burglary fear now, but the one referred to is a woman of twenty-two. She was in such a hysterical condition when she came to me that you would have supposed burglars were going to make a mass attack on her house every night.

"I went back and back, probing into that woman's history. There is *always a beginning somewhere to every* fear. I probed for a long time and found nothing. She had never been frightened by an actual burglar; nor had she ever seen one.

"Finally, I discovered that when she was a child, her mother would double-lock the street door, then look under the beds and into the closets, as though burglars made these places a frequent resort. Lastly, she would look under the girl's bed, and securely lock her door.

"Of course the child grew up with the idea that burglars were about as common as flies in summer time. And now, here at twenty-two, she was so paralyzed with the fear of burglary that she could not sleep or live a normal life.

"All because of a mother's foolish attitude! After a long time, she has become complete master of herself and her fear, and she sleeps with only ordinary precautions."

"WHAT is the worst and most common fear you have to deal with?" I inquired.

"The fear 'I won't make good,'" answered the doctor instantly. "That's the greatest and most common fear of all. It's the curse of humanity, and entirely useless.

"Of course we all have had a normal and healthy fear at times that we might not make good in certain situations, such as dealing with the boss, or making a speech, or meeting a customer, and the like; but with these people it has become so chronic that it crushes the heart out of them, saps their nerve, and pretty well insures that they won't and can't make good."

"Does this fear always go back to childhood?" I inquired.

"Not always. It most frequently comes from *the demands made upon people to try things which are beyond their physical, mental, and temperamental capacities.*

"Our schools are the worst offenders in this. They require children to do things which our physical, mental, and temperamental tests *prove* that more than fifty per cent of them cannot do. These children can do other things just as important; indeed, far more important for the kind of lives they are going to lead and the work they are going to do. But just because of these foolish demands and false standards, which over half of the pupils can't possibly make good at, the schools actually drill into the children the habit of fear, and the feeling of failure.

"The children thus get the attitude, 'How am I ever going to get through this?' And usually they don't, and can't. They do their best and fail, and soon are filled with all sorts of fears and feelings of inferiority, which spread over their whole lives.

"I recall the case of a boy, who was about nineteen when he came to me. For some time he had been out of a job. Since leaving high school he had had several jobs. He gave obvious reasons why he had left each job, but I was not quite satisfied. Finally, I found out by questioning that each time before he had quit a job there was looming up before him the picture that he was going to fail. He felt each time that very soon he was going to fall down. So he 'got out from under,' and deceived even himself about his reasons for quitting.

"As I got more deeply into his story, it became clear that he had the ability to handle all these jobs; but I found, also, that his school had made demands upon him that he could not meet. This had got him into the habit of looking ahead with fears and *expecting* failure. I have numerous cases like this, and by proper handling can teach them how to overcome the difficulty.

"Modern psychology has proved that practically everyone can do far more than he thinks he can do. The lack of confidence which people have in themselves is astounding, considering their equally astounding abilities.

"Strangely enough, some of the most incompetent people are those who brag most about what they can do. The egotistical man who brags on himself is nine times out of ten, not doing nearly as much as he could. But he is afraid he cannot do what is expected of him, and so he brags, as a compensation for his own fears. I heard a good epigram the other day, 'Your brags express your fears.' This is perfectly true.

"Of course many people are delighted in other people's successes and pained at their failures, yet most of us are a little relieved at the failures of others, because it releases us from the fear that maybe we are inferior. Other people's failures give us confidence in our superiority.

"The fear that you won't make good takes many forms. For a long time I had a man, one of the biggest executives of America, who got afraid to meet other people. His income ran into six figures. And yet he sat there in my office like a whipped dog, and confessed he was in mortal terror in meeting his subordinates.

"He told me that he never went into a conference with the managers of his factories and other officers without his heart fluttering, his breathing getting hard, and without wondering how he was going to get through. His underlying fear was this: 'What are these fellows thinking of me? Will they carry away the impression that I am really a big executive, or just a mollycoddle in a big job?' He often postponed important conferences because he was afraid to meet his men either singly or in a body.

It finally became clear to me where it all started. All fears start somewhere. His father had been a bear and tyrant in his family. Everyone had to refer all decisions to him. The boy grew up without any will or personality of his own. You can't do anything worse for your children than to keep them dependent upon you for their decisions. Little children must depend on their parents, but it is disastrous for children fifteen or sixteen years old.

"THIS boy was fond of football and a fine player, but his father made a coward out of him by refusing to let him play in a big game after the boy had received a slight injury. The boy invented other excuses besides his father's veto, and soon, when another big game was on, he played sick and refused to go to the field.

"He forgot this experience, and finally got away from his father and climbed to be this big executive. But unconsciously the fact that he had sneaked out of a big game made him try to sneak out of important engagements.

"He developed a habit of dodging, and when I saw him as a famous executive he hadn't an inkling there was any connection between those football games and his present form of fear.

With LUCO-LAC you can easily make your home *distinctive*

BEAUTIFYING possibilities such as you have dreamed of—and hoped for—can now be realized.

In *Luco-Lac*—Brushing Lacquer—Lucas has produced a finish that makes this realization of your dreams possible.

With *Luco-Lac* you can give every room an individual charm, and its beautiful pastel shades give full sway to your desire to express your own individuality,

and to satisfy your craving for colorful things.

You can quickly transform a room, for *Luco-Lac* dries so rapidly that a chair or table can be used a few minutes after *Luco-Lac* has been applied.

With *Luco-Lac* you can have unlimited color combinations in a most practical form. The twenty distinctive colors, white and black, may be mixed one with the other to any shade or color desired.

Luco-Lac has the soft, satiny beauty of fine hand-rubbed enamel.

Write today for the booklet, "The Way to Luco-Lac," which shows the new "half-hour" way of beautifying so many things about the home. Sent free with our color card on request to Dept. A-10.

What Luco-Lac Is and Does!

Luco-Lac is a brushing lacquer.

It is easily applied, flowing freely.

It dries quickly—without brushmarks.

It is waterproof and will not turn white.

It will not mar easily.

It will not show hot dishmarks.

It will not stick to clothing.

The "Do and Don't" of Home Decoration

For each home use of paint, varnish, enamel, lacquer, etc., there is a handy little Lucas Book—each a helpful guide—that simplifies the work, and improves the results. Any of these books will be sent free upon request.

"But when I made him describe *just exactly how he felt when he was preparing for his conference*, he soon saw, himself, that each time he was simply *reliving that old football experience*. It was a big revelation.

"Now, you take a sensible man, and when he sees the cause of his fear, as a rule the fear vanishes. This man became calm and confident, and was soon going strong again."

"I suppose," I said, "that you teach your patients will power, nerve, determination, how to grit their teeth and go through things."

"Not a bit of it," Mitchell replied, with a tinge of sarcasm. "Perhaps you have noticed that you probably have seldom, if ever, heard me use the words 'will,' or 'will power.' I don't believe in what is popularly called 'will.' Most people imagine that will power is some mysterious mental pep or jazz or dynamo that you can summon by some sort of fierce effort or determination out of the nebulous nowhere, which adds something new to your own power. I do not believe that that view represents our best psychology.

"Will, in my belief, is a *system of habits*. You can, of course, greatly strengthen these habit systems—call them will power, if you like. In this way, your self-mastery grows rapidly, and you can immensely increase the drive of your powers. But you do not do it by some supreme inner effort, or some miraculous concentration. You do it merely by exercising a long series of choices of the right action, instead of the wrong action.

"By thus acting a great many times in the right way, you develop these habit systems. They gradually become the main body and drive of your whole life. In time, these habit systems grow so strong that they literally head off any thoughts of doing any other way. In this way, your will, or your desirable habit systems, as I prefer to call them, grows so powerful that in time, without hesitation, you express the whole force of your personality in the desirable direction. That, to me, is a strong 'will.'

"IT SOMETIMES takes a good while to build up new habits that are stronger than the old ones. Here, for example, was a young man who was so afraid of going up on high places that he could not go above the second story of the down-town office buildings. He could not bring himself to go up even in an elevator. You can imagine what a man would be up against, trying to make a living in New York, and never leave the ground floor.

"I found it all went back to three childhood situations: The first was that of a jovial old uncle who used to catch him and hold him dangling over an open well while the little fellow screamed with terror. This gay uncle did not realize that his little joke was ruining a boy's whole life.

"The second thing occurred when his teacher, in order to discipline him, used to threaten to drop him out of the third-story window.

"The third thing in this beautiful method of child-training, was when his father did precisely what he should not have done. He dragged him frequently to the edges of cliffs and high buildings, and said, 'I'll break you of this fear.' Oh, if parents would only ever get over this foolish idea of 'breaking children's wills,' and 'conquering' them! In this boy's case, the other children also made matters worse by calling him 'scared cat!' Parents should train their children not to frighten and ridicule each other.

"Well, it was a long process of reëducation. I first slowly built up his *confidence that he could overcome it*. I mapped out a program like this: 'You will go so many times this day to the second story of a building, and so many times to-morrow. You must call to mind all I have said about there being no *reality* to your fears. If there were, everybody would be afraid. Remember, too, there are only two natural fears. Keep all this in mind to give you confidence.'

"I built up his self-confidence in other ways, and soon had him going up in elevators and everywhere, without thought of being afraid. Don't you see I began at the bottom of the building and worked up? His father and teachers had begun at the top and worked down. That's what they always do, begin at the wrong end when they try to 'break' children's wills and fears.

"Just as the greatest fear is the fear that you won't make good, so the greatest cure is building up confidence that you *can and will make good*. And it is truly amazing what a simple process it is by which most people have lost their self-confidence, and what a simple mental trick it is to get it back.

"I ALWAYS give everyone who comes to me an intelligence test and show him what it means in his particular case. Practically always, one measures up in a higher rank than he has been imagining himself. Indeed, I frequently give intelligence and aptitude tests now by mail. They are not quite so reliable as if given by a psychologist personally under rigid conditions, but anyone can get a fairly accurate idea of his abilities by tests which he can give to himself.

In addition, I have a simple little scheme for restoring self-confidence that works astonishingly well. It is so simple that you may at first think it absurd. But just try it. It gets results.

"The scheme is this: I have my clients make a list of forty or fifty common everyday performances, such, for example, as driving a car, playing the piano, making a speech, superintending the work of others, acting as host or hostess, telling an interesting story, and the like. Next, I have them rate their own ability in these performances on a scale running from 1 to 5.

"I then say to them: 'If you think you are among the best ten per cent of the people, you know, in doing these things, rate yourself 5; if among the worst ten per cent, rate yourself 1. If not in the upper ten per cent but in the upper thirty per cent rate yourself 4; if not in the worst ten per cent but in the worst thirty per cent, rate yourself 2. If about 50-50 rate yourself 3.' When they have done this, I have them add up the sum total of their ratings.

"Next, I have them rate ten of their friends in the same way on the same performances, and compare their total scores with the total scores of each one of their friends.

"The psychological point in the scheme is this: A man loses his confidence in himself by a general blanket judgment of his own inability and inferiority. And this scheme does is that it sub the place of a man's blanket j inferiority, a set of particular of his ability in particular pe The part of the scheme which my sleeve is this: I know tha not so likely to list a performan he knows he is poor as he is t thing in which he is fairly good,

"For example, I would ne myself, 'Singing a solo.' I wou on that. I ask each person t own list. Without any suggest me, they are astonished to find usually rank better than others ticular items.

"It is amazing how people cling fears. They are so thoroughly c of their inferiority that they actual against discovering the opposite are afraid if they let go of their f will have no place to light.

"It seems unbelievable, but often fight against my prov they have large unused abilities they can't make good on them. It me of an incident related by Dr. Franz, psychologist of Leland Stanford He had a man who had walked for years with a crutch. One day, Doctor Franz a situation so the fellow got excited ran nearly two blocks without his crutch. When he discovered he did not have crutch, he yelled for them to bring him quick, as he couldn't walk with

"You see, just like that man people have been saying to them 'I am no good; I can't make good have also been saying about their 'They are all right; they can make They are applying a generalized ju to themselves, and a judgment of lar performances to their friends this little psychological scheme makes them reverse the whole apply a large series of particular to themselves against the abilities friends.

"They thus nearly always with a higher standing in their *ment* than the very people with who have been comparing themselves ably for perhaps thirty or forty

"THE great difficulty with these who are fearful, blue, depressed, ried, and afraid they won't make good that they won't face *reality*. Frequently their parents have shielded them made decisions for them until they are wildered when they have to make decisions about real things for themselves.

"These over-mothered folks are tainly pathetic propositions—and fathered ones too. Parents should that their big job is to teach a child independent *command of life*.

"I tell you, Wiggam, some day that very soon, we are going to our whole system of education, and our ideas as to what makes an educated man or woman. Anyone who is afraid of the ordinary trials and difficulties of life, and fearful of failure, and that he won't make good, *is not in any true sense an educated person*.

"We shall begin first with the parents and show them that when they talk fear and lack of confidence in the home, and when they dominate, threaten, rebuke, frighten, and ridicule a child, they are

wounding its mind and heart, and marking it with the brand of fear and failure for life.

"We shall next take the school and the school-teachers, and show them the folly of setting tasks for children at which over one half are bound to fail. Every child's mental abilities will be measured, and tasks set at which each child can succeed with the joy of success.

After years of experience, Doctor Mitchell has tabulated the actual fears of hundreds of college students, school supervisors and teachers and a considerable number of salesmen, clerical workers, executives, and merchants.

THE surprising thing is to find, even among able, successful people, that the fear of failure is well-nigh universal. Fear of not being able to handle the situations of life which lie ahead is plainly one of the most devastating burdens of mankind. This fear takes several forms! but the following is a partial list of them:

Not being able to get a job.
Not being able to satisfy in the present job.
Not being able to hold the new job, if obtained.
Not being able to meet strangers.
Not being able to talk to the boss.
Not being able to meet subordinates and maintain authority.
Not being able to meet customers.

Summing up, Doctor Mitchell finds the following proportion of fears among normal people:

Fear of failure	75%
Fear of the dark	16%
Fear of thunder and lightning	16%
Fear of animals	13%
Fear of water and drowning	12%
Fear of falling from high places	4%

In addition, Doctor Mitchell finds a great many normal people have the following chronic fears:

Being alone
Traveling on trains
Crossing a bridge
Old age
Death
The dead
Poverty
Fire
Being kidnapped
Ghosts
Burglars
Firearms
Being buried alive
Being locked in
Dark holes
Disappointment
Mediocrity
A cellar
The sight of blood
The dentist
An oft-repeated dream
An insane person
The end of the world
Taking an anesthetic
Fast driving
Insanity
Injuring others when driving
Excessive heat
Getting lost
Points or sharp edges
Big eyes, mouth, or teeth
The opposite sex
Punishment and its instruments
Disease and germs
Loss of friends or relatives
Bad luck—the number 13, etc.
Skeletons
Very narrow or wide-open spaces
Becoming a drug addict
An eclipse
Machinery
A locomotive

Among the creatures which many normal people say they are "deathly afraid" of are:

Rats
Mice
Snakes
Dogs
Cats
Wild animals
Bulls
Horses
Bugs
Beetles
Caterpillars
Spiders
Pigs
Toads
Cows

Nothing is more valuable in building up your self-confidence than to compare yourself *item by item* with other people. You lose your confidence by a *blanket* judgment of your inadequacy. You build it up by an *itemized* judgment of your actual abilities.

In the accompanying chart, Mr. A—— K——, an actual person, has rated himself and ten other persons in fifty significant performances. Mr. A—— K—— had an overpowering fear of failure. This was his blanket judgment. Had his belief in his own inadequacy been true, he would have rated himself 1 on all these performances, and his friends 5. This would have given him a total score of 50 and his friends a score of 250.

But when he rates himself, item by item, his actual score in these 50 skills is 176. He thus has 3½ *times the ability that he thought he had.* He rates only one person, Mr. B——, above himself; namely, 220. Only two have ratings near his own, Mr. E——, 173, and Mr. I——, 170.

Thus, in his own carefully analyzed judgment he is superior to nine out of ten of the very persons he is afraid of:

The following rating chart is given merely as an indication of the wide and varied range of performances you can use for comparative purposes. In making up your own list, you will doubtless prefer to substitute other subjects for some of those given here. For instance, if you are a woman, you will substitute more feminine occupations and talents for the purely masculine ones contained in the chart, and vice versa, so that your rating will have a real comparative value.

Performance Rating Chart of A. K.

	A. K.'s Self-rating	Rating of Ten Friends									
		A	B	C	D	E	F	G	H	I	J

DON'T give him ordinary good ood. Take him to a place that offers he unusual in food and drink. Give im something worth rolling on the ongue to get the full measure of its lelicate exciting flavor. Never mind whether it's as easily digestible as t might be. Delicacies that make eople expand and grow mellow are omehow not always "health foods."

But before you leave him be sure to ell him the Gourmet's secret—ENO.

Tell him to take a sparkling dash f it in water before he goes to bed, nother when he gets up. It will elp to clear his system, rid him f many of the poisons that often ollow overindulgence in food and rink, and thus help to keep his spirits high next day so that nothing will intervene to dim the genial memory of the night before.

For ENO is one of the greatest of all laxative cleansers—mild, efficient, sparkling delightful. It has become world famous because of that. And because there is nothing about it to suggest the ordinary, harsh, nauseating salt laxative. ENO's taste is *good.* even after its effervescence has subsided. And although its action is mild, it is very thorough. For years the smart world both here and abroad has depended on this bubbly saline in part to keep keen for social duties. Business men declare it does wonders in keeping them alert. Mothers everywhere depend upon it as a laxative corrective for their families.

Have a bottle in your own house, always. For the health of your family and as a courtesy to guests.

ENO, world renowned for over half a century, from all druggists, 75c and $1.25 a bottle. Prepared only by J. C. Eno, Ltd. Sales Agents: Harold F. Ritchie & Co., Inc., Belmont Bldg., Madison Ave. at 34th St., New York.

How Successful Men Invest

MEN who succeed owe much of their success, in most cases, to a systematic plan of investment which gradually builds and keeps a fortune.

Fortune builders would do well to consult S. W. STRAUS & CO. We have advised and helped many thousands on the road to success — served them in the selection of safe and satisfactory investment securities. We can help you.

We suggest that you ask us for literature describing the sound and attractive investment bonds underwritten by S. W. STRAUS & CO., at present yielding as high as 5½-6%. Write today and ask for

THE FAMILY'S PROBLEMS

I Buried My Financial Troubles In the Deep Blue Sea

AFTER having been a widow several years, I took three children to rear and educate. Their ages were nine, twelve, and fourteen years, two girls and a boy, the boy being the oldest of the three. From the start, I gave each child an allowance. The girls had ten dollars a month each, and the boy fifteen dollars.

My income was $260 a month. After deducting the children's allowance money, there was $225 to budget. This we did on the most expensive system book to be had.

I had put my savings into a home, and was paying out the balance on the purchase price "just like rent." When we moved into the new house and had purchased enough additional furniture to meet the needs of three more persons, I had $240 in the bank. Of course that was absolutely sacred. According to "the book," anyone who dipped into his savings was a lost soul.

But the budget failed to take into consideration the unsatisfactory lawn that the building company had put in for me, and it haughtily ignored the chicken runs that I had to have built at the rear of the lot.

Summer slipped by and time for school came. I had paid out $50 to have the lawn reconstructed. The enclosure for the chickens took $20, and the twelve hens cost $24. I had the use of the lot next door, and in order to get the benefit of the early rains I had it plowed. That cost $6. My $240 was now reduced to $140.

About this time the children started to school. In a few days, I received a letter from the health department saying that the youngest child must have her tonsils out. Her condition was so bad that she was held at the hospital a week. The operation cost $50, a hospital room $40, and the anesthetic $10. This left me $40, and I grimly resolved that it should stay in the bank if I had to go without shoes.

I HAD always been rather an easy spender. I earned more than enough for my needs, and as occasion arose I spent what I liked. But after coming under the influence of the budget book, I spent with groanings each penny that was not authorized by the budget.

Ordinarily, I would have paid poor little Edwina's hospital and surgeon's bills cheerfully, thankful that I had the money to meet the indebtedness. All my concern and sympathy would have been with her suffering. I paid, but I'm afraid I did so grudgingly.

We live in a state in which all school books are furnished, even to high-school students. However, by the time John had his mechanical drawing tools, his gymnasium suit, his football shoes, and his track suit, and Elizabeth and Edwina had cooking aprons, gymnasium suits and shoes, and all and sundry had paid locker fees and swimming pool fees, the $40 in the savings bank had become $3.65, and I a gibbering idiot. My once reliable sense of humor had died a horrible death. It had been smothered between the leaves of a budget book.

But I went grimly and stupidly on. Daily expenditures were recorded on a little tablet with the date and the purpose. Once a week these items were transferred to the budget book. Once a month the book was balanced, I was unbalanced, and the family peace and happiness were given one more shove toward annihilation. In other words, we spent the money once and then gloomed over its departure again during the daily, the weekly, and the monthly reckoning.

There is something in my make-up that forces me to follow a course once I have set out on it. I stuck to my budget book for a year. By this time it was September again and the children must start to school. I got an old friend to come and keep house for them for a week while I went down to the beach by myself. I took with me the budget book and all my canceled checks. And there I held a post-mortem that *was* one. I had promised to go to Catalina with a friend, so I made a neat package of the vouchers, the budget book, and a good-sized stone that I had found on the beach. Then I embarked for Catalina. At one point on the way to this island, there is a very deep place in the ocean floor. I learned from the captain when we were directly over this great depth, and there I quietly slipped the package of grief overboard.

WHEN I got home, I called the children together and told them that I had decided to abandon the budget plan. They would still have their allowance money, and out of the remaining sum we would first pay the instalment on the house, then the water, light, gas, and telephone bills, and set aside what we had found to be about an average for the table. The rest we would use as we needed it.

At the end of the month, wardrobes were gone over, and new clothes, repair bills, and cleaner's bills planned for. When this left anything for uplift, amusement, or savings, then those funds had a share. If one of us preferred to go to a show and wear a mended glove, that was his privilege.

Each child had a savings account of five dollars started for him. This was added to twice a year, the savings being kept in individual envelopes in my desk until the half-year rolled around. No one but the saver knew how much was in the envelope; and if at any time he deemed that he had a better use for any or all of the coins there, he consulted no one, but used as much as he saw fit.

Possibly I have outlined a sort of budget. If I have, I prefer it to be called by a less austere name. For us it has proved a flexible, variable, livable plan, and it has added enormously to the sum total of our happiness.

My children are all adults now. None of us is in the "poorhouse," and no one of us owns a budget book! M. J. P.

Gossip!

The Meanest Habit in the World

By EDGAR A. GUEST

I HAVE given up talking merely for the sake of spilling words out of my mouth.

I confess I am somewhat late in trying to learn to hold my tongue; ut it was only a short while ago that I ame to the conclusion that the man or oman who sits silently by while the ossips are telling everything they *think* hey know, isn't the dull ember of the party, but he smart one. The gift of ab isn't a gift—it's a peril. am sick and tired of going ack to people explaining o them that I didn't mean vhat I said. I have done nough explaining to last ne for a lifetime. I have nade all the apologies for illy, thoughtless, and unkind witticisms that I care o make.

I hope I have played the gossip for the last time. I hope I have graduated from he smart-aleck class. I hope I have now learned enough from life to know that most of the things I hear about other people are not true.

I have had my share of trouble. Some of it was unescapable, but much of it could have been avoided had I kept a discreet tongue in my head. And it isn't that I have really talked a great deal. Most of my difficulties have arisen because I have talked without thinking. Something smart would pop into my head and I would say it without reflection, usually to regret it a moment later.

Speech is one of the distinctive benefits conferred upon man by the Divine Power; it also is his greatest responsibility. Once we have taught a child to talk, we have equipped him for society, but we have also made him dangerous to himself and others. We have given him that which can bring him embarrassment, injury, enmity, loss of prestige, loss of friends, shame, disappointment, quarrels, hatred, and remorse. Speech may cause him to be beloved, or despised; it may advance his interests, or betray them; it may mark him as wise, or stamp him as a fool.

Time and again in the smoking compartment of a Pullman I have amused myself by listening in on conversations. The man with the gentle manner I should like for a friend; the one next to him is too boastful to be good company; the third is advocating business tactics which are plainly dishonest. I wouldn't trust him out of my sight. The man with the loud voice and over-positive manner has betrayed his ignorance by his grammar and the repulsiveness of his ideas.

Their tongues have given them all away. I have heard business secrets told to strangers by men who should have known better. I have heard men discuss their family affairs and their friends and their neighbors, as though it mattered not at all who might be there to overhear them. What most of us forget is that strangers have wives, children, friends, neighbors, and acquaintances. They have business interests to which our secrets might be valuable. It may or may not be important to them to know what we think of other people. At any rate, the man who talks without first being sure of his audience has only himself to blame if he gets a black eye, or loses the contract he has been working for weeks to gain.

A TRAVELING friend of mine not long ago told me this story: He had been sent into a town in the South to straighten out a little difference with a customer.

It was a rainy morning. Having concluded his business, my friend was back at the hotel at ten-thirty

You Can't Muzzle a Gossip, but You Can Give Him the Cold Shoulder

"A GOSSIP is a public menace," says Mr. Guest, "and richly deserves to be muzzled, for a biting, dishonest human tongue can do more harm than the snapping jaws of a dog! A gossip can ruin your reputation, start a run on a bank, break up a church, make neighbors hate one another, shatter the happiness of a town. And no man is immune to the serpent-like flashing of a gossip's tongue.

"Some years ago, a story became current that I had been a life convict in a Minnesota prison, sent there for choking my wife to death! I gained my release, so the story went, by writing a bit of verse which attracted the attention of the governor. He pardoned me on my promise to choke no more wives! That tale spread and spread, until people who had known me for years began to ask if it were true. The slander didn't worry me, but it did worry my wife and my mother. I had to laugh them out of their indignation. Another report about me is that I am an habitual drunkard! The fact that I never drink did not deter the gossip who started it, and those other gossips who keep it going.

"But what can we do about these unbridled tongues that cause so much trouble? Just this: First of all, we can control our own tongues; and, next, we can refuse to keep company with any person who indulges in harmful gossip. Give the scandal-spreader a cold shoulder. He'll starve to death on that diet."

o'clock. He sat in one of the lobby chairs to smoke a cigar, and the stranger next to him began a conversation.

"A bad day," he said.

"It is," replied my friend.

"Too bad for me to go out and get wet. See that three-story building down the block?"

My friend did, and asked what of it.

"There's a fifteen-thousand-dollar order down there waiting for me to go and get; but it will have to wait until the rain stops."

"What is your line?" asked my friend.

The conversationalist told him. They were in the same line of business. The talkative individual had never seen my friend before, although he would have recognized him had he heard his name.

"I chatted with him a few minutes," said my friend, "and then excused myself. It was still raining pitchforks when I reached the building. The manager of the factory was glad to see me. He said he had wondered why no representative of our concern had thought to call on him before. I caught the two-o'clock train out of town with that fifteen-thousand-dollar contract in my pocket, and when I left the hotel the other fellow was still waiting for the rain to stop, and still talking, I imagine."

SEVERAL years ago Henry Ford and my boy Buddy and I were riding together near Mr. Ford's home, at Dearborn, Michigan. It was in the course of a Fourth of July celebration and the road was crowded with cars. The Ford ahead of us stopped without warning, and Mr. Ford's car bumped into it, slightly bending the rear fender. In that car were a young fellow and his girl, and neither of them recognized Mr. Ford. The youth got out and in a loud voice began to demand an explanation.

"That's all right, son," said Mr. Ford. "I'll give you a new fender."

"You bet you will!" the youth shouted. "And you'll pay for it right now."

"Not now," said Mr. Ford. "You take the car over to the factory to-morrow and they'll put on a new fender for you. I didn't do much damage to the one you have, but I guess the car will stand a new one."

"Nothing doing," said the youth. "You'll give me the price of it right now."

By this time a crowd had gathered, and somebody called Mr. Ford by name. The boy's eyes opened.

"Are you Henry Ford?" he gasped. "I'm sorry I spoke that way."

"Never mind the apologies," said Mr. Ford. "Take the car over to the factory in the morning and have it repaired."

"But, Mr. Ford, I didn't know it was you," stammered the boy.

"And I didn't know you before, but I know you now. You've shown me just what kind of fellow you are. You'd have been very nice to Henry Ford, but a roughneck to anyone else you thought you could browbeat."

That sort of policy isn't confined to rough young fellows either. I know any number of people whose tongues are operated on just that basis. They are ladies and gentlemen with their friends; but they're not so particular about themselves with their servants or the strangers they happen to think don't amount to anything.

When my tongue is on parade it is always courteous; but when my tongue is running loose it is a different matter. I am always polite to the man I want to please, the famous man, the rich man, or the man I am afraid of. I may think up smart sentences and bitter sentences and sarcastic sentences, but I am wary enough not to utter them. If I can control my tongue in one instance, I can control it in the other, and I have definitely made up my mind to have the same rule of speech for all.

THE sharp tongue is a poor tool to work with. I know several sharp-tongued people who have made friendship with them almost an impossibility. They are what are commonly called "outspoken" persons. They are continually saying cutting and hurtful things, and they excuse themselves by insisting that they tell only the truth.

"I am not going to flatter anyone for his friendship," said one of these outspoken conversationalists to me. "I'll say exactly what I think every time I am asked for an opinion."

This would be perfect conduct if this type of person did wait until asked for an opinion. But usually the bitter thing is said without invitation or excuse. It is tossed into a peaceful atmosphere like a bomb. It shatters, burns, sears, and hurts. It starts tears where smiles should have prevailed. It is unnecessary and uncalled for, and the victim never entirely recovers.

The sharp tongue is the weapon of envy and malice. It hides under the mantle of truth the dagger of vindictiveness.

My tongue has been my enemy, and I know it is the enemy of many.

Mrs. Guest stepped into a little neighborhood notion store, kept by an old misanthrope, one morning.

"Have you by chance," she said, "a package of carpet tacks?"

Without rising from his chair, he turned and snapped at her:

"Does this look like a hardware store to you?"

Perhaps it was foolish for Mother to imagine that carpet tacks could be purchased in a notion store, but that wasn't half so foolish as the old man's smart retort. He may have thought it clever, but the fact is it cost him a good customer. He not only drove her to the hardware store for carpet tacks, but he drove her to the next notion store for all her notions.

If it is true that some men have dug their graves with their teeth it is also true that many others have dug their social and business graves with their tongues. They have actually talked themselves into failure. Once get the reputation of being a talker, and no business man will have you within hearing. You are destined to a job where you can do the least harm. Tell everything you know, and you'll soon have the reputation of a know-nothing.

In every trade and every profession there are the human sieves. Information just fairly filters through them. They are so busy spilling over, they never have time for investigation or inquiry. To them, everything they hear is news to be passed on. They are the fountain-heads of gossip and the base of supply for scandal.

Some twenty years ago there was a run on one of the largest banks in Detroit. It happened the day following a holiday, and it took a bishop of the Catholic church to stop it. Its source was ignorance; but it spread with such rapidity that even the intelligence of the community was stampeded. A Polish depositor, who could read no English, and whose knowledge of American legal holidays was limited, came down on a holiday to draw his money. He found the doors closed. He rattled at the front door and he rattled at the side door. A policeman went over to him.

"The bank's closed!" the officer said curtly.

The man understood that; but that's all he did understand. He went home and spread the news among his friends and neighbors that the bank was closed and they'd lost all their money.

The next morning there was a line-up blocks long, and soon the officers of the bank were forced to the realization that they were confronted with a first-class run of panic-stricken depositors. Words were futile. There was nothing to do but pay out. The more they paid out, the more other depositors rushed to get their money. Sister banks poured in their cash to save the situation. Some of the big business men talked and tried to calm the frightened people by making large deposits. Finally, Bishop Foley was called upon, and he at last succeeded in calming the situation.

And all because an ignorant man had talked without knowledge of the facts!

I believe I could start a panic within an hour. I know I could ruin any man's reputation with a few words.

The trouble with gossips is that their eyes are never open and their mouths never shut. They see a man they know with a woman they don't know, and the tongue begins to wag.

TWO years ago one of the big department stores in Detroit was obliged to use a full-page advertisement in all the newspapers to stop a lot of ugly gossip that was going the rounds. In fact, the story had spread so far that the common council of the city had begun an official investigation with a view to legislation.

Mrs. Guest told the story to me at the dinner table. She had it first-hand from a friend who thought she had been a witness to it. When I heard it, I said, "That story isn't so. It didn't happen; it couldn't happen." This was the tale:

A woman was electrocuted in the beauty parlor of the store. She was being given a permanent wave, and the attendant had attached the apparatus to her hair and turned on the current. She left her for a few minutes. The woman noticed her hair was burning, and called to a young girl who was in the place. The girl became frightened, and threw a glass of cold water over the customer. The water affected the electrical apparatus and the shock instantly killed the woman.

Now, Mrs. Guest's friend said she had seen them carry the woman out of the store. Every one of the million and a half people in the city of Detroit heard that story, and most of them believed it and most of them passed it on. There was not one fact upon which such a tale could be based. There had been no accident in the beauty parlor, no woman had lost her life; no woman had been injured.

It was true that an ambulance had

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

driven to the rear door and had taken away a woman, but the lady had merely fainted. The company, rather than let her venture out alone in her weakened condition, had provided the ambulance as a conveyance. What Mrs. Guest's friend had seen was that woman being taken home. When she heard the other exciting tale, she merely concluded that she had at least had a glimpse of the victim. Who started that story no one knows; but it continued to go the rounds until finally the full-page denials officially squelched it.

I HAVE reached the point where I am suspicious of even my friends' sources of information. I have made it a rule never to believe stories concerning other people until I have been able to confirm the facts myself. I have found that the noon-day gossip at the club is usually wrong. The easy conversationalists will divorce happily-married couples; make drunkards out of teetotalers; change a little family house party into a wild orgy; scatter reputations right and left, belittle achievements, and magnify the commonplace.

Word of mouth is the sweetest of nectars and the deadliest of venoms.

It is the best advertising medium when it praises, and it can be fatal to any man or to any industry when it condemns.

A friend of mine, at the head of a large baking organization, told me this story:

"We were one of the largest concerns of our kind in Michigan," said he. "Our bread business was increasing daily, and we were serving a great section of the state outside the city of Detroit. It seemed to us, when we shut down one evening, that nothing could happen to interfere with our prosperity. The next morning, when I reached my office, a report came to me that a woman in a certain neighborhood had complained that she had found two tiny pieces of glass in one of our loaves. I immediately jumped into my car and went out to investigate the story. I knew such an accusation might have serious consequences.

"The woman insisted that she had found the glass in our bread, and produced two tiny bits to prove her claim. It was impossible to dispute her statement. The glass may have been in the loaf she purchased; but if it was, how it got there was a mystery to all of us. It was an unfortunate, unavoidable experience, and it happened (if it did happen) in spite of all our carefulness, our cleanliness and our pride in the product we were making.

"The woman told her neighbor that she had found ground glass in our bread. Before the day was out, that story had spread like wildfire throughout the entire neighborhood, and in less than two days our orders dropped one thousand loaves a day. We were powerless. After considering every possible way to stop such an evil influence, we decided that our best course lay in silence. But we spent many troubled weeks and lost thousands of dollars before we lived it down and regained the confidence of our public."

PHOTO BY GEORGE ADAMS, DETROIT

Eddie Guest in front of the office of the Detroit "Free Press," the newspaper for which he has worked during thirty-two years

There is no defense against gossip. It is impossible to anticipate what will be said about you. Personally, I have been accused by total strangers of every conceivable human bit of wrongdoing from murder down. One story in particular, which started somewhere in the East, was that I had been a life convict in a Minnesota prison, sent there for choking my first wife to death while in a fit of rage. I gained my release, so the reliable and authoritative informer had it, by writing a bit of verse which attracted the attention of the governor. He pardoned me on my promise to choke no more wives.

That tale spread and spread, until even people who had known me for years began to ask if it were really true. It didn't worry me, but it did worry my mother and my wife. For a time I thought Mrs. Guest really was going to choke with rage, but I finally succeeded in laughing her out of her indignation.

A YEAR or so ago I received a letter from a woman living in the Middle West, asking for information about myself. She said she had attended a meeting of the literary society of her community, and had been shocked to learn from the speaker of the afternoon that I was a quite horrible sort of person. The speaker, it seemed, after discussing my work, felt compelled to reveal a number of unpleasant things about my personal life. She knew for a fact that I was constantly under the influence of liquor, and that Mrs. Guest had been obliged to leave me, taking the children with her. While she had never met me herself, she had met many people who knew me well, and they had all told her that I got most of my exercise by using my wife as a punching bag, or words to that effect.

And in all that gathering of women there was, apparently, only one present who either doubted the tale or cared enough about it to seek the truth. To her I chuckled as I wrote: (*Continued on page 100*)

She felt his hand on her head and opened her eyes in sheer astonishment. It was the first time that anyone had touched her with that gentleness

"The Ninth Life"

A story of a young man who couldn't ignore a challenge—

By I. A. R. Wylie

ON ONE fine spring day, Francis Clairvaulx, having proved beyond reasonable doubt that he believed firmly in monogomy, democracy, the United States Government, and all existing things whatsoever, landed at the Battery and, some hours later, thanks to George, in Mrs. Gottlieb's rooming-house around on Ninth Avenue.

George, it appeared, was often on the Battery, anxious to help just such new arrivals, and particularly if they came from England, because, as George explained, his people came over sometime in 1665, which, of course, made him sentimental on the subject. So it was natural that he should lead Francis to Mrs. Gottlieb, who was an old friend of his and, contrary to appearances, a decent and kindly soul.

Judged by appearances, Mrs. Gottlieb was a blowsy lady of uncertain years with a squint and a strange but fluent flow of English. She had, she admitted doubtfully, a room to let. It was what she described as a hall bedroom, and looked out straight onto a blank wall. If you wanted sunlight you lit the gas jet. Otherwise, you went without. But it was, as George said, decent and, thanks to the brick wall, you could only hear the Elevated. In fact you could hear nothing else. Which was a good thing. And only seven bucks a week. Whatever they were.

Francis didn't care much. The trouble with him was that he didn't really care about anything. Even the alpine configuration of his prospective mattress didn't worry him. He was, so to speak, beyond good and evil. And when George suggested changing the one-hundred-dollar bill which represented Francis's sole stake in the universe on a couple of drinks, he agreed to that too. He didn't care. But he was a friendly soul himself, and he recognized that the spotty youth had proved once more that you must never judge people by their appearance.

A drug store seemed an odd place to celebrate—a queer drug store, at that, with a few dusty perfume bottles in the show cases and a bored and blue-jowled druggist who responded to George's wink with another. They passed through glass doors.

"Seeing life, ain't you?" the spotty youth demanded gleefully. "Put your foot on the rail, boy, and say what—"

IT WAS the not caring that did it. After his second drink, Francis knew nothing very clearly until he awoke to the conviction that his skull was full of loose iron that was rattling 'round with a frightful noise and hurting horribly. By the pale daylight that filtered down the crevasse outside the window, he perceived that he was in the hall bedroom, on the alpine mattress, and fully dressed. If anything, the place looked a shade more hopeless. And the one-hundred-dollar bill had changed. Effectively. In fact, beyond recognition.

Of course, the truth was that the officials of Ellis Island ought never to have allowed Francis to land. But then, the great trouble with officials is that they are fallible. They can even test your heart and be unaware that it is broken. Which is serious. Because an immigrant with a broken heart is much more likely to become a charge on the community than someone suffering from eye trouble or even angina.

The symptoms are subtle, and can be detected only under close and prolonged observation. They include a marked distaste for food, and a total disregard for the great moral principle of the century, which is that you shall go one better than the next fellow, or perish. They prefer to perish.

So that Francis wasn't particularly upset. He even thought it rather nice of George, who was evidently bound to become a great man, to leave him five dollars to go on with. He paid three dollars in advance to Mrs. Gottlieb, who seemed to have lost faith in humanity early in her career, and went out to look for a job. He didn't really want a job, but it seems that if you are alive you have to live—Francis was not quite clear why.

In Sixth Avenue he encountered little knots of men gathered

STATE UNIVERSITY SYSTEM OF FLORIDA

outside doorways. On the doors themselves were fixed white pasteboard notices which announced a pressing need for car men, ice men, bricklayers, waiters, and stenographers. It all looked very hopeful.

The clerk at the desk took fifty cents before he even inquired. Then he took down Francis's name, address, and age. He too seemed to feel that the name was a mistake. You couldn't spell it and you couldn't say it.

"Make it something short and snappy," he suggested. "Smith, f'r instance."

Francis obligingly made it "Smith."

"What sort of job you want?"

"Well—almost any sort."

"I see. All-round man. Best at everything. I tell you what—we've got a call for an ice man round on Fifty-ninth. Ever handled ice?"

"Not exactly handled. I used to skate a good deal."

"Aw, don't be funny. What's your line? What *can* you do?"

"Well—I don't really know. I'm not much good at lifting things. You see, I got smashed up a bit."

"Shorthand?"

"A little. Rather slow. I haven't had much practice."

"Say, what *did* you do where you come from?"

FRANCIS explained. He murmured something about a war. Apparently, he had messed through that satisfactorily enough. At any rate he had survived. Afterward he had written—poetry, articles, and short stories. The inquirer seemed to think that they were no preparation for the career of ice man—or any other sort of career.

He sat back for a moment, however, and considered the grave and gentle face opposite him with a genuine curiosity.

"But don't you worry," he encouraged, "you're the sort of guy that takes all the tricks. With your line of talk you could sell yourself to anyone."

"If you really think so—" Francis began.

"Sure I think so. I'll ring up the 'Times' offices and let them know you're coming. They need peppy fellows like you."

Francis had a suspicion that the young man was only being kind. Still, kindness reinforced by a hot-dog and a cup of coffee at a neighboring stall stiffened his resolution. Happening upon the Times Building, he went in and inquired for the

editor, or, as he explained diffidently, anyone who would see him. And the office boy said that nobody saw anybody without an appointment. And Francis, realizing that of course the kind young man at the agency had not yet rung up, lifted his hat courteously and said, "Quite," and went out again.

SOMEONE had told Francis on the ship that there were six million people in New York. There were seven million in London, so perhaps it was the lack of the odd million that made him feel so utterly alone. And all the six million were going somewhere, very fast, with tense, set faces and unseeing eyes. Whereas, Francis wasn't going anywhere in particular, and on account of the said heart trouble he felt certain that he never would. So that he got in the way a good deal, and several people said, "Watch your step, can't you?" in English, but with a strange, alarming accent.

As dusk began to fill the streets he went home. At least he went back to Mrs. Gottlieb's. He felt oddly sore, as though he had been beaten all over, and so hungry that he doubted if even the bumps in his mattress would make him forget the ache of it. On the dirty steps a girl ran into him. They nearly lost their balance, and for a moment they clung to each other, laughing.

Then she drew clear. Francis lifted his hat.

"I'm awfully sorry."

In the uncertain light, he could hardly see her. But when she spoke he was sure she didn't belong to Mrs. Gottlieb's house. She spoke so gently, and the strange accent suddenly sounded friendly and sweet.

"Quite all right. It was my fault."

"It wasn't. I've been knocking into people all day."

"I trod on your foot. I hope I didn't hurt you."

"I must have hurt *you*."

"Indeed, you didn't."

She lingered. "Aren't you Mrs. Gottlieb's new young man?"

"Well—I'm new, at any rate."

"English, aren't you?"

"Yes. How did you know?"

"I just guessed. My people came from Somerset. That's England, isn't it?"

"Oh, absolutely."

"I guess that helps. Just come over, haven't you?"

"Yesterday."

"Well—I don't suppose you'll be at Mrs. Gottlieb's long."

"I don't suppose so either."

"Not that she's as bad as she seems."

"I'm sure she isn't," Francis agreed eagerly.

"Well—good night."

"Good night."

He lifted his hat again, and she slipped past him with a nod and a smile.

Afterward he sat on the edge of his narrow bed and hid his face in his hands. There was no room to walk about. It was too dark to read, and obviously he didn't dare light the gas jet. He had nothing but his thoughts. He thought of chops and steaks, and of Kilty-in-the-Dale of a summer's evening. He would never go back, because Elsie, who had run away with his best pal, had lived there too, and on just that sort of evening, fragrant with dew and sweetbriar, they had walked youthfully hand in hand through narrow, steep-hedged lanes.

But homesickness had him by the throat.

He thought of the girl who had bumped into him on the dirty steps. He wondered what she was doing in this miserable place. He wondered what she would have done if he had held on to her, and said, "Please, let me talk to you a little." He would even have told her about Elsie. Because, though his heart was broken, he still had to live with it. And it still hurt. It hurt worse now when nobody knew.

Chops and steaks again.

There was no reason why he shouldn't have cried. There was no one to witness the disgrace. But it seemed ridiculous, after you had messed your way through the Great War to cry because you were hungry and had nobody to live for.

THEY met at least once a day on the stairs, and said "How d'you do?" rather shyly. Never more. On those particular stairs there was no reasonable reason for lingering. And there was nowhere else. Even if he had had the price of a meal—which he hadn't—he wouldn't have asked her. Just because she was so lonely and unprotected, he had to be the more careful. He wanted her to feel that with him, at any rate, she was safe.

Otherwise, she obviously wasn't safe at all. There were things and people in Mrs. Gottlieb's establishment that she oughtn't even to know about—the loud-mouthed youth on the third, for instance, who came back five nights out of seven bawling tuneless and beastly songs, and the peroxide blonde across the landing, with no visible means of support and hunted, revengeful eyes. Francis thought of his two sisters in the quiet little village of Kilty-in-the-Dale, and went hot with shame.

Of course it wasn't his business. Nothing was. Still, she was a human being. You were responsible in spite of yourself. A rather sweet human being. Even if you didn't care, you couldn't help noticing it. In his chronically dizzy state of mind she appeared to him in the poetic form of a ray of sunlight in a dark and evil-smelling prison. She was frail and gentle-looking. He noticed her pathetic efforts to dress with a fresh prettiness that defied the squalor of her surroundings. Knowing the price of a clean collar, Francis guessed that she often went without her lunch.

He didn't even know her name. But he knew that she was

The light from the neat, cheerful room blinded him so that he could not read her expression. He didn't want to. He didn't want to see her at all

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

Mrs. Gottlieb, amidst a pile of soaked and dubious-looking possessions, wailed passionately in two languages. Francis shook her by the arm. "Miss Dawson!" he shouted, "Miss Dawson!"

poor and alone. And he suspected her smile of being very gallant. It might even be that her heart, too, had gone the way of hearts.

He didn't care about himself. He was finished. But she was young and unspoilt. It was a shame. Lying carefully in the deep and stony valley of his ancient mattress, he planned how he would really speak to her—gently and earnestly as an elder brother might do. He would warn her that the neighborhood in general, and Mrs. Gottlieb's house in particular, was no place for her. He would ask her, if things went very wrong, to have confidence in him—

He imagined her anxious, astonished eyes.

Meantime he made two discoveries: First, that the people who had assured him that in America even the half-witted became millionaires, almost in spite of themselves, had exaggerated. Second, the main difference between the Old World and the New was that in the former only the fittest survived. Whereas in the New you could be a totally unfit ice man, for instance, and be fired regularly once a week, and still live on. Which fortunate fact enabled Francis, carrying square blocks of the mean, slippery stuff between steel pincers, with his old wound aching like a tooth, to keep Mrs. Gottlieb, if not the wolf, from baying too persistently at his hall bedroom door.

And one day when ice men were at (*Continued on page 160*)

Behind Nearly Every Lie There Lies A Fear

And you parents have got to find out what those fears are if you want to solve the problem of why children do not always tell the truth—The days of arbitrary parental rule have passed, and study, reason, and understanding must be mixed with discipline if you want to make a good job of rearing a boy or a girl

By Angelo Patri

PEOPLE who say that childhood is the happiest period of life are usually short on memory and long on sentimentality. Childhood, contrary to numerous rhapsodic comments, is a period of uncertainty, of constraint and restraint, of constant chafing against irksome commands and rules of life which are not clearly understood.

Children do not grow up gently, like flowers in a garden. They suffer acute growing pains, they have symptoms baffling and elusive, they progress and backslide; they run the whole round of life in a few short hours, repeating it again and again in ever-widening circles.

In order to rear children properly, it is necessary to have a broad and gentle tolerance, born of real understanding. The old hit-or-miss system is gradually being relegated to the limbo of forgotten things, and parents and teachers are now seeking knowledge where they were wont to be content with traditions. They are asking questions where once they were satisfied to lay down laws. In brief, children have become people to be studied and considered. And we who study them have managed to evolve a few fundamental principles upon which we can base the answers to the most common questions of parents.

"Tell me," a troubled mother said to me, "why my children lie? I am truthful. Indeed, I am very particular to tell them only the truth and to keep my lightest promise. Yet they tell fibs. Why do they do so?"

The answer is that most children, if not all, tell lies at one time or another. Broadly speaking, it is fear that makes them do so, although I have known children gifted with very vivid imaginations who lie for the sheer joy of embellishing the truth or of creating a situation in which they are the central figures. However, such children are the exception rather than the rule and I haven't room to consider them in this article. I firmly believe that behind nearly every lie is a fear. If you can remove the fear, the lie dissolves. Each child has a different fear, each one tells a different lie for a different reason. But the principle is clear: No fear, no lie.

Let me tell you about Mary Ellen. She was a pleasant child, healthy, and intelligent on every subject except arithmetic. The moment the teacher began, "A man had seven—" Mary Ellen's courage died on the spot.

The teacher did her conscientious best. She kept Mary Ellen in after hours and drilled her thoroughly. She sent home deficiency blanks for her mother's signature, and faithfully marked the deficiency in red ink on the monthly report card.

Mother helped loyally. "Mary Ellen, you must really try harder. Now, put your music aside and put all your time on arithmetic. How can you ever expect to go through college unless you get a passing mark in mathematics? It would be awful if you failed, you know. The family on both sides are college folk. You don't want to be the first one to fail. Now, do put everything out of your mind and work hard. We want to be proud of you. We must be proud of you."

ONE morning Mary Ellen handed the clerk of the school a letter which stated that she was leaving in order to go to a private school in the neighborhood.

Soon afterward I saw Mary Ellen on the platform of the L station at an hour when she should have been in school. I bowed and smiled, but she seemed embarrassed by the recognition and rapidly disappeared behind the ticket office. A few days later one of the teachers saw her on the street, again at a time when schools were in session, and, as before, the child seemed disturbed at being noticed.

Scenting trouble, I had the private school called up on the 'phone, and, as I expected, it knew nothing about Mary Ellen. We immediately got into communication with her mother and asked her to come in with Mary Ellen the next morning.

"Of course I'll come," she said; "but you can get Mary Ellen from the classroom any time you want her, can't you?"

"We'd rather you brought her in with you, if you can do so conveniently," was the rejoinder.

Mother arrived at the appointed time the next morning, but without Mary Ellen. "She said she would rather go to her classroom first, so that her attendance would be marked right," explained the lady. "She is such a conscientious child. It seems too bad that she does so poorly in arithmetic. Is she going to pass, do you think?"

Mary Ellen was not in the classroom, of course, and it was left to me to explain the situation. "It is not so bad as it looks on the surface," I assured the mother. "Can't you see that Mary Ellen did this to protect herself from us all? We were pushing her to do something that she could not do. We made her feel a disgrace and a failure every time she entered the school. At the close of the day, instead of returning happily to her home, looking forward to being petted and praised, she went sadly, bowed under a load of failure. In self-defense she ran away. She could see no other way out."

"But she lied," sobbed the mother. "This is awful. To think that my daughter deceived me and forged my name to a letter! What ever will become of her? I don't even know where she is."

"Don't worry about Mary Ellen," I said. "Give her a chance, and everything will be all right. Mary Ellen is afraid of arithmetic. That's the key to the whole trouble. Now you will have to accept the fact that arithmetic is not for Mary Ellen. So will we. We will have to tell her, and prove our sincerity too, that we think just as much of her as ever, and that her success in music balances her poor arithmetic.

"Nobody knows about this but you and me and one teacher," I went on. "Nobody else is ever to know. When Mary Ellen comes home this afternoon—she will come home, never fear—you tell her you know what she did and why she did it, and when she cries and tells you how sorry she is, forgive her and bring her to us in the morning."

MARY ELLEN failed in arithmetic that term-end but she took the failure cheerfully. She did extra work in music and drawing, and the commendation and praises it brought strengthened her and gave her courage. The next term she got a sixty-five in arithmetic, which let her by. The following term she was able to do those problems that begin: "If a tree seventy feet high casts a shadow . . ." which is not so bad. And she is quite as truthful as any other child from whom fear has been lifted.

"Why does my child steal? I give him everything that he ought to have, yet he steals. Why does he do that, and what can I do to stop him?" That's another problem parents have to face.

STATE UNIVERSITY SYSTEM OF FLORIDA

Children are born without moral sense. They are just human grubs. Wrapped within them, however, are the germs of a moral and spiritual growth, which, like all growth, must struggle for birth, and be fed and trained and faithfully tended. Character is a slow growth born of fiery trial. Think back to your childhood, and remember how your moral sense developed and blossomed.

"Little children take things for the mere sake of clutching. It is not to satisfy a hunger for possession. The eyes of childhood are imperfect carriers, while the sense of touch is the best possible one. The clutching hands must verify the seeing eyesight if early impressions are to be correct. In other words, children are impelled to *feel* an object as well as to *see* it.

But the pilfering of the pre-adolescent and the true adolescent is another matter. The latter has developed a moral sense, and knows the difference between right and wrong. Each question that arises in his mind has two sides, the self-centered side and the selfless side. In the beginning, he will always take the selfish view, because he has not had sufficient experience of the ecstatic joy in the denial of present ease for future good. His is a purely material world of hungers and satisfactions. He enters upon the other with halting steps, backward glances, and rebellions.

This half-way stage of growth or adolescence is the most difficult of all for children and parents. Almost anything may happen. One or two principles of training stand out here. The child has no power to step from the physical to the spiritual self. The helpful adult lays the bridge and points the way. To my mind, the Ten Commandments and their background is the *way*. Gently, if you can, sternly, if you must, hold them fast to that elementary code.

EARLY impressions persist. They have persisted with *you*. It may be true that you no longer attend church, and your Sunday-school days are in the past; but it is also true that they are merged in your background and are the foundations of your ethical conduct to-day. When we begin to learn a game we follow the rules grimly; but when we become expert and the technique is second nature to us, we forget the pain of our learning and its method.

It is quite common to find adolescent boys and girls taking money from their parents' purses to buy candy or tickets for the show, or to stand treat to the "bunch." When that happens, keep your head. Wait until you have thought the situation out thoroughly before you talk it over with the child.

I am a firm believer in giving a child an allowance. It should start when the child is about eight or nine, and end when he is self-supporting. During this period of time he should be allowed to handle the money that buys his clothes, school supplies, and pleasures. He should also be trained to keep an account book, and to understand what spending and earning means. This is a legitimate part of his education. Nowadays, every good college and boarding-school has a personal finance department, and the students regularly go over their budgets with an expert. It is ignorance of the meaning and use of money that causes the mischief. Educate the children, and the trouble will vanish.

PHOTOGRAPH BY UNDERWOOD & UNDERWOOD

Angelo Patri and one of his pupils in a modeling class. Mr. Patri is principal of a New York City public school; but his influence is by no means confined to one school, or one city. By his example and through his writings, school methods all over America have been affected. He is the author of numerous magazine articles, syndicated newspaper talks, and books. "A School Master of the Great City" and "The School That Everybody Wants" are among his best-known books. Mr. Patri was born in Italy fifty years ago, and has been a teacher in American schools for twenty-seven years

Billy is a good example of what training in money affairs will do. Billy spent his allowance, and then helped himself to any loose change that he could lay hands upon.

In despair, his mother brought him to my office one day.

"What do you do with the money, Billy?" I asked.

"Oh, I just spend it," replied Billy.

"Well, Billy, I think a man ought to *earn* money before he spends it, don't you?"

"Sure."

"And it's rather cheap to spend money that another fellow earns, isn't it?"

"Sure it is. I want to go to work; but they won't let me."

"If I can persuade your parents to allow you to earn money in your spare time will you promise me to keep a strict accounting of it?"

Billy nodded his head.

"Now, see here, Billy. I'm going to give you this new quarter. It is your charm. You keep it in your pocket, just to remind you that money need not burn holes in it. You show it to your mother every night, and bring it along with you when you come to see me next time. If it is still a whole twenty-five cents, the charm will work for you overtime.

"This little book is your account book. In it you keep a record of how you spend your allowance and the money you earn. You also keep in it a record of your savings. And remember, son, that no gentleman ever takes money he has no right to."

Billy spent foolishly, and once or twice he kept change he should have turned in. But he held on to the quarter I gave him, and I changed it into half a dollar and then to a dollar. After that, he did not need to keep a "charm" in his pocket, because he had learned enough about money to be trusted with it. You see, honesty is a habit that has to be taught, just as any other habit is taught, by example and practice, *reward* and *punishment*.

Should children be punished? Of course they should. They must not be cheated out of their punishments. They are entitled to them. We dislike to make them unhappy, but they must learn that their happiness lies in doing what makes others happy, in reaching past their physical selves to their spiritual selves.

When shall they be punished and when not? Again the principle is clear. If the mistake was committed in selfishness, it is to be penalized. If it is a mistake of judgment, well-meaning, a groping toward a higher plane of self, it is to be corrected, and the child comforted and sent on its way rejoicing.

Buddie climbed on the pantry chair and took down a jar of jam and ate to his heart's content. His mother discovered him when he had about completed the job.

"You are a naughty, selfish little boy. Nobody likes a greedy boy who eats all the jam, makes himself sick and doesn't care whether anybody else gets any or not. You must be punished for such conduct.

"Bring a tablespoon. Now you measure out the spoonfuls in this full jar. We'll count them. There are about ten spoonfuls. Now measure how much is left in your jar. Five spoonfuls. That means that for five times (*Continued on page 105*)

What A Man In Politics Is Up Against

By Brand Whitlock

IN THE early days of the Middle West, when life was monotonous and hard, without depth or background, when the theatre and most forms of social amusement were considered wicked, and people cowered before the countless taboos that were the poisonous legacy of puritanism, the political meeting in the autumn, the revival in winter and the camp meeting in the summer were the only means of relaxation. The political orator who could amuse the people was in demand. His well-tested jokes and stock of funny stories, repeated about the red-hot stove and the sawdust spit-box in the country store, served to while away the dull winter evenings until the revival began.

There was something of the artist in these old politicians; and simply because they were at home on the stump and never so happy as when they had a crowd to harangue, is no reason for denouncing them as demagogues; they were not preaching dangerous and subversive doctrines; they merely had a way with the crowd; they knew how to establish an easy, familiar, and confidential understanding with their hearers. They may have had sometimes a certain swaggering assurance of good-fellowship, a necessary touch of democratic vulgarity, but they had withal a kind of charm, that mysterious power of personality, which goes so much further than any argument.

Harriet Martineau, in "Society in America," describes a political meeting at Greenfield, in Connecticut. As she listened to the orator of the day, all her "sympathies were baffled," and she was "deeply disgusted." . . .

"Here was . . . a candidate for the highest office in the State," she wrote, "grimacing like a mountebank before the assemblage whose votes he desired to have, and delivering an address which he supposed level to their taste and capacity. He . . . offered them shreds of tawdry sentiment, without the intermixture of one sound thought, or simple and natural feeling, simply and naturally expressed."

"SIMPLE and natural feeling, simply and naturally expressed." To be sure; but it isn't so easy as it looks. In fact, it requires a very great artist to do that sort of thing. And if one is not a very great artist, and tries it, one is apt to come a cropper. I happen to know.

One night in a municipal campaign in Toledo I had spoken at four meetings, and had one more speech to make before the day's work would be done. The last meeting was in the slums of the city, and as I drove into the dark and empty street and got out of the motor before the hall, I looked up for a second into the clear, cold sky of an October night, and caught a glimpse of the constellation known as Charles's Wain. I remembered then to have heard that one of the stars that compose the constellation is a triple star; some people, I had been told, had eyesight so strong that they could see two of these stars, but hardly any eyes were able to distinguish three.

I was sick and tired of political speeches, my own more than any, and I wondered what I was going to say; I never liked to cadge for votes. But I thought of that triple star, and attempted a little application of it to life, to ideals, how, as a man's perceptions developed, he could see more of truth and beauty—that sort of thing.

ON THE front row of seats, just below me, sat a shabby, battered man, with a blotched red face, exhaling the fumes of spirits strongly all about him. Among his friends and acquaintances he was responsive to the onomatopoetic name of "Buzz," which no doubt faithfully suggested the operations of his mind. It was still in the hot, sticky room, and Buzz had been comfortably snoozing during all this part of my little talk. But some of the poor women were listening with attention; perhaps some of them might see what I was driving at.

"Some can see one, some two, and there are those who—" (*Continued on page 139*)

"Big Matt"

begins next month

SUPPOSE your one great ambition was to be governor of your state, and then suppose the tireless loyalty and hard work of a lifelong friend finally landed you in that office. This friend of yours is a "practical" man, a political boss, not particularly well equipped to fill an important appointive office, and yet perhaps he will do all right if given a chance. Anyway, he wants a certain appointment, and that is all he does want in return for making you governor. You face a crisis in your life and a problem in ethics all in one: you must commit a public wrong, betray a public trust, by naming a doubtful man to high office; or you must commit a definite, personal wrong by ditching the friend upon whose shoulders you rode to power. Which?

Governor Blake faces just that situation in Brand Whitlock's new novel, "BIG MATT," which begins next month. He faces this situation —and a lot of others! So does Big Matt, the Boss. So do all the men and women in this great fiction story. Mr. Whitlock knows the inside of public life—also the outside. He knows people the same way. For six years he was a newspaper reporter, devoting much time to politics; for four years he was a clerk in the Secretary of State's office in Springfield, Illinois; for eight years he was mayor of a great city, and for another eight he was in the diplomatic service—a perfect background for the writing of such a story as "BIG MATT." In this novel, which will be printed in four parts, Mr. Whitlock combines his knowledge of people and politics with his rare ability as a novelist, to produce an extraordinary story—one of his very best! The article beginning on this page will give you an idea of the wealth of Mr. Whitlock's experience.

If you know anything about public life, you will be fascinated by "BIG MATT." If you don't know anything about public life, and don't care anything about it, you will be fascinated just the same! For "BIG MATT" is a story of love, conflict, loyalty, ambition, temptation, growth —a story of life by one who knows how to portray life on the printed page. THE AMERICAN MAGAZINE is delighted to present this newest Whitlock novel to its readers. You will like it! THE EDITOR.

Mrs. Nell Donnelly

TENS of thousands of American housewives dress more prettily at their work because, twenty years ago, when Mrs. Donnelly married, she resolved that she wasn't going to let housework make her look like a wielder of mop sticks and frying pans. Unable to buy the gay-colored little work dresses that she wanted, Mrs. Donnelly began designing and making her own house dresses in the rose-trellised Donnelly bungalow, in Kansas City, Missouri. Friends who saw the dresses wanted similar ones for themselves, until, to meet the demand for her dresses, Mrs. Donnelly had to start a factory, which has grown to be one of the largest of its kind.

It's All Right To Be A Wife If You Don't Look Like One!

By Charles Lane Callen

SHE was seventeen. She was pretty. She loved beautiful things and hated ugly things. And she dreamed every young bride's dream of a bungalow for two; of se trellises and dainty curtains, and of a otless kitchen wherein it would be ust fun" to cook.

Nell Donnelly, you see, wasn't a bit fferent from other young brides. She so said to herself: "I'm not going to let usework make a frump of me." And hile Nell was dreaming of her bungalow which they couldn't yet afford—her sband Paul was dreaming at some day he might be the head of his own little siness: you know, the nd of a little business herein he could "be his vn boss."

Nell had been a stenogpher. Paul, who was venty-three, also was a enographer, earning ghteen dollars a week. hat wasn't enough, even 1906—the year they ere married—for them to ford the luxury of "a rl," or even to have the ash "done out."

Nell herself, once her ream bungalow became a ality, would have to do e cooking and the washg, the darning and the nending, the window cleang and the bed making, nd all of those other endess tasks which make omen's backs ache and ause them to forget the urling irons.

"But I won't forget the urling irons!" Nell proested. "A housewife *can* ook just as nice as a business girl!"

Older married friends, who, too, once ad resolved and dreamed, shook their eads and smiled wistfully. "You will earn," they warned, "that a housewife an't look pretty over a frying pan and a washtub."

"I won't learn!" retorted Nell Donelly. "I'm going to look as pretty, and dress as prettily, and keep our home as pretty as if we had a million instead of eighteen-a-week!"

And she did! That is, when she got the home.

Not that she dreamed ever of having a million. Such a dream then would have seemed very silly. Millions don't evolve out of eighteen-a-week marriages, and frying pans and mop sticks and washtubs, or even rose trellises and pretty kitchen dresses—and yet, they sometimes do!

To-day, though only twenty years have gone by, Paul and Nell Donnelly are well on the way to getting their first million. He is president, and she secretary and treasurer of a factory—the Donnelly Garment Company—which occupies four entire floors in one of Kansas City's largest buildings, employs more than five hundred people, and last year did a business exceeding two millions of dollars.

And this business, which is one of the largest of the kind, grew directly from a sewing machine in the rose-trellised Donnelly bungalow, and from Nell Donnelly's triumph over the frying pan and the mop stick!

WHEN young Mrs. Donnelly could not buy pretty aprons and dresses to wear in her housework, she designed her own patterns and made them up herself. Housewives, all over the country, yearned to replace the drab, purely practical garments they were wearing with the same kind of aprons and house dresses, just as soon as they heard of them. The factory resulted as the one means to supply the demand.

When I called at the Donnelly factory, without the formality of an appointment, a businesslike young woman informed me that "Mrs. Donnelly is in conference."

Mrs. Donnelly's secretary presently appeared, and after her in a few moments a decidedly attractive young lady, whom I took to be a stenographer. She smiled. "You wish to see Mrs. Donnelly?"

I certainly did.

"Then we'll sit down right here where we won't be disturbed," decided the attractive young lady. "I am Mrs. Donnelly."

She isn't five feet five inches tall. Her light brown hair is fashionably bobbed. Her eyes are blue. She wore a gay smock, suggestive of the traditional garment of an artist's studio.

Of course I had to comment on the smock. It was so utterly unbusinesslike, not at all like "factory" atmosphere.

"WELL," laughed Mrs. Donnelly, who, it happened, had designed the smock, "there is no more reason why a factory girl should look like a drudge than a housewife should look like a scrubwoman. We make these smocks for women to wear in their kitchens, though, of course, we make other garments too. It is our contention that, no matter what may be a woman's work, she can, and should, look nice as well as practical. Now, that isn't mere vanity either: it is plain common sense.

"Tell me," she went on, "can you think of anything more disagreeable-looking, and more likely to get on a man's nerves, than a frumpy, untidy woman? Can you think of anything more detrimental to a woman's *own* nerves, and to her *own* ambition and viewpoint than the consciousness that she is hideously dressed?

"There is a psychological effect in what one wears, just as there is in what one does. You can do your best when you know that you look your best. You will smile quicker in bright colors than you will in drab ones. If you men don't believe that, put on a pair of dirty overalls and go without shaving for a week. Your whole viewpoint, for the time, will undergo a change. You won't feel nearly so self-confident and lordly as you did. Likewise, a woman who looks like a scrubwoman three fourths of her day is going to feel like a scrubwoman after a few years have passed. Dowdy dressing leads straight to dowdy thinking, more times than it leads to (*Continued on page 74*)

There's No Argument Here—Mrs. Donnelly is Right!

"TOO many girls see only two things in life—marriage or a career," says Nell Donnelly. "They forget that marriage in itself is a career. It entails the same chances of success or of failure as a career in the professions or in business. The wife can make or break her husband; she can make or break a home. She has a big job, and the better she is equipped to fill it, that much better will she do the job.

"People often express surprise that this company of which my husband is the head was founded on one of *my* ideas. What surprises me is that more husbands' businesses are not the outgrowth, at least in some measure, of their wives' ideas. It takes two to make a marriage, and both are endowed with brains. Why should only *one* of the contracting parties put his brains to use, considering that the profit is mutual?"

Old Hawk Eye

He was the most unpopular man in town until a weak spot in his armor revealed a soft spot in his heart

By Chester T. Crowell

ILLUSTRATED BY STOCKTON MULFORD

STANDING at the intersection of Sycamore and South Main streets, the Reverend Mr. Biddle addressed his little audience as follows: "Something ought to be done about this." Eloquence was unnecessary; one sweeping gesture sufficed to indicate that he referred to the entire neighborhood.

Philip Merriweather, president of the First State Bank, made funny little clucking noises with his tongue and stared at the jungle of drab, ugly houses, some of them vacant and apparently in need of repair. This was the first time in three years that he had seen them. The neighborhood was only ten blocks from the bank building; but it might as well have been in another state, since it was across the railroad tracks.

Riverdale, like many other towns of four thousand population, was divided into two parts. The elect resided on one side of the tracks and the heathen on the other. Mr. Merriweather, needless to say, was of the elect. So was Norman Barker, secretary of the local chamber of commerce. Mayor Finger knew the neighborhood quite well, having been there six or seven times during the recent campaign; however, this was the first time he had thought of it as anything other than the Third Ward. Mayor Finger had lived in Riverdale all his forty-seven years, and the Third Ward had always been the Third Ward. But the Reverend Mr. Biddle had not lived in Riverdale all of his fifty-two years; he saw the town with eyes unclouded by local traditions. "Something," he repeated, "ought to be done about this."

Mayor Finger looked at him uneasily. An impressive, dignified man, with a low, earnest tone and purposeful eyes—but meditated—a man who would lure busy, important personages away from their desks to go prowling about like this might turn out to be an awful nuisance. So Mayor Finger agreed heartily that something ought to be done.

Original from
STATE UNIVERSITY SYSTEM OF FLORIDA

Who owns most of this property?" Reverend Mr. Biddle asked.

mmediately Mayor Finger's expression ;htened. If the owner of the property e going to be the person held re- nsible, the subject might be discussed omfort, for William Baker never sup- ted anyone in local campaigns.

Nearly all of this property," the yor answered, "belongs to William ter."

Old Hawk Eye," added the secretary, rman Barker. And Mr. Merriweather ned as he echoed, "Old Hawk Eye."

He owns darn near a third of the n, and the Lord only knows how much d around it," the mayor continued.

So I have been informed," said the verend Mr. Biddle. "Have any of ı talked to him about this?" Again made that sweeping, all-inclusive ges- e.

Here he comes now," the secretary nounced. "Maybe you'd better talk to n."

Mr. Merriweather and the mayor nned. Norman Barker turned his head d winked at them. It was a capital e, if only the verend Mr. Bid- could see it; t he was a sin- e, earnest per- ı and probably uldn't, so they pt it to them- selves. Much good it had ever done to talk to Old Hawk Eye about anything. He was far and away the most unpopular man in Riverdale—Old Hawk Eye, the bargain snatcher, the bird of prey. Now they waited as he approached, carrying his heavy cane, and talking to someone. That was unusual. The someone turned out to be Leonard West, editor of the Riverdale "Reporter." Old Hawk Eye was talking and Mr. West was listening.

It was amusing to watch Old Hawk Eye when he talked, because invariably he would turn his head slightly to one side, very much as a bird does. His face was thin and the cheek bones prominent. He wore a black suit. One of his eyelids fell just a little lower than the other, and it gave him a sinister appearance, which was in no way diminished by that heavy black walking stick. In Riverdale, unless one was crippled by rheumatism, one did not carry a walking stick. Therefore, to the populace, this queer person, named William Baker, seemed to be a hobbling old man, though as a matter of fact he was in very good prime and frequently walked five miles for exercise. However, he was nearsighted in one eye, and therefore often found it necessary to turn his

"Here comes Old Hawk Eye, now," the secretary announced. "Maybe you better talk to him!"

head in order to get a better focus on the person with whom he was conversing.

"How do you do, Mr. Baker?" said the Reverend Mr. Biddle. Old Hawk Eye appeared to be puzzled, and hesitated a second.

"I am Mr. Biddle," the minister added.

"Yes, yes. Glad to see you, Mr. Biddle." Then he discovered the others, and jerked out staccato greetings: "Hello, Merriweather. Hello, Finger. 'Lo, Barker. Leonard West with me. All met him, I believe. What are we doing here? Convention?" He smiled; it was barely noticeable, but nevertheless an authentic smile.

"We were looking at these wretched houses," the Reverend Mr. Biddle explained, "and trying to think of some means for improving the lot of these people."

"Think of anything?" Old Hawk Eye snapped out the question in his characteristic staccato jerks.

"Could we count on your coöperation if we should think of anything?"

"Certainly. It's all my property. Why not?"

"Wouldn't it help a great deal, Mr. Baker, if these houses were painted?"

"No."

"Why do you say that?"

"Good paint on 'em now. Terrible color. But good paint. Know where I got these?" His gesture indicated the houses.

"I have heard, Mr. Baker; but I should be pleased to have it from you direct."

"There was a factory. You can see the walls. Right over there. Put up during the war. These houses, too. After the war I bought the whole thing. It was cheap."

"Precisely, Mr. Baker. And for that reason it seems to me that you could afford to make some improvements."

"No. Nothing in it. Very cheap rent. Always has been over here. Hard to collect, too. Plenty good houses across the tracks. If they wanted 'em, they'd move. Some do."

"But for the good of the community—" the clergyman suggested, leaving the sentence unfinished. Old Hawk Eye blinked at him as though he did not understand. "For the sake of these people," Mr. Biddle added.

"NOT interested in them," was the prompt reply. "Don't amount to much." With a gesture of dismissal, he turned to Mr. Merriweather, and asked abruptly, "What did you think of?"

The banker, as a matter of fact, hadn't been thinking at all; but he hastened to say, "I mailed our thrift booklet to all of these people."

"Didn't mail 'em any jobs, did you?" Old Hawk Eye demanded. And with that Mr. Merriweather was dismissed. It was now Norman Barker's turn.

"What did you think of?" The tone was neither friendly nor unfriendly. But the secretary had had a moment of warning, and that was all he needed to formulate a reply:

"The sewer system ought to be extended all through this part of town," he said, "and the streets ought to be paved. There are not enough lights here, either."

"Good idea," was Old Hawk Eye's comment. "Vote a bond issue." Mayor Finger looked angrily at the secretary. Bond issues sometimes brought political careers to a close. And this one most assuredly would, with three fourths of the taxable property on one side of the tracks and all of the proposed sewers on the other!

Leonard West laughed out loud. Old Hawk Eye turned on him and asked, "What do you think?"

"It isn't my funeral," replied the editor.

"AND now, Mr. Baker, tell us what you think," the Reverend Mr. Biddle requested.

"Chloroform," said Old Hawk Eye, without a second of hesitation, and no embarrassment whatever. In fact, it was Mr. Biddle who blushed, while the unpopular landlord calmly addressed the editor, saying, "Come on, West. We've walked far enough. Better get back, now." Turning to the others for a moment, he said curtly, "Good day, gentlemen. Thanks for the advice. If you think of anything else let me hear from you."

Old Hawk Eye

They stared at him with mingled resentment, admiration, and wonder. But most of all with resentment.

"That man," said the Reverend Mr. Biddle, "should be brought to his senses. I believe that at bottom he is a good man. He just doesn't see things clearly." And the others nodded assent.

Meanwhile, Old Hawk Eye was saying to Leonard West, "Pretty good fellow that Biddle. Means well. Got no common sense. Can't see things clearly."

They walked another block in silence. Leonard West was amused at the thought of efforts to uplift the Third Ward, and at the same time uneasy. There would be a fight over this, no doubt, and the Reverend Mr. Biddle was powerful. He would expect the coöperation of the press. But here was Old Hawk Eye taking him out for a walk to make a business proposal—Old Hawk Eye, who already had a line on practically every industry in the town and several of its businesses.

"My suggestion is simply this," Leonard West heard the queer little man walking beside him say: "You get out a booklet telling what your plant can do. Let the booklet speak for itself about the quality of your work. It's remarkable work. You've already got an agent in the city who looks after advertising. Let him become your city representative to receive printing orders also, and thus you have a city office. It's only fifty miles away on the main line and telephone calls are cheap. Here, in a little town, you can beat the city plants on prices. You ought to get lots of business. Now, how much money would you need for additional equipment?"

"That," said West, "would depend on the amount of business."

"Precisely. As long as that is the basis of loans you can have all you need."

"On what terms, Mr. Baker?"

"A straight mortgage, or we share in the business, each according to what he put in. However, you should have the right to buy me out at any time in whole or in part, at one-twenty for every dollar I put in. Which do you like best?"

"I'm already mortgaged, so you come in as a partner, Mr. Baker."

"That suits me. I have unlimited confidence in your ability, and I expect to make some money out of it. I turn off here. Good day. 'Phone when you want the money."

He was gone. The editor and job printer smiled as he repeated to himself: "'. . . unlimited confidence in your ability, and I expect to make some money out of it.' Queer person, Old Hawk Eye. A genius for saying things that would stir people's resentment. And yet, doesn't every lender of money expect to make a profit out of his confidence in the borrower? But the sound of it, the sound of it, when you say it bluntly."

HAVING arrived at the gate of his estate, Old Hawk Eye stopped a moment to look for the head gardener. All the way home he had been thinking about the Third Ward. Trouble brewing there, he meditated. Efforts that would mature slowly might not be enough. Better do something immediately. Too many violations of the law down there across the tracks. If public agitation was begun there would be a powerful weapon in the hands of his critics. Strange that he should be mixed up with the Third Ward; but there it was. Better do something immediately, and thus gain time. So he entered the big stone gateway, turned to admire the curious old iron lanterns that adorned its

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

Old Hawk Eye searched the countenance of his guest. No one had ever brought the charge against him of trying to do good

pillars, walked across a broad lawn, and then followed a path through the shrubs.

Hansen, the head gardener, was working in the little celery bed. That small patch of ground had a history, and Old Hawk Eye smiled his queer, faint smile whenever he saw it. Here the first experiment had been made to determine whether celery could be grown in this soil and climate. It turned out a complete success, but interested no one for miles around except Hansen and his employer. Later, however, the news spread to Norway. The net result had been a thriving colony of celery-growers, about half of whom were named Hansen. Most of the others, also, were Hansen's relatives.

Old Hawk Eye took his profit from the land they first rented, then bought, and turned a jaundiced eye toward the Third Ward. Since celery was not the answer, it had occurred to him that chloroform might be.

"HANSEN," he said, "did you ever see a baseball game?"

"You bet. I like it."

"Could you lay out a baseball diamond and smooth it?"

"Why not? You give me the measurements?"

"I'll look them up to-night in the library. To-morrow, Hansen, you get whatever help you need and go to that ground where the two big oak trees are, the big tract on South Main Street. Make a fine baseball diamond there, Hansen."

"Yes, sir."

Old Hawk Eye slowly retraced his steps through the shrubbery, then turned to the right and followed a winding path that traversed a quarter of an acre of flowers. Up the long flight of stone steps, and he was on the veranda of his mansion, for it was no less. From his rocking chair he could look down on Riverdale, and clear across the town to the new celery fields on the far side. Bohemians, over there.

A man rose as he reached the top step and came forward. "I am George Harrison," he said.

"Good," was the response. They looked at each (*Continued on page 189*)

STATE UNIVERSITY SYSTEM OF FLORIDA

You've Heard Of The Average Man? Well, Here He Is!

His name is Roy L. Gray, and he lives on the average street in the average town of the average state—This is the story of how he was found, what he does, and what he thinks — Does he speak for you?

By William S. Dutton

WHERE East ends and West begins—and North meets South! Where it is cold when it is cold, and hot when it is hot! Where it is neither city nor country, but both intermingle and blend on the tree-shaded, democratic midway of the small-town Main Street!

There, in the Average House on the Average Street, in the Average Town of the Average State, I found the Average American Citizen, in flesh and blood!

Not *an* average citizen, mind you, but *the* average citizen. That, by population figures, circumstances, and election.

He is native born, of native parents.

He is forty-three years old, a good average age.

His family has four members—himself, his wife, and two children, a boy and a girl—which is as near as you can come in life to 4.3, the official Census Bureau figure for the size of the average American family.

He is neither tall nor short, thin nor fat, but "average." He owns an average business, does average things, and drives an average car, which was three years old last spring, and is "still good."

He believes in the old-fashioned God of our fathers, in the soundness of the country, in the good of the times, and in the fundamental virtue of his fellow men. And on Sundays he likes his slippers, his pipe, his newspaper, and peace.

He confessed to me in our talk that there are lots of things he possibly should do, but doesn't; and that there are numerous so-called "big questions" which possibly should interest him, but don't. He isn't alarmed over the "crime wave;" neither is he "wet" enough to blame it on prohibition; nor "dry" enough to credit prohibition with the country's prosperity.

Ever since our country donned its swaddling clothes the average citizen has been a fact. Newspapers and magazines have been edited for him, untold buckets of eloquence poured out by statesmen for his ear, and laws have been made and unmade to his nod. But he has always been in the abstract—a little of all of us, but specifically none of us.

Nobody, so far as I can determine, has troubled to seek out in these United States that one actual individual who, if not *the* Average Citizen in fact, at least most closely approximates him and comes nearest to meriting the title.

My search for the average American began with the figure of 118,620,000—that being the population of the continental United States, according to the Census Bureau's latest official estimate.

The Nation is made up of forty-eight states and the District of Columbia. As the District's population is greater than that of eight separate states—notably Arizona, Delaware, Idaho, Nevada, New Mexico, Utah, Vermont, and Wyoming—therefore we have, in effect, forty-nine states. Dividing the total population of 118,620,000 by 49, I found the average state population to be 2,420,816.

The *one* state whose population most closely approximates this average is Iowa, which, by an official state census taken in 1925, has 2,422,915 people. Fittingly, it is geographically close to the heart of the nation.

I WENT to Iowa. At the office of the secretary of state in Des Moines I learned that Iowa has 205 towns and cities of 1,000 or more inhabitants. Dividing 205 into 2,422,915, I got 11,819, the average town population. Only *one* town of the 205 in Iowa approximates this figure! It is Fort Madison, in Lee County, with 11,299!

The Mississippi is nature's great dividing line between the American East and the American West. Fort Madison is on that line. The Iowa-Missouri line marks the end of what was debatable Southern territory and the beginning of undebatable Northern territory during the Civil War. Again, Fort Madison is practically astride that division point. It is neither Northern, Southern, Eastern, nor Western. It is all. The pioneers who settled it were Americans from the Thirteen Colonies. To-day

Us

By Arthur Guiterman

OUR tale remains untold; the world will bow
Before the great, the glorious, the sainted;
Our fathers came with rifle, ax, and plow
And found no time to have their portraits painted;
They rest unknown to fame; and even now
The Muse of History is unacquainted
With us, a Nation's not too meek civilians,
Who number something like a hundred millions.

All tasks are ours, all forms of enterprise,
And most of them are not at all exciting.
We worship peace; but when the Fates devise
That fighting must be done, we do the fighting:
And maybe when emergencies arise
We prove—though not in lecturing or writing—
At least as able reasoners or guessers
As many university professors.

We run the farms, the stores both great and small
And constantly invent new occupations;
We try to be polite and fair to all,
Our neighbors, friends, and even our relations:
And, working summer, winter, spring, and fall
To keep our families in clothes and rations,
Each does his best and hopes, the Future's debtor,
To bring his children up to do much better.

Then take us as we are without pretense,
Resourceful, helpful, kindly, up-and-earning,
Endowed perhaps with that clear common sense
Which often serves the purpose more than learning;
We may be found of some slight consequence
And not unworthy by the well-discerning;
Besides, as Lincoln said, the Lord must love us
Because He always makes so many of us.

ety-two per cent of population is na- e born.

No one industry ninates the town; it boasts a variety industries. Its ple know St. Louis l. Chicago; they know the folks he Iowa, Missouri, d Illinois farms pund them. Of nes in Lee County, ile 3,142 are rented re are 4,389 owned! ree fourths of the nes owned are free incumbrance, and value of the aver- e home is $3,540. at sum buys you a etty nice home in rt Madison.

The Average Town, en, is a community substance, neither h nor poor, but mfortable. It has

"Why pick me out of a hundred million?" asked Roy L. Gray, when the author of this article told him he was *the* average American. The process by which he had been selected and then elected was explained to Mr. Gray, and he accepted the nomination. Above, he is seen in the doorway of his Fort Madison, Iowa, store; at the left you see him with his family

made trees along its streets, lawns about its residences, every convenience the city can boast, and space in which to breathe. Its people are proud of their homes and their town. They may stand a little in awe of New York, but they don't envy the New Yorker. The latter, they say, doesn't "live like a man," but exists.

I SET out to find the Average Citizen in the Average Town by going direct to the townspeople themselves. The nominee was to be:

A native-born American, of average age, average size, average education, and average viewpoint.

He was to own an average home on an average street, drive an average automobile, and be the head of a family of four.

He was to be neither in the employer class nor yet in the employee class, but engaged in what was essentially a "one man" business; and that an average business.

He was to be neither a leader nor a laggard in public affairs, neither prominent nor obscure; neither the most popular man in town, nor the most unpopular.

And he was to be an honorable man, a church member, and to have the respect of his neighbors.

I consulted the editor of the local newspaper and the members of his staff; then, in turn, an officer in each of three banks, a business man, a business woman, a theatre manager, a politician, a lawyer, and an ex-postmaster. Fourteen in all, and each nominated a man.

Twelve of them named the same man as their first choice, and two named this man as their second choice! Roy Lewis Gray, retail clothing merchant, is that man!

Plain R. L. Gray is the way the Average Citizen signs his name. He is Roy Gray to the folks of the Average Town. A rather quiet, gentle, modest sort of chap, I found him when I called at his clothing store on a Saturday afternoon. An astonished man.

"You say that I am the Average Man? I know I am average, well enough; but why pick me out of a hundred million?"

I have said it was Saturday afternoon. Every little while Mr. Gray had to excuse himself to help a customer try on a new suit, to press the wrinkles from a coat, or to attend to the innumerable details of his business. On busy days like this, he has an assistant or two to help him. It is an informal store, a friendly place of first names and neighborly inquiry. Mr. Gray's desk is in the rear, fenced off only by the racks of men's clothing. Mr. Gray looks after the furnace, keeps his own accounts, and is the general custodian of the place.

A CUSTOMER who was in from a nearby village told me: "Roy Gray is as square as they come in any town. When he says a suit is wool you can stake your bottom dollar that it *is* wool. If it's part wool and part something else, he'll tell you it is; and he's just as square with a stranger as with a friend."

"Roy is this kind of man," another confided: "You'll find him ready to give his support to anything that's for the good of the town. He'll dig down into his pocket to help as quick as anybody. But he isn't what you'd call forward in getting into things. He doesn't try to push himself into the front rank.

"For instance, we've got a chamber of commerce here, and we think that all our business men should get a chance to be its president now and then. We don't believe in anybody's monopolizing the office. Well, some time back we decided to elect Roy. He wasn't a candidate for president or for any other office. We just decided on him. But before he'd take the position a committee had to go around to his house and talk him into it. They had to convince him it was his duty—and that was the only reason he accepted."

In somewhat the same way Roy Gray accepted his nomination as the Average Man. He was astonished that the spotlight should settle (*Continued on page 154*)

Why I'm "Agin" Oratory

By John Clarkson

DRAWINGS BY NORMAN PRICE

IF ALL the speeches I have heard were laid out flat (as most of them were) and placed end to end, they would reach from Talkingrock, Georgia, to Frostburg, Maryland.

I have heard pep speeches and sob speeches; long speeches and short speeches; sunny speeches and sad speeches; get-together speeches and bust-'em-up speeches; he speeches and she speeches. Verily, there is no type of eloquence that I have not heard—and I have listened in several languages. Luckily, I was no good in the language courses at college, so I could understand only those talks delivered in English, and not always could I understand them.

Those political twins, "The Man Who," and "The Man Than Whom," are so well known to me that I feel as if I had grown up next door to them. No political convention is complete without them; indeed, no political convention is possible without them. They are as necessary to such occasions as "The spirit of coöperation" is to a Chamber of Commerce luncheon, or "Inadequate facilities" are to the money getters who go about raising endowments for colleges.

"We have with us to-night" gives me a pain; "Unaccustomed as I am" makes me sick, and the mere words "Mr. President, Ladies and Gentlemen" causes me to run, not walk, to the nearest exit. In short, I'm "agin" oratory.

As close as I can figure, I have listened to ten thousand public addresses. Allowing thirty minutes for each one, that means that I have put in nearly two years of eight-hour days sitting under a flood of words. Looking back, I seem to recall speeches, speeches everywhere, but not a thought to think.

The explanation of my present position of Past Grand Wampus of speech hearers is simple: During most of my working life I have been a reporter. I began reporting immediately after I was graduated from college, and for many years after I was busy at the job all the time, except when I was asleep at banquets.

MY EXPERIENCE with oratory really began when I was in college. It had long been the custom of graduates from my college to offer medals to those who came after them. There were medals for the best debaters, medals for the best declaimers, medals for those who showed the greatest improvement in oratory, and consolation medals for those who failed to win any other kind. I joined a literary society in college because it was urged on me; but I never got 'round to making a speech, because I was fired for non-attendance before my turn came.

But I'm an expert on college speeches, just the same; an expert because of my ears, not because of my tongue. In my day, there were several ways to begin a college oration, and I learned all of them. For instance, a young Demosthenes could come out front in his hired dress suit, his cuffs jumping out of the sleeves, look over his audience fiercely, and light in.

"As I stand here on this platform," he would begin in a high voice, "and look down the corridors of Time, I see retreating before me . . ." And then he would represent as retreating before him whatever it was that he had decided to lambast that evening. He went on: "But what is that I see coming over yon distant hill?" He peered hard, to make out what it might be. "A-h-h-h-h-h-h-h," he exclaimed. "It is the figure of a new day, the dawn of a new day, leading by the hand the alluring figure of . . ." And then he pictured the Dawn of a New Day bringing into the hall whatever it was that he decided to exalt. Usually, the ugly figure retreating before him was that of Autocracy, Ignorance, War, or some other little thing of that sort; and the thing he saw coming, with the Dawn of a New Day leading it by the hand, was Justice, Virtue, Universal Peace, or some other panacea of that variety.

"But what is that I see coming over yon distant hill?"

ANOTHER beginning, just as good and just as frequently employed, was for the young man to come out from the semi-circle of uncomfortable sitters on the stage, and start off in a low voice:

"Realizing as I do my inability to speak on a subject that is so far beyond me, but appreciating to the fullest the honor that has been done me by my associates in selecting me to represent them on such an auspicious occasion; knowing full well that my poor brain cannot cope with a subject that is so far beyond me, but realizing as I do the honor . . ." He halted for breath. The audience did, too. He stuck his arms far out in front, and began all over again. This time he realized and appreciated some more, but generally managed to get going.

Peace, universal peace, was the favorite theme in my college. The students there have beaten enough swords into plowshares, and enough spears into pruning hooks to plow up all the prairies in the West, and to prune all the grapevines in Italy. Furthermore, they represented the lion and the lamb as approaching a relationship so intimate that it bordered on scandal.

Listening to these young men (every one of whom, according to the visiting orators who spoke to us in chapel, was a potential President of the United States) gave me my start as an expert on oratory. My reporting kept the training up.

I have nothing to say against the orator who has something to say. The real purposes of addresses, or what should be the real purposes, are to inform and to guide the public. Plain talks often do this, but oratory rarely. The orators too frequently seek to "gull" the public; and when not doing this they give the public a shot of dope.

Consider, for example, our patri-

STATE UNIVERSITY SYSTEM OF FLORIDA

c orators—those welkin-ringers who ve fine-sounding words on tap for all tional celebrations. The Fourth of July ator is the worst of the lot, for, if my perience is typical, he knows less than ost of the others. These men have hinred progress more an any other group can think of. They ve hindered it by aking their hearers lieve everything is grand and glous. You have heard em roll out their e-sounding phrases; t did you ever, as a sult of hearing them, home and become better citizen? Did y one of them ever ake you see the dects in your State, d point out to you way to remedy em? How many atriotic addresses ve you heard that fired you with a termination to do something *specific* for ur community?

And holler he did!

ONCE lived and reported in a state that needs, more than it needs anything se, to be shaken loose from the past, to e its own mistakes and to strike out ew with a vision and a plan. There ve been many efforts in that state to art something worth-while, but each me some hard-working leader has atmpted to institute great reforms he has n into a barrage of hot air that stifled s attempt. And the stifling was done the name of patriotism! The oppoents of progress, never recognizing themlves as such (Defenders of Liberty, and e like, is the way they think of themlves), have met every argument for ange with loud praise of the glorious st, with adjective piled upon adjective, erce look added to fierce look, in unasoning laudation of the big men who d helped to make the State. The men ferred to were big, many of them. But mes change, and not many leaders are ise enough to speak and act for all time. they meet the issues of their own day ey are doing well.

You hear a lot from the orators about back to the good old days," but not so uch about forward to better days. It is forward to better days that we should look and work for. And we might do more of that if the orators didn't lull us to inactivity and a glowing sensation of self-righteousness by their plausibility and their fine diction. They send us home from meetings with a feeling that all is well, when they should send us home with a feeling that there yet is much work to be done.

My first reason, then, for questioning the value of oratory is the fact that the orators themselves do not make good use of their gifted tongues. My second reason is that oratory scares many good men out of politics, and beats many good men who go into it. More than two thousand years ago, Plato, while discussing democracy, said that one of its weaknesses was the fact that orators would be elected because of their oratory, regardless of their ability. The truth of that statement is evident. In the course of my reporting, I have followed several political campaigns, and every time my respect for Plato has risen.

One campaign I recall in particular. It was a contest for the United States Senate. The best man in the race just talked when he mounted the platform; but he always said something. He had made a great record in his own affairs and in an appointive office he had held. He was a student, an earnest student of public affairs.

His opponent was none of these things. Perhaps that opponent had read a book at one time or another. If so, he had forgotten all about it. Yet he was an orator! With tears in his voice he could speak of the poor man. He knew what it was, so he said, to rise before day and plow on until after dark. He knew the taste of corn bread without butter. He knew what it was to have his children go to bed crying for something more to eat. And you know the result of that campaign!

The fact that the job of a senator is not to plow all day long, and that the taste of dry corn bread has very little to do with statesmanship was not considered by the voters. We use oratory as a test of fitness for office, when actually it is no true test at all.

ONE afternoon, while I was reporting a political meeting, I saw a big-hatted farmer in the crowd. He was stolid when the first speakers came on; but after a while, when his candidate rose up, he began to yell lustily. I worked my way over to him in the crowd.

"What do you think of the proposal to change the tax system?" I asked him.

"Think?" he replied. "Think thunder! I didn't come here to think, I came here to holler!" And holler he did! The speech that inspired his shouts, when printed (and if you want to test the substance of an address read it in cold type) ran something like this:

"I am proud to stand here as the representative of a sturdy yeomanry who have ever exalted the virtues learned at their mothers' knees [apple sauce]; I am proud to serve a State whose womanhood is the purest and the fairest [apple sauce]; I am proud to come before you as one whose faith in your judgment, whose reverence for your glorious past, and whose belief in your bravery and justice are unqualified . . . [prolonged apple sauce]." (*The End*)

I have heard pep speeches and sob speeches; long speeches and short speeches; get-together speeches and bust-em'-up speeches

Growing

A story in which Helga Lind discovers that not all the duties of a rural mail carrier are covered in the Postal Regulations

By NELIA GARDNER WHITE

Illustrated by Victor C. Anderson

HELGA LIND had never liked Grandma Wheeler. She had come very close to most of the folks on Route Three, and loved them too, but Grandma heeler she had always shied away from her thoughts. Not that Grandma had t plenty of good in her. Any woman o has run a farm for thirty years and ade it pay, besides bringing up five nice ildren, has some measure of dignity and rth. Helga could see that. She could en admit that the heavy, stern old fige, with its thick gray hair and its Suny black silk was impressive. But she dn't like her. Chiefly because of Bess, o had married Grandma Wheeler's n Ed.

Helga could see now, as she jogged ong through the June morning, the pink mbler roses over the Wheelers' side rch. She could see, too, Grandma heeler herself sitting on the steps with a n of something on her lap—peas, probly. As she came nearer she could even e indignation in the energy with which randma popped the pods open. She felt shrinking within as Grandma Wheeler t down the pan and came down the iveway toward the mail box, her heavy dy moving slowly but certainly. She ished there were no mail for the Wheelers that she could wave her hand and go n. But there was the paper and a letter.

"Here's your paper!" she called cheerlly.

Grandma Wheeler took the mail.

"I never read the paper," she said. "I n see, right under my own roof, what e world's like nowadays. And it don't ive one no comfort, either! Makes a ody feel that it wasn't no use, all our refathers went through. I declare, lelga, when I was a girl, if I'd 've left my aby to go off to a dance of a mid-week ight, or stopped in the middle of doin' up trawberries to have tea—*tea*, mind you, ut in the yard with those light-headed iverwells—I'd have been thought worthss trash, and rightly, too!"

"Oh, pshaw!" Helga let her steady ray eyes laugh at Grandma Wheeler ever o little. "Life's different now, Grandma Wheeler. Dancing's not a sin any more, nd surely tea's no crime!"

Grandma's eyes snapped.

"It's always a crime not to tend to our business if you've got a business to end to! If Bess was sickly, I wouldn't ay a word. But she's got strength enough o do the things she wants to do. Helga, hen I think of my boy Ed, tied to a iece like her for life, it makes me sick!"

Helga's eyes still laughed.

"Ed doesn't seem to be worrying!" she said, with faint maliciousness.

Grandma Wheeler snorted.

"Ed's a fool, if he is my own on!" she said. "Ed wasn't brought up to see his women-folk lie abed of a morning, nor yet go chasing off to town on wash day. And, what do you think, Helga, Saturday night, when I said to Ed that the water was all het for his bath, he just laughed, and said he'd take his bath on *Sunday*—he allowed he was *too tired*. If there's one thing that can be said for the Wheelers, Helga, it's that they're clean; and to hear a son of mine say such a thing as that! But that's what he's come to, he's careless like that all the time now. And she *lets* him be!"

Helga laughed aloud then. She couldn't help it. Her eyes twinkled at Grandma Wheeler.

"Let's see—Ed's all of thirty, isn't he?" she asked.

"Thirty-one, come the first of next March."

"Well, maybe he thinks he's old enough to know when he wants to take baths!" Helga said.

Helga could say such things to Grandma Wheeler; no one else could.

"It's always kind of hard for two women-folks to be in the same house," Helga said then, a bit more slowly. "I wonder sometimes why you folks stay together."

"Where would they stay, I'd like to know? I've always said as Ed should have the farm, and why shouldn't he live on it? I can get along with most, Helga; but, sometimes, seems as if I'd go crazy with Bess. She hasn't any more system to her 'n a fly! . . . Well, I s'pose you got to get on. How's the Larsens' young'un? . . . Did Mrs. Vetter send up the W.C.T.U. dues? . . . How's Ern Hollstrom's leg? Somebody said it got broke in two places. Is that right? . . . Well, I told him that bull 'd be the death of somebody, and here it's almost finished him. I hope he'll get it put out of the way now."

HELGA started to drive on, then glanced back.

"My, but your garden's lovely!" she said. "I never seem to find time to fuss with flowers."

Grandma Wheeler snorted again.

"*Nor I!*" she said significantly.

Helga felt depressed as she drove on. She wished she had had the courage to tell Grandma Wheeler just what she thought of her, but she knew she never would have it. She thought of Bess, pityingly. Bess didn't belong on a farm. Not a Sweden Hollow farm. You had to be willing to do hard labor to wrest a living from this land. There was always a fight against weeds and stones and hilly fields.

And Bess was fragile and gay and whimsical, where the Sweden Hollow folks were sober and strong and matter-of-fact. But none of them, Helga thought rebelliously, had ever made a garden like the Wheelers'. Larkspur, and phlox and bachelor buttons and roses, pinks and marigolds and Bouncing Bets—the gay colors stayed in Helga's mind a long time.

That night at the table, the long Lind table, she told them about Ed's bath, and they all, John and Hilda and Anna and Carl and Emil, shouted with laughter. But, after supper, Emanuel Lind said to his daughter:

"I've been thinking about Grandma Wheeler. It's not so funny. Folks up this way have always been kind, Helga, and it seems too bad an old lady like her has to hurt a girl."

"Yes. It's like a sickness. She can't think of anything else—just the things Bess does to upset the system of her life. If only she wouldn't talk about her so much!"

HELGA thought she would try to show some special friendliness to Bess soon, but before the opportunity came Grandma Wheeler was down at the mail box again.

"Helga,"—Grandma's face was very red—"Helga, I don't usually stop in the middle of a washin' to gossip, but I'm so boilin' mad I can't keep to anything this morning! Bess's mother was here yesterday—they drove over from Dansville. Goodness knows, I don't grudge the girl company; but the woman had the gall to say, right before my face, that Bess looked thin and she was afraid she wasn't getting enough to eat! Enough to eat—*in my house!* I had a mind to show her the door. 'N' do you think Ed spoke up 'n' put her in her place, like any son ought to have? Well, he never! He said, 'She *is* thin; I'm worried about her, Mother Benning.' He calls her *Mother*—a woman like her! And what's he worried for? She couldn't have it easier. I do three fourths of the work, and I'm always there to look after the baby while they gad. If she'd stay to home and mind her business a little, she wouldn't be so thin!"

Helga felt a little sick at heart.

"I don't believe Bess is very strong," she said hesitantly.

STATE UNIVERSITY SYSTEM OF FLORIDA

Grandma Wheeler snorted.

"Strong? I guess she's strong enough! I was skinny too, when I married; but I had three babies when I was her age, and I'd taken two prizes for the best bread at the county fair, besides! And one for fancy quiltin'. She just needs gumption, that's all!"

"But she isn't used to farm work," Helga insisted. "It's hard when you're not used to it."

"H'mph! It ain't hard what little she does! Feedin' the chickens and ducks, 'n' washin' dishes 'n' makin' beds! Fussin' with flowers 'n' the baby! That ain't what I'd call hard work!"

"No, I suppose not," Helga admitted. Helga had done more than that when she was ten. "But it makes a difference when you've never done it. She taught school, didn't she?"

"Kindergarten. If she'd have taught a country school, I'd 've had more respect for her—but *kindergarten!*"

Helga groped for some words of defense, could find none but those she knew would irritate Grandma Wheeler still further. So she was silent.

"Well, I got to get back to my work," Grandma said at last. "I've seen the day when I'd 've had the wash out long before this. But I'm getting on! If I only had help like I'd ought to have, with my own son's wife right in the house—"

Helga drove on with relief. But she thought angrily of the old woman all the rest of the day.

When she reached Sary Overhiser's, Sary added fuel to the flame of her resentment. Sary said to her, "I wanted to ask you something, Helga. I been wanting to have a little party for Ma on her birthday—just some of the old ladies—and I can't decide about Grandma Wheeler. Helga, it's just awful, the way she goes on about Bess! It gets Ma all upset. Maybe the young'un can't keep house; but it don't seem becoming to me to hear a woman Grandma's age running down her son's wife from morning till night. I got a mind not to invite her."

HELGA looked away from Sary across the June fields. The daisies nodded at her and she thought of the Wheelers' garden, so bright and bravely beautiful. Helga was never cruel, but her mouth was a little stern as she turned back to Sary.

"I think it would be a good idea . . . not to ask her," she said quietly.

So began the ostracizing of Grandma Wheeler.

Helga felt sometimes a twinge of shame at what she had said to Sary. But one day she overtook Bess walking up from town, and asked her to ride. Heavens, but the girl was thin! Hardly pretty even, any more! Bess didn't talk much at first, though Helga tried several times to get started. Presently Helga said:

"Do you miss your teaching?"

Bess did not answer, and Helga turned to look at her. Bess was looking straight ahead, but down her too-thin cheeks hot tears were running.

"Why, Bess—what is it? Shouldn't I have asked that?" She knew she should not have.

"Oh, I *am* a baby!" Bess said then, impatiently. "Only, I do miss it so!"

"I wanted to teach," Helga groped; "but it didn't pan out. I love the Route, though. It's always beautiful!"

"Yes," said Bess. No more. Helga felt a little desperate. She wanted to put her arm around Bess, comfort her. But Bess was her own age, and Helga felt that she was seeming patronizing already. She wanted to tell her right out that she knew what the trouble was, tell her she was sorry.

But she didn't really know Bess, and there was a reserve about her that Helga hesitated to pass. When they came near the Wheelers', they could see the baby playing on the grass.

"Well, you have the baby, anyway," Helga said, and flushed with embarrassment at having implied so much. Bess was out of the buggy. She looked straight at Helga, and Helga thought of a trapped baby fox she had once seen. "Now,"

When Grandma Wheeler snorted at the flowers, Bess had the courage now to say, laughing, "Now, you *know* they're pretty there, Mother Wheeler!"

ga thought, "I've past that barrier!" : she hadn't.

Yes," Bess said, d he's *so* good!" nd that was all. : Helga was not y then that she d said a word inst Grandma eeler.

WEEK later there was a box for the eelers, and Helga ve up beside the se with it. Bess out weeding the vers. Helga could her childish short rand slender shoul- s bent above the ghtness. She was a flower herself, ga thought.

Oh, has them sepa- or pieces come at t?" Grandma eeler said from doorway. "Set right on the steps, lga. I'm up to my s in canning! The early rries have come on awful . I've got twenty quarts the stove right now; I n up since four a-pittin' . It's some job—all e!"

Helga felt anger rise with- er at those last words. wondered why Bess n't helped. Grandma eeler told her soon ugh.

Bess is in one of her s this morning. She't take a word of advice! tty contrary, uppish sort olks, I always thought, t couldn't take advice n folks a lot older. All I nted of her was for her to nge her apron. Anybody ws cherry stains are bad get out, and she had on of her best aprons. I't stand anybody that ks!"

"But it was *her* apron, sn't it?" Helga asked, a le tartly.

"What if it was? Does have to ruin it?"

Helga felt again that wave nger. She found herself ving away without an- ering. She stopped by flower beds and spoke ectly to Bess.

"It's none of my busi- s," she said, "but why n't you and Ed leave here l live somewhere else?"

Bess looked up. Her eyes were not ky. They were still and bewildered. e looked frozen inside.

"I don't know," she said. "You just n't seem to go. She's all alone, you ow!"

Helga couldn't find anything more to .

"It does me good to look at your flowers," she brought out at last. "Folks up this way don't do much with flowers. I don't know why, when it comforts so just to look at them." (*Continued on page 90*)

"You got a place to stow us away for the night, Helga?" he asked

"Daylight And Dark Are Mine Alike To Use"

The story of B. Frank Irvine, blind editor of the "Oregon Journal"—For twelve years the fear of blindness was before him, and when the blow fell it turned out to be a challenge to him to make more of his life

By Magner White

MORE than twenty years ago, B. Frank Irvine, then of Corvallis, Oregon, took a trip to San Francisco, California, accompanied by Mrs. Irvine. They were gone three weeks. When he returned to his business at Corvallis—he was running a small newspaper there—Mr. Irvine had passed the turning point in his life. For the thing he had been dreading and fearing for twelve years had happened to him while he was in San Francisco.

But B. Frank Irvine was far from downcast when he returned to Corvallis. He went about with a new enthusiasm, a new determination. As I have said, he had passed the turning point. From that day he went straight ahead.

Many men have told in these pages the interesting and often inspiring stories of how the turning points came in their lives—those incidents or events from when they have since dated their worth-while achievements.

But it was no ordinary thing that marked the turn in the career of B. Frank Irvine. It was something extraordinary! When he was in his early thirties, and just entering the real earning period of his life, he went blind!

This, then, was the calamity that was upon him when he returned from San Francisco to Corvallis to resume his place in the world. Although he had been fearing blindness for twelve years, when it did come it came on swiftly, with only three days of warning.

As the San Francisco train crawled over the California and Oregon mountains the young man was thinking how he was going to make his newspaper bigger, and planning his adjustment to the new situation.

He was restless, eager to get home.

The next morning he was at his office earlier than he had been for months. He plunged in, and lost himself in work.

He did make his newspaper bigger. He did more. He made himself bigger. He became one of the most widely quoted "country editors" on the Pacific coast. He became a leader in his community.

The management of a big daily newspaper in Portland, Oregon, heard his editorial voice and beat a path to his door. He was offered a job as editorial writer on the daily.

To-day he is editor of that newspaper, the "Oregon Journal," the largest evening newspaper in the northwestern part of the United States. And he is an outstanding figure in journalism on the Pacific coast.

He is a man of many and varied friendships. Many people call at his office to visit with him—railroad presidents, high government officials, famous actors and actresses, pioneers who knew him forty years ago, newsboys, a mother with a blind son. He is a man people like to talk to, because he has learned some of the greatest lessons of life, and has not become embittered in the tests.

He is in constant demand over all Oregon, and, indeed, over much of the Northwest, as a speaker. Schools besiege him every June to make graduation addresses, and he accepts as many of these invitations as he can, because he likes to encourage young people to make the most of themselves and their opportunities.

"I have not had a melancholy thought in fifteen years!" Mr. Irvine told me.

And no wonder, for he lives a most active and interesting life. Last winter he was a member of five dancing clubs.

Every day at noon he takes a swim at the Multnomah Club, never less than a half-mile, and often a mile.

He likes to get out on the Willamette River and, with a friend at the rudder, take out after one of the big Columbia River freighters in a rowboat.

HIS self-reliance is a constant wonder to his friends and associates. "We here in the 'Journal' office never think of him as blind," the managing editor told me.

Mrs. Irvine is his "eyes." She reads the newspapers to him, gives him suggestions for his editorial page, and, particularly, she sees that he stays in the forefront ranks of Portland's best and neatest dressers.

"How did you feel when you knew you were blind at last?" I asked him.

"Relieved!" he replied. "Twelve years of fear, of misery, of vain hoping and uncertainty had come to an end. I knew exactly for the first time what I was up against. Why, I could hardly wait for the train to get home so I could get back into harness again.

"What astonished me most was that the blow was nothing, absolutely *nothing*, compared with what I had expected it to be. Worry! Say, I built enough bridges of worry in those twelve years of uncertainty to have spanned every ocean in the world!

"I remember my first day at the office: I got down early, eager to find out how I was going to get along. About the place was a queer chap who did general chores. He was a Russian; a graduate from some European university—one of those mysterious personages from nowhere often seen in small towns.

Imagining What Might Happen Is a Fine Way to Waste Time!

"WORRYING is the most inefficient use you can make of your mind—and I'll tell you why," says Mr. Irvine. "In any situation it is true that there may be as many as a thousand *possibilities*. But there are only three or four *probabilities*. Now, when you worry, your imagination gets away from you. You find yourself looking at all the things that *might happen*—and you can't see the probabilities for the confusion, or the woods for the trees, as the old saying is.

"That's why it's useless to worry. Try to reason. Worrying is just wild guessing against odds.

"Well, when blindness came on me not a darned one of the things I had thought for years might happen actually did happen. I didn't drop out of the current of life; I didn't become a parasite on my family; I didn't lose my business. Instead, I began to find out that I could depend on myself, and I began to get a confidence in myself I had never had before."

"'Get a pencil and some paper,' I said him. 'I'm going to dictate some copy r next week's paper.'

"I couldn't then afford to have a enographer.

"It was laborious work. The Russian ten had to stop me while he caught up, r he was taking it down in longhand. e misunderstood some of the words, and dn't know how to spell some of those he nderstood.

"Finally, after two days of it, I couldn't and it any longer. I stepped over to my pewriter, slipped some paper into the rriage, and started writing. Say, that as a thrill! I poured e copy out.

"Now, why had I asted two days try-g to dictate? I had arned the touch sys-m of typewriting. hy, then, didn't I rite? I was afraid, raid I couldn't do —and as long as I lt that way, I uldn't. Worry and agination again, you e.

"The Russian looked my copy. 'Why, at's fine!' he said, ou've hit a capital for an A a couple of nes, and there's a istake here; but out-le of that it's as good you've ever done.'"

BEFORE we proceed with his story I nt you to have a mpse of Mr. Irvine. is about medium ight. His hair is a autiful iron gray and head is leonine, giv-him the appearance, nen he is at his desk, being much taller an he really is.

His face is marked th several lines, sou-nirs of a thrilling tomobile accident, out which he will l you later.

He declined to tell e his age, but I sus-ct it is somewhere ound sixty. This is duced not from any-ing in his appearance t from piecing to-ther details of his story. His step is brisk and springy. He is a hard worker. When you realize at he must get from what is read to him sweep of world affairs wide enough to able him to write from one to three lumns of editorials a day, in addition directing the general news policy of e paper, you can appreciate how vast ust be his capacity for work, and his ility to visualize conditions and memo-e facts.

He doesn't have the advantage other itorial writers have of being able to down a fact or a figure and file it away use later in the day. He must remember until he is ready to use it.

In learning to spell and remember the thousands of new words that have come into our language in the past twenty years, or since he has been blind, he doesn't have the advantage of making mental pictures of the printed words, but must remember the letter sounds.

"I haven't any particular system for remembering," he told me. "I simply store up the facts I want, and when I need them I find them right on tap. Practice does it—a conscious effort to remember."

Mr. Irvine was born in Scio, Oregon, a small town near Salem, the state capital. His father, originally from Kentucky and one of the pioneers, operated a small store, and for a time was in the livery stable business when Mr. Irvine was a boy.

PHOTO BY BERGER STUDIO, PORTLAND, OREGON

Although an urge to run a newspaper was in his blood, B. Frank Irvine tried out teaching, telegraph operating, clerking and dairy ranching before he became editor of the "Times," Corvallis, Oregon. While editing this paper he lost his sight. But his writing had attracted wide attention, and led first to the position of editorial writer on the "Oregon Journal," and later to its editorship, in 1920. In this article Mr. Irvine tells you why he no longer thinks melancholy thoughts

HE WAS always alert to advance the interests of Scio, and one of the things he did was to finance a man in the establishment of a small newspaper. The venture failed, and the elder Irvine was left with the plant on his hands. Frank took it over and got out a four-column paper which he called the "Semi-Occasional," a true description, he says, of its career. As the spirit and business conditions moved him he got out an issue, collecting the news, writing the advertisements and setting the type himself. Sometimes he cleared as much as four dollars on a single issue.

But Scio was small, and Frank had his schooling to look after, so the little newspaper died a natural death.

The experience had given the boy a taste of newspaper writing, however, and after that he began to send news items from Scio to the newspapers in larger towns. His masterpiece, at the age of thirteen, was the story of a fire in Scio. "Doc" Dodge's house got on fire. In the excitement, Dave Mason got caught on a picket fence and couldn't get up or down.

Frank wrote the story of Dave's predicament and sent it to the Albany "Democrat," which printed it. That brought the positive conviction to many people in Scio that Frank should be a writer—and he thought so too.

"BUT I lacked the self-confidence," he told me, "to go to a bigger town and ask for a newspaper job.

"My first real occupation was teaching school. Father was able, by the time I was old enough, to send me to Willamette University, from which I was graduated with a B. S. degree. There were no high schools in Oregon then. Teachers taught 'by the pupil,' five dollars for each one. I was fortunate in having teachers who took a special interest in me, and before I left Scio I had had trigonometry, advanced geometry, algebra, and Latin.

"When I returned from college, the Scio school board offered me the local school. It was a voluntary offer on their part. I took the job.

"Teaching school in your own home town is no snap. An atmosphere of dignity was expected of pedagogues in those days, and you can imagine my mortification over the fact that three fourths of the kids called me 'Frank' instead of 'Mr. Irvine.' Some of the boys were as big and as old as I.

"But we got along fine. They liked me, and obeyed me.

"The school that year had a bigger attendance than was anticipated. I took in so much money at five dollars a head that I was able to hire an assistant, and have nearly one hundred dollars a month for myself after paying her.

"I was saving money, and the outlook was promising. (*Continued on page 71*)

Lathrop Studied Art Behind The Plow

He looked and saw that beauty is everywhere—in the newly-turned earth, in stones, even in banks of mud; and he longed to paint the wonders his eyes revealed to him—He dreamed, he worked, he suffered disappointment; and then, at last, won fame by his pictures of simple scenes

By Sherman Gwinn

ON THE easel, in the raftered studio that was more than a century old, sat an almost completed picture. As I studied it—a novice, without any training in art—I wondered where I had seen that picture before.

A narrow little country road wound by a woods toward a city on the hill. The late afternoon sun gilded the tops of the distant buildings, and yellowed the green of the friendly trees. Already, shadows of the spring evening were gathering.

There was something warmly intimate about this painted scene that lacked only the final touches of the artist's brush. Familiar as a soothing memory was it; and yet I did not know the road, nor the city. Both seemed vaguely to belong not to fact but to almost forgotten dreams.

And then the artist, who stood at my elbow, spoke. He spoke as if I had become part of the picture, as if I were walking down the painted road.

"It is long ago," he said softly. "You have been wandering in the country, and this late spring day has been one of the happiest of your life. Now, as evening nears, tired and hungry you are approaching home. See, the city is in view as you turn the bend in the road. You are a little sad that the end of the day has come; and yet glad, for home, the haven, is just ahead."

Suddenly, I *was* a part of the picture, and the picture was a part of me! I remembered the very day, that very road. The city on the hill, which I had never seen in fact, was my city. This painting was a golden page out of my past, revived that I might relive it in memory. Again I felt the thrill of that bygone day.

Marveling and silent, I pondered the mystery of this bit of painted canvas which had rescued from the past a cherished experience I had all but lost. The picture had been conceived—perhaps years before—by a man to whom, until an hour ago, I had been a cipher. Not once had our paths crossed. Yet, as he had painted, a day of mine had sat as his model, a day that even I had almost forgotten. And now, like an old friend, his picture reminded me of that day!

Presently, the artist showed me other pictures: a corner of a wood on a drowsy summer day; a wind-swept bit of coast over which a storm gathered; a lonely hilltop at dusk. Each brought back memories such as come upon the leafing of a dusty album, untouched for years. Each revived its hour, its day.

AND there in the raftered studio, I realized why this painter of landscapes, William L. Lathrop, has been called great. He was not a painter of pictures, but a painter of memories. These, caught and made lasting by his brush, did not belong to me nor to anyone alone. They were the common property of mankind.

That unfinished painting on the easel, of the day's end with home in sight, it belonged to every man and woman who ever had experienced such a day—and who of us has not! That drowsy bit of summer woods—it could conjure dreams in a million minds! That lone road over the hill at dusk—it belonged to every person who had ever stood alone and, bound by duty, had faced the night!

"Hang any one of these pictures in any home," I thought, "and daily it will stir cherished memories. Day in and day out, it will help folks over the troubles of the moment by recalling them to the happiness of the past. It will shed light, like a glowing candle in a dark room."

I turned to the artist, to this builder of monuments to gone hours and gone days. Tall, straight, hair and beard grizzled by his sixty-eight years, he himself in that old studio setting appeared worthy of a master's brush. Here again, in the man himself was an inspiring picture.

YEARS ago, on a little impoverished Ohio farm facing the expanse of Lake Erie, he, a farm boy, had dreamed of painting pictures. His first canvases were scraps of linen from his mother's ragbag, bits of paper, pieces of white board, and the pages of his school books. His brushes were such as the druggist kept in stock for medical use. His paints were those to be found about any farm, left over from painting the house, the barn, or a shed.

He was self-educated in art. He had never attended an art school, nor studied art under a tutor. The work which he had done was exclusively his own, born within himself.

And this work of his, over the years, had received some of the highest awards in the field of landscape art: the W. T. Evans prize, the Webb prize, the First Altman medal of the National Academy of Design, gold medals of the Philadelphia Art Club and of the Philadelphia Academy of Fine Arts, gold and silver medals at the Panama-Pacific Exposition, to mention just a few.

His landscapes were represented in the country's most famous permanent collections, including that of the Metropolitan Museum of Art, (*Continued on page 140*)

You See Beauty Where You Have Learned to Look for It

"I LEARNED that comfort and ease—and cost—have nothing to do with real beauty," says Mr. Lathrop. "The costliest house is often an atrocity; the humble cottage may be a jewel of beauty. To me, an old freighter, rust-streaked and battered by the storms, is more beautiful than a newly painted ship. Its scars are the wound chevrons of its service. The seas, and not men, have painted its colors; and the seas are master artists.

"You may see beauty in the newly painted ship. The old freighter, you may say, is ugly. The view you take is the consequence of your training. You have been taught, perhaps, that the thing which suggests comfort, ease, and luxury is beautiful, and that which suggests discomfort and toil is unbeautiful."

William L. Lathrop

WITH all outdoors as his studio, and Nature as his teacher, William Lathrop swung into fame as one of our foremost landscape painters, after winning the W. T. Evans prize at an annual New York Water Color Show—an award much coveted by landscape artists. The prize-winning picture, a little water-color, not more than twelve by fourteen inches in size, swept the Exhibition, and the struggling, unknown, penniless artist, who for years had been miscast as a farmer and a country school-teacher, found himself a figure in art. He grew up near Painesville, Ohio, and began early to dream of line and color. This picture shows Mr. Lathrop at work on his boat, which he constructed in leisure hours at his home in New Hope, Pennsylvania.

OUT of George Hensel's desire for fun has grown a unique order. It is the Slumbering Ground Hog Lodge. Every February 2d, when the ground hog is supposed to emerge from his hole to view the weather, the lodge assembles to honor the occasion. Above, Squad No. 5 stages a demonstration of how it is done.

GEORGE W. HENSEL, JR., of Quarryville, Pennsylvania, is a hardware merchant, president of a bank, guardian of orphans, and a friend of the poor. He is also a story-teller of rare ability, a patron of old-time dances, and president of the Association of Consolidated Horse Detective Associations!

Photographs by the Killian Studio, Lancester, Pa.

THE fiddle quartet and Taylor McCummings, jig dancer, in action at Hensel's store, Saturday night. Not much tradin' is done, but the fiddles are kept hot. As Hensel puts it, "There's something about a fiddle—"

"The World Needs Fun And I Aim To Make Some"

So says George W. Hensel, Jr., of Lancaster County, Pennsylvania. And he continues: "I found I couldn't take any water out of an empty barrel, and that if I wanted more out of life, I'd have to put more into it"

By Helen Christine Bennett

IN THE AMERICAN MAGAZINE of October, 1926, Clarence Budington Kelland explained Scattergood Baines —that shrewd, likable fiction character around which he has written veral series of short stories. Scatter-ood, he said, is a Vermonter. He em-odies the characteristics of that state, nd is to be found in half a hundred of its nall towns. As Kelland has lived in ermont he must be right. But recently, hen I was in Quarryville, Pennsylvania, met Scattergood in the flesh, a Scatter-ood true to the Kelland tales, but whose rbears had been Pennsylvanians since efore the Revolution. If you, who have nown and loved Scattergood for many ears, harbor any doubts, just have a look t this parallel.

Scattergood Baines is a well-fixed hard-are merchant in his small town.

George W. Hensel, Jr., owns and man-ges the largest hardware store in Lan-aster County south of the Conestoga Creek, where you can buy anything from ins to cook stoves.

Scattergood owns a large number of hares in the local bank.

Hensel is the president of the Quarry-ille National Bank, the financial Gibral-ar of southern Lancaster County.

Scattergood is financial adviser to the eople of his community.

Hensel is the guardian of orphans, the onsoler and adviser of helpless widows, he friend of the poor, the feeble, the old. He writes most of the wills of the neigh-orhood and administers the majority of he estates. Twenty-five children have een willed to him and those who have rown to manhood are able and respected itizens.

Scattergood believes in the power of a ood yarn.

Hensel has been telling yarns all his ife, and writing them for the past twenty ears. His column in the Philadelphia "Inquirer," "Down Lancaster Way," is read from coast to coast, and he receives hundreds of letters each year from all states of the Union.

Scattergood mixes a bit in political affairs both local and state.

Hensel has held but one office, post-master under Cleveland; but his political power is felt in both state and national conventions, and once his friends nominated him for Vice President.

Scattergood says: "Man is of few days and full of trouble. I calc'late we give" (in each story) "about a half-hour of fun. And crowd out a half-hour of trouble. And that's good enough for me."

George Hensel says: "For twenty-five years I've been hunting the fun in life. And for twenty-five years I've been finding it. You can't take more water out of a barrel than you put into it; so I make the fun."

NOW if your vision of life is so real and earnest that sheer fun for its own sake, with no purpose or moral attached, bewilders you, lay down this article right here. But if, like Scattergood and Hensel, you are seeking the fun in life, keep on, and you'll learn how to find it.

When I met Hensel in Lancaster, Pennsylvania, I noted, as I went toward him, that even his thick-set figure with the pronounced middle quarter carried out the Scattergood illusion. A heavy, slow-moving man with a bald head fringed with gray hair, strong features, flapping trousers and coat, cut generously to permit sitting down in comfort, a broad-brimmed black hat, under which looked forth a visage solemn yet humorous. Hensel rarely smiles. He is preternaturally sober, or he laughs great, hearty laughs that redden his pale face and shake him from head to feet.

I had gone to Lancaster County to see George W. Hensel, Jr., not because of his resemblance to Scattergood, but to see a man who has built for himself a reputation of getting almost one hundred per cent out of living. What higher praise can a man receive than this? Naturally, I was eager to get acquainted with a man who, with a moderate financial success, had built himself a plan of life and a philosophy that had won happiness for himself and the high esteem of all those who knew him.

As we journeyed through the fertile fields of Lancaster County, Hensel talked a great deal of the countryside and its people, but very little about personal matters.

"I'm not much at talking about myself," he admitted, when I probed for detail. "There's a good deal of talk that never gets anywhere, like the ducks.

"You see, there was a green farmhand in Ireland, who had been put out to learn. And he was coming 'round the barn idlin', when his master saw him.

"'What ye doin', Pat?' asked the master.

"'Nothin'; what would I be doin'?' asked the green hand.

"'Feed the ducks,' directed the farmer. So Pat, not knowing about ducks, went and did what he thought best, and returned to the master.

"'Have ye fed the ducks, Pat?' he asked.

"'Sure, I fed 'em.'

"'An' what did ye feed 'em?'

"'I fed 'em hay.'

"'An' are they a-eatin' of it?'

"Pat scratched his head.

"'We-ll,' he replied, 'they're a-talkin' about it!'

"A good deal of our talk is like that of the ducks, it doesn't get anywhere."

WE DROVE on down to Quarryville, and stopped at the crossroads known locally as the "gateway to the South," just fifteen and a half miles straight to the Mason and Dixon line. On one corner stands the red brick bank Hensel heads, on the second, large warehouses storing the bulkier of the hardware supplies, and on the third, a rambling, low, white building bearing on its corner stone the carved inscription: "Where the race of men goes by," a building housing both the hardware store proper and the home of the Hensels.

Josephine Martin Hensel was waiting for us, and greeted me with the warmth she has extended through more than thirty years to all kinds and conditions of humanity—and numerous friends of the lower animal kingdom—brought by George Hensel beneath that roof. The hospitality of the Hensel home is limitless; almost no day passes without a stranger within its gates, and the town folks come and go like the tides of the sea, unceasing. From its sheltering walls no one goes forth without cheer and comfort and at least one hearty laugh at Hensel's quaint tales, and at times the stone foundations rock with the laughter of great gatherings for a day of fun. "Be Yourself, George; Be Yourself!"

By Mary B. Mullett

ONE evening, about seven years ago, a new Shubert revue was opening on Broadway. As on all first nights, the back-stage atmosphere was tense with excitement, as if permeated with an electric current. But it was in the dressing-room of a young actor named George Jessel that this current reached its peak.

For one thing, this was to be his first chance in a big Broadway show. During almost ten years he had been doing sketches and monologues in vaudeville. If he made good now, it would be a long step forward.

He had been engaged simply to give one of his vaudeville specialties. He might "go over big," or he might not! You never can tell in advance. But, anyhow, he was feeling pretty good over his luck—when suddenly the unexpected happened.

A little while before the performance was to begin, J. J. Shubert opened the door of Jessel's dressing-room.

"Do you want a chance to make a real hit?" he inquired.

For the fraction of a minute, Jessel could only stare in surprise. Then his answer flashed back.

"Lead me to it!" he said.

Whereupon, Shubert explained that one of the actors in two important numbers could not appear. If Jessel thought that he could step into the breach . . .

But Jessel didn't waste time thinking. He had been knocking at the Door of Opportunity until his knuckles were tired. This offer sounded like the turning of the key in that door, so he didn't hesitate.

"Give me the cues," he remarked crisply, "and I'll do it."

When he had reached this point in telling me the story, he paused.

"I want you to get this," he said. "We actors have our drama off the stage, as well as on; and the twenty-four hours that followed that opening performance were the most dramatic ones in my life.

"I didn't have time to learn the lines of the actor whose place I was to take. Anyway, they were built up around his personality—not mine—and I didn't want to give a mere imitation of someone else.

"When the first of these two numbers began, I waited in the wings until I heard one of the actors on the stage say, 'Here comes Jack. He'll tell us all about it.'

"That was my cue, and I walked on. But instead of taking up the part as it had been written I went down to the footlights, and said to the audience, 'I don't know, any more than you do, what this is all about! I wasn't hired for the part until about half an hour ago.'

"Then I began to 'ad lib,' telling a lot of jokes, and trying to put over my own kind of stuff.

"Fortunately, it went over. A first-night audience is a very sophisticated one. It likes to be surprised. And it is quick to catch on, eager and responsive. In this case it was especially friendly because it knew that I had jumped into the part at the last minute.

"As a result of all this, the crowd was with me from the start, and I made a big hit. As a result of that, the Shuberts signed me up, the next morning, for a five-year contract as a star! And when the doors opened that evening my name was in electric lights over the entrance.

"Sounds fine, doesn't it? Congratulations poured in, and I thought I was 'made' for life. But when the final curtain fell, my balloon was as flat as a pancake.

"The second-night audience was just an average one. Their attitude was, 'Well, we've paid our money; now show us what you've got.'

"I was no longer a surprise. After seeing my name in electric lights they not only expected me but they expected me to be a 'wow.' I couldn't get their interest on the plea that I was a last-minute pinch-hitter. They thought that was just bunk. So the very same stuff which had convulsed the first-night audience just died when I tried it the second night! Instead of a hit, I was a failure.

"The very next morning the electric lights that spelled my name were taken down. I had thought I was a star. But I had been only a twenty-four-hour rocket."

PERHAPS this is, as Jessel said, the most dramatic episode in his life; but it is by no means the only one. From the time he was born, twenty-eight years ago, his career has been a continuous drama.

"In at least one respect," he told me, "I am different from other Jewish actors. They were born in the East Side tenements of New York. I was born on the upper West Side. But that doesn't mean Riverside Drive. It means a little flat on Amsterdam Avenue.

"If my father had lived, he might have reached the Drive in the course of time. But he died when I was nine years old, and the family prospects died with him.

"Said family consisted of my mother and myself. There was no money to support us, so she earned our living by selling tickets in a motion-picture theatre.

"Even so, our income fell short of our needs, and I helped out by singing ballads in the theatre where she sold tickets; kid songs, you know, like this one:

I want somebody to play with,
Someone, for I'm all alone.
Someone like you, with a dolly or two,
To play till my mother comes home.
She went away with the angels—

"And so on. For these daily warbles I received four dollars a week, Sundays extra. On Sundays I sang my songs at a piece-work rate of ten cents a song.

"One of the performers at that same theatre was no less a person than Eddie Cantor. He was about seven years older than I was; and he has been a sort of big brother to me ever since.

"A few months after our meeting, Eddie was engaged by Gus Edwards for a vaudeville child specialty act, called 'The Kid Cabaret.' He persuaded Edwards to include me in the cast. So, at nine years of age, my future career was settled. I was 'on the stage.'

"For six years I was with Edwards; first in 'The Kid Cabaret,' then in his 'Song Revue.' We played vaudeville houses all over the country. I didn't have a chance to go to school. Once in a while my mother would travel with me, for I was getting fairly good money. But most of the time 'home and mother' was only a phrase to me.

"'GROWING up' was only a phrase, too. At fourteen, I was just about the same size I had been at nine. But when I was fifteen I suddenly started to make up for lost time.

"It seemed as if I grew several inches overnight. My voice changed. A baby mustache decided to take up residence on my upper lip. My little suit ceased to be cute, and became a joke instead. As a child actor, I was through!

"That was in 1913—and the '13' was certainly an unlucky number for Georgie Jessel! I managed to get a few engagements, but I was a failure every time. I had acquired little mannerisms, which had been all right in a child actor but were unpleasing in a more or less grown-up one. Like my little suit, they were no longer cute.

"My optimistic manager, Max Hart, risked sending me abroad. But my reception was bad in London, worse in Scotland, and worst in Ireland. They said I was too fresh. I didn't mean to be. It was just a hangover from the cockiness which people had liked in the kid actor.

"I had outgrown that appeal, and hadn't developed anything in its place. So I came home, with another failure chalked up against me.

"'I guess there's only one thing for you to do,' Hart said. 'Keep out of sight a few years, until everybody—including yourself—has forgotten you were a child actor.'

"'That's all very well,' I told him; 'but I can't get along, even for a few years, without eating!'

"'Well,' he said, 'can't you find a character you can hide behind? Why don't you try blacking up?'

Digitized by Google
Original from
STATE UNIVERSITY SYSTEM OF FLORIDA

"The only trouble with that suggestion," Jessel went on, "was that I wouldn't follow it. I can't explain just why, but I've never been willing to do a black-face act. Perhaps," he admitted, "it was because I had a hunch that I couldn't do it well enough. Anyway, when I balked at that, Hart suggested my trying what is known as 'clown white.' I did—but it was no use—the audiences didn't like me.

"Then I got a part in a vaudeville sketch called 'A Ray of Sunshine.' The title was rather misleading, for it was anything but a sunshiny play! My rôle was that of a boy who has the delusion that he is George Washington's son. Audiences don't like characters who aren't 'all there' mentally; so the sketch didn't go over.

"Another failure in my rapidly growing list! But, just the same, I found in that sketch a hint of the sort of thing I wanted to do. There were lines in it that had real feeling. In my old kid songs, like the one I quoted to you, there was an attempt to tug at people's heartstrings. In them, the attempt was just silly bunk. But in certain lines of 'A Ray of Sunshine' I could feel that I did reach people's hearts, because the lines had truth and sincerity.

"SO I had my idea; but for a long time I didn't know how to use it. I just blundered along. The only thing I can claim any credit for was that I stubbornly refused to be a mere imitator of other people, even though they were winning the success which I was *not* getting.

"For instance, the Al Jolson-Eddie Cantor method of singing songs was becoming the rage. You might call it the acrobatic method, with its snapping of fingers and violent motions. It gets more out of a song than any composer ever dreamed of putting into it.

"Jolson and Cantor were wonders at this; and imitators sprang up by the dozen. Of course I was advised—and was tempted—to join the procession. But I knew that this method wasn't *mine*. It wasn't natural to me. Even if I could put it over, my success would be only a borrowed one. So I just set my teeth and tried to find some way that would be *my own way* of winning the public.

"I knew what I wanted to do. I wanted to get laughs, but with a bit of sentiment underneath them. And I wanted to get tears, but with a smile behind the tears.

"I wrote several sketches which went fairly well. Then I hit on the idea of doing a monologue which was supposed to be a talk with my mother over the telephone. That gave me the chance to bring in references to all the members of an imaginary family.

"My mother and my grandmother were the only real ones; but I had a regular army of relatives, who provided all the realism I needed. Our family was one of those sentimental ones that are unconsciously funny, especially when they think they are pathetic. So if I was borrowing at all it was from real life.

"This telephone monologue went so well that the Shuberts engaged me to do it in 'The Gaieties.' And it was then that I went up like a rocket, the opening night, and came down like a stick twenty-four hours later.

PHOTOGRAPH BY BLOOM

George Jessel, star of "The Jazz Singer." Mr. Jessel was born in New York City, and began his stage career when a child. He knew many lean years because he persisted in his determination to "be himself," rather than imitate someone else

"AS I told you before, my name disappeared from the electric signs after the second night. At the end of a week, the two extra numbers were taken away from me. At the end of two weeks, I was out of the show entirely!

"Of course I still had the five-year contract which they had given me when it looked as if I had made a big hit. But a contract is cold comfort to an actor if it allows him to appear only on paper. I wanted to be working. So I gave up my contract and tried to get a job.

"The offer of the Shubert engagement had been so tempting that I had deserted my vaudeville bookings in order to take it. This had made the vaudeville managers sore; and now that I had failed with the Shuberts they had a chance to get even with me. They certainly did it! Not one of them would let me into vaudeville again.

"I had to do something, so I started to write songs. As this was soon after the war, I wrote one song, reminiscent of our soldiers in France, called '*Ooh, là, la! oui, oui!*' It sold one million and five hundred thousand copies. Another was called, 'Oh, how I laugh, when I think how I cried about you!' I made quite a lot of money out of royalties; but, to be perfectly frank, I was a fool and spent it as fast as I earned it. I was young—only a little past twenty—and I had some hard lessons to learn.

"During this period I also wrote a play, called 'Mama's Baby Boy,' but I couldn't get anybody to produce it. Finally, the vaudeville managers relented and let me do it as a sketch. It was a pretty big thing for vaudeville, for there were twenty-three people in the cast; but I wouldn't have agreed to cut it down to a sketch if I hadn't been promised a regular production later on. However, this promise never was carried out. Another disappointment!

"After two years of 'Mama's Baby Boy' in vaudeville, I was engaged to provide one of the so-called 'Shubert Units.' A 'unit' (*Continued on page 170*)

Where There Isn't A Will There's A Way

Two is company except when they're both grooms, then it's an awful crowd— Ask Effie May

By Ellis Parker Butler

ILLUSTRATED BY R. M. BRINKERHOFF

"You get up and come down," Mrs. Wrinch ordered. "You got yourself into this fix, and you can get yourself out"

WHEN Mrs. Wrinch had climbed the stairs, she paused a moment outside her daughter's door, partly to get her breath and partly to listen whether her daughter was still weeping.

Effie May was still weeping. She had been weeping all day. She had come down to breakfast and she had come down to lunch; but she had sobbed through both meals, and immediately after each meal she had gone to her room again, locking the door, and had wept there.

Now Mrs. Wrinch, her mouth quite firm, rapped on the door.

"Effie May!" she called sharply. It was the tone of a mother who has had a quarrel with her daughter and who is still angry with her.

"Yes?" Effie May answered, and her tone was that of one who has been most unjustly treated by an unkind world and who is still suffering from its cruelty. The word with which she answered her mother was more a wail asking for sympathy than a query.

"You got to get up and come down," her mother declared. "One of them young men has come."

She heard Effie May blow her nose and heard the springs of the bed creak slightly, but she did not hear Effie May getting to her feet.

"You get up and come down," Mrs. Wrinch ordered. "That's all there is to it. You got yourself into this fix and you can get yourself out. I got to get dinner. The young man is sitting on the porch. And there he'll sit for all of me," said Mrs. Wrinch, "till midnight!"

"Ma," wept Effie May.

"Well, what is it?" asked Mrs. Wrinch impatiently.

"Which one is it?"

"How do I know which one it is?" said Mrs. Wrinch.

Effie May listened to her mother's heavy tread as she went down the stairs again. For a few moments Effie May remained on the bed, dabbing at her eyes with her handkerchief, and then, still weeping, she got to her feet and prepared to go down.

She did her glorious golden hair as beautifully as she ever did it, and she took her usual pains to arrange her garments effectively, discarding three pairs of silk stockings before she was satisfied; but as she made her preparations she wept.

She wept quite frankly as she rummaged in the bottom of her closet among her six pairs of low shoes, trying to decide which was the best pair to wear this time. She knew it would be impossible to remove the traces of her weeping from her face, particularly as she knew she was going to continue to weep, but she bathed it and wiped the fresh tears away while she used powder and lipstick.

EFFIE MAY was in very great trouble indeed. She was engaged to marry. She was engaged to marry Willard Brown. There was nothing in that to make a girl cry, but she was also engaged to marry Wayland Brown.

In Westcote the Brown twins were quite famous, not because they were especially alike, for they were not more alike than many other brothers, but because they were such fine, big young fellows and so inseparable. They topped six feet and they were always together. They had played football together in school; they had won the championship for their school three years in succession. They were as gaunt as they were tall, and they had equally an unconquerable bulldog quality that refused to admit defeat.

Timmerson Brown, their father, was as unlike his sons as man could be, for he was a chubby man, always laughing and endlessly good-natured, and he had played a rather unfair trick on his wife when he named the twins.

Willard and Wayland are perfectly good names for any boys, and Mrs. Brown had accepted them as such, but Mr. Brown had known that the names would be shortened to Will and Way. It was his little jest to say that where there was a Will there was a Way. On the whole, Mrs. Brown did not complain; Timmerson Brown was quite capable of calling the boys Pete and Repete.

Although he was a prosperous dry-goods merchant, Timmerson Brown had not wished his boys to be merchants. They had been graduated from college together, and Way had gone at once into the office of Tanner Brothers, the sewer and road construction contractors. Will took a little more time, and after looking over the field carefully, entered the office of Harvey Cale, the surveyor.

BOTH boys were doing splendidly. They were serious-minded boys; people even remarked that they were old for their years. This was because they had such sedate manners and bony faces. They liked fun; but they had always been somewhat shy.

Dropping football when they left college, they had looked about for some other

rm of exercise, and this had led them nost inevitably to the National Guard ompany and its basketball team. Presitly they were stars in the basketball mes. These games were always made cuses for dances in the armory, and the sketball team and the girl friends of the embers became a "bunch."

One of these girls was Effie May Wrinch. e was far and away the prettiest girl in e "bunch"—one of the prettiest girls in wn. She was the most helpless little ing, sweet and appealing, like a bigled, golden-haired doll. She had the ost amusing, senseless chatter, and she nced like a fairy.

AT FIRST Will and Way thought of her only as one of the "bunch." At e dances the "bunch" would run across e street to Miffin's for soda, or evenward eleven—make a rush for Tim's for t coffee and sandwiches. The "bunch" ways started home together, and when ey split up one young fellow sometimes ok one couple of girls to their homes and metimes another couple.

But one night in late spring, after the nal dance of the season, when the "bunch" ached the corner where they split up, Vay Brown put his hands under the bows of Effie May and her friend Alice nd turned toward their street.

Before they had gone five steps Will rown called to them.

"Oh, Way!" he called. "I'll take Alice nd Effie May, if you say so."

"It's all right; I'll take them," Way alled back.

They dropped Alice at her gate and Vay and Effie May loitered on their way. n hour later, in Effie May's porch hamhock, Way and Effie May were kissing assionately and were engaged to be mared. When Way reached home he paused t Will's door, but Will was sound asleep, nd Way went to his own room.

The next night about eleven o'clock Will Brown opened the gate and walked up the short path to the Wrinch house. For three hours he had been walking about trying to decide whether it was wise to marry before he was earning more and whether he could live without Effie May much longer. From the street he had heard the creaking of the hammock as Effie May swung it gently.

"Effie May!" he called softly in the darkness.

"Hello, honey!" she answered eagerly.

"May I come up there a minute?" he asked hoarsely.

"You certainly can," Effie May answered, and Will went up. It was totally dark, but he heard Effie May laugh in a giggling sort of way, and as he felt with his hand in the darkness Effie May took it and kissed it. When he dropped beside her in the hammock she snuggled close to him. All his shyness departed instantly.

"Sweetheart! Sweetheart!" he cried, and kissed her, and she cuddled closer to him. He could not, afterward, remember exactly what he said or what she said, but he thought that what he said—after he had kissed her again—was, "And you'll marry me, won't you, dearest?"

"Of course, you darling boy," he thinks she said next. "You just know I will!"

"Right away!"

"Oh, no!" she said then, as well as he can remember it. "It can't be right away, sweetness. Not until June. I can't get ready, possibly, before June. It must be a church wedding, big boy."

"I don't care what kind of a wedding," he thinks he said.

"But I do," he seems to remember her saying. "Mother did not have one, and she has always been so sorry. She always told me never to be married unless I had a church wedding. She says a girl is only married once—"

"You'll only be married once," he thinks he said next. "Have it a church wedding if you say so. And June, if you insist. The first day of June!"

"No," she said, "that would be unlucky. The first of June is Friday."

"The first of June is not Friday," he knows he said. "The first of June is Wednesday. Will you marry me the first day of June if it is not Friday?"

"Yes," she said, and of this he is positive, because he took his pocket diary from his pocket and struck a match to make sure he was right about the day of the week on which the first of June fell.

AS HE struck the match Effie May uttered a cry of dismay.

"Oh!" she cried and drew away from him.

"What is the matter?" Will asked with concern, because he thought the match might have burned her hand.

"You're Will!" she exclaimed. "I thought you were Way. Why, I can't marry you—I promised Way!"

Will looked at her in amazement—looked until the match burned his fingers and went out.

"When did you promise Way?" he asked hoarsely.

"Don't be angry with me, Will," she pleaded. "I didn't know it was you. I thought you— Oh, this is terrible!" and then she began to cry and Will put his arm around her again. She cried against him.

"Now, don't cry, Effie May," Will said. "There's nothing to cry about. You like me, don't you?"

"Oh yes! Yes, I do, Will," she wept. "You know I do, Will."

"You love me," he asserted. "You do, don't you?"

"Yes—yes—" she sobbed.

"Then there's nothing to cry about," Will said rather sternly. "You've prom-

They talked until two o'clock in the morning, but they did not quarrel. They were too fond of each other to quarrel

ised to marry me and you've got to keep your promise."

"But—but I promised Way," she sobbed.

"I don't care who you promised," declared Will. "I don't care if you promised a thousand fellows. You may have for all I know—but you promised me last, and that's all I care about. That's what counts. Don't cry now; quit crying. Honey, don't cry like that; I'll fix it up with Way. It will be all right. Listen, sweetheart, don't worry about it. You go on in to bed and I'll fix everything all right. Kiss me!"

She continued to cry and explain that she had to marry Way, and Will kept her in his arms, kissing her and telling her she had to marry him now that her promise was given, and finally she gave him a wet kiss and went into the house weeping, and Will went home.

He awakened Way and told him he was engaged to Effie May, and Way sat on the edge of his bed and said he would be hanged if anyone but himself was engaged to her and they talked until two o'clock in the morning, but they did not quarrel. They were too fond of each other to quarrel.

Finally, Will yawned and said he was all in and that the best thing to do was to sleep on it, he guessed, and Way got into bed again, and Will went to his own room and was asleep as soon as could be expected.

The next day Way was busy until late in the afternoon, and then he went up to the Wrinch house to see Effie May. Usually the Brown boys faced the world with clear eyes and smooth brows and with heads held high, but Way Brown frowned as he walked to the Wrinch place. He had his hands thrust far into his pockets and his hands were doubled into fists.

"I want to see Effie May," he said when Mrs. Wrinch came to the door, and he was abrupt to the edge of rudeness.

"And I should think you would want to!" exclaimed Mrs. Wrinch, glaring at him. "Whichever you are," she added.

EFFIE MAY came downstairs crying. She felt utterly miserable and wicked. She loved both twins so much she did not know which she loved more, and she knew she would lose them both and that they would hate her forever, so she was crying with all her heart, like a hurt child, one hand feeling the wall and the other holding a wet handkerchief to her eyes. When Way Brown heard her sobs he jumped out of the hammock into which he had dropped, and ran into the hall.

"Effie!" he cried. "Effie May, don't cry!" and he took her into his arms and drew her shelteringly to him and kissed her passionately.

Mrs. Wrinch looked into the hall and then closed the kitchen door with a bang.

"I'm so wicked! I'm so miserable!" Effie May wailed, clinging to Way.

"No, you're not," Way said. "You're the sweetest girl in the world, and that's all you are."

"But I don't know what to do," Effie May sobbed. "I don't know which one of you to—to marry!"

"Why, of course you don't," Way comforted her. "Nobody would; I wouldn't myself. You've got a right to like Will—Will's fine. You bet Will's fine. Only he can't have you, Effie May, because you're going to be mine. You *are* mine. I've got a right to you; you promised me first."

"He—he says I'm his, be-because I promised him last," Effie May sobbed with her face against Way's coat.

"That's fool nonsense," said Way stoutly. "He's got his logic wrong, that's all. I'll talk that out of him, you bet. But don't you worry any more; it's nothing for you to worry about—the whole thing is up to Will and me. You didn't do anything; I'm glad I'm engaged to you, and Will is glad he's engaged to you. Aren't you glad you're engaged to us?"

"Ye-yes!" wept Effie May.

"Well, there you are!" said Way. "Everybody's glad. I would have been broken-hearted if you had turned me down, and so would Will have been. You didn't do anything—you did the right thing. Of course you did!"

"I—I FEEL so guilty," Effie May wept, but less violently. She felt immensely comforted there in Way's arms.

"You needn't a bit," said Way. "This is not your business—this is Will's and my business, and we'll fix it up between us. Let me wipe your eyes. That's the girl! Give me a smile now. That's the girl! You'll be all right now, won't you?" he begged. "You'll leave this to us, won't you? That's the girl!"

He kissed her again, and she laughed a half-hysterical little laugh and wiped her eyes.

"My face must be a sight," she said, quite comforted. "I cried all night and all day, Way."

"You poor kid," Way said. "But don't think of it any more; you let Will and me do the worrying. You've got enough to do."

"To do?" she asked, not understanding him.

"Getting ready to be married," he explained. "You girls have to fuss up a lot of clothes, don't you? And Will says it's to be a church wedding, you li'l rascal. Spats and everything. And June sometime."

"June first," Effie May said.

"June first." Way repeated, making a memorandum in the little red book he always carried in his vest pocket. "Will told me; but I was sort of agitated and didn't catch it quite. June first suits me. I'll be waiting at the church with all flags flying. Daytime or night?"

"Noon, don't you think?"

"Fine!" said Way. "That suits me if it suits Will. Did you and Will talk about which church it would be?"

"I thought it would be the chapel, Way," said Effie. "It's easier to decorate a small chapel than a big church. I think it's nicer to have a small place filled with people than a big one half full, don't you?"

"The chapel suits me," Way said. "Did you ask Will about it or shall I? I guess he won't care any more than I do. That means Mr. Raylor will do the marrying. He's all right. Did you and Will talk about the wedding trip?"

"I'd like to go to the mountains somewhere," said Effie May diffidently. "I've never been to the mountains."

"That suits me," said Way, "and I guess it will suit Will if—but he's not going to marry you, and he needn't think he is. But I'll tell him. I'll look up some good mountains; there are plenty of moun-

"I'd like the one that doesn't marry me to be the other one's best man," Effie May said wistfully

"I'll tell you, Mother Brown! You tell me which to marry!"

ains around one place or another. I've ot to get a cutaway coat."

"And spats, Way," Effie May said, uite happy now. "You've got to wear pats. They're just too smart! Pearl-ray spats, like the duke and that prince vore. Tell Will, too, will you, Way?"

"I'll tell him," said Way; "but it's not nuch use—I'm the one that's going to narry you. But, look here, do I have to vear spats? I'd rather be shot than wear pats. If there's anything makes me feel ike a fool it's to wear spats!"

OF COURSE, you don't have to marry me if you don't want to," aid Effie May. "I guess Will—"

"Oh, I'll wear them!" said Way quickly. "I'll even wear a stovepipe hat if you say o. But I'd rather be shot."

"I don't believe they wear stovepipe hats with cutaways," said Effie May doubtfully; "but I'll find out and let you know. I'm going to have my maid-of-honor wear blue and my bridesmaids wear rose."

"Effie May," said Way, who had not heard her last words because he had been thinking.

"What, Way?" she asked.

"I believe stovepipe hats can be worn with cutaways if you insist. I believe I've seen pictures of them—swells coming out of churches with their brides on one arm and their stovepipe hats on the other arm, and wearing cutaways and spats," said Way eagerly. "Why don't you say right now that whoever marries you has to wear spats and a stovepipe hat?"

"Why?" Effie May asked.

"Well, I don't believe Will would wear them," said Way frankly. "I heard him say once that he would die rather than wear a stovepipe hat. I don't believe he'll do it. And if you said right now that the man you married had to wear a stovepipe hat—well, it would simplify things a lot. If Will would come right out and say he wouldn't wear a stovepipe hat—"

"I guess you don't know how much Will likes me," said Effie May simply. "Will would wear anything to be married to me, I guess."

"I'm afraid so," said Way, sighing. "*I* would. Well, I'll have to fix it up with him some way. We can't both marry you, that's sure!"

"No, you can't both marry me," Effie May agreed, "but I'd like—"

"What?" Way asked her.

"I'd like the one that doesn't marry me to be the other one's best man," Effie May said wistfully.

"If Will was going to marry you I'd be glad to be his best man," said Way; "but you'll have to speak to Will about it. I'm the one that's going to marry you."

"But if Will does marry me—"

"Of course," Way said, and they talked further about the wedding, as engaged lovers will, and presently it was dinner hour, and Way had to go and Effie May went singing into the kitchen.

"YOU'RE mighty happy all of a sudden, seems to me," said her mother. "Bawling your eyes out one minute and singing like a lot of canaries the next! Heaven knows what to make of girls these days. What happened?"

"I'm so happy, Mother!" cried Effie May. "It's all fixed up—Will and Way are going to decide it between them. We're going to be married in the chapel, at noon, and they're going to take me to the mountains for the honeymoon—whichever goes. Mother, can I have engraved invitations?"

"Engraved— You'll have to ask your pa about that, Effie May," Mrs. Wrinch said. "Business has been none too good in the ice business yet this spring. Well, they're nice boys, whichever it is. They'll have a lot of money one of these days, if their old man don't go bust."

"I DON'T care for money," said Effie May. "I'm marrying for love. I always said I would too, didn't I, Mother? I always said I would never get married until I found a man I loved with all my heart—"

"You've found two of him, seems to me," said Mrs. Wrinch somewhat dryly.

"Well, of course, Mother—" said Effie May hesitatingly. "Well, I know how you would think about it, because you don't know the twins as well as I do; but if you did know them as well as I do you would know how a person could love each one of them with her whole heart, because that's the way they are, Mother. They're both the kind you can love with your whole heart, don't you see, Mother?"

Mrs. Wrinch opened the oven, peeked in, and slammed the door.

"You sound like a fool," she said; "but you're talking more sense than you've any idea of. What are men, when you come down to it, but a barrel of apples, and if you like them you like them, and that girl is wrong somewhere that can't love any one or two of them that is sound and decent—or a whole lot of them, for that matter—until she has took her final pick and gone crazy with partiality.

"I'll say this for you, Effie May—you've chose better than I ever guessed you would, be it Will (*Continued on page 133*)

A Man's Debts Are Sometimes The Measure Of His Courage

But he must be sure he is borrowing for a wise purpose, says John H. Camlin, one of the men who helped to build Rockford, Illinois—As a youth he traveled far, searching for adventure. This is the story of how and where he found it

By Neil M. Clark

JOHN CAMLIN'S eyes lighted with interest as he strode up the main street of Rockford, Illinois, on the first day of September, 1883. For the first time, he found himself in one of those raw, new towns of the West, stories of which had long stirred his imagination. His glance took in unpaved streets awash with mud, sidewalks made of planks laid high, buildings, many of which were of unpainted wood, and men and women who appeared to possess in good measure the characteristic energy and hardihood of the frontier.

"This," he told himself, "ought to be an interesting place to stop a while—until I'm ready to go on."

For John Camlin, an English lad into whose nostrils from childhood had been blown the smell of the salt sea, was an incurable adventurer, smitten deep with wanderlust. Having heard the call to far places, he meant to go on and on along dim trails to the ends of the earth, to where only a few rare spirits venture.

"Yes," he told himself, jingling in his pocket the three dollars which were the last of his money, "I'll see what there is to be seen here; make a little stake, and then go on."

That was forty-three years ago. The other day I found John Camlin still in Rockford. And yet I learned that the glory of his dreams had not died. He had found what he sought—adventure—in unexpected guise in that pioneer Illinois city, and he had stayed to savor to the full its heady flavor. By doing so, he missed some of the far places—though he visited many of them, too—but he tasted in their stead the sweetness of a life made rich by satisfying achievement.

Briefly, John Camlin is one of those men of whom a few may usually be found in every city. They take an active share in a variety of important activities; make money for themselves and others by their vision and enterprise, and eventually, because of their integrity and willingness to serve, they come to be known as first citizens of their communities, and are drawn inevitably into wider spheres of service.

For John Camlin, special tasks were in store. He is head and sole owner of the John H. Camlin Company, one of the large fire insurance agencies of the Mid-West and much the largest agency in Rockford, dealing also in bonds and real estate loans. He owns or controls much valuable property in the business heart of Rockford; he is vice president of two manufacturing companies, and a member of the board of directors of a dozen. He has been president of the Illinois Chamber of Commerce, an office to which he was elected annually for five years; and he has served as president of the National Association of State Chambers of Commerce.

A career busy and distinguished, certainly; but how in it did he find adventure? As the story is told, I think you will see.

CAMLIN'S motto is the ringing slogan of adventurers: "Bold men win." He also cherishes the conviction that what one man can do, another can do. All his life an athlete, at the age of sixty-three he retains the vigor and rugged health of a man of forty. His cheeks are ruddy, his hair but slightly gray. The numerous crow's feet around his eyes are less signs of his years than they are the inevitable paths worn deep by good nature revealing itself in smiles.

The *burr* in his speech is a continual reminder of his Scotch ancestry; for his mother was a McNeill of the fighting Highlanders, and his father's family bore the name "Cameron," until some seventeenth-century royalists of the line, over-loyal to a defeated king, found it necessary to flee to France for their lives, and when the hue and cry grew less hot, they returned under a name slightly changed. John Camlin himself was born in England.

"My birthplace was Gravesend," he said, "a city on the River Thames, more than half way from London to the Channel."

On this broad highway to waters that wash all lands, he saw passing the commerce of the world, carried near or far in single-masted smacks, schooners, tall barks and barkentines, darting launches, stately liners aflame with lights at night, tugs endlessly busy, tramps laden with homely cargo, but bound to or from ports whose very names were poems to a boy who found himself consumed with desire to know all that lay below the horizon.

"Every red-blooded English boy," Camlin says, "at some time dreams of going to sea. Often, after watching the ships, I'd climb into the branches of an old apple tree in the garden, and sit for hours absorbed in some adventure book. 'Swiss Family Robinson' was a favorite. I *lived* the experiences of those castaways."

At sixteen he was past holding.

"One of my friends," he says, "possessed an invaluable uncle who was captain of a steamer, and this friend took a voyage. Nothing would do then but I too must go. With my parents' consent, I enrolled in the ship's company as a purser's clerk, and made two voyages to Bombay and Calcutta and back. It was merely a taste of roving, which whetted my appetite but did not satisfy it. After six months, however, at my parents' earnest request, I gave up the berth and entered college. I entertained the possibility of reading law, and my parents were eager for me to become a doctor."

Camlin remained at college for three years; but he takes care to point out that he never was graduated.

"By the end of the third year," he said, "I felt as if I were suffocating and *must* get away. Settling down in England to a musty career was the last thing I wished for. I could not, in any of my dreams, see myself on a high stool, growing old and gray while I waited for somebody ahead of me to die, so I could step into a job I never wanted in the first place.

"I insisted to my family that I had to go *somewhere*. Finally, my parents agreed that I come to America. They gave me a sum of money which little more than paid for a second-cabin passage to New York; when that was gone, I was expected to fend for myself."

ON THE way across, Camlin by chance read a novel which he discovered in the ship's library, a current favorite, Roe's "Barriers Burned Away." It related the imaginary adventures of a young man who sought his fortune in Chicago, encountered innumerable vicissitudes, and reached the crisis of his adventures during the great fire of 1871, which the author described circumstantially.

"That book," Camlin says, "led me to think Chicago would be a good place to go to; especially since it seemed to be a sort of jumping-off place for the frontier West, which had fascinated me in Mark Twain's 'Roughing It.' So upon landing I went at once to Chicago.

"My money would not last long, and I knew that soon I'd have to find some kind of work. Stopping at the old Hotel Sherman, I made inquiries, and met a man

Digitized by Google
Original from
STATE UNIVERSITY SYSTEM OF FLORIDA

who was enthusiastic about Rockford, a town enjoying prosperity, he told me, and lying about a hundred miles west of Chicago. He explained that the town had some factories already built and others projected, about ten thousand people with plenty of energy and go-get-it spirit, a river with water power; and he said jobs were to be had. So to Rockford I went.

"My cash balance when I stopped off the train amounted to three dollars and maybe a few pennies. I considered eating a primary necessity, while other things were, by comparison, luxuries, so I looked immediately into the question of food. Down a flight of stairs under a store I found a cheap restaurant, and here for three dollars they offered me a meal ticket good for twenty-one meals. I quickly owned a meal ticket, and practically no cash. Luckily, I succeeded in finding a rooming-house where they didn't require me to pay in advance."

In "Barrier's Burned Away," the book that had attracted Camlin toward Chicago, the hero was jobless and down to his last dollar in a strange, unwelcoming city. In order to provide himself with a bed and meals, he turned to shoveling snow off the walks at twenty-five and fifty cents a job.

JOHN CAMLIN, in a somewhat similar plight, now sought any job to bridge over his own need, and fared about as humbly. He obtained a place in a carpet store at five dollars a week. It served his purpose by bringing him immediate cash. But he knew it was not the kind of job he wanted to keep. Before his first week was up, he located another place, in a small insurance office, where the pay was thirty dollars a month, and the opportunities greater. The agency was operated by a father and son; Camlin was their sole employee.

"I was hired as a bookkeeper," he explained, "but I did a porter's duties as well; swept and dusted, made the fires, and carried ashes down two flights of stairs. The proprietors were exceedingly conservative, and had an old-fashioned method of keeping their books which left them scarcely any time to go out and scare up business.

"My first month's salary was pledged for expenses incurred before I received it. But the Scotch in me soon showed, and I made up my mind not to spend *all* I earned. Out of my thirty dollars a month I began putting aside five, with which I bought shares in a building and loan association.

"I found this a particularly good way to save money. The idea was to put in fifty cents a month per share, and keep paying at that rate for a period of ten years, when your certificate of investment matured. The total you actually put in, on each share, was sixty dollars, and the certificate at maturity, on account of the accrued interest, was worth one hundred. At the start, I bought ten shares and paid five dollars a month. When my income increased, I bought more. And I never missed a payment. Those first little savings were the foundation of all I did in business later.

"At the insurance office, I was told that if I could sell any insurance I would be paid a commission on it. We carried one side line that didn't amount to much with us; namely, travelers' daily casualty insurance.

"It was on this type of insurance that I got my first experience as a salesman. Every so often the railroad ran excursions from Rockford to Chicago, going early and returning late, and on such days I made a practice of getting to the station at five or five-thirty in the morning. As soon as the crowds began to arrive, I went through the coaches and offered the passengers insurance that would protect them for the one day, in the event of injury by wreck. I always made a little money in this way. Sometimes I sold as much as two dollars' worth of insurance, on which my commissions would run as high as fifty cents!

John H. Camlin, head of a large insurance company in the Mid-West, was born in a little town not far from London. While still in his teens he made two voyages to India, but at the request of his parents he gave up seafaring for college. Later, he came to America, stopping first in Chicago, but finally settling in Rockford, Illinois, where he still lives. Mr. Camlin is sixty-three years old

"I SAW that it would be to my advantage to devise some simpler method of keeping books, so that I would have more leisure for selling. Therefore I worked out a system that took only a fraction of the time; the balance of each day I put in hunting for customers.

"One fact about salesmen had already impressed me. I noticed that as a rule they expected to receive attention when they called, whether they came with or without an appointment, and often they arrived at times when the buyers were very busy, and were either unable or unwilling to listen carefully. Besides this, I thought many of them wasted time by not coming quickly to the point. I decided to try a different plan, and I went about it this way: Calling on a prospect, I would say:

"'Mr. Jones, my name is Camlin. I'd like to talk with you about your fire insurance. I suspect you're very busy now, but if you'll name a time when you can give me a few minutes, I'll come then.'

"Invariably the men I approached agreed that they were busy; but, just as invariably, they named a time for me to return. People seemed to like the businesslike approach that didn't take up much time. I practiced, and before long managed to become a pretty good salesman. My salary was increased to forty and later to fifty dollars a month, and after a few years, what with commissions, I was earning as high as eighteen hundred and two thousand dollars a year. The owners of the agency hired a girl to take care of the books, while I devoted all my time to selling."

Meanwhile, John Camlin the rover was gaining a revised conception about life's values.

"A year or so after reaching the United States," he (*Continued on page 84*)

The Biggest Battle Americans Ever Fought

By Thomas M. Johnson

EDITOR'S NOTE: Nine years ago, the grim, desperate battle of the Meuse-Argonne was in full swing. You read of it eagerly each day, or took part in it; but so stupendous was the operation that no correspondent could give a complete picture of the engagement. After this battle, the war ended, and there followed a time when the public was "fed up on war stuff." Very little was written about the great conflict in those years; but there were a few writers whose interest never flagged. Thomas M. Johnson, author of the following article, was one of these. He was an accredited correspondent of the New York "Sun" throughout America's participation in the World War. He conceived then the desire to tell the story of the great fight Americans made—and during the nine years since the Big Battle, he has been steeping himself in facts about it. Mr. Johnson has had access to innumerable authoritative sources of material. This article is a result of his faithful interest and tireless work on "war stuff." In its preparation he had the whole-hearted coöperation of many Army officials, among them Major General Fox Conner, who was Chief of Operations of the American Expeditionary Forces, and Brigadier General Hugh A. Drum, who was Chief of Staff of the First Army, A. E. F. In this article is much material heretofore unprinted in popular form. Mr. Johnson gives you an accurate story of the great fight, a thrilling story, and as complete a picture as it is possible to give within the limits of one article.

You have here a real contribution to American history, and one that will fire your interest; and keep it fired from start to finish.

THE Chief of Intelligence drew from his pocket a long envelope.

"Gentlemen," he said, "here is the plan of tomorrow's battle."

The correspondents leaned forward about the table. The locked door muffled the sentry's voice:

"Can't let nobody in. S'orders."

The Chief of Intelligence took from the envelope a few mimeographed sheets.

"It will be a very great battle," he said slowly. "A big job."

So the Meuse-Argonne proved to be: a very great battle, the greatest any American army ever fought in any war, our part in the mighty struggle that in forty-seven days broke the greatest military power in history, and ended the greatest war; a big job, so big that only the grim will of the few who led, the bright courage of the many who followed, made it, at last, the greatest, most far-reaching single American victory.

The American army, pick of the American nation, passed a stern test, that tried it to the uttermost. What a test is scarcely comprehended even now nine years after, when many would answer, "What was the Meuse-Argonne?" by, "It was a battle in a forest where an entire battalion got lost!"

We have never appreciated our biggest battle, or what our soldiers accomplished there. The same forty-seven days were too lurid with other events. Bulgaria, Turkey, Austria-Hungary fell, one after another. The German armies yielded on every front. The people revolted, the Government asked armistice, the Kaiser fled. Even the flu epidemic came, to distract attention.

News of the Meuse-Argonne seemed buried. But what news it was! The unceasing assault of 1,200,000 hastily-trained boy soldiers, more than half in their first battle, upon positions the most vital and among the strongest on the Western Front, defended by a veteran German army, desperate because it must hold them to escape complete disaster. Forty-seven days and nights of unending struggle with some 200,000 casualties of all sorts, that have not ended yet—you read of new ones often.

That was what it cost us to stop trains running through a place called Sedan. A high price. But when those trains stopped, the German Empire stopped, and, with it, the most enormous war in history.

This map gives you an idea of the strategy of the final Allied Campaign of the World War. The Germans on the Western Front were dependent mainly upon two great railway systems, one through Maubeuge, Namur, Liège and on to Cologne; the other by way of Mézières and Sedan, and on to Coblentz. Marshal Foch planned a united drive, hitting hard in the general direction of Maubeuge and of Sedan, to cut either or both of these railway arteries. Once these lines were cut or even seriously threatened, the Germans would have to retreat quickly from France and Belgium. The American part of the campaign was to drive toward Sedan, on a front of approximately twenty-one miles, about one fourth of which was the Argonne Forest front. Beginning September 26th, the Americans, British, French, and Belgians hammered unceasingly at the Germans, and at the end of forty-seven days of fighting, the Marshal's plan was crowned with victory—and peace! The lines on the map, with their dates, indicate the stages of the Allied advance during the great and final battle of the war

On the way to Sedan and victory the German army was not the only obstacle. We were short about every kind of supply and equipment, including experience. We made mistakes. But we made good, as an American Army, under the American Flag and an American General whom history will write down as a great American General.

Guns were crashing and flashing in this battle little more than three weeks after Marshal Ferdinand Foch, commander-in-chief of the largest armies ever assembled in the world's history, had his great idea—a converging attack of those armies upon the railroads vital to the safety of the German armies in France and Belgium.

It was a big and risky thing to attempt. French and British had lost heavily during the summer. Americans alone were fresh.

The safety of the German armies in France and Belgium depended upon two main east and west railroad systems: the northern, the Liège line in Belgium; the southern, the Sedan-Mézières line in France. The German front was shaped like the Florida peninsula, with a neck one hundred and twenty-five miles thick between the frontier of neutral Holland on the north and the trench front on the south. Both railroad lines traversed this neck, like jugular veins, but separated by the mountainous, forested Ardennes region, through which were few connecting lines.

The Allies were then nearest to either railroad at the Meuse-Argonne-Champagne front, only thirty-one miles south of the Sedan-Mézières railroad. That was the place chosen for the American attack, supported by the French—to cross the thirty-one miles quickly enough to cut or shell and bomb to

pieces the Sedan-Mézières railroad before the Germans could extricate troops, guns, and supplies from the peninsula.

In short, their armies on the whole Western Front would be cut in two parts north and south of the almost impassable Ardennes. The northern must surrender at once, the southern be overwhelmed afterward. That was Marshal Foch's ambitious plan. The British part was to cut the Liège line, which was ten miles farther from their front than the Sedan-Mézières line was from ours. To do this, the British must break the famous Hindenberg Line in their sector, then drive for Maubeuge. But the advance upon Sedan and Mézières from the American viewpoint was the crux of the whole plan, which was feasible only with American help, for British and French were tired.

General Pershing has called the territory Americans were to take, "ideal for defensive fighting." Nature and the Germans had made it so. Nature had made it rugged, hilly, wooded, the climate raw and rainy, especially in autumn. The Germans had worked four years adding artificial to natural obstacles, and the thirty-one miles comprised, first, thirteen miles of trenches, barbed wire, concrete dugouts, and machine-gun nests, then several miles more surveyed for defense.

Here the German defensive zone was thickest, because the Metz-Meuse-Argonne region was the southern pivot of their front in northern France and Belgium, where converged all the defensive lines they had built in four years of war to protect their conquests or permit, at least, their orderly and gradual relinquishment.

The Americans thought the Metz-Meuse region the most vulnerable part of this vital zone. But Marshal Foch's plan was to attack frontally in the Meuse-Argonne. Speed was all-important, for we must cut across the neck before the Germans got out of the peninsula. General von Schwarte's new and authoritative German war history says: "The chief work on the important right wing was assigned to the Americans."

If we succeeded fully, Sedan would see German disaster and the war might end. If we failed, there might be an American "Wilderness" in the Meuse-Argonne.

General Pershing faced an awesome decision. This new battle might nickname him "Butcher," even lose him the greatest military command in American history. A weak man might dodge responsibility, pass the buck to President Wilson. An over-ambitious one might insist blindly upon the original American plan.

This plan was to follow the St. Mihiel battle with a second thrust east of Metz on the Luneville front, or north of Metz on the front east of Verdun, and so disrupt German railroad communication, envelop Metz, key to one half of the Western Front, and take, or render useless to the Germans, the Briey iron basin and Lorraine coal fields, indispensable sources of munitions supply. That should force German withdrawal from northern France and Belgium as readily as the Marshal's Sedan-Mézières attack, and the fighting would be on easier ground. The Americans had built their Service of Supply to this end.

Instead, General Pershing asked himself: "What is the big thing we are after?" The answer was: "To win the war as soon as possible." To the question, "How?" the answer was: "By playing the game with the Allied Commander-in-Chief"

That did not mean sacrificing the American Army's independence. General Pershing insisted that the Marshal give to an army comprising most of the 1,500,000 Americans then in France, not split up, either all the sector of the Fourth French Army west of the Argonne, or of the Second, east of it. Finally, Marshal Foch agreed.

"Well, on which side of the Argonne do you wish to fight?" he asked.

THAT was another big decision. West of the Argonne the country was more level, going easier; but for an American army, supply and evacuation very difficult. East of the Argonne, the country was the hardest on the Western Front, and supply and evacuation hard enough, but easier than on the west, as this sector was closer to the supply lines and hospitals established by the Americans for the now abandoned Metz campaign.

"We'll fight east of the Argonne," Pershing said.

Marshal Foch knew what that decision meant. His eyes brightened.

"It is a country very rugged," he said. "But—you have the Devil's own punch. Go to it!"

At least, so he told some American correspondents later. The Marshal was proud of his knowledge of English. He was learning American.

Speed was the big thing now. General Pershing agreed to limit his already arranged St. Mihiel attack on September

2th to the bare pinching out of the alient, stopping before the Hindenburg ine across its base. That should be reliminary to the Meuse-Argonne, then et for September 25th. So the Americans ntered upon plans for the greatest battle n American or world history, discarding ome previous strategical convictions in rder to give their indispensable help to he Allied Commander-in-Chief to execute he hardest part of his plan, and so hasten rictory and peace.

Then began the most intense, the most trenuous job of preparation that any American army ever attempted, carried out under increasing pressure day and night. General Pershing and General Drum directed the First Army staff in preparation simultaneously for two battles, while all along the railroads, depots, wharves across France, Major General James G. Harbord and Brigadier General Johnson Hagood were called upon to turn the uncompleted Service of Supply inside out.

ON THE morning of September 25th we were ready! The French asked twenty-four hours more, so September 26th was "D day."

The night of September 12th, eighteen hours after the jump-off at St. Mihiel, heavy guns, not yet cool, moved westward, starting the greatest military assembly in American history. Federals and Confederates at Gettysburg totaled not more than 165,000. There were altogether 1,200,000 Americans, 150,000 French, and 750,000 Germans in the Meuse-Argonne. On one day there were 1,031,000 Americans and French in the First Army. They used as many as 143,500 animals and 178,800 gallons of gasolene a day. They built 21 miles and rebuilt 50 miles of standard railroad, 170 of narrow railroad, and repaired 350 miles of roads. Their artillery fired 4,216,575 shells. They salvaged goods worth $20,000,000. The battle news was written by some twenty-five of us who were accredited correspondents, and by many visiting correspondents.

Four days before the battle started, American correspondents, driving over roads crammed with troops, truck trains and guns, saw a thousand and one signs of what was coming. We wondered how everything would ever get in place in time. Troops thronged villages, roads, ditches, even fields, most of them clamoring, "Where the hell's our outfit?"

FROM nearby heights, crowned by the Verdun forts, we looked on the morning of September 26th over the "country ideal for defensive fighting," and wondered whether a hundred thousand and more might not be the price. At St. Mihiel was the flat Woëvre plain, but here in the Meuse-Argonne were ridges, hills, valleys, gulleys, ravines, forests, woods, copses, every natural fortress and hiding place for troops and artillery, above all for the terrible machine guns.

The American battlefield stretched before us, a great triangular defile, twenty miles wide at its opening or base, the jump-off line, and tapering toward Sedan, thirty-one miles to the north, where the River Meuse turned westward to flow through Mézières, fourteen miles away. North of both cities was the almost impassable Ardennes region, against which we should fling the Germans if we struck hard and quickly enough.

To the east, through the mist that seemed always to swathe that battlefield, loomed the heights of the Meuse. Away to the west, was the Aire Valley, overlooked by the tree-crowned promontories of the Argonne Forest. Almost straight ahead, up the center of the defile, was the ruined village of Montfaucon, "Mount of the Falcon," crowning the first of three barrier ridges that crossed the defile and blocked our advance. The second was a ridge running through Cunel and Romagne, and the third, through Buzancy, eighteen miles from the jump-off. That was the crest of the high ground in the defile. From it the country sloped down toward Sedan, thirteen miles away. When our infantry should reach Buzancy, our long-range guns could shell Sedan and the vital railroad.

To prevent that, the Germans planned their first real fight on the ridge through Montfaucon west to the fortified promontories of the Argonne Forest. Beaten here, they would make a life-and-death fight on the Kriemhilde Line, southern extension of the Hindenburg Line, along the Cunel-Romagne ridge, and already fortified. They had another line surveyed, the Freya Line, to protect the highest ground near Buzancy. As it turned out, the Kriemhilde heights marked the peak of our effort.

West of the Argonne Forest was the Fourth French Army, commanded by General Gouraud, of the one arm. His battlefield was the Champagne plain,

level but strongly fortified. His ultimate objective was Mézières, as ours was Sedan.

To reach those objectives quickly, an ambitious plan had been drawn. Marshal Foch was striking for decisive results. Objectives, he said, should be made more remote, the "limited" days were over. The sky was the limit now. The thing was to push ahead, wherever we could, as far as we could. It was time for optimism.

So the Americans, preparing with the French Army, under General Petain's coördination, hoped for a knockout at the start. They hoped in the first few days, perhaps the second or the third, to break through, not only the Montfaucon Line but far enough through the Kriemhilde Line, so that railroad artillery could shell the Sedan-Mézières railroad and at least hinder, if not stop, German troop movements over it. At the same time, they would pinch the Germans out of the Argonne Forest, as two weeks before they had pinched them out of the St. Mihiel salient, and join the French in the Grandpré Gap. That would be a twelve-mile advance. Its effect would be to cause the collapse of most of the German front to the North Sea.

Then we would make another twelve-mile advance, break the Freya Line, take the Buzancy heights and push down the slope toward Sedan, outflanking the Germans before the French on the Aisne River, and clearing the way for the French advance to Mézières.

THAT was the plan. We carried it out, except for changes in the time table, made by some people who had not been consulted—the Germans. They made us take forty-seven days, instead of just "a few." But that was better than General Petain's prediction on September 2d—that we wouldn't make it before winter.

We started to break the Montfaucon Line at five-thirty on the morning of September 26th, by driving a flanking wedge on either side of Montfaucon. Then the troops between were to close up, and attack the Kriemhilde Line at Romagne and Cunel. Later, the heights east of the Meuse would be cleared. The troops that had been thronging to carry out this plan were all eager, young, and fresh; but would be "war-wise" only with dearly-bought experience. Of the nine jump-off divisions, two had never even been under fire, and only three had battle experience as divisions, and those three had so many new replacements that of the 225,000 men only about 75,000 had ever been in battle, and another 75,000 had never even been under fire.

The eastern wedge would be driven by the III Corps under Major General Robert Lee Bullard, fighting man of unquenchable spirit, with, from east to west, the 33d Illinois Guard, the 80th Pennsylvania National Army and the Fourth Regular Divisions—only the Fourth battle-experienced as a division. The western wedge would be driven by the I Corps under Major General Hunter Liggett, indomitable, indefatigable, among the ablest American commanders, with, from east to west, the 35th Kansas and Missouri Guard, without battle experience, and the 28th Pennsylvania Guard and 77th New York City National Army Divisions, both with battle experience in the Marne salient. In the center before Montfaucon, the V Corps had three green divisions, two never under fire, one never in battle. These were the 79th Pennsylvania National Army, the 37th Ohio Guard, and the 91st Pacific Coast National Army.

FULLY as important, six of the nine Division Staffs and one of the three Corps Staffs had never before commanded troops in battle. The Army Staff had done it only once, two weeks before, at St. Mihiel. Everything had been so hurried by the change of plan when our St. Mihiel concentration had already commenced, that the staff had to grab divisions as it could for the Meuse-Argonne, without too nice a selection of sectors. That, and necessity for safety at St. Mihiel, is why the experienced First, Second, Twenty-sixth, Forty-second and others were not in the Meuse-Argonne jump-off. Perhaps, as some have said, if they had been, we should have gone clear through. But they could not have been.

There were no men in the world more fit, more gay, more determined than the 225,000, mostly Guardsmen or National Army, "tin soldiers and drafties," led largely by "ninety-day wonders" from the officers' training camps, who opened our part of the world's greatest battle. No other army had their equal, in fresh vigor and enthusiasm. No wonder Marshal Foch, Napoleon's successor and admirer, expected much of his "Young Guard."

For four days, Ludendorff says, the Germans had known all about the French attack in the Champagne and were ready for it. But from the Argonne to the Meuse, they expected at most a slight attack, and, although they had taken prisoners from several American divisions, they thought our great effort would be east of the Meuse, toward Metz. We had fooled them. They had only five divisions, barely 60,000 men, against our attacking 225,000, and 85,000 (*Continued on page 195*)

An Ounce Of Prevention Is Worth Fifty Firemen

've found that people are very careless about things that make for fire hazard around their homes, and very excitable when they smell smoke. Some rules that may save you a disaster

By a Volunteer Fire Chief

HAVE you ever had a fire in your house? Sooner or later, practically everybody does have one—or more! I could tell you of a family with a cord of six fires in ten years; perfectly honest" fires too.

You see, I know a good deal about fires; so about the people who have them. By rofession, I am a lawyer; but I live in a own where we have a volunteer fire epartment, and I have belonged to it ver since I left law school. For the past ve years I have been fire chief in our own.

Now, I want to repeat that, sooner or ter, you probably will have a fire in your ouse. I am going to tell you some things hat will help you to avoid having one; ut I am also going to give you some dvice to follow in case you do have ne.

If you are as smart as I hope you are, ou will get your family together *right ow* and thresh this thing out. Drill into heir heads, and into your own, a few ules which I shall give you before I get hrough.

Keep these rules all shined up, ready or use. They will save you money and rouble. They may even save your life. 'or a fire can be anything from an xpensive inconvenience to a terrible ragedy.

A LAW firm in our town used to have its office in an old building on the main treet. There was a large closet off one of the rooms; and in this closet was stored a mass of old papers, magazines, and things for which someone, at some time, night possibly have some use.

One member of the firm was an old and partly crippled man. His pet fear was that this rubbish might accidentally be set on fire; which, by the way, was a more sensible notion than most pet fears are.

Knowing that the boss cherished this particular worry, the office boy prepared and tacked up on the closet door a sign which read as follows:

In Case of Fire Put It Out

When the old man read this sign, he called the office boy to him.

"Son," he said, "you are a bright lad. When you grow up, you ought to make a great lawyer—already you give such excellent advice."

Now, although you smile at the office boy's amusing effort, you may think that it was pretty good advice nevertheless. Well, it *was* good; but it wasn't the best that could be given in that case.

My own advice would have been to get rid of the whole mess of rubbish in that closet! Hundreds of fires start in just such accumulations of old stuff.

FOR years, insurance men have been warning people of the danger of letting rubbish accumulate in closets, attics, and cellars; but you folks go right on doing it.

You even put oily rags, and other highly inflammable things, into these closets, where a heap of dusty old stuff is just waiting to be touched off and turned into a bonfire; there are well-authenticated cases of spontaneous combustion occurring in just such places.

People who do that sort of thing have the magpie instinct. The magpie, you know, is a bird with an uncontrollable impulse to hoard up everything he can get his claws on. Not because he has any use for these things, but simply because of his impulse to get and to keep.

It seems to me that in every family there is at least one member who has this magpie instinct. To throw away anything is as painful to them as a surgical operation. They fill their attics, cellars, and closets with decrepit furniture, old magazines and papers, old clothes, shoes, hats.

After a recent fire, which fortunately was put out before it had done much damage, I went through the house to make sure that everything was all right. I found the attic crammed with the usual conglomerate lot of rubbish; and I particularly noticed a large pile of discarded masculine headgear, including half a dozen old straw hats of various vintages! Somebody in that house was evidently a hopeless magpie.

One of the leading citizens in our town spends a couple of days at home twice a year, in the slack business seasons. He devotes these days off to his own brand of housecleaning. It consists of collecting everything which he considers of no further use and making a bonfire of it.

After these semi-annual raids, his wife will hardly speak to him for about a week. But he tells me that when she has recovered from the agony of these enforced partings with her beloved if useless trash, she is really grateful to him.

Naturally, women are more likely to have this failing; but they don't monopolize it.

We have a doctor in our town who has this magpie instinct in a particularly dangerous form. At least, he did have it. I hope he was cured of it by a fire he had.

His office is in his residence; and it was his custom to have the office boy unpack, in the basement, the boxes in which his medical supplies were shipped to him. Most of these supplies being contained in glass bottles they were packed in excelsior.

I found that they had been putting the excelsior into a small room, partitioned off from the main basement where the furnace was, and occasionally they used it to start a quick fire in the furnace. But they had a huge pile of the stuff there, enough to last a year.

Excelsior is so inflammable that it will almost take fire at the mere sight of a match. As if this were not dangerous enough, they had thrown into the room the oiled rags which they used on the hardwood floors. Moreover, this tinderbox of a room was so close to the furnace that it sometimes became very hot.

Now, perhaps the office boy went in there, carrying a lighted cigarette, and dropped a spark without knowing it. Perhaps the heat caused those rags, saturated with oil, to break into flame.

No one knows just what happened; but in some way a fire did start in that room. Fortunately, it was in the daytime and was quickly discovered. The fire department put it out before it burned up into the house itself. Moreover, the basement was cemented throughout, except for the partitions.

That doctor had a narrow escape from losing his home. He almost deserved to lose it.

LET me tell you about another fire we had in our town. It happened one night early in the autumn. The house was a new one; the family had only recently moved in.

Although the man was an architect, had planned the house himself, and had supervised its construction, the bricks forming the bed of the living-room fireplace had been laid directly on wood! As the evening was a cool one, a fire had been built in this fireplace. After the family had gone to bed the wood under the hot bricks caught fire. The next morning, the nice new house was a smoldering ruin.

The moral of that story is: Don't build a fire trap, thinking that you are building a home!

You may say to me, "But we didn't build the house we live in. Someone else built it; and we don't know what mistakes they may have made!"

My advice then (*Continued on page 183*)

"Folks Mostly Acts Like Human Beings"

A story in which Scattergood fires a chance shot, and hits the mark

By CLARENCE BUDINGTON KELLAND

Illustrated by Paul Meylan

"SQUIRE TINGLEY," said Scattergood Baines, "was a perty good man accordin' to his lights—and they was middlin' bright lights too."

"He was a dum fool, seems to me," said Postmaster Will Pratt, "and this here slayin' proves it."

"I allus says," Deacon Pettybone interjected, in his high nasal voice, "that no good wa'n't comin' from adoptin' the daughter of a proved murderer into a Christian fambly."

"And now the squire's killed," said Scattergood slowly, "and you ol' coots 'll have it that Gertie done it. W-al, mebbe she did; but that hain't no reflection onto the squire's takin' her in when she wa'n't wanted no'eres else."

"Ye can't turn a gnurly crab apple into a Northern Spy," said Will Pratt.

"She wa'n't but seven when her pa was put away," said Scattergood.

"She needn't of been more'n seven months, if the seeds of it was in her," said Deacon Pettybone.

"You calc'late folks is born so's they can't help bustin' the Commandments?" asked Scattergood.

"They be," said the deacon.

"THEN," said Scattergood, "it don't seem right to punish 'em for it. They hain't rightly to blame."

"They're evil," said the Deacon.

"But it hain't their fault—not if it's born into 'em before they git a chance to weed it out."

"The's suthin to what you say, Scattergood," agreed Will Pratt. "But what you goin' to do about it? Who is to blame?"

"W-al, if you fellers is right, the' hain't but one's to blame. And the' hain't no way we kin manage to punish Him. If God creates 'em wicked then the sin's at His door, hain't it?"

"I don't want to lissen to no sich sacrilege," scowled the Deacon.

"Facts is facts," said Scattergood. "But, s'posin' you fellers is wrong, and God don't foreordain folks to be crim'nals. Which sounds kind of reasonable to me. You got to take your choice. Either folks is foreordained or they hain't. If they be, then it hain't their fault, but God's; if they hain't, it's their fault for undertakin' wickedness when they wa'n't forced. I calc'late, Deacon, you be the one that's a mite sacrilegious—blamin' so much onto the Creator."

"Jest the same, Gertie shot the squire with that there rifle, her a-hidin' alongside of the road. And she shot him so's she'd fall heir, and be able to marry that loafin' Milt Green."

"And mebbe Milt put her up to it," said Scattergood. "Calc'late so? Eh? Figger that's about the size of it?"

"More'n likely," said the deacon.

"When was the squire found?"

"Along the middle of the mornin'—a-layin' on the roadside with the ol' hoss browsin' near."

"Jest one shot?"

"Didn't need no more."

"Doctor hazard how long he'd been dead?"

"He estimated the shootin' was last night."

"Um. . . . What's been done, so fur?" asked Scattergood.

"They've fetched in his body, and now the sheriff's on his way over to take charge. Dep'ty Penny's watchin' the back door of the house and Town Marshal Snyder's watchin' the front."

"Um. . . . Hope they're thorough," said Scattergood. "With one desprit

STATE UNIVERSITY SYSTEM OF FLORIDA

:een-year-old girl to watch seems as gh the' wa'n't enough growed men he job."

Don't aim to have her escape," said Pratt.

Jm. Escape? Shot las' night, wa'n't W-al, if she was bound and set on oin', why didn't she go to work and t? Wasted eight-ten hours, hain't "

Seems as though," said Will Pratt, tching his head.

ID," said Scattergood, "if she was to run off how d'ye calc'late she'd it by the killin'? Killed him to in- t his money, didn't she?"

That's the idee."

Couldn't inherit much if she was n' off in Canady," said Scattergood. o; the' hain't goin' to be no escapin'. he done it, she's got to face the music. 's got to prove she never done it a-tall. n she kin inherit and live in peace. erwise, she jest wasted a adopted er and a ca'tridge out of a gun. Find evidence?"

Nobody hain't looked for none."

Jest leaped to conclusions, eh?"

Gen'ral opinion's runnin' agin her."

Searched the house or anythin'?"

Waitin' fer the sheriff."

Um. Peered around the scene of the otin' any?"

Jest fetched the body in—that's all."

So nobody knows nothin' except that squire's dead."

Exceptin' what common sense tells ."

The's been times," said Scattergood, hen it looked to me like this town didn't have much common sense to be told by."

"Everybody knows Gertie's a crack shot," said the deacon. "The squire was allus braggin' about her."

"Folks don't do killin's 'thout a reason," said Scattergood; "and Gertie didn't have no more reason than any girl whose folks has proppity to leave her. You don't, any of you fellers, suspect your children is tryin' to contrive your deaths, do ye?"

"No. But our children didn't have murderers fer their fathers," said Deacon Pettybone, "and the squire was opposin' Milt Green!"

"Huh. S'pose he did hinder her runnin' around with Milt. So does every other father hinder his daughter. Comes natural, I calc'late. And never amounts to nothin'."

"W-al," said Will Pratt, "I can't stand arguin' here all day. I got to 'tend to the U-nited States mail."

And so, presently, Scattergood was left alone, slouched down in that specially reinforced arm chair which for a generation he had occupied on the piazza of his hardware store. He closed his eyes and crossed his hands on his ample waist line, but he did not sleep. He was thinking, remembering—looking into the future when he should no longer be there to meddle in the affairs of Coldriver Village. Who would take his place—or would any man arise to occupy his shoes.

IT WAS perhaps a half-hour later when a horse and buggy dashed into town at a speed to which Coldriver was unaccustomed. Its driver was a young man in overalls and a dilapidated, broad-brimmed straw hat, who, as soon as the horse came to a stop in front of Scattergood, leaped over the wheel and rushed across the sidewalk.

"Mr. Baines!" he panted. "Say, Mr. Baines, what's this I hear about the squire?"

"I dunno what you come to hear, Milt."

"The rumor's runnin' that he was shot to death out of ambush."

"For once rumor's speakin' true."

"He didn't have much use fer me, but he was awful good to Gertie," said the young man. "And her alone to face it. That's why I come tearin' in, calc'latin' she'd feel the need of me."

"Mebbe," said Scattergood, "she's a-goin' to need you more'n you figger."

"What d'ye mean, Mr. Baines?"

"Gertie," said Scattergood, "was a crack shot."

FOR an instant this passed Milt by; he did not catch the significance of it. Then his blue eyes blazed, and he leaped up the steps with fists clenched.

"Hey, now, you look at here! I don't care if you be Scattergood Baines, nor the President of the United States; you can't cast no hints like that at Gertie. I hain't goin' to stand and endure it—"

"Calc'late you'll have to git used to it," said Scattergood. "It's bein' talked from Dan to Beersheeby. . . . Where was you las' night, Milt?"

"Settin' in the dinin'-room readin' till nigh nine o'clock, and then to bed."

"Anybody with ye, Milt? Anybody settin' there could swear to it?"

"Hey, now, you look at here! I don't care if you be Scattergood Baines. You can't cast no hints like that at Gertie"

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

"Lant James and his wife, that I work for—both of 'em was there."

"Kin they swear you didn't sneak out of the house, Milt?"

"What be you aimin' at, Mr. Baines?"

"It jest come into my mind that an alibi might come in dog-gone handy for you, Milt."

"You mean," said the boy, quiet now, pale, thoughtful, "that these folks is talkin' it up that me 'n' Gertie done it together?"

"Tide sort of runs that way."

"And what," demanded Milt, with a certain youthful dignity, "do *you* think, Mr. Baines?"

"Um. W-al, me, I hain't contrived to commence thinkin' yit."

"Tell me—be they goin' to arrest her?"

"Dunno. They got everybody but the state milishy guardin' the house now. . . . Say, Milt, if you 'n' Gert didn't do this here deed, who d'ye figger *did* do it?"

"Mebbe he done it himself."

"From all I hear he couldn't of. . . . No gun found, and all. . . . Um. . . . Unless he done the shootin' a piece away, and the hoss pulled him along in the buggy till he fell out. Might 'a' been. But suicide and the squire don't set in the same pew, seems as though."

"'TWAN'T like him," said Milt. "But this hain't no time to stand talkin'. I got to do suthin'. I got to go to her."

"The's times," said Scattergood, "when standin' talkin' is a heap sight more profitable'n anythin' else. Um. . . . W-al, I calc'late you 'n' me better step around and put in our oar. Got a new sheriff, Milt, and he's goin' to be almighty active. He's a-goin' to stir around perty brisk, and make himself a reppitation. Wait till I h'ist myself up, and we'll be amblin'."

They walked around to Squire Tingley's house to find Deputy Penny pacing up and down in the front yard. In the rear, Marshal Snyder could be seen at his post. Scattergood stopped.

"Be you armed, Dep'ty?" he asked.

"Got m' gun and m' badge and m' handcuffs," said Penny.

"Don't seem like that's enough fer a thorough job," said Scattergood. "This here miscreant's all of eighteen year old, and she's a girl. Looks to me, Dep'ty, like you was kind of inadequate, so to speak."

"I calc'late," said Penny valiantly, "to cope with this here emergency."

"Uh-huh? W-al, Dep'ty, off and on you been about as able a coper as we ever had in Coldriver. Copin's been your speciality, kind of. . . . Kin Milt and me go in and see her?"

"Pervidin'," said Penny, "you hain't carryin' in nothin' to aid her in escapin'."

"I'm law-abidin'," said Scattergood, "even when it hain't to my advantage so to be. Come along, Milt."

They mounted the steps and rapped. Presently, Gertie came to the door and opened it warily; but at sight of Milt she burst into tears—a slender, sleepless, pathetic figure. Always she had been pathetic since that day, eleven years ago, when the squire and his wife had brought her home after her father's sentence—brought her home to save her from being on the town, as the saying went.

Since then she had been apart, for Coldriver does not forget. She had been the daughter of a murderer, her childhood made dreadful by the jeers of other school children and by overheard, low-voiced comments of her elders. The old squire and his wife had cherished her, had done for her as for one of their own. After his wife's death she had been the old man's companion—but no light of real happiness had come into her life until Milt Green, greatly daring in the face of prejudice, had courted diffidently.

"BETTER kind of soothe 'er some," said Scattergood. "You go into the parlor, and I'll set here till she's fit to talk. Hain't in a mite of hurry. The's times when a pint of soothin's wuth a barrel of common sense."

It was ten minutes before Milt appeared and beckoned. Scattergood entered the shadowy parlor and took a seat on the haircloth sofa.

"W-al, Gertie," he said, "folks is sayin' this and that."

"Do—do they say I killed him?"

"That looks like the underlyin' idee."

"Am—am I arrested?"

"Not yit; but you better git your mind made up to it."

She shut her eyes, and Milt stroked her hand.

There was a sudden commotion, a vicious, thrusting rush for that unguarded

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

Do you think I done it, Mr. Baines?"
I hain't one to *think* much, Gertie. pref'rences is all fer *knowin'*. The ire drove to Higgins Bridge yestiddy, n't he?"
In the mornin'."
And this here happened on his way ne. We kin find out when he left gins' Bridge. That'll tell us about en it happened."
He figgered on bein' home by ten ock."
Uh-huh. Where was you last night, rtie?"
To home. I never stirred out."
Anybody come in? Anybody see ye?"
Nobody ever comes in—not when squire's away."
So the' hain't nobody kin swear you

She arose unsteadily; but presently came back with face more pallid than before.

"Mr. Baines," she said, "the' hain't but one gun here. Jest the squire's and the shotgun. Mine hain't in its place."

"Eh? Yourn gone? Sure you hain't put it no'eres?"

"It's gone," she said in a tone of finality. "It's gone."

"GERTIE, ever hear of the squire havin' serious words with anybody?"

"He wa'n't quarrelsome, Mr. Baines. He never had no words that I know of."

"Was he fetchin' or carryin' money yestiddy?"

"He jest went to some kind of a meetin'. He allus had a ten-dollar bill

"What's the good, Milt? Nobody won't b'lieve me, and I hain't no manner of proof. . . . And the gun's gone. I got a feelin' they'll find my gun, and it'll be clost by that place. I got a feelin' my gun done this deed."

"Um. . . . Squire carry it with him, figgerin' mebbe to git a shot at a deer?"

"He'd of taken his own," she said. "He didn't have none when he drove off."

"When'd you see your gun last?"

"I hain't even thought of it fer a month."

"So somebody could of taken it any time the last three-four weeks?"

"Seems as though," she said apathetically.

"Gertie, did the squire ever let on to you how he calc'lated to leave his proppity?"

"He showed me his will. Everythin' was left to me."

"Squire ever have words with Milt here?"

"Never what you'd call words. He didn't esteem Milt had much git up and git. And he forbid Milt to come around the house. But that was because he didn't know Milt." Then, with a sudden flash of understanding which astonished Scattergood, "And because he was kind of jealous of me and afraid of bein' left alone. It 'd 'a' been the same if it was anybody besides Milt."

ide door, a sudden babel of sound, shouting, scuffling, thudding blows

as in the house all the whole time?"

"Nobody kin."

"Um. . . . Good shot, hain't ye? Seems ke I've heard the squire braggin' about e."

"He taught me."

"Any guns in the house?"

"Hisn and mine, and a shotgun."

"'Twan't done with a shotgun. Kin ou fetch me them other two guns, Gertie?"

folded in his pocket—agin emergencies, he says."

"Ten dollars hain't sufficient," said Scattergood. "And that rifle's gone."

Apathy seemed to fall upon Gertie. "I calc'late," she said dully, "they'll go 'n' hang me, like they done my father."

"Gertie," cried young Green, "you didn't ever do it! Say you never done it. Gertie, I can't bear it if you don't say you never done it. Say it quick!"

THERE came a sudden rapping upon the door, and Scattergood arose to answer it.

"Howdy-do, Sheriff?" he said affably. "Step right in."

"I come," said Sheriff Tucker, big with the honors of his new office, "to take this here girl into custody."

"Um. . . . Dunno's I'd be hasty, Sheriff. Dunno's I'd be hasty."

"Hain't been. Spent the mornin' investigatin'. Found the gun, Scattergood. Found it where it was throwed in the bushes nigh the scene of the crime. Calc'late that warrants my takin' steps."

"Her rifle, was it, Sheriff? Gertie's gun?"

"It's been so identified."

Scattergood nodded his head. "Justifies you, seems as though. Notwithstandin', Sheriff, the jail hain't no place for a girl. If I was you, (*Continued on page 129*)

The Age Of Indiscretion

It's the first fifty years of a woman's life that are the hardest; after that, she's free

By Virginia Terhune Van de Water

DO YOU feel your years very much, my dear?"

The woman on whom I was calling put the question to me suddenly.

"My *what?*" I asked.

"Your years," she repeated. "Surely, when one has passed fifty-five, one feels her years." I am only eighteen months older than you, yet I feel mine—oh, dreadfully! . . . Why do you look so queer?"

Perhaps I did look queer. Until this moment, it had not occurred to me that my years were something that I should "feel." Nor, to be brutally frank, had it occurred to me that my hostess was only eighteen months older than I.

To be sure, she is not in good health. That accounts for her slow movements, for her appearance of fragility, for her lack of enthusiasm.

I have not failed to appreciate that I am no longer young. Nor have I any illusions as to the number of years that have passed over my head, leaving their gray dust on my hair. But—here is the point—I had not, until my friend asked this question, thought of "feeling" those years.

But her query set me to thinking seriously. I had walked a mile and a half to her house on this especial afternoon, and as I walked the same distance back to my own abode my mind was busy.

I had reached my present age, I mused, so gradually that I had not noticed it. I remembered the story told me in childhood of the woman who began carrying a newborn calf, and carried it every day, so that when it was a cow she was not conscious of its increased weight. Perhaps that was how I had carried my years. Perhaps that is why I do not "feel" them.

But why should I? To be sure, I am a mother of grown men and the grandmother of one small boy. I appreciate all these blessings; but I do not bear them as a burden.

Much cogitation since the interview I have alluded to has convinced me that age is an arbitrary thing. That is a bromidian statement, as is the assertion that some people are older at forty-five than are others at seventy-five. And, after all, why should years make so much difference?

I fancy one reason they make a difference is that we are ashamed of them. That seems to me the silliest thing in the world—to be ashamed of one's age. As if one could help it, anyway! It is one of the few facts about one's self for which one is not in the least bit accountable. I have always had a comfortable conviction that the color of my eyes and the year of my birth were something for which I must thank or blame my forbears. I refuse absolutely to accept censure or credit for either.

Since they, my age and eyes, are what they are, I've got to make the best of them.

In making the best of my years, I find in their number much to be thankful for and little to be ashamed of.

Not that I have always made the best of them. I have not. Had I done so, I might have been famous, instead of mediocre; I might have had erudition, where I have but a vague smattering of knowledge; I might have been a saint, where I am only a poor, stumbling sinner.

But one thing I am sure of: I do not purpose to spoil the remaining span of my life by fussing over what I have done or left undone in the past.

We all remember the remark of the Irishman who by mistake put a five-dollar gold piece into the collection plate instead of the nickel he had meant to lay there.

"Well," he remarked philosophically, "I'll not spend me time regrettin' it! It's gone to heaven—to hell with it!"

My philosophy with regard to the mistakes of past years is something like his.

AS TO these present years—I refuse to "feel" them in the sense in which my friend suggests. For while I am not blind to their disadvantages, I am quite clear-sighted as to their advantages. I said as much to this friend when she renewed the subject on my last visit to her.

"But," she reminded me, "you live alone now, don't you? Surely that must be a hardship."

"In some respects it is," I admitted honestly. "I confess that I have qualms of loneliness when I come home from a theatre, concert, or dinner, and have nobody with whom to talk things over. But, on the other hand, I have many subjects to think about when by myself; and there is also a sort of comfort in knowing that if I am out late, or am detained far beyond the hour of my expected return, nobody is worrying about me. Moreover, I have the telephone, and at the other end of the wire are hosts of friends, as well as members of my own dear family, whom I can summon at a moment's notice."

My pessimistic friend shook her head.

"You are merely whistling through the woods to prove that you are not afraid!" she accused.

I would lie, of course, if I were to declare that I am not sometimes assailed by a sudden longing for the days that are gone. But they *are* gone. Those that are left will be gone too, sometime. While they are here why not get every ounce of good out of them? To do this, I focus on their advantages.

So many friends have asked me to name these advantages that I am moved to mention a few of them. For the longer I live, the more I believe in the law of compensation. I admit that some of the compensations are inadequate—but half a loaf is better than no bread. And, anyway, one can eat only a slice at a time.

Well, then, one of the compensations of being past fifty-five is that one can do as one pleases. I touched upon this when I spoke of living alone. It was impressed upon me recently, when I had been dining out with a man whom I have known for years. He suggested, after dinner, that we attend a social function to which we had both received invitations.

"It is nearly eleven o'clock now," he remarked; "but the affair will be in full swing for at least two hours to come. Can you stay out as late as that?"

"Surely," I replied. "Why not?"

"I thought perhaps someone might be watching for you to come home, and be worried."

"No," I explained. "My maid is fast asleep and will not know a thing until morning. The only other creature at home is my Scottish terrier, and while he will welcome me joyously, he will ask no questions and make no criticisms."

(That is, by the way, one of the reasons I like dogs.)

So I stayed out and had a lovely time, reaching home about two o'clock. Had I been a young woman, or an attractive matron of forty, the sleepy elevator man would have widened his black eyes and wondered at my indiscretion—coming home alone with a man at such a scandalous hour. But one does not gossip about a grandmother. People take it for granted that she could not be indiscreet if she tried.

For the first fifty years of a woman's life she can seldom do as she chooses. She must adhere to certain conventions. If she is not afraid of getting herself talked about, her family may object to her doing so. It may cast reflections on them if she does imprudent and unconventional things.

FOR instance, were I young, I could not go about New York alone at any hour of day or night. Nobody is going to be impertinent to a grandmother. If a street happened to be so dark that a man ventured to address me, he would discover his mistake by the time we reached the next electric light and would flee in dismay.

Which reminds me of a funny experience I had last winter. I was going home at ten o'clock in the evening. I was on Fifth Avenue and saw a bus coming up. I decided to board it instead of taking a taxi. I wished to reach the next corner before the bus did, therefore I ran the length of the block. Before the bus came to a full stop, a handsome limousine overtook me and two young men leaned out.

"I say, honey," one of them called,

Digitized by Google

STATE UNIVERSITY SYSTEM OF FLORIDA

can drive faster than you can run. er get in here with us!"

vore a hat with a brim and my face shaded. I laughed and boarded the but I did wish I could have shown countenance to those fresh youths, to note their consternation.

course the person who can get about kly need not feel her years as does my lid friend.

VERAL years ago I was strolling ptown and saw just ahead of me a ler woman in deep widow's mourn- She was walking rapidly and with free step of a girl.

Poor young thing!" I mused com- ionately. "To be widowed so early!" nstinctively, I quickened my pace. As ached her side she turned toward me, I recognized a dear old friend of nty-five. I uttered an exclamation of rise.

What right have you to be walking at rate?" I demanded. "Why, I thought were a young girl!"

ne laughed lightly. "My , it has been said that a nan is just as old as her . I say she is just as old er walk. I have always ked rapidly, and I mean o so until I step into my ve."

he did. When she died, felt as if a woman in the vigor of life had gone.

by their walk you shall w them—or some of m—these no-longer- ng women. Watch them, see what I mean. If a son is lame, or rheumatic, nas fallen arches or some er ailment, she is to be ed. But when she has ne of these things, why g along wearily just be- ise one is over fifty and "going on" ty? When we did this kind of thing at teen we were reproved for laziness and d to step lively. At sixty, a slouching t is supposed to indicate languor. I do believe that it always indicates that. m convinced that it is often the result inertia, a letting-down of interest, a f-indulgence acquired because one has owed herself to "feel" the years, and get them.

Another of the compensations I have in nd is that people confide in us things ey would not confide in younger friends. en will tell the mature woman of their ve affairs; girls will talk of their prob- ns. One nearing sixty cannot be jealous youth, unless one be a fool. Moreover, e man or woman of that age can give cellent advice. Of course it will not ways be followed; but it is rather fun to ve it.

Then, too, there is a positive thrill in ting the development of other lives. hen one is vitally interested in her own ve affairs those of others are not inter- ting. But the unconcerned observer atches a continuous drama.

Not that I would be only an observer. o, indeed. That would be stupid. But far as heart-affairs go one is so delight- lly out of it! One has all the joy of oking on, and none of the responsibility. here are certain lessons that we, no longer young, have learned. Now it is our turn to stand by and help others if they will let us. Which they probably will not do, for who wants to take her experiences second hand? I did not want to in my youth. We all want to do everything for ourselves. But it is entertaining to see other people working out their problems as we worked out—or messed out—ours.

Here is an interesting thing: even *our* own problems are not all yet solved. I have just suggested that people want to be allowed to learn their own lessons. Perhaps we feel we have not lived until we have known all the sensations. I have not experienced them all yet. There are several that I hope to have before I die.

"What are some of them?" asked a young girl curiously.

I did not say to her just what some of them were, for she would have thought me presumptuous perhaps, or sentimental. And people well over fifty are a little silly when they are sentimental. So I did not tell of certain beautiful places I want to see before I pass on. I want to see them in the company of one or two or three dear persons. Nor did I tell my young friend of vague aspirations after triumphs of a sort for which my material self yearns. But I can always be expecting these. If I don't get them here—and I probably won't—I may get them beyond. But I'm going to make the best of now and here.

Years ago I put a question to a much-loved elderly relative. "Why?" I asked him, "do you always stay up so late at night and get up so early in the morning?"

The dark eyes twinkled mischievously as he dropped his voice to a confidential pitch.

"Dear child," was the honest reply, "I am always afraid something agreeably interesting may happen, and I not be in it!"

PERHAPS that strain is in my blood, for I do not want anything agreeably interesting to happen and I not be in it. That may explain why I always hurry toward a crowd instead of away from it, as do women who "feel" their years. Something interesting may be going on in that group, and I don't want to miss it.

"I hate crowds!" one of my contemporaries shudders. "They frighten me so! I simply will not ride on the subway!"

Why should crowds frighten her? She is one of the crowd herself. I admit that the subway is indecent during the rush-hour; but I do not see why one should be frightened by it, unless one fears to have her good clothes torn or her pocket picked. But that is not why my friend is frightened. It is because she "feels" her years. She confesses that this is the reason.

"Do you always walk as if you were hurrying to catch a train?" a physician asked me recently.

"Yes," I admitted shamefacedly. "I am afraid I do. It is a habit I acquired years ago."

"Well, don't stop it!" he laughed. "Perhaps you'll keep on going so fast that old age will never catch you."

Of course my hair is gray, for am I not a grandparent? Of course I am no longer young. Of course I have had sorrows. Of course I have heartaches. Who has not all these?

But—here is the crux of the matter: my own youth and the things that belong to youth are behind me. But the youth of to-day is near me, thank heaven! Life is still full of interesting happenings; the sun is still bright; the skies are still blue; friendship and love are as real as ever; work grows more absorbing all the time. With all these good things to feel with every fiber of my being, why should I sit down and begin to "feel the years"?

UNDERSTAND, I am not dealing with old age. I am daring enough to say that I have not reached it yet, nor do I intend to for many a long day. Much has been written about its sweetness, its beauty, its placidity. From what I have seen of some ideal elderly folk all these joys may exist. But I am not going to hurry ahead to meet them before my name is called.

A while ago a questionnaire was sent to various well-known men as to what each of them would do if he found he had but a half-hour to live. Some men said they would pray; others said they would give all their goods to the poor. One man, noted for his laconic speech, replied as follows:

"Wouldn't do a thing! What would be the use?"

That is just it, what would be the use? And what would be the use of sitting down and counting the past birthdays when there is not a thing one can do about it?

For which reason—and because I am not ashamed of the age for which I am not responsible—I decline to feel my years, except to get all the good out of each of them. Which does not mean that I try to seem young. I could never make even a pretense of being that, and I would hate to behave like a fool. Nor does it mean that I am what someone calls "shelf-shy." When, because of the infirmities of my flesh, my dear ones must lay me upon the shelf, I shall try to assume a graceful and neatly-folded appearance. But until then I will not fold myself up and tuck myself away in an old-age corner. To quote my blessed relative, "I am too much afraid that something agreeably interesting will happen and I not be in it." (*The End*)

Leading Father Time a Race

"DO YOU always walk as if you were hurrying to catch a train?" a physician asked Mrs. Van de Water.

"Yes," she admitted. "I am afraid I do. It is a habit I acquired years ago."

"Well, don't stop it!" the doctor said, laughing. "Perhaps you will keep on going so fast that old age will never catch you."

"An hour from now, sir, I shall take great pleasure in placing my sword point there"

War Drums

A stirring romance of the early American wilderness

By Herbert Ravenel Sass

Illustrated by Stockton Mulford

Synopsis of First Instalment

TWO songs floated over a garden wall—the song of a bird, and the song of a woman. Lachlan McDonald—idling in Charles Town while he awaited the arrival of his father's warriors who were to escort him back to Talasé, his father's kingdom—stopped in the lane to listen. The little bird's song was wholly joyous, but in the woman's there was a note of yearning and of sadness. Somehow, Lachlan McDonald knew that he stood at the threshold of a rare adventure.

And even as he listened, the adventure began. From the other side of the wall came a man's voice, a woman's scream, and the rasp of swords. In an instant Lachlan was over the wall. On the grass lay a slim, gallant stranger. Over him bent the loveliest lady Lachlan had ever seen. Ten paces away, aloof and insolent, loomed Captain Lance Falcon of the brig "Good Fortune." The young man leaped upon Falcon, only to be hurled back by the powerful arms. Then the lady intervened. Falcon was sent away, and she demanded to know who Lachlan was and why he had assaulted her friend in her garden!

He told her the first—he was Lachlan McDonald "a Scotchman, a Frenchman, and an Indian, a Prince of the Muskogee Empire, a Chief of the Family of the Wind." As to the second, he knew no answer, and got himself out of the garden. But he could not get the lady out of his mind. He found Almayne, and prevailed upon the old hunter to tell him what he knew of her.

She was the Lady Jolie Stanwicke, lately come from England to her father's house that she might search for her lover, Gilbert Barradell, who had come to the New World and disappeared. The "popinjay" in the garden was Barradell's brother, who would soon return to London. Falcon's part in the drama Almayne did not know. He knew only that Falcon's brig was suspected of piracy.

Almayne implored Lachlan to start at once for home. His education in Charles Town was finished. Rumors of Indian wars were everywhere. His father awaited him. "I will go," said Lachlan, "when I have found how I may serve a lady in distress!" That very night he intercepted a message from the Spanish commandant to Captain Falcon, making an appointment on the "Good Fortune" for Don Ruy Ortiz of St. Augustine, at "12" that night—the conference to concern "Chief Concha's prisoner."

Lachlan changed the "12" to "10," made himself up as a Spaniard, and rowed out to the brig, leaving Almayne and two warriors in the boat to wait for him. Everything went beautifully. Falcon talked freely of his alliance with the Spaniards against the English settlers, of his piracy, and of Chief Concha's prisoner—who was no other than Gilbert Barradell. As to Jolie, he boasted that he "held her father in the hollow of his hand." She must needs do his will. And then, when Lachlan was ready to depart, the cabin door swung open upon a short, squat Spaniard, who lifted his hat to Falcon. "I am an hour before the appointed time," he said. "I am Don Ruy Ortiz!"

FOR a long moment silence reigned. Falcon stood beside the table, swaying slightly as though he had been dealt a blow. Lachlan leaned against the wall, aware only of the pounding of blood in his temples and a sudden weakness in his limbs. Yet, perhaps because his need was greater, he was the first to recover his faculties.

He leaped toward the table and seized the empty wine pitcher which stood there. In the same instant he poised it and hurled it straight at Falcon's head. It was a deadly missile at that close range. But for his thick felt hat, Captain Falcon might have closed his eyes at that moment for the last time. As it was, he dropped like a felled ox.

Lachlan had not waited to see the effect of that first swift blow. Lithe as a panther, he wheeled, whipped out his rapier and, with its point aimed at the Spaniard's throat, sprang toward the door.

He dealt, however, with a cool man and a quick one. The Spaniard sprang backward in a long leap, landing lightly as a cat, and he had scarcely landed before his sword was out. The moon had broken through the clouds, and the deck was bathed in light. For the moment Lachlan faced only one enemy, since the three men of Falcon's company were as yet weaponless.

They stood gaping, bewildered at the sudden apparition of an armed man leaping from the doorway of Falcon's cabin; and Lachlan, turning his back on them, drove for the Spaniard with a shout.

With a clash the swords crossed. The Spaniard gave ground, fighting carefully, devoting himself wholly to defense. He, too, was bewildered—not only bewildered but alarmed; and in an instant Lachlan read the man's mind, understood that he believed himself in a trap.

It was no time for hair-splitting niceties. Lachlan knew that he must win his way quickly to the brig's stern, where he had told Almayne to hold the canoe in readiness, for in a few minutes at most Falcon's seamen would join the fight. Between thrusts, he taunted the Spaniard in his own tongue.

"Spanish spy," he said, "we have you now, and you'll hang for it." Then, in a louder voice, as though addressing men behind the Spaniard, "Close in, lads! Take him alive."

And all the while he drove fiercely forward, thrusting, thrusting, thrusting, forcing his opponent backward step by step toward the brig's stern.

Yet Don Ruy Ortiz fought well. Convinced that he had stepped into an ambush, and that he was assailed by many enemies, he did the one thing that he could do, dealt with the only enemy that he saw. He fought a wary battle, giving ground freely, taking no chances. At Lachlan's shout, "Close in, lads!" he leaped sideways, placing his back against the cabin, so that he might not be taken in the rear by new foes; but when no new foes appeared a light seemed to break upon his understanding.

He smiled, a slow, crafty smile. He was an old soldier and he saw through Lachlan's stratagem; perhaps he himself at one time or another had employed the same trick. Plainly, this swordsman who had leaped from the cabin doorway was alone. Plainly, too, he was not happy just now, otherwise he would not pretend to have allies when he had none. The Spaniard's quick mind darted here and there, nimble as his nimble sword. He could not know all that had happened; but he knew now that it was not he who was in a trap.

He shifted suddenly from defense to offense. For six paces

gained ground, before a prick in the shoulder halted him. er a minute of quick, hot work, he realized that his skill was rmatched, and again he fell back slowly, on the defensive e more.

Suddenly Lachlan sprang backward, jumped across a hatch-y, darted around the cabin and raced toward the brig's stern. m the direction of the forecastle the three men of Falcon's w were coming, armed with cutlasses, and behind them ran ee other men, who had clambered up to the brig's deck m the Spaniard's canoe.

LACHLAN'S canoe also, under the brig's stern, the sound f the swords had been heard. Almayne and the two Musko-s had gained the deck, and now they came running to meet chlan. He waved them back and the four dashed aft together.

"Into the canoe," Lachlan panted. "I'll hold them. . . . ick, man!" he shouted. But the hunter shook his head.

There was no time for talk. The Spaniard and the three cut-s men were at hand. Yet, before they closed, Almayne spoke guttural word, and the two Indians dropped over the stern o the canoe.

Out of the corner of his eye Lachlan saw that Almayne car-d not the cutlass with which he had equipped himself, but one the long paddles of the canoe. Next moment, as the Spaniard d one of Falcon's seamen rushed, the tall hunter smote with is weapon as though it were a flail.

Don Ruy Ortiz, catching the blow squarely on his shoulder, as hurled sideways and fell sprawling. He fell, as luck would have it, directly in front of the foremost of Falcon's seamen, and the latter, stumbling over him, reeled sideways, staggering drunkenly as he tried to regain his balance.

Almayne gripped Lachlan, nearly dragging him off his feet.

"Now, lad!" he shouted. "Overboard!"

Next moment he stood on the brig's bulwark, Lachlan beside him; and in another instant both had plunged into the river.

Almayne's head had hardly bobbed above the surface when one of the Indians laid hold of him, and he was safe in the canoe, into which the other Muskogee had already hauled Lachlan. There ensued a few minutes of some anxiety, during which the Spaniard and one of Falcon's men peppered the water roundabout with musket balls. The shots did no damage, however, and the two Indians soon drove the canoe out of range.

The danger was over. In the stern, Lachlan McDonald, as wet as Almayne, laughed softly to himself and whistled the first bars of a song. But the tall hunter saw nothing to whistle about, and grumbled his discontent in a monologue curiously punctuated with English, French, and Spanish oaths. Lachlan he ignored, addressing his remarks to Little Mink, who sat nearest him.

"A fool's errand," he growled; "a crazy, crack-brained, chuckle-headed venture! Near stabbed, and near drowned, and near shot, and 'twould have served us right. Listen, Little Mink, my brother. From this time forward, Almayne follows his own judgment, and not that of any mad boy whose tongue bewitches his wits. I give you that pledge, Little Mink, and if I break it, my best knife's yours."

Lachlan grinned.

"Mark the pledge well, Little Mink, my brother," he said. "Mark the pledge well. And choose the silver-hafted knife that he won from the Frenchman at Fort Prince George."

AGAIN he fell to whistling, and for some minutes, for the joy of it, he let Almayne grumble and snort. Then, having had enough of foolery, he said in a tone of mock reproach:

"Old friend, if you had taken the trouble to inquire what happened in Lance Falcon's cabin, perhaps you would see some sunshine in this sad world."

Lachlan got slowly to his feet . . . and walked a few steps to the top of the dune to get a view of his surroundings

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

Almayne grunted and was silent for a moment. Then, "What happened?" he asked grudgingly.

"Two things," Lachlan answered. "Captain Falcon got a knock on the head which put him into a sound sleep, from which I think he has not yet awakened. But before he was put to sleep he told me something."

There was that in his tone which aroused Almayne's interest.

"What did he tell you?" the hunter asked, with an eagerness which he could not conceal.

"That Gilbert Barradell is alive," Lachlan answered; "and that he is a prisoner in Chief Concha's town!"

The next morning, a Sunday, dawned clear and warm. Lachlan had crawled into bed not more than two hours before sunrise, yet before the sun was an hour high he opened his eyes and was instantly wide awake. For a while he lay thinking. He had learned that Gilbert Barradell was alive, had learned where he was. That much of the problem was solved. But that was only the beginning. There remained the task of bringing him back to Charles Town, where Jolie Stanwicke awaited him.

YET it was not with this task that Lachlan's thoughts chiefly concerned themselves. His interview with Lance Falcon had disposed of one mystery, but it had revealed two other mysteries: What was the power which Falcon possessed over Edward Stanwicke of Stanwicke Hall, Jolie's father? And what was that mysterious "affair of Chief Concha's daughter," concerning which Falcon had so eagerly sought news?

For many minutes Lachlan studied these two problems to little purpose. Then he rose, dressed quickly, and walked to the inn where he usually breakfasted. A half-hour later he knocked on Almayne's door, at the house where the hunter lodged.

A gruff voice bade him "Come," and, finding the door unbolted, he entered.

"Plague on you!" growled the hunter from under his sheet. "I had thought to sleep till noon to make up for last night's frolic, and you wake me at cock-crow. What want you?"

"My letter," said Lachlan briskly. "The letter which you were to deliver to Mistress Jolie Stanwicke in case I came to grief on Falcon's ship."

ALMAYNE jerked his head toward a rough closet built into a corner of the room. Lachlan crossed the floor, found the letter, and thrust it beneath his coat.

"That's finished," he said. "Fortunately, I'll not need your services as letter carrier. I can make my report to the lady in person."

Almayne chewed the end of his white mustache.

"You mean," he asked, "that you will call on Mistress Jolie Stanwicke?"

Lachlan nodded. Almayne, sitting up in bed, seemed to consider. "That's fair enough," he said presently. "It was

Next moment, with a whining, humming hiss, a ball passed not six feet from Falcon, where he stood at the wheel, and picked a great chunk out of the port bulwark

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

that discovered Barradell's whereabouts. It's only right you should give her the news. Wait till I've eaten, and I'll you to her."

"Thanks," replied Lachlan dryly, "but I'll not trouble . Much as I enjoy your company, I prefer to see the lady ie."

He moved toward the door, but paused before crossing the eshold.

"Almayne," he said thoughtfully, "I shall return here later we can plan what's to be done next. We must move swiftly."

For some minutes after the door had closed Almayne sat tionless on the bed, frowning and chewing his mustache. wly the frown faded.

"By Zooks!" he muttered, swinging his long legs out of the l, "the young cock partridge is in fine feather now! He's en command, and Almayne's a private in the ranks."

Lachlan McDonald had not the honor to be included among the friends of Edward Stanwicke of Stanwicke Hall. Hitherto he had not counted this a misfortune. Old Stanwicke—Lord Stanwicke, as he was often called—was a power in the Province, a great landholder, the bearer of a title in that strange system of Colonial nobility which the Lords Proprietors had established in the day of their authority. Yet, for certain good reasons, few sought his favor or his company.

Lachlan was turning over in his mind the problem of how to gain entrance to Stanwicke's home, when something plucked lightly at his sleeve. He half turned and saw a small negro boy wearing the Stanwicke livery. For an instant the round black face grinned up at him, white teeth gleaming. Then the thick lips framed the word "Come," and the boy passed on ahead of him, walking rapidly.

His heart beat faster when presently he made sure that the boy was leading him by a somewhat roundabout way toward the Stanwicke house. It was not the house itself, however, which they finally approached, but the spacious wooded garden.

Lachlan's thoughts sped back to the moment, two evenings before, when he had stopped in that lane and listened to a woman singing; but he had little leisure now for meditation. The black boy slackened his pace, halted, motioned to Lachlan.

"Ober de wall, master," said the boy. "Me fust."

LACHLAN cupped his hands, and the little negro mounted and scrambled upward. For a moment he sat on the top of the wall, peering this way and that; then, evidently satisfied, he nodded to Lachlan, and immediately dropped out of sight within the garden.

Lachlan waited, listening keenly. There flickered in his mind for an instant a doubt as to where this adventure would lead. Who had sent the black boy, and why? Who was waiting there in the shrubbery of the walled garden? It was perhaps a subtle forewarning of peril. Yet he crouched, sprang upward with outstretched hands, and in a moment was perched on the wall's summit.

He saw her instantly. She was seated on a

Getting Ready For Winter

By William S. Sadler, M. D.

WHEN the frost is on the pumpkin, and the fodder's in the shock," most of us are feeling in the pink of physical condition. During the summer we have spent a great deal of time out of doors and we look forward to a good, productive winter.

It is the purpose of this article to give you some practical suggestions on getting ready for the winter season, which, with its sedentary indoor life and artificial conditions, tends to draw heavily on the strength and energy that you have stored up during the summer and fall.

Biologically, man is an outdoor animal, and he always courts trouble when he undertakes to live for long periods indoors. It is a recognized fact that we have more sickness in the winter than in the summer. But most of it is preventable.

Winter would be the most healthful season of the year if we but knew how to avoid some of the handicaps of the indoor life which the cold season imposes upon us. Cold weather is a tonic, and this is borne out by the fact that the races who occupy the earth's colder regions are in many respects more active and stronger than tropical peoples.

I want you to resolve to continue your physical exercise during the winter months, and arrange that at least a part of it shall be taken out of doors.

The approach of the winter season necessitates many radical readjustments on our part. We must provide for burning more fuel in the body, in order to maintain the standard, normal temperature. Physical exercise assists us in burning up the fuel, and the resultant heat that is liberated helps to keep us warm, even in the presence of frigid temperatures. The energy which furnishes the heat to warm the body is derived from the digested and assimilated food which has been stored in the muscles. About eighty per cent of our food is burned up to keep us warm; only twenty per cent is spent in the energy of motion.

Along with the fuel stored in the muscles, nature prepares a chemical substance called *oxidase*. This is a sort of digestive ferment which contributes to the combustibility of the stored-up muscle fuel. As cold weather draws on, the amount of oxidase to be found in the body is greatly increased, thus supplying us, as it were, with additional kindling wood which can be used to advantage throughout the winter season of low temperatures.

Other changes also take place in the early fall which amount to a complete overhauling in the heat-regulating mechanism of the body. But these cold weather adjustments have nothing to do with the old exploded notion of the blood being "thick" or "thin." We used to be told that certain people were cold and chilly because their "blood was thin." It was supposed that our blood got thick during the winter. Generally speaking, the blood is the same during summer and winter, with the exception that during the latter season it contains more of certain substances which increase the internal combustion of the fuel, thus assisting the body in the necessary task of generating more heat. It is only in some such subtle fashion that the blood is materially changed as between summer and winter. Some folks are doomed to have cold hands and feet, not because their blood is *thin*, but because of certain hereditary tendencies or deficiencies in the circulatory mechanism.

While I commend all of the outdoor sports belonging to the winter season, ranging from hiking to skating, I especially recommend the former as adapted to all ages and conditions. It's free for everybody, and there is no form of exercise that is more invigorating and healthful than walking in the fresh, crisp, wintry air, with chest expanded and arms swinging freely.

Gymnasium work, indoor swimming and other forms of indoor exercise will serve to supplement outdoor activities; but don't forget the health value of the winter hikes.

After outdoor exercise on cold days, don a sweater or overcoat the moment your muscular activity ceases. If you don't, you are inviting a cold.

THE wild animals fatten up during the summer so as to provide against food scarcity during the winter. By spring they are usually relatively thin and gaunt. In the civilized human species it is just the opposite. We are more active during the summer, have more green stuff to eat—foods which are less fattening—while during the winter we tend to house ourselves, eat heartily, exercise less, and gain in weight. So it develops that around ground-hog day human beings of obese tendency begin to weigh themselves and think seriously about reducing.

But we can burn up more food in the winter than we do in the summer, provided we don't overheat our living-rooms, and provided, further, that we get out of doors occasionally. Starches, sugars, and fats are the fuels of the body. Starch and sugar are about of equal value, while fats are highest in calories. If we are not overweight and are exposed to outdoor temperatures during the winter season, we are justified in eating more butter, cream, and other fats than during the summer. We can also utilize a reasonable amount of starch and sugar, together with the usual protein allowance.

In fact, we probably use a little more protein in winter than in summer, but not a great deal more, as protein is not ordinarily used as a fuel in the body. It is utilized for tissue replacement; though protein can be burned up as fuel if there is a scarcity of the ordinary fuel supply.

And one important point to remember is that the body needs water during cold weather the same as in warm weather. The minimum of six to eight glasses of water should be drunk every day during winter, regardless of whether or not you are thirsty. This is done to keep the blood stream clean and to prevent irritation of the kidneys by the over-concentration of the circulating fluids of the body.

The iron content of the blood tends to run down during winter. This is what we doctors mean when we say the hemoglobin is getting low. The following are foods which are especially rich in iron, and you should try to have some one of them at each meal during the winter season: spinach, egg yolks, asparagus, beef, cabbage (outside leaves), oranges, apples, unpeeled almonds, tomatoes, beets, carrots, lentils, beans, fish, peas, potatoes, cereals, bread, figs, and milk.

THE question of vitamins is a more important problem during winter than during summer. This is not the place to enter into a discussion of vitamins; it is too big a subject. I merely want to say this—if you are eating something green each day, if you are using milk, you don't need to worry much about vitamins. You require only a small amount to be healthy, and vitamins are found in all our raw foods. In the case of children, vitamins are of more importance. We should remember that orange juice and tomato juice contain practically all of the known vitamins, and that even canned tomatoes are very good. Cooking the tomatoes does not wholly destroy the vitamins.

In a former generation some families were wont to have a certain date, like October 20th, as the day on which every member of the family was to don the winter flannels. Young and old had to put on the winter underwear, no matter how warm the day or how much these old red or other colored flannels might "itch us." This business of putting on flannels on a certain day was almost as much a ritual with some people as was the habit of taking molasses and sulphur in springtime to purify the blood.

Now, if there is any one thing that needs to be thoroughly revised about our notions of winter clothing it is the idea of wearing the same amount of underwear, no matter what the temperature. Clothing should be a matter of constant adjustment with reference to the weather.

I am more and more convinced that it is best for indoor workers, city dwellers, to wear the same type and weight of underwear the year around. This may not be sound advice for farmers and those who are out of doors in low temperatures many hours each day. I still think, though, that many of our outdoor workers would do better to wear lighter underwear and to provide for heavier outer garments, overalls, leggins, sweaters, and coats, so that when they do come indoors they will not be overheated.

Many of us maintain our indoor temperatures at almost summer heat. Most homes are kept at 75 degrees Fahrenheit

Digitized by Google

STATE UNIVERSITY SYSTEM OF FLORIDA

r above. One cannot live in such temeratures, wearing heavy underwear, and ot bring about that constant state of erspiration which predisposes to chilling nd catching cold, when suddenly going rom such a warm temperature into the older outdoor air.

There is one exception I want to make to his advice about wearing the same undervear winter and summer, and that is with eference to socks and stockings. Men and vomen who are in the habit of wearing hin silk hosiery in the summer need to vear something a little heavier during the vinter.

The main thing about dressing in the vinter is to keep the arms and legs well clothed. The greatest opportunity for chilling is in the extremities, and it is chilling that does the mischief, contributing to internal congestion, colds, and sinus trouble. There are plenty of blood vessels to be found in the skin of the face and even on the neck and chest. It's not the low-necked dresses that cause trouble during the winter. It's the exposure of the arms and the legs to wintry blasts.

Women who are in the habit of wearing satin or thin-soled leather shoes during the summer should turn to low-cut oxfords in the winter. The important point in the dressing of the feet is that we should do our best to keep them warm, without overdressing them. Those individuals who "catch cold" every time their feet get wet should form the habit of wearing rubbers. This is also good advice for those who have chronic sinus trouble.

And don't be afraid, if the temperature goes up, to leave off your heavy winter overcoat and wear one of lighter weight.

THE biggest problem of our indoor life during the winter season is that of humidity. I think the majority of our colds, troubles with the nose, throat, and lungs, are due to breathing air that is too dry. In the case of the hot-air furnace the water pots can be kept filled, and this helps a little; but it doesn't entirely solve the problem. Where there is steam heat, attachments can be put on the coils automatically to liberate steam in the room and thus the humidity problem is largely solved. In the case of hot-water heat this is not possible. If your home is heated by stoves, keep kettles of water boiling on the top.

Humidity is best indicated by means of the combined thermometer—that is, a wet and dry bulb thermometer. If the air becomes over-humid it is depressing, and such conditions are very undesirable.

A good practical test for humidity during the winter is to observe whether or not the windows are frosted. Janitors don't like to have a humid atmosphere, because it makes the windows "sweat." But this is all wrong from the standpoint of the health of the people who live in the house and breathe the air. When the air is around 70 degrees Fahrenheit and has fifty per cent humidity, it is not far from right. Whenever such air falls down to 52 degrees Fahrenheit, the dew point is reached, and water will precipitate on the cold window surface. Of course, on cold days the window glass is far below 52 degrees Fahrenheit, and so it follows that if there is no frost on the glass there is little water in the air of the room—too little for the health of its occupants.

Of this one thing you can be sure—the house where the windows do not sweat and frost during the cold weather is not fit for human habitation. The school with clear windows is wasting the taxpayers' money, the teachers' time, and the pupils' health. The office with clear windows is a place where employees (*Continued on page 108*)

If You Ask Me:

Don't be afraid of a draft if you open the windows of your mind

ON a recent rainy night, Carl Lomen, the reindeer king of Alaska, told me a true story. It has stuck in my crop ever since. And now I'm going to pass it along.

"A certain Greenland Eskimo," said Lomen, "was taken on one of the American North Polar expeditions a number of years ago. Later, as a reward for faithful service, he was brought to New York City for a short visit. At all the miracles of sight and sound he was filled with a most amazed wonder. When he returned to his native village he told stories of buildings that rose into the very face of the sky; of street cars, which he described as houses that moved along the trail, with people living in them as they moved; of mammoth bridges, artificial lights, and all the other dazzling concomitants of the metropolis.

"His people looked at him coldly and walked away. And forthwith throughout the whole village he was dubbed 'Sagdluk,' meaning 'The Liar,' and this name he carried in shame to his grave. Long before his death his original name was entirely forgotten.

"When Knud Rasmussen made his trip from Greenland to Alaska he was accompanied by a Greenland Eskimo named Mitek (Eider Duck). Mitek visited Copenhagen and New York, where he saw many things for the first time and was greatly impressed. Later, upon his return to Greenland, he recalled the tragedy of Sagdluk, and decided that it would not be wise to tell the truth. Instead, he would narrate stories that his people could grasp, and thus save his reputation.

"So he told them how he and Doctor Rasmussen maintained a kyak on the banks of a great river, the Hudson, and how, each morning, they paddled out for their hunting. Ducks, geese and seals were to be had a-plenty, and they enjoyed the visit immensely.

"Mitek, in the eyes of his countrymen, is a very honest man. His neighbors treat him with rare respect."

The road of the truth-teller has always been rocky. Socrates sipping the hemlock, Christ crucified, Stephen stoned, Bruno burned at the stake, Galileo terrified into retraction of his starry truths—forever could one follow that bloody trail through the pages of history.

Something in human nature makes us resent the impact of new ideas. We hate to be disturbed in the beliefs and prejudices that have been handed down with the family furniture. At maturity too many of us go into hibernation, and live off the fat of ancient fetishes. If a new idea invades our den we rise up snarling from our winter sleep.

The Eskimos, at least, had some excuse. They were unable to visualize the startling pictures drawn by Sagdluk. Their simple lives had been too long circumscribed by the brooding arctic night.

But there is no adequate reason why the average man should ever close his mind to fresh "slants" on life. He does, just the same. Nothing is more tragic—or more common—than mental inertia. For every ten men who are physically lazy there are ten thousand with stagnant minds. And stagnant minds are the breeding places of fear.

An old farmer up in Vermont always used to wind up his prayers with this plea: "Oh, God, give me an open mind!" If more people followed his example they might escape being hamstrung by prejudices. And what a pleasant place to live in the world would be!

INTERESTING PEOPLE

They Hunt Seals for Zoos and Animal Acts

WHERE do the trained seals you see on the stage and in zoos, circuses, and carnivals come from? Are they grown domestically and reared from babyhood for theatrical careers?

One would think from their grace and skill that the sleek animals begin their studies early, to qualify for public appearances; but most of them enter captivity after having reached comparative maturity.

The seals of stage, zoo, and circus fame come from the Pacific Ocean. They breed on both shores of the Pacific, and on this side may be found all the way from Mexico to Washington along the California and Oregon coasts. They are hardy animals, and cover a wide range in their habitat.

It is the California sea lion—*Zalophus Californianus*—you see when the animal act comes on. Ten chances to one, these seals have been captured in a narrow-mouthed cave on the middle one of the Coronado Islands, in Mexican waters, twenty miles south of San Diego, California. For it is there that two professional seal hunters brave Pacific storms and the attacks of the seals themselves, so that science may be furthered and the world entertained.

Steve Zolezzi and his son John, two Italian fishermen, supply nearly all the trained seals and captive seals you will find. In four years, the two men have captured six hundred of these animals, some of them after hard struggles; and their prizes now appear in the world's greatest circuses, in London and in Berlin zoos, in the Imperial Zoölogical Gardens at Tokio and in the National Zoo at Washington, to mention only a few places.

The two Zolezzis set out from San Diego whenever an order for seals reaches them, and chug to the cave in their thirty-three-foot sloop-rigged boat. They drop anchor two hundred yards from the island, then put ashore in a skiff. They work alone, and with no other human aid they capture seven or eight seals weighing from two hundred to four hundred pounds each, and manage to get all these aboardship in one fighting, barking mass.

"How?" says the elder Zolezzi. "My boy John and I go to the middle island and try to land when the sea is smooth. There is no place to dock a thirty-foot boat, so we must anchor outside and row in with the skiff. I row the little boat, and John fastens the net to the rocks on one side of the entrance to the cave. It is very rough here, and we must take great care.

"When John has fastened the net to the rocks, we row across the narrow channel to the other side and secure the other end. At high tide the lead sinkers rest on the bottom of the ocean and the cork floats barely reach the surface. The sweep of the water holds the net taut.

"The cave is like a big room, with the entrance low, like a chapel. Right in the center the seals play and fight and bark on a rock that steps out of a sandy beach.

"Sometimes there are three hundred sea lions in the cave, judging by the numbers that leap at the net. That starts, by the way, when we fire two shots from a gun, to frighten them. Then they pour from the mouth of the cave, the first-comers rushing blindly into the meshes of the net.

"After the first six or eight have been caught, those following sense some trouble, and dive to the bottom or slide over the cork top. Even though three hundred may rush from the cave, we seldom catch more than eight on one trip."

Once the "drive" ends, the Zolezzis gather the ends of the

PHOTOGRAPHS COURTESY OF SAN DIEGO NATURAL HISTORY MUSEUM

Most of the seals in zoos and circuses are captured by Steve Zolezzi (oval) and his son. (Above) Steve and John adjusting the net at the mouth of a cave at Coronado Islands, in Mexican waters. When Steve fires a gun, the seals plunge out of the cave into the net, and are towed out to the "Josephine Z." (Bottom) a herd of the seals that inhabit the Pacific Coast

STATE UNIVERSITY SYSTEM OF FLORIDA

into the small boat. They row out to the "Josephine Z," r fishing craft, towing the net. Since each catch weighs from thousand pounds to a ton and a half, they have rigged a ck and tackle by which the net and its contents are pulled ard and dropped into the hold.

During their first "experimental" year the Zolezzis dropped sea lions into the hold with no mechanical means of remov- them on reaching the dock at San Diego. On such occasions, younger Zolezzi would go below with a lariat and lasso the atures, which were then hauled on deck by his father.

Now, Steve arranges crates into which the seals may be ven. They are given the freedom of the hold during the yage to San Diego; but on arrival at the dock a heavy stick ces them into the crates, which then are lifted to a waiting tomobile truck. Thus the men save considerable energy, and oid risk.

Trainers who purchase seals rely upon Steve's good judg- nt to bring in only those which give promise of becoming apt pils. Steve has learned to discard the heavier and older seals, d those with too thick necks.

He seeks seals weighing from one hundred and twenty-five to one hundred and fifty pounds, though the average adult runs around two hundred and fifty. Cubs seldom live in captivity, so he tries to get males about two and one-half years old, because the youngsters learn more rapidly than older animals. He relies largely upon the shape of the neck and the seal's movements in the water when he predicts its probable future.

Just what age the California sea lion attains no one knows definitely. Some have weathered forty winters, but few live longer than twelve years in captivity.

The California State Fish and Game Commission recently took a hand in the controversy over seal conservation, and sent an investigator on a two-year cruise to learn how many seals live on the west coast of Mexico, California, Washington, Oregon, and British Columbia.

While the scientists pursue the seals for study, the Zolezzis pursue them for personal gain under a permit issued by the Mexican central government. Steve has the privilege only because the Mexican Government believes the ends of science are being served.

ANDREW R. BOONE

Jim Way Pushes His Lawn Mower 1,700 Miles a Year

ON OCTOBER 12th, 1927, James Edwin Way—or Jim Way, as he is better known—celebrated the seventy-fifth anniversary of his birth by purchasing another pair of army shoes. The shoes came in handy, because Jim is official Keeper of the Village Green at aron, Connecticut, and has to do a lot of walking. For three ars he has been responsible for a bit of lawn from fifty to nety feet wide and more than mile long. And because he kes his responsibilities seri- usly, he disdains horse or motor ower and cuts the grass with a rty-pound lawn mower which e pushes personally.

As demonstrated by a pe- ometer fastened to one of his ng and active legs, Sharon's eeper of the Green propels his wn mower eighty-six miles each eek, from late April until about ctober first, an annual mara- on of 1,700 miles. But Jim ouldn't trade places with any- ody.

"Sharon's the prettiest vil- ge in Connecticut," he pro- laims with pride, "principally ecause it's got the prettiest reen. Lays just right and shaded y some of the finest old elms and naples in the Nutmeg State. But our green wouldn't be so uch talked about if it didn't ave such velvety grass, and it ouldn't have such velvety grass f I didn't get out and mow it egularly.

"Before I took this job, in 925, the Sharon fire district ommittee had tried all kinds of chemes to keep the green in ood condition. They bought a ower-motor mower steered by and; but after it went into a ditch in front of Jones's place and had to be hauled out by main force, they discarded the mower. Then our public-spirited Dewitt C. Noyes gave the fire district a bigger and fancier motor mower. Like the one the committee invested in, this big one was a combine of cutter and roller, but it was a whale! It cut a swath thirty-six inches instead of two feet wide, and the driver sat on top of it.

"All told, this contraption weighed a ton, and would have been fine on some of the big estates that surround Sharon and have acres of lawn without many trees; but the thing was too cumbersome for our village green. It skinned the humps and missed the hollows, to say nothing of barking the elms, and getting out of order. Once the committee tried a horse-drawn lawn mower, but the horse's hoofs cut up the turf. Then I agreed to do the cutting myself for nine hundred dollars, and keep the sidewalks graveled to boot.

"The committee voted to try me out, as I'd been a professional gardener and horticulturist for fifteen years.

Jim Way, seventy-five-year-old keeper of the village green of Sharon, Connecticut, pushes forty pounds of lawn mower eighty-six miles every week, from April until October

"The first year they furnished me, at my request, with a sixty-eight-pound, five-bladed hand machine that cut an eighteen-inch swath. I pushed it; but it nearly ruined me. Since the spring of 1927 I've been pushing a mower with three blades, cutting sixteen inches wide and weighing only forty pounds.

"As soon as the snow's melted in the spring I rake most of the leaves, and burn them up on the highway that borders the Sharon green, but I don't try to rake quite clean. Some of them I leave for soil nourishment.

"After the spring rains have given the grass a start, I oil up the mower and begin each Monday on the schoolhouse lawn—my contract covers that and the lawn in front of the public library—and work south past the soldiers' monument, the flagpole, post office and town clock tower clear to the southern end of the Wheeler place. I finish up there Friday afternoon.

"In forty-two hours of steady going I travel eighty-six miles. Of course my lawn mower travels, too. But both of us quit at three each afternoon, and lay off entirely on Saturday, unless rain delays us, or I have some extra contracts to carry out. In dry spells I may skip the library lawn for a week or two. But throughout the season I'll give the whole green a once-over every week.

"It's careful cutting that makes a lawn. The Sharon green hasn't had any fertilizer since 1925. It didn't need it then. But you won't find any finer grass carpet than the one I'm mowing in the summer months. It's mostly red top and very few weeds."

If you catch Jim after three P. M. perching on the granite boulder in the center of the green, the Keeper of the Village Green will call your attention to a bronze tablet on that boulder and to its legend:

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

"Site of the 2nd House of Worship in Sharon. George Whitefield Preached Here June 18, 1770. Text, 'Marvel not that I said unto thee, ye shall be born again.' John 3, 7.
An Immense Congregation Assembled."

Then Jim will describe the thrilling day in 1862 when he saw the 150th New York Volunteer Infantry march out of Poughkeepsie for Baltimore, and how, one year later, he ran away and became their mascot until the regiment was called to the field of Gettysburg.

Or he may dwell on the decade in which he kept store, or the years when he was a guard in Sing Sing prison.

"If I could only write the story of my life!" he exclaims, gazing along the stretches of his green under the cathedral arches of its elms. "But between mowing and weeding and raking leaves, and managing movie benefits to raise extra money for benches and bridges and flower beds the warm months go past fast enough. And in winter I have to keep the sidewalks along the green clear of snow, put on the Litchfield County poultry shows, take a turn at the wood-burning furnace in the Methodist Episcopal Church and try to keep our new Sharon Men's Club alive."

EARL CHAPIN MAY

An Invalid Who Directs a Business From Her Bedside

THE bed of Mrs. Shirley L. Lloyd, of New York City, might almost be a throne, except that the cause of her being there is severe arthritis. At seventy, after four years in a sick-room, she still sends and receives messengers to and from her far-flung dominions, which happen to be a wall-paper company with headquarters in New York and branches in Brooklyn, Newark, New Jersey, and Chicago.

She took over her small empire, the W. H. S. Lloyd Company, at the death of her husband, thirty-five years ago. At that time it was tucked away in two rooms on a top floor in Twenty-first Street, New York City. It has since grown to have three branches, with a spacious main store in flourishing Forty-eighth Street. Mrs. Lloyd has been the guiding influence all these years, and now, when she cannot go to them, her son and her old associates come to hold their councils around her bed.

The council's edicts go from a back room in a modest apartment on Ninety-first Street, where the sun shines in for part of the afternoon. Mrs. Lloyd sits there in her old-fashioned brass bed, wearing a kimono, varying her position now and then by sitting erect or by leaning back against the improvised cloth rest, a total varying distance of about one inch.

This is as far as she can move by herself without pain.

The arthritis was the second quirk in her life that she refused to let upset her. The first was finding herself a widow with a son of four and a baby daughter. As her husband's business could not provide for her if she engaged a manager, the natural thing at first seemed to let it go and accept her three older brothers' offer of support.

Yet complete independence was what she really wanted. She disliked being indebted for help, even to her brothers. She called in her mother, then nearly seventy-five, to keep house and care for the children, and she took command at the office.

She knew nothing about either business or wall paper, so she asked questions. A traveling saleswoman in those days was a strange sight, yet she went on the road, carting two huge trunks. The wall-paper samples used to be mounted in large sets on wooden easels, each weighing thirty pounds, which had to be lifted in and out and around the room until the customer chose the one he wanted.

As her customers somehow managed to be away or engaged in deep thought while the lifting was going on, she did that, too.

She had two guiding rules: Her earnings must be put back into more stock or held as reserve capital; and everything must be done to make her salesrooms and her service convenient to her customers.

The one helped the other. Her first ambition on taking charge was to move the office down to the ground. She economized rigidly in the business; she took a modest apartment for herself, and finally, after two years, she risked additional expense by moving to a ground floor on Twenty-fourth Street.

Mrs. Shirley Lloyd's husband died thirty-five years ago, leaving her with two small children. She took over his wall-paper business herself, expanded it, and at seventy is still managing it, propped up in bed

Other moves followed, but her next big decision was that of opening a branch. The West was thriving. By 1908 her salesmen were making regular visits to the Pacific coast. Trade was growing; but her customers were impatient at having to wait for goods sent from across the continent. Chicago was a central point for distribution, and, with only the capital she had retained in the business, she sent her oldest salesman to start an office there.

The demand for speed grew more insistent after the war. Even the Hudson River seemed a handicap to business between New York and New Jersey. Two years ago, though she had then been two years an invalid, she agreed with her managers to expand again. A branch was established in Newark. A year ago, one was opened in Brooklyn, still with her own capital.

To-day, from that little beginning in Twenty-first Street, with three assistants and an office boy, she has a main store in a new building in a new center of business, on the ground floor of course, with a dozen clerks and as many salesmen, with three branches, and a corps of salesmen on the road. Hers is one of the largest wholesale firms in the United States dealing in imported wall papers.

Wall paper came to be her hobby. As the business grew, she took more time to become acquainted with it, traveling to visit the English and French factories once a year.

She learned how the workmen raised the large stamps on pulleys, wet them on ink-soaked blankets and touched one after another on the paper, always with patient precision. One particularly memorable work—paper for International House, on Riverside Drive, New York—represented early American scenes, for which each block of the design had to be stamped eighteen hundred times.

She by no means claims all the credit for the firm's success. "I've had splendid help," she said. "The head of the Chicago branch was engaged as a boy by my husband. One of the heads in New York has been with me twenty-six years, and some of the others over twenty. I always got their advice about the business."

Yet a person going into her store to-day and asking a salesman casually whether it is true that Mrs. Lloyd manages the business, gets the positive reply, "She *is* the business."

The arthritis seems almost incredible to her after her active, healthy life. Yet, Mrs. Lloyd has not let it upset her. She has surrounded herself with a few comforts, and sits there, carrying on business, talking enthusiastically with guests and discussing the day's events. Whatever hold the arthritis may have got in this struggle, she has the real victory. Her mind is free and her interest reaches everything.

Hunter Has Revived a Fifteenth-Century Art

DARD HUNTER, of Chillicothe, Ohio, does what nobody else has done since the invention of printing. Unassisted, he makes books complete.

Hunter makes his paper in a water mill operated by himself; he designed his type and laboriously cast it, piece by piece; he writes his books or, rather, composes them in type at the case; he himself prints them on his own press. His customers include the great museums of Europe and of the United States, and many of the wealthiest book collectors. Each of his volumes, upon its appearance, has been included in the annual list of the fifty typographically best books of the year. Copies command premiums equaled by few other present-day fine books.

Hunter is a strongly-built man in the early forties, classic of features, reserved in manner. His father was a printer, as were his father's people for generations before, and he was brought up in a printing shop.

At twelve, Dard quit school. But he was studious, and in his own way acquired a knowledge of subjects he liked.

When he was eighteen he joined Elbert Hubbard at the Roycroft colony. His first task at East Aurora was making a colored glass window for the Roycroft Inn, a task on which he spent months of patient effort. When it was completed, he felt it failed as a work of art, though Hubbard and others said it was beautiful; therefore he took a hammer and smashed it.

After several years at East Aurora, where he designed many books, Hunter studied abroad. He is the only American who ever received a degree from the Royal Austrian School of Printing, which in its day was the Mecca of typographical students. Once while in Austria, Hunter found himself practically penniless. He went to England and made a fresh stake by designing advertising matter and booklets.

Meantime, he lived with the art of bookmaking. His taste was nurtured on the great books of the fifteenth and sixteenth centuries that he found in museums and libraries. He studied type, paper, and papermaking, and, comparing the old with the new, gradually resolved to produce modern books as beautiful as those early books.

"The more I studied," he says, "the more I felt that paper, type design, the type itself, page design, presswork—all should be the product of a single mind and hand, as a painting is the product of one artist."

The project required years of patient labor. One day on a walking trip in Wiltshire, England, Hunter passed a village where workmen were dismantling an ancient paper mill. For a few dollars, the equipment became his; he crated and shipped it to the United States.

At Marlborough-on-the-Hudson, in New York State, convenient to water power, he built his paper mill.

Papermaking, however, was only a small part of the preparation.

"Of all the work I had to do," he says, "the most discouraging was making the type. I was five years at it. To support myself and my family at that time, I raised raspberries on a farm near Marlborough.

Bookmaking is a real art to Dard Hunter, of Chillicothe, Ohio. He writes them and prints them on paper he makes in his own water mill, with the type he has cast himself

"There were months of discouraging labor. Certain letters caused no particular trouble. But I found it nearly impossible to make perfect castings of the small letter *m*. For every perfect letter saved, I discarded hundreds. I made easily fifty thousand castings of that one letter, and to-day I doubt if there are a hundred perfect specimens in my type case."

Hunter's first two books were made for the Chicago Society of Etchers. He printed two hundred and fifty copies of each, to sell for two dollars and forty cents apiece.

Shortly after, one set of the two books was sold at auction for eighty dollars.

His third book was the first he wrote himself. It dealt with the history and methods of papermaking. The library he has collected on this subject is probably more comprehensive than any of its kind elsewhere. This third book was made to sell at twenty-five dollars per copy. One Chicago bookseller contrived to get six copies at the time of publication, and after holding them for three months, disposed of them at fifty dollars each. A copy recently sold in London for one hundred and twenty-five dollars.

The next book, "A Bibliography of Papermaking and Watermarks," was sold for thirty dollars a copy. But the latest book, on which Hunter is at work now, will be sold for sixty dollars a copy.

"I had finished the 'Bibliography,'" he said, "all but the presswork on the title page and the dedication page, when late one night I suddenly could not see. I lay in a hospital with my eyes bandaged for months, and permanently lost the sight in one eye."

In gathering material for "Primitive Papermaking," on which he is working now, Hunter made a trip to the Tonga Islands in the South Pacific, for no authentic study had been made of the *tapa* of the South Sea Islands.

"Tapa," he said, "is made from the bark of young mulberries stripped from the trunk in pieces six or seven feet long, and from one to four inches wide. It is pounded with wooden mallets until it becomes extremely thin, and much wider. The thin pieces are pasted together, until the material has the thickness of three or four pieces. The result is a tough paper which the natives color in many intricate and interesting designs, and use for clothing. In my next book I am including many different samples.

"Sometimes," Mr. Hunter went on, "I am asked why I limit myself to a couple of hundred copies of each book. As a matter of fact, in future the number may be less. One hundred and fifty copies are about as many as I can produce, without endangering the workmanship.

"Results?" He shrugged his shoulder. "My aim," he said, "is to produce beautiful things. Still, I know there have been results of another kind, tangible and cheering. Many of our modern books bear witness that their makers have forgotten, if they ever knew, that bookmaking can be an art. While commercially the pendulum has been swinging away from art, I am pushing hard to swing it back. I know that my influence has penetrated a little way, even into unexpected places."

Her Job is to Make People Want to Pay Their Debts

A BUSINESS man of Minneapolis proudly informed me that his city possesses a unique institution: a collection agency owned and run by a woman.

Collecting bad debts is a hard job for anybody to tackle; yet Clara Sandborg has been doing it for six years and with surprising results.

When she was graduated from a Minneapolis high school, over ten years ago, she landed a job with the credit manager of a leading retail store.

In the store, she learned how retail business men size up customers before allowing them to have a charge account and to run up bills.

After some experience there, she took a position with a collection agency, where she learned that there are different kinds of "bad debts," just as there are different kinds of people. Handling these delinquent accounts, as they are politely called, meant handling human beings. More and more, she studied the people behind the debts. In each case, she tried to find out *why* they were delinquent.

She wanted to work intelligently, even sympathetically. For her experience has taught her that not all "bad" debts are incurred by "bad" people.

Since she started her own company, the Legal Adjustment Company, she has handled hundreds of these delinquent accounts; and she has learned to separate them into a few distinct groups.

"In proportion to their numbers, the enormous middle class furnishes very few of the delinquent accounts," she said to me. "These people usually plan their expenses carefully, and try to accumulate a surplus to take care of emergencies.

"The very poor people cannot always get credit. As for the very rich, the head of the family, who is pretty certain to be a business man, cannot afford to let the family bills go unpaid. His own commercial standing would suffer if he did.

"Most of the trouble comes from two strata of society; one below the real middle class and the other above it. Both these strata are made up of would-be's; people who are struggling to keep up with the class above them. They live on a scale which they can't afford. They allow no margin of safety; and consequently they are unprepared for an emergency, such as sickness or loss of a job.

"There is also a smaller group. I might call it the 'optimist group'; people who have a blind confidence that the future will somehow take care of itself.

"There are certain families which seem to inherit this cheerful irresponsibility, just as they inherit their physical characteristics. They live comfortably and blithely. But they are really living on the charity of the merchants with whom they trade.

"Seventy-five per cent of the people who owe money can pay their debts if they really want to! If this were not true, I couldn't stay in business, for we are not paid for *trying* to collect a debt. We get a percentage of the money that we actually do succeed in collecting from debtors.

Clara Sandborg runs her own collection agency in Minneapolis, Minnesota. Three years ago she formed a Physicians' and Dentists' Credit Exchange, now numbering 500 members, because she says these professions suffer most from unpaid bills

"There are some delinquents who have nothing and are not earning enough to enable them to save a dollar. These accounts are hopeless and I don't try to collect them as long as that condition exists. They are held in abeyance and rechecked at various intervals to see whether any favorable change has taken place.

"But most debtors will *say* that they can't pay. So it is up to us to discover whether the person, or the family, has a steady income and how much it is. We find out how much they are spending and what they are spending it for.

"Then we try to discover the right appeal; for my idea is not to make people pay, but to make them *want* to pay.

"I employ both men and women as collectors; but, on the whole, a woman does better than a man.

"A man, even a supposedly hard-boiled collector, is prone to succumb to the smiles or tears of a woman who has neglected to pay her bills. But a woman debtor knows that she is wasting time if she tries those tricks on another woman.

"A woman collector is also more successful with the brow-beating, blustering type of man; the kind that swears at a collector and threatens to kick him out.

"He can't very well try those tactics on a courteous and well-bred woman. He doesn't know just how to meet the situation. This gives the woman a chance to state her case, which is really *his* case. If she does this intelligently and sensibly, he begins to realize that she is not an enemy but a friend; that we want to help him to get out of a bad fix.

"Of all business and professional men, doctors are the worst off in this matter of bad debts. Before a merchant allows you to open a charge account, he requires you to furnish references, but if a physician is called to your bedside, he can't wait to investigate your reputation for paying your bills.

"Physicians suffered such severe losses through unpaid bills that I began to specialize in that kind of collection work; and this led me, three years ago, to form a Physicians' and Dentists' Credit Exchange. It now has 500 members.

"Theoretically our members should send us, regularly, a list of their delinquent patients. These lists are assembled in our office and are available to each physician and each dentist. But if I waited for this information to be sent me, I simply wouldn't receive it. I have to go to them, examine their books, and find out for myself who, among their patients, are not paying their bills.

"The dentists have responded more concertedly to the idea of this exchange than the physicians, for not only is their labor involved but also their actual outlay of money in valuable materials put into their patients' mouths.

"As a matter of fact, I have found that not many debtors really mean to be grafters. But they get in so deep that they just flounder hopelessly.

"A collection agency is a cold and cruel thing if it tries merely to get money out of people's pockets—usually pretty empty pockets at that! But if, instead, it tries to give understanding and help—even when they are not, at first, wanted—I think it is a real service. To the creditor, of course; but that isn't what I mean. The greater service is to the debtor; because he is helped to become a free man again."

MARY B. MULLETT

"Daylight and Dark Are Mine Alike to Use"

(*Continued from page 33*)

"But, unfortunately for me, there was a nny old Scotchman on the school board.

"The next year I was offered the school gain, but at a flat salary of sixty dollars a nonth.

"Somebody else got that sixty dollars a nonth. I wouldn't have it. Instead, I ent to Marion, seven miles away, and ung around the railroad station about a ear without pay while I learned the elegraph code and picked up enough nformation to enable me to get a job as n operator. I lived on the money I had aved teaching school.

"The train dispatcher finally put me n as relief operator. During the vacation eriod I traveled from station to station, elieving operators who wanted to get way, or filling in between regulars.

"Assignments were not very frequent, nd my money kept dwindling. By the ime I got down to seven dollars and very ew clothes, the dispatcher gave me the ob of agent at a new station opened at Corvallis. Corvallis was a terminal point hen, and a very busy little city.

"IN COLLEGE I had made it a rule to learn at least one important, valuable hing a day, and the whole field of railroading was now open to my inquiry. There was nothing organized about my effort to acquire knowledge; I simply istened to everything I heard: the comments of trainmen, executive officers of the road and so on, and read all I could find on railroading.

"Years later when, as editor of this newspaper, my duties required me to comment editorially on various phases of railroading this knowledge came in handy. I remember an instance:

"There was an accident at Celilo. Seven people were killed in a head-on collision. The engineer and conductor of one of the trains were fired by the railroad company.

"I couldn't believe that those men, both old in service and nearing the pension age, could be so plainly to blame for the wreck as at first seemed the case.

"It developed that, instead of a regular block signal, the stretch of track where the wreck occurred was protected by a telephone system. It happened that when one conductor was telephoning ahead, in the case I'm telling you about, the other had already rung and, getting no answer, had passed on. The second conductor, getting no answer, also ordered his train ahead.

"They had done all they could do with the equipment at hand. But as the public didn't understand railroading, it wanted the trainmen punished, and the railroad company dismissed them.

"I went to bat for those two loyal employees. Time and again the 'Journal' hammered on the fact that the fault was not with the men, but with the equipment they had to work with.

"The Oregon public service commission finally ordered an investigation. When the facts were sifted, the men were found to have been in no way negligent, and the railroad company restored them to duty with full pension privileges.

"Without the experience I had gained in the business, I would never have been able to present the case of those two old men to the public as effectively as I did.

"Among my railroad friends during the three years I was in the station at Corvallis was a young locomotive fireman. He was a powerful chap. His favorite pastime was boxing.

"One day, while we were having a friendly match in a box car at the side of the depot, he accidentally hit me in the left eye with what must have been all his might. The blow sent me spinning to the other end of the car, and my eye felt as though it were occupied by a lot of lightning.

"My eye blackened and swelled. It is possible that my vision in that eye had been defective for years. I remember that when we youngsters used to go strawberrying in Scio, I could never find any strawberries—couldn't see them, I guess.

"Anyway, from the day of that blow my eye gave me discomfort. That was the beginning of the twelve years of trouble that led to this." And Mr. Irvine tapped his temple with his finger tips.

All the time he worked at railroading Mr. Irvine was editing for the Corvallis newspaper. As he was at a point where he could watch the comings and goings of everybody in town he kept the newspaper supplied with this type of news.

"My dream in those days," he told me, "was to have a job like the one I have now; but I lacked the confidence necessary to try to get one. As a matter of fact, I wasn't ready for such a job.

"The enthusiasm I had had for railroading began to wear off and, lacking this interest, I found it more and more difficult to learn something new every day. Added to this waning of enthusiasm was the constant reminder that railroad jobs were becoming more insecure all the time.

"Feeling this way, I was ripe for the proposition when my brother-in-law suggested that we buy out a boot and shoe store in Corvallis.

"The most important thing I learned in that business was that the commercial instinct is totally lacking in my make-up.

"MY EYES were steadily failing. The size numbers on the shoe boxes were so small I couldn't see them, and I had the boxes marked with a code system of letters. The letters were three quarters of an inch high.

"But the first real definite feeling that I was going blind came one day when I was driving a horse and buggy from Corvallis to Brownsville, a distance of twenty-four miles. I had difficulty in seeing the road. The trip convinced me that sooner or later I would be totally blind.

"Mrs. Irvine sensed the situation. She and one or two of her friends took up stenography, studying together at each other's homes. Do you think I didn't know why she was studying so earnestly?

"I was proud to know that she was willing to prepare herself for whatever extra burdens the future might bring; but, even so, the fact that she thought it necessary filled me with gloom.

"Any reference to my eyes became embarrassing to me. My imagination was running amuck, and my self-confidence was dying. When a chance came to sell the store, I was glad. I wanted to get away where people couldn't see me—where they couldn't pity me.

"MY FATHER owned a dairy ranch near Sprague, Washington. I leased it, and we spent four years and a half on the place.

"The work was hard, and I lost myself in it—a blessed relief from thinking of myself so much. I did my share of the milking, led about by a small boy. We had between fifty and sixty cows. I helped with everything, from digging post holes to harvesting.

"But my horizon kept coming closer and closer. Trees I had once been able to see disappeared in the blur. In the late '90s, I went to New York and had an operation on my left eye. It became much better.

"In February—we had gone East in September—I returned to Sprague with my eyesight about fifty per cent of normal. A tree down in a hollow a mile away showed up perfectly plain. I had never seen it from that point before, and the sight was some thrill, believe me.

"But—the other eye, the one I had been depending on when the left eye was so bad, began to fail! In a year or two, conditions had completely reversed: My left eye was the 'good one,' and the right was the failing one.

"My sight was slowly, very slowly, failing again.

"Ranching wasn't a successful venture. Finally, thoroughly discouraged, I sold my personal property on the place and went back to Corvallis.

"I decided to end once and for all the urge that had been breaking out in my mind every so often—the urge to buy a newspaper.

"Corvallis had two newspapers by that time—the 'Gazette' and the 'Times.' The 'Gazette' wasn't for sale; the 'Times' could be had for $5,000 with $1,000 down.

"A banker there agreed to lend me $500, to be secured with a mortgage on the plant. I went to a groceryman friend of mine and asked him to lend me the other $500.

"With fifty dollars as operating capital, I walked into the 'Times' office and became proprietor. It was a proud moment; but it would have been followed by a lot of sad ones but for Mrs. Irvine.

"I've told you that I haven't the commercial instinct. There Mrs. Irvine came in. I devoted my time to getting out the paper, and to taking part in civic affairs. She ran the business, made collections, did the buying, paid the bills, and so on.

"I made it my business to study the needs of Corvallis. We backed a gravity water-system project, and a sewer system,

Digitized by Google Original from STATE UNIVERSITY SYSTEM OF FLORIDA

and put them both over. My fellow townsmen honored me with the office of mayor.

"The business grew, and I changed the paper to a semi-weekly.

"BUT all the time—my eyes! One night there came a streak over my left eye; the next morning it had spread further; the next night still further.

"Mrs. Irvine and I got on the train and rushed to San Francisco. An oculist told me a strange condition was developing in both my eyes that would eventually leave me blind—and that the time was not many hours away.

"Within three days, while I was lying on a cot in a hotel room in San Francisco, the blow fell. I felt it coming. A light seven feet away suddenly grew dimmer, and went out! I was blind.

"For a few days the oculist continued his treatment, to make it easier for me to bear the affliction. Then we got on the train and went home.

"I was anxious to get back to my work. 'Now,' I said to myself, 'I don't have to worry any more about my eyes. I know what I'm up against, and from here on I'm going straight ahead.'

"Mrs. Irvine did my reading for me, and kept me posted on all the topics of the day.

"I gave special attention to farming topics. One day I wrote an article on the coöperative movement started by a handful of apple growers at Hood River, Oregon. They were the first in the West to point the way to coöperative farm marketing. Mr. C. S. Jackson, publisher of the Oregon 'Journal,' saw it. He wrote at once and asked if I wouldn't write similar articles and editorials regularly for the 'Journal.' I lost no time in getting some copy to him. Every line I sent was used.

"Finally, in September, 1907, he asked me to come to Portland and write editorials for the 'Journal.'

"My dream had come true! I accepted on the spot, rushed back to Corvallis, leased the 'Times' for a year and returned with my family to Portland. I later sold the 'Times.'

"My first day on the 'Journal' was a hectic one. The racket of a city newspaper room was new to me. It took me all day to write an editorial that I wrote ordinarily in fifteen or twenty minutes.

"In the room where they put me was a boy with a foghorn voice. He was an eager youth, very much interested in sports. Every time I got settled down to write, he would yell across to the sporting editor for details on some sporting event. As I was interested in sports too, it was difficult for me to concentrate.

"Now, I had anticipated something like this, so before I left Corvallis I wrote a handful of editorials. Whenever I thought the proper period of time had passed, those first three or four days, I'd slip one of these editorials out of my pocket and send it to the composing-room. This stratagem got me by, and nobody was any the wiser."

Mr. Irvine would rather be editor of the "Journal" than governor of Oregon. He proved it once when he headed off a spontaneous movement for his nomination that was sweeping the state.

"I feel there is a bigger work for me to do here," was his reply to those eager to honor him with the highest office the state can offer.

"Mr. Irvine," I said, "what is it that keeps you so happy?"

"The things I *see!*" he replied. "If, by touching a button I could restore my sight, I would hesitate a minute or two while I took leave of the beautiful world I'm living in now. I am blind; but I see a side of life that many do not see.

"A kind word, a touch, a deed—every day some beautiful token of human kindness comes to me. There is so much more goodness and kindness and fairness in the world than most people realize.

"It sounds odd to you, I know, for me to say I see things—but I do see them. I don't see the faces of my friends, but I see their souls, their real personalities—for, realizing my condition, no one tries to bluff me."

I asked Mr. Irvine to tell me about the automobile accident that left such deep lines on his face.

"A party of us were going to Hood River to a meeting of business men and farmers. In the crowd was a woman singer, her accompanist, a swimming partner of mine named James Sayer, and myself. I was to speak.

"Traveling down a five per cent grade on the Columbia highway, we hit a spot where the sun hadn't had a chance to shine yet—it was early in the forenoon. The driver stepped on his brake, skidded, and then things commenced to happen.

"The back end of the car began to sway. It felt as though we were running down a railroad track. I gripped my seat and waited. In about five seconds there was a terrific bump. The car had left the pavement and run into a telephone pole. The pole was snapped off like a twig.

"I was thrown into the windshield. The first thing I did was yell to see if my friend, Jim Sayer, was hurt. There was no answer. I opened the door and stumbled out of the car. Someone said, 'Your friend is hurt, Mr. Irvine.'

"I FELL down in a heap beside the road. The next thing I knew somebody was wiping my face. I didn't feel any pain. The blow had evidently blocked a nerve center.

"'What are you trying to do?' I asked.

"'Your face is badly cut up,' was the reply. 'Don't move.'

"The woman singer and her accompanist were both injured; but Jim Sayer was hurt worse than anyone else. He was unconscious for more than an hour. They rushed us to Hood River, bandaged us up, and we went on to the meeting."

I asked Jim Sayer about the incident. "I want to add just one thing to what Mr. Irvine has told you," he said. "After we got to the meeting, Frank, with one wound that had been sewed up with twelve stitches, went ahead and made his speech!"

Spectators at the Multnomah Club swimming pool are often amazed at Mr. Irvine's endurance in the water.

"It is a pity everyone doesn't realize the benefit of a daily swim," he said to me. "I leave the office at noon tired out, take a swim, have lunch, and come back fresher than I was in the morning."

"How did you come to take up swimming? Weren't you afraid of the water?" I inquired.

"Yes, I was afraid I would be afraid; but that was just my imagination working overtime again. When I was a boy, I pretty nearly lived in the water of a river near Scio. I was a good swimmer. I might just as well have had the pleasure of that sport all along, but I never supposed I could get around in the water after I lost my eyesight.

"One day three of my friends dropped into the office. I asked where they were going.

"'Swimmin',' one of them said. 'Want to go along?'

"He was only jesting, but I said, 'Sure. I'll go.'

"Mrs. Irvine spoke right up, 'No! You'll do nothing of the kind. Why, you might get drowned. You couldn't take care of yourself.'

"Well, there was a challenge—and so I went.

"MY FRIENDS led me to the pool, told me how far it was to the other side, and turned me loose. I took two or three experimental strokes, and all at once the glorious pleasure of it came over me. Here was a brand-new activity I had been overlooking. I struck out for the other side as hard as I could swim!

"My friends took after me—to see that I didn't drown, I guess. I thought they were racing me, and put on some more steam.

"I touched the other side—the first one across, and as happy as I could be. They had a time getting me out of the water; and, except when I'm out of town or the tank is closed for repairs, I have never missed a daily swim since.

"Next to swimming I like dancing—the swing of the music, the joyous frivolity of the conversation, the enlightening phrases from the language of youth, which are a constant source of amusement and wonder to me. It is an offset to the hours of serious thinking I must go through here in the office.

"People often ask me how I manage to get about the ballroom. There seems to be a sense, I don't know just what it is, by which I realize when another couple approaches. One's partner, too, is always giving little signals of warning without realizing it.

"Voices tell me a lot about a person. When you are able to see a person, you miss so much that is revealed in the voice. When we are sad, our voices reflect it—even when we try to cover up any signs of grief. When a person is happy a wonderful quality develops in the voice, a greater resonance and a more vibrant quality.

"Oh, I'm in contact with life," Mr. Irvine said. "You consider me, I suppose, a very dependent person. But in many ways blindness gives me freedom!

"I can 'shut myself up in my mind' any time, anywhere. Concentration has become a habit, because I can't look out of my window and see something to distract my attention.

"Except for the sympathy I feel for my friends, or when it stops the 'Journal's' presses, it means nothing to me when the lights go out. All time is mine to use, daylight and dark."

Don't be "Sold"

When you're convinced, buy. In the meantime, accept this 10-day test we offer to prove our claims

GENTLEMEN:

Men are slow to change a habit. So we have found in offering them this remarkable new shaving cream that it is better to offer a test, *at our expense,* than merely try to *argue* them into a change.

Results prove the big majority of men who *try* Palmolive Shaving Cream stick to it. For they find the things we say are true. And they tell others, in extravagant terms, things we would never dare to claim.

So now we urge you to clip the coupon as a reminder. Try this ten-day test, and prove to yourself that what you seek, we've got. You owe it to yourself to know from your own experience.

How we did it

Palmolive Shaving Cream's sensational success is no accident. Our vast laboratories worked years perfecting it.

Before we started, we asked 1000 men what they expected in a shaving cream. Then we set out to give them what they asked. They named four things. We offer five—features that came only after 130 different experiments had been rejected.

All our knowledge of soap, gained in a lifetime of study, has gone into this new shaving delight.

5 exclusive factors

1. Multiplies itself in lather 250 times.
2. Softens the beard in one minute.
3. Maintains its creamy fullness for 10 minutes on the face.
4. Strong bubbles hold the hairs erect for cutting.
5. Fine after-effects due to palm and olive oil content.

Won't you try it?

It costs nothing to learn what we have done. We count on winning you strictly on merit. Your present method may suit, still there may be a better. Send the coupon before you forget.

THE PALMOLIVE-PEET COMPANY, CHICAGO, ILL.

To add the final touch to shaving luxury, we have created Palmolive After Shaving Talc—especially for men. Doesn't show. Leaves the skin smooth and fresh, and gives that well-groomed look. Try the sample we are sending free with the tube of Shaving Cream. There are new delights here for every man. Please let us prove them to you. Clip the coupon now.

It's All Right to Be a Wife if You Don't Look Like One!

(*Continued from page 19*)

right thinking. What is more, in the home it is one of the causes for discontent, unhappiness, and divorce. It takes a strong-minded man, or a blind one, to keep on loving a dowdy wife."

"But what about the cost of this pretty dressing?" I interrupted.

"It is no more," replied Mrs. Donnelly, "than the cost of ugly dressing. A dollar's worth of material is still a dollar's worth, whether the color of it is gray or orange, or whether you cut it up in straight lines or in curves."

NELL DONNELLY was born on a farm near Parsons, Kansas. Her father, formerly a farmer, worked in the Parsons railroad shops, and Nell Quinlan —which was then her name—was the youngest in a family of twelve children.

"Oh, there was plenty to do in a family of that size," admitted Mrs. Donnelly; "but I'm afraid I didn't do much of it. Being the baby among the twelve had its advantages. It made of me the family pet, the 'lady,' if you please."

Nevertheless, at least in those days, it was considered a disgrace in Parsons even for a "lady" not to know how to sew and to cook. A woman's ability was judged by her baking and her needle. So Nell was taught by her elder sisters how to remake for her own use the dresses which they had outgrown but not outworn, and how to preside over a kitchen range.

Later, she attended a convent school, the high school, and the business college in Parsons, where bookkeeping and stenography were taught. She was "good in arithmetic," and was advised to become a bookkeeper. Over and beyond the ambition to become a bookkeeper, she had a greater ambition to go to college. But there wasn't enough money for that.

Instead of college, therefore, Nell decided on what she considered the next best thing, a business career in Kansas City, which was the nearest big city to Parsons.

"I was positive," laughed Mrs. Donnelly, "that I could live on twenty dollars a month, and earn eighty dollars a month. I pictured myself having a perfectly wonderful time selecting from a dozen nice openings the one I would like best. I wasn't one bit afraid, and surely not lacking in confidence."

But at the first office where she applied, her confidence was slightly shaken. A man with a fierce mustache informed her without ceremony that they "hired only girls with experience." At the second office, the young manager was not quite so blunt, but just as emphatic. He couldn't afford to waste his time on inexperienced help. And so with the third office, the fourth, and the fifteenth.

In all of these offices girls were serenely at work—experienced girls. The question was, how had they ever got started?

"I settled it in this way," said Mrs. Donnelly: "I had been applying only at the best offices, to the ones which appealed to me as the nicest places in which to work. I reasoned that every other girl looking for a job also would apply to those offices, so they could afford to be choosy. Next morning, in looking over the 'Help Wanted' columns, I checked off only the least desirable jobs advertised, the kind that nine out of ten applicants would pass over. I argued that these offices wouldn't be so particular, and that I could get my experience in one of them, and *then* get a good job.

"About the poorest-sounding opening in the whole list advertised was that in a mail-order house. The same 'ad' had been in all of the previous day's papers. I applied there first, got the position, and worked six weeks. Then, armed with my 'experience,' I went after one of the really desirable jobs, and was engaged almost at once. It was easy, once I had the secret.

"I think that most girls, and men too," she continued, "make the mistake I did in first trying to get a position. They come loaded up with recommendations, and expect them to take the place of the experience which they do not have. There is no recommendation like being able to say, 'Yes, I am now employed; but I want a better position.'"

AND back at her boarding-house, the newcomer from Parsons had launched into a new adventure. Young Mr. Donnelly sat opposite her at the dining table, and on both sides of the table it was love at first sight. He was a former St. Louis boy, also a stenographer, twenty-two; which gave them much in common. There was a church wedding in Parsons at the end of the year, Nell Quinlan became Mrs. Nell Donnelly, and off they went to St. Louis to visit his people for their honeymoon.

One day during the honeymoon they were taking a walk along one of St. Louis's shady streets. On the right was a building sitting back in green grounds.

"It is a school, isn't it?" asked Nell Donnelly.

"Forest Park Girls' College," answered her new husband.

Nell Donnelly stood still. "You know," she said, "for a whole year I've forgotten all about it; but when I came to Kansas City my big idea was to earn money enough to go to college."

Paul Donnelly was also standing still. "Do you really want to go to college?" he demanded.

"We-ll," shrugged Mrs. Donnelly, "I did want to go once; but I wanted to get married more, I guess, for here we are—married."

They walked on in silence for a block. "There is no reason, Nell," said Donnelly suddenly, "why you still can't go to college. We are both young. Being married shouldn't make any difference, unless it's a favorable difference. Before, you were going it alone. Don't overlook that you now have a helper."

"But married women don't go to college," Nell Donnelly protested.

"You'll learn just as much married as you would single," Paul Donnelly decided. "Marriage should help, not harm. As commander-in-chief of this family, I say, 'Go to college.'"

And Nell Donnelly *did* go to college, though a bride, and though it took them more than a year to raise the money.

Between them, at the outset, they had two hundred and eighty-eight dollars in savings and Paul had an eighteen-dollar-a-week job. Nell, as seemed proper at the time, had given up her position with the thought of assuming her new one as a housewife. Now the dream of the bungalow was put out of mind except as a dream for the future. Instead of talking furniture costs, they sat down to figure college costs per year.

THE result was that they decided to continue boarding, as the cheapest way they could live, and Paul Donnelly struck out and got a job at twenty dollars a week. A month or two later his old boss begged him to return. A Donnelly did return to the place, but it was Nell Donnelly, to earn her husband's former salary, and save every penny of it. At the end of a year they had nine hundred dollars, which was enough for a two years' course at Lindenwood College, at St. Charles, Missouri, near St. Louis. So for two years Mrs. Nell Donnelly was a "college widow," while back in Kansas City Paul Donnelly was putting aside his savings for a home.

"We looked at it this way," explained Mrs. Donnelly in our talk, "that marriage was not the end but the beginning of life for both of us. It was a coöperative venture for the mutual good.

"This is not my company. It is not Mr. Donnelly's company. It is our company. I had the idea, which was a woman's idea, and the woman's knowledge of how to put that idea into concrete form. My husband, on the other hand, supplied what I did not have—the knowledge of how to market that idea, to finance the operations, to put the whole on a workable business basis. He filled the man's place in the partnership.

"And he did not think it unusual or startling for his wife to get a practical idea. He did not 'pooh-pooh' and tell me I knew nothing of business; nor did he stand lost in surprise when the results proved that I did. In my husband's eyes, I was one half of the marriage, a co-signer of the contract, and supposedly endowed with a normal allotment of brains."

But that is ahead of our story. After college, the bungalow did become a fact—a "little jewel of a place," as Mrs. Donnelly described it, with five rooms and a bath, all for seventeen dollars a

In business
FACES that are FIT
inspire confidence

"Just notice the fine skins of the men who shave with Williams!"

TO insure that look of fitness that comes with a well-conditioned skin, millions of men demand Williams for the morning shave. For Williams Shaving Cream—pure, mild, free from coloring matter—does far more than make shaving remarkably smooth and easy. It thoroughly cleanses the skin pores—tones up and conditions the skin texture—and leaves your face with a buoyant, youthful fitness.

87 years of research and specialized study have gone into the preparation of Williams. Ask the drug clerk! He'll tell you: *"Oh, yes—sometimes they change . . . but they all come back to Williams!"*

Next time say
Williams Shaving Cream

month. Mrs. Donnelly made the curtains, sofa pillows, and similarly decorative things herself and she adopted the cook book as her favorite novel.

Of course she became acquainted with her neighbors, and, of course, they talked about dress. The neighbor women, all older and more experienced in married life, were unanimous on one thing: A woman simply could not look pretty and do housework; there was no such thing as an attractive house dress. The most drab and practical kind of house garments predominated in the neighborhood.

At first Mrs. Donnelly blamed the women themselves. They simply didn't take the trouble to buy pretty things at the stores.

At a big department store she described the kind of house dress she wanted, something bright, colorful, and cheerful. The clerk actually yawned. "Sorry," she said, "but that kind of house dress isn't made."

"Oh, it must be made," insisted Nell Donnelly, and she had the clerk call the department manager, who, in turn, summoned the buyer.

"No," admitted both manager and buyer, "there isn't a manufacturer who makes such house dresses. The women don't want them. We couldn't sell a dozen in a year."

At other stores the result was the same, and the verdict the same. It was nonsense to think that women wanted to look pretty over frying pans and washtubs. The managers were confident that the manufacturers knew their business.

"Who are these manufacturers?" demanded Nell Donnelly.

Several of the leading firms were mentioned. Without exception they were headed, directed and controlled by men! Even in the stores, most of the buyers were men, and most of the department managers were men! It struck her as being a little funny, and just a little tragic.

THAT night, instead of dresses, Mrs. Donnelly took home with her a number of yards of dress material. Using the parlor floor as her designing table, and a plain sheet of wrapping paper, she cut out some patterns according to her own ideas. In spare hours during the week she made the material into dresses for work.

Seven years slipped by. Nell Donnelly continued to keep house, to buy according to the budget she and her husband worked out between them, to study her cook book, to make her own clothes and curtains, now and then to give little parties to friends, and to do all those things ordinary housewives do. But in her neighborhood and among her friends she had won a distinction, and a victory.

She was now an experienced housewife, a veteran. Yet, to all appearances, she was still a bride of a month! The gay, becoming house dresses which she wore were the marvel of the neighborhood. Visitors, no matter what hour they called, always left to tell "How nice Nell Donnelly looks!" More than one lamented that such dresses could not be bought in the stores.

In the meantime, too, Paul Donnelly had not been standing still. He had risen to credit manager, and then to secretary and treasurer of a wholesale hat company.

Chrysler Standardized Quality Assures Greater Value

FOUR GREAT CARS IN FOUR GREAT MARKETS

THE NEW "52"

52 miles an hour. Amazing acceleration and smoothness. Full-sized bodies of wood and steel. Saddle spring seat cushions. Fine mohair upholstering. Coupe $725; Roadster (with rumble seat) $725; 2-door Sedan $795; De Luxe 4-door Sedan $875; f. o. b. Detroit. Excise tax extra.

$725

Chrysler "52" Sedan (illustrated), $795, f. o. b. Detroit

earch as you will you can nd no such cars as those fered by Chrysler in their our great price fields — not ithin several hundred dolrs of them.

hrysler's mastery of scientific eneering and precision manufacring, Chrysler's inveterate habit f stepping faster than the procesion, Chrysler's ability to marshal eatures beyond the resources of e imagination of the ordinary uilder and crowd them into a lowingly beautiful vehicle without forcing up the price—these are the unique advantages Chrysler gives the buyer as the result of its exclusive principle of Standardized Quality.

As originated and practiced by Chrysler, Standardized Quality extends its benefits to four great lines of cars—the New "52," the Great New "62," the Illustrious New "72," and the Imperial "80"—specifies uniformity in high-grade steels and other materials, sets new close limits of precision manufacture, establishes new standards of accuracy of inspection, cuts down costs, but always raises quality to higher levels.

More than that. It means that Chrysler, with its vast resources, can apply refinements required by its cars of top price to those in lower price ranges.

The public has been quick in appreciating these benefits, and, by its approval, has raised Chrysler from 27th to 4th place in three years.

"Small-bubble" lather *soaks every whisker*

Holds water like a sponge. Softens each hair right where it grows out

AT the base, just where the razor edge works—that's where Colgate lather battles whiskers. Sopping-wet with water are its minute bubbles. They snuggle round each tiny hair, as the pictures below show.

How "small-bubble" lather works

The moment Colgate lather forms on your beard, two things happen:

1. The soap in the lather breaks up and floats away the oil film that covers each hair.

2. With the oil film gone, millions of tiny, water-saturated bubbles bring and hold an abundance of water down to the base of the beard, right where the razor does its work.

Because your beard is properly softened at its base, your razor works easily and quickly. Every hair is cut close and clean. And your face remains cool and comfortable throughout the day.

A WEEK'S SHAVES—FREE. Try this unique "small-bubble" lather at our expense. The coupon below will bring a generous trial-size tube—free.

EXTRA DIVIDEND! We will also include a sample box of Colgate's Talc for Men—the new after-shave powder that *keeps* your face looking freshly shaved all day long.

ORDINARY LATHER This lather-picture (greatly magnified) of ordinary shaving cream shows how large, air-filled bubbles fail to get down to the base of the beard; and how they hold air, instead of water, against whiskers.

COLGATE LATHER This picture of Colgate lather shows how myriads of tiny, moisture-laden bubbles hold water, not air, in direct contact with the base of the beard, thus softening every whisker right where razor works.

SOFTENS THE BEARD AT THE BASE

He was earning four thousand two hundred dollars a year. But still he wasn't his "own boss." He still was planning, dreaming of owning his "own little business," and saving to that end.

Christmas, that year, Mrs. Donnelly decided to give house dresses as presents to various of her friends. She designed each dress a little differently, and sent them on their way.

Shortly after this she gave a party to her friends. It had no intentional connection with the dresses given as presents. However, it turned out to be a veritable house dress round-table. The talk from first to last was of the dresses.

"WHY don't you make these dresses and sell them to the stores?" her friends demanded. "Everybody would buy them!"

The enthusiasm of her friends left Nell Donnelly thinking. She was thinking of several sewing machines standing idle in a little shop near by—machines which belonged to a friend of her husband.

This friend had made a venture into glove manufacturing, which had not proved successful. The three machines in the nearby shop were all that was left of the venture. They were little different from ordinary sewing machines except that they were run by electric motors.

"Why not?" pondered Nell Donnelly.

Wrapping up two of her own dresses, freshly washed and ironed, she took them to the buyer of one of the largest department stores in Kansas City. Her only sales argument was the dresses; but in five minutes the buyer ordered ten dozen of one style and eight dozen of the other. Nell Donnelly rode home on air.

Two of the sewing machines were bought and moved from the shop to an upstairs room of their home—they had a cottage now. Two women were engaged, one a large woman and one a small one.

"The reasons for the sizes," Mrs. Donnelly laughed, "was that I needed models, or dress forms. The large woman was my 'form' for the large-size dresses, myself for the medium size, and the little woman for the small size. Of course these women also were my makers, so that they had two positions in one. I cut out the material, just as I had cut it for my own dresses, and also did the fitting."

They worked one month on that first order. Mr. Donnelly was the financial backer of the venture, but otherwise only a curious onlooker. Nell Donnelly herself delivered the finished order to the store, a day in mid-winter, 1916. Next morning the store placed the dresses on sale.

At home, all on edge, Mrs. Donnelly waited until afternoon, and then she could wait no longer. She telephoned the buyer and asked in a small voice if they had yet sold a dress.

"Sold a dress!" the buyer exclaimed. "We've sold them *all!* The entire lot was gone before noon! How soon can you give us more, and how fast can you give them to us thereafter?"

The Donnellys soon saw they would have to move to a larger house, and to add another machine and another woman. They rented a place far enough apart from their neighbors that the latter would not be annoyed by the hum of the sewing machines. For the first time, too, Nell Donnelly engaged a housekeeper. Quickly

When busy traffic brings new problems to a Ford

The remedy is in *your* hands

Have you tried the new Mobiloil "E"? (for Model "T")

A serious new problem faces *all* makes of automobiles. It is the problem of multiplied starts and stops—brought in by today's congestion of traffic.

This new frequency of starting, stopping, and accelerating puts a heavy new work-load on *every* engine. Your Ford Model T doesn't escape!

Every start means wear on transmission bands.

Every stop means *more* wear.

Every moment when your car stands idle with its engine running may mean added carbon deposit.

Obviously this is a problem that must interest you, if you want

smooth operation and low repair charges.

A solution

Foreseeing this problem, the Vacuum Oil Company began some years ago a series of experiments. The object: to insure smoother starts and stops and preserve the transmission bands and at the same time to reduce carbon deposit to the minimum.

Today the result of those experiments is bringing new economy to Ford owners the world over; the new Gargoyle Mobiloil "E" does more than the so-called "non-chatter" oils. Its use assures smooth starting and stopping. *Yes.* But on top of that it gives maximum freedom from carbon and sticky valve action.

These characteristics combined in an oil of the highest quality and correct body for the Ford Model T represent the result of these years of research.

The next time you drain your crankcase, refill it from a sealed one-gallon can of the genuine Mobiloil "E" or with 4 quarts from bulk which nearby Mobiloil dealers can supply you.

Mobiloil "E" is also available in original quart cans for touring, in one- and five-gallon cans for the home garage and in 10-, 30- and 55-gallon drums with faucets.

GARGOYLE

Mobiloil "E"
***for* Fords**

Ahead of him, so much to master...all alone!

Yet only you can care for him in little things like this

What worlds he has to conquer—this boy of yours! How much he needs all the health and vigor you are giving him!

Constantly you are planning for his success—caring for him and safeguarding him. Not just in the big ways, but also in those many small ways which only mothers understand.

It is one of these seemingly small points which has recently attracted nation-wide attention in the public schools. It has been found that children's grades and their entire health are vitally influenced by the kind of breakfast they eat. The National Education Association and the American Medical Association now are urging mothers everywhere to give their children a *cooked* cereal for breakfast.

This slogan hangs today on the walls of over 60,000 school rooms:

"Every boy and girl needs a hot *cereal breakfast"*

Only a *hot* cereal can supply the energy needed for the strain of school work.

And ready for your boy is that one cereal which authorities have for thirty years recommended as ideal for growing children—Cream of Wheat!

First, it brings an abundance of energy. Second, Cream of Wheat is easily and rapidly digested. Third, children love its creamy goodness.

This little care in safeguarding your children's health—start it now! Send them off to school tomorrow morning really prepared. Give them a steaming bowl of good old Cream of Wheat.

This boy is the star runner on his team One reason is, every morning he eats a *hot* cereal breakfast—*Cream of Wheat*

© 1927, C. of W. Co.

FREE—*Mothers say this plan works wonders!*

To arouse your child's interest in eating a hot cereal breakfast, send for attractive colored poster to hang in his room. There is a four week record form on it, which the child keeps himself, from day to day, by pasting in gold stars. Posters and gold stars sent free with authoritative booklet, "The Important Business of Feeding Children," and sample box of Cream of Wheat. Mail coupon to Dept. P-8, Cream of Wheat Co., Minneapolis, Minn.

For a girl aged..... *For a boy aged*.....

Name and address.....

the output of the up-stairs "factory" grew to two dozen dresses a day.

"Even the larger house soon proved too small; so I rented a small storeroom not far away, for fifteen dollars a month. When we moved there we added five more machines, making a total of ten. But though we made a greater number of dresses, we made each dress exactly as we had made the first ones, which were as carefully made as my own. I simply taught my helpers, who were housewives just like myself, and not factory-trained women, to sew in my way.

"IN 1917, when America got into the war, Mr. Donnelly considered it his duty to go. His brothers each had children, whereas we had not; and Paul did not want the Donnelly family to be unrepresented in the army. Moreover, my factory was now doing so well that he had no need to worry about me.

"He was several months in closing out his own business interests and in putting me on what he considered a secure basis. For instance, my little storeroom wasn't fireproof, so Paul rented for me a corner of the twelfth floor in a large fireproof building—the same in which we occupy four entire floors to-day. Also, before he left for training camp, he obtained for me a credit-rating, such as all recognized businesses have. This made it possible for me to buy my materials in quantities in St. Louis.

"'Pay your bills on time, and don't plunge!' was Paul's parting advice. 'Go just a step or two slower than you think you can, and you'll be safe.'

"Then he was off. I *had* to go it alone."

Many a woman, under similar circumstances, would have been content to let well enough remain undisturbed. Nell Donnelly quickly demonstrated that she is not that kind of woman. Since one big department store was so enthusiastic about her wares, why not *all* big department stores? She decided to find the answer to that question.

Taking some sample dresses under her arm she called on the buyers of the other leading department stores in Kansas City. At the very first office she was welcomed with a fervor that was not devoid of relief.

"You mean to say," demanded the buyer, "that you've been making these dresses right here in Kansas City? Young woman, you've been giving me a pretty chase. For weeks I've been canvassing New York City in an effort to get those dresses. Nobody in New York had ever heard of them."

Every store to which she offered the dresses gladly gave orders. Various of the buyers even made suggestions as to how she should go about marketing her goods in other cities.

"Really, there was nothing difficult about it," Mrs. Donnelly continued. "Any woman who can run a house as it should be run, and keep a household budget as it should be kept, could have managed as well as I did. Business isn't nearly so complicated as men like to make out.

"I knew just how many dresses one woman and one machine could make in a day. I had my costs figured down to the last penny on this one-woman basis. Therefore, as I obtained new orders and was in need of a greater output, I simply

So popular, so gay *with the laughing* MOUTH of YOUTH

THE smile of youth, light-heartedly revealing perfect teeth, is a gift that all too soon loses its radiance.

Yet you can always keep your teeth shining white, your gums hard and healthy. Two things are necessary, cleansing and youthful activity of the six important mouth glands which produce the healthful fluids that protect the teeth and the gums against the destructive action of food-acids.

But soft foods give the tiny mouth glands too little exercise. While we are still in our teens they slow up. Then food-acids start decay.

The special formula of Pebeco Tooth Paste restores the youthful vigor of the mouth glands and polishes beautifully. A tingling and refreshing after-feeling tells you that your whole mouth is wholesome, healthy.

Made by Pebeco, Inc., a division of Lehn & Fink Products Company. Sole distributors, Lehn & Fink, Inc., Bloomfield, N. J. Distributed in Canada by Lehn & Fink (Canada) Limited.

Adored by those whose admiration counts the most!

You can always have the joyous thrill of being admired and sought after. Your gleaming teeth, so white in smiles and laughter, make you proud and confident.

Where the Mouth Glands are located

Three on each side, as the numbers show, are the mouth glands. When we are still in our teens they begin to slow up, then cavities appear. Pebeco stimulates the mouth gland fluids which neutralize the acids of decay.

added the necessary number of women and machines.

"In one way, it was perhaps a good thing that I did not know too much about business. For instance, since I was buying my materials in St. Louis, I saw no reason why I shouldn't sell some dresses to St. Louis stores. I knew nothing of the old precedent that one goes *East* to *buy* and *West* to *sell*.

"'If a man were running your business,' one St. Louis buyer told me, 'the first thing he would do would be to get a New York address, or at least an Eastern address. Styles in women's clothes come from the East.'

"'But why should they?' I retorted. 'If Kansas City can make nice dresses, why should she be ashamed of it? Isn't the real test the dress itself?'

"In the long run, he admitted, it was; but still, there was a prestige about a Fifth Avenue address that buyers liked, he said. Nevertheless, he signed a nice fat order for Kansas City-made dresses.

"I DON'T like day traveling on trains. So I arranged my schedule according to my likes. I jumped from one city to another by sleeper, spent the day in visiting stores, and then was off with night for the next city. I don't recall that a single store at which I called failed to give me an order.

"Well, the long and short of the story is that when my husband got back from camp after the Armistice and I turned over the sales end of the business to him, I was able to show him a list of orders amounting to a year's business of a quarter of a million dollars. My credit rating was as good as ever, and I hadn't any unpaid bills.

"After that, Mr. Donnelly took charge of the sales and financial work, and an old friend of his was admitted into the partnership with the title of vice president. I took over the designing department—which soon became, by the way, a real department—and also managed the factory as superintendent.

"For a time we tried hotel life, but it wasn't satisfactory. We wanted our own home, and therefore took an apartment, which is how we now live. Every morning we drive down to work together. Last summer we spent two and a half months in Europe, largely to permit me to study Paris styles and to get fresh ideas.

"You see, we make so many dresses now that our volume enables us to buy materials made to our order directly from the mills. The patterns for these materials, color schemes, and so on, are all our own exclusive designs. Our factory is now the second largest in America engaged in this line of business. We also make many dresses for general daytime wear.

"No," she concluded; "I haven't missed my home, because I still have that. Besides, business is a sort of glorified housekeeping. To me it is like a fairy tale come true—the fact that we are able, with all of these prosaic machines, to help make thousands of homes more cheerful and thousands of women prettier at their housework. And with our competitors all making so much prettier dresses than they once did, no housewife in America to-day need look dowdy and frumpy, unless she wants to be that way."

YOU HAVE TO BEAT RUGS TO GET THEM CLEAN

NOTHING very new about that, is there? You've heard it a thousand times. If you've ever kept house you know it's true.

Because it *is* true, it wasn't enough that The Hoover should whisk up dust and lint from the *surface* of carpetings.

No; so long as it was the deeply *embedded* dirt that did the damage, The Hoover must be designed to get that, too.

What better method of getting it than to apply the time-tested principle of *beating*—of jarring the buried dirt to the surface so it would be suctioned away?

Such is the reasoning behind The Hoover, which as everyone knows is the electric cleaner which *beats*, as it sweeps, as it cleans.

Such is the practical common sense behind the now-famous principle of "Positive Agitation," which is *beating* reduced to an exact scientific process.

Such beating, instead of being concentrated in a few violent strokes as with the carpet-beater or broom, is modified by The Hoover into a series of swiftly repeated air-cushioned taps. This is accomplished by means of a totally new appliance—the exclusive and patented Hoover Agitator illustrated here.

Suction lifts the rug from the floor and floats it on a cushion of air while the Agitator gently flutters out all the embedded grit.

Then strong suction draws all this dirt into the dust-tight Hoover bag.

Simple, isn't it? Efficient, too. "You have to *beat* rugs to get them clean."

The difference between The Hoover and a vacuum cleaner is that The Hoover *does* beat them—"Positive Agitation" being a feature of the celebrated Model 700 Hoover and of the lower-priced Model 543 Hoover as well.

Authorized Hoover Dealers will make you an allowance on your old cleaner, delivering you a new Hoover on easy payments. Cash price, the Model 700, $75.00 or the Model 543 **$59.50**
Dusting tools, $12.50. Prices slightly higher west of Rockies and in Canada.

THE HOOVER COMPANY, NORTH CANTON, OHIO

A Man's Debts Are Sometimes the Measure of His Courage

(*Continued from page 45*)

said, "I attended a banquet in Chicago, sponsored, I think, by the St. Andrew's Society, at which the principal address was made by Andrew Carnegie. He was not then as important a figure, financially or industrially, as he later became, but he was already a big man. After the formal meeting, several of us gathered around him, and somebody asked the question: 'Mr. Carnegie, what advice would you give a young man starting out in life?'

"'I never give advice,' the shrewd little steelmaster replied, with a twinkle in his eyes, 'because nobody takes it. But if I did, I think I'd say something like this: "Be reasonably sure you are on the right track, then go ahead, and don't let anybody or anything dissuade or discourage you."'

"This made a great impression on me, and I never forgot it. At critical times, I heartened myself by repeating it. It is really, I suppose, another way of saying that the bold men who make their plans carefully, and then won't be frightened and discouraged, are the ones who win.

"About this time, also, one of the newspapers, probably the old 'Chicago Times,' published a series of interviews with prominent business men, such as Chauncey Depew, E. H. Harriman, and Collis P. Huntington. I saw by reading what they had to say that they were impelled by something bigger and far more important than merely making money. It was true that making money was part of the scheme; but it was apparent that these men were also motivated by ideas of accomplishment, of service, of building and creating.

"Business had not appealed to me in any such light before. I had thought of it merely as a means of making a living. Now, as this bigger vision dawned on me, I began to realize that a man might very well find in business the same sort of satisfaction and thrill as in accomplishing a difficult piece of exploration or in scaling a mountain, and probably far more than in beating without purpose around the Horn, or in trading idly for pearls or copra in some corner of Polynesia."

THUS, among the stirring opportunities he found in this new land, Camlin's heart warmed with the promise of adventure—to be sure, of a different stripe and color from that which his dreams had pictured for him. And adventure of a stirring kind, too, the adventure of pitting his wits against problems that demanded all he could give them. Perhaps the hardest job of all was overcoming himself, because inevitably there were times when he was tempted to solve problems by chucking them and turning rover again. So Camlin began taking journals and financial papers. Eschewing social activities, he studied diligently every night in order that he might gain a knowledge of the rules and idioms of this new adventure. And presently he made his first investment.

"I had accumulated five hundred dollars in the building and loan association," he said, "when a business man who had taken some interest in me called my attention to a subdivision in which he considered the lots a good investment and bound to advance in value. He was buying two lots himself. I went to the building and loan association and borrowed four hundred dollars on the security of the five hundred I had invested, and bought one lot next to my friend's.

"The lots did advance in value very rapidly. In less than a year my friend decided to build himself a house. Thinking he needed more room than his two lots afforded, he bought mine; but prices had increased to such an extent that he had to pay me more than twice what I had paid.

"I now had a little fortune in hand, about a thousand dollars in cash. The impulse was very strong to strike my tent and head for Borneo. But I had now fully reached the conclusion that there was a job for me to do in Rockford, intrinsically bigger and more satisfying than merely roving. I promptly bought three more lots with the cash I had."

AT THIS spot in the world to which chance had brought him, Camlin saw there was a city to be built. He had reached it when it was flush and new. In but a few years it had developed with something like magic before his eyes. But he saw that enormous jobs remained to be done—providing new homes and home sites, perfecting transportation, introducing and helping to finance new industries; and, in all this, leadership would be required.

The chance to participate in the leadership and the building appealed to him. So John Camlin sat him down to aid in the adventure of creating a modern city.

It was not to be all easy sailing. Had it been, he would have missed the tang of adventure.

In 1890, Camlin bought the insurance agency in which he had been employed, changing its name to the John H. Camlin Company; the company now does, in a week, as much business as the old company did in a year. Even before buying the agency, however, Camlin had been venturing into bigger enterprises than buying single lots, and he soon got a sharp taste of business vicissitudes.

"Half a dozen of us," he explained, "formed a syndicate and bought at the edge of town a farm, which we planned to convert into a subdivision. Before long it became clear that if our plans went through, and this property was improved with high-class homes, as we meant it should be, the adjoining property would increase in value and would also be desirable for homes. Therefore, we organized another syndicate to buy a second farm.

"Some members of the first syndicate didn't want to go into the second, so we brought in some new men. Presently we organized a third syndicate on the same basis, then a fourth, a fifth, and finally a sixth. Some men were in one, some in two or three, but I was in *all*. Of course I didn't have enough cash to pay my share in all these purchases, so I tested my credit and borrowed to the limit. I believed then, and still believe, that after you have decided, upon mature consideration, to go into an enterprise, venturing boldly is ninety per cent of the task of bringing it to a successful conclusion. In a short time, I had notes outstanding totaling approximately one hundred thousand dollars.

"Then came the panic of 1893.

"Nobody, I venture to say, who was in business and passed through that period, will ever forget it. That was when the bankruptcy law first became really popular. One day in the midst of the crisis I met a lawyer who knew something of my affairs, and he said:

"'Well, John, I suppose you're going through bankruptcy?'

"'I suppose I'm *not!*' I said.

"My banker called me in. He was a good friend and a splendid business man. In front of him lay a fat pile of my notes.

"'What are you going to do about these?' he asked.

"'I'm going to *pay* them.'

"He looked at me shrewdly for a moment.

"'Yes,' he said finally, 'I believe you will.' He clapped the notes into a drawer. 'Now,' he went on, 'you'll need some money to carry on with. How much?'

"He was offering to lend me *more*. I thanked him; but assured him I had done all the borrowing I wanted to just then."

DURING the panic, few people cared or had the cash to buy real estate; not many were buying fire insurance; but Camlin had to earn money, and a lot of it. Therefore he got a job on the road for a while as an adjuster and investigator for a fire insurance company, being paid on a *per diem* basis, with the privilege of attending to his own business in Rockford as it needed him.

In five years, by working at this job, by selling some fire insurance, and by disposing of an occasional lot from his subdivisions, he earned enough to pay off his debts. Eventually, he had his reward too, for the properties he had held onto in spite of the terrific strain became the choicest residential section of the city. More important to him than that, however, was the fact that men had learned he had the stamina to live up to the first law of accomplishment: To *stick to his job under fire*.

Camlin was not in the least frightened by his first experience with fire. On the contrary, the adventurer's heart in him, shrewd to attempt, and careful to prepare, and bold to carry through, urged him to undertake still bigger enterprises.

"One of my friends," he said, "a banker, used to drop in at my office nearly every day on his way to lunch, and one day he said:

The flash of a smile that reveals brilliantly clean teeth . . . what an asset!

Now . . . for You Cleaner Teeth

CLEAN

Your dentist will urge you to use a dentifrice for *one* reason only—to keep your teeth *clean.* If you think your teeth or gums need treatment for any disease, don't expect a dentifrice to cure you—go to your dentist at once.

Try this unique cleansing method . . . see teeth grow beautifully clean

NOW—you can have teeth that sparkle, they are so *clean*—teeth that make you proud to smile. Thousands have gained this wonderful result after a few weeks' use of this unique cleansing dentifrice. Ribbon Dental Cream is designed to *clean* teeth—leading dental authorities say that this is the *one* function of a dentifrice. Its famous formula is based upon the cleansing principle, the result of many laboratory tests and years of experience.

When Ribbon Dental Cream is brushed upon the teeth it breaks into a delicious, aromatic foam. This foam contains calcium carbonate, a material which safely *rubs loose* the imbedded food particles, releasing their hold and dividing them into minute bits—at the same time polishing the teeth brilliantly. Then this remarkable foam sweeps over every tooth and gum surface, through every tiny crevice—*rinsing away* all impurities and removing the very causes of tooth decay. Thus Colgate's *cleans.*

Once you have cleaned your teeth with this cleansing dentifrice you will realize that, after all, the best thing you can do for your teeth is to keep them really clean.

Thereby you are doing your utmost to preserve the health of your teeth and gums and the flashing brilliance of your smile.

Colgate & Co
Est. 1806

TRY THIS—*see teeth grow cleaner!*

If you want to have beautiful, clean teeth, you will gladly take a little trouble to find the dentifrice that really cleans them best. Send for a trial tube of Colgate's and compare its cleansing quality with that of any other dentifrice.

COLGATE & CO., Dept. 200-K
595 Fifth Ave., New York, N. Y.
Please send me a sample of this cleansing dentifrice.

TRADE **YALE** MARK

SUPREME SYMBOLS OF SECURITY THE WORLD OVER WHEREVER MEN ENFORCE RESPECT FOR THE DIFFERENCE BETWEEN MINE AND THINE

There is only one maker of Yale Locks and Keys. The mark Yale means the name of the maker.

The Yale and Towne Mfg. Co.
Stamford, Conn., U. S. A.
Canadian Branch at St. Catharines, Ont.

YALE MARKED IS YALE MADE

"'John, I hear you've bought some more lots in the outskirts.'

"'Yes, that's true.'

"'Did you ever stop to think,' he asked, 'that every time one of those lots out there increases in value one dollar, the lots down-town increase one hundred dollars.'

"THAT started me to thinking, and I could easily see the truth of the remark. The town had to grow to the outlying districts, and each lot there depended on growth in its direction; but in the business center, growth in any part of town helped to raise values. So I began making a change in my plan of investments. I bought no more lots in the outskirts, but confined myself to business property in the center of town. For the most part, I was unable to buy it outright, so I took what I could get on ninety-nine-year leases.

"I induced owners to make such leases by offering them rentals far higher than they had ever dreamed of receiving. I did this because I believed that one day the income from such property would justify the high rentals. In this way I picked up something like fifteen or twenty choice sites in the center of the city.

"The advantage of leasing lay in the fact that I did not tie up any capital, but merely agreed to pay yearly rentals, trusting that my judgment of what was going to happen was sound."

With what result? To-day the properties that Camlin leased are exceedingly profitable. On one, for example, he contracted to pay a yearly rental with taxes of three thousand dollars, and to-day it brings ten thousand; on another he pays a little over five thousand dollars, and receives eighteen thousand. And so on.

Camlin, sitting in as he was at the fascinating game of helping to build a city, discerned that, among other things, better transportation was needed. A miserably inadequate horse-car line was operated on one street by the city, and a private company operated cars on a few other streets. Both companies lost money daily and gave bad service.

A few men, including Camlin, began buying the stock of the private company, which was a drug on the market and could be had for a song. A practical, experienced manager of street railways was brought in to head the enterprise, and Camlin and his associates together gained control of the management. They secured additional franchises, consolidated the two poor companies into a single good one, bought new equipment, hitched up the city line with interurban lines which they built to neighboring towns, watched the pennies carefully, but gave the city excellent service and made money for themselves. When they sold the property, it was a prosperous, efficient organization.

There were many other things, too, to be done. A city, Camlin realized, grows by means of the prosperous enterprises it already has, and by the new enterprises it organizes or encourages and enables to become prosperous. Camlin now had money and credit a-plenty, and he invested freely, but intelligently, in the stock of new and promising concerns that were sadly in need of crisp cash. To-day he is a heavy stockholder and director in fourteen such companies, besides his own company, which he owns outright and which to-day, besides insurance, handles bonds

"You Didn't Say a Single Word All Evening"

"HOW could I? I didn't even know what they were talking about."

"Well, Ralph, I wouldn't brag about that."

"But how was I supposed to know that they were going to talk literature and art? If they had discussed real estate, I could have chatted with them easily—all evening. . . ."

"Business, always business! If you were a big enough real estate man you'd know how to forget business and talk of other things in company!"

"I never felt so uncomfortable in my life," he said ruefully. "Couldn't even follow the drift of things. What was all that discussion about some poet who was killed in the war?"

"Really, Ralph—you should keep more abreast of things. I was surprised that you didn't contribute at least one idea or opinion to the whole evening's discussion."

He turned to her, curiosity and admiration mingling in his smile. "You were certainly a shining light tonight, Peg! You more than made up for my deficiency."

Many Wives Are Keeping Pace with Successful Husbands —This Pleasant Way

Peg was grateful for her husband's praise, and Ralph was quick to observe this. He moved closer to Peg, glad that he had succeeded in diverting attention from himself. "You were the prettiest and the cleverest woman at that dinner, dear," he added. "What a pity it is that we business men cannot find the time to devote to books and reading. Now women—"

"One moment, Ralph, I know what you are going to say—something about women having more time. But, my dear, you know that for the modern woman that is not so! Let me tell you the secret of it all. Do you remember that Elbert Hubbard's Scrap Book I purchased several months ago? You were rather skeptical about it. Well, I have been reading it in my spare moments ever since."

"That sounds interesting. Tell me more about it."

The Famous Elbert Hubbard Scrap Book

By the time they reached home, she had told him all about the unique Scrap Book. How Elbert Hubbard, many-sided genius, began it in youth and kept it throughout life. How he added only the choicest bits of inspiration and wisdom—the ideas that helped him most—the greatest thoughts of the greatest men of all ages. How the Scrap Book grew and became Hubbard's chief source of ideas—how it became a priceless collection of little masterpieces—how, at the time of his death, it represented a whole lifetime of discriminating reading.

Imagine it! This Scrap Book has now been published and anyone can have a copy. Do you know what that means? You can get in a few minutes' pleasant reading each evening what it took Elbert Hubbard a whole lifetime to collect! You can get at a glance what Hubbard had to read days and days to find. You can have the finest thoughts of the last twenty-five hundred years in one wonderful volume. If you read in the Scrap Book occasionally, you'll never be uncomfortable in company again. You'll be able to talk as intelligently as any one.

May We Send It to You for FREE Examination?

The Elbert Hubbard Scrap Book radiates inspiration from every page. It contains ideas, thoughts, passages, excerpts, poems, epigrams—selected from the master thinkers of all ages. It represents the *best* of a lifetime of discriminating reading, contains choice selections from 500 great writers. *There is not a commonplace sentence in the whole volume.*

This Scrap Book is a fine example of Roycroft book-making. The type is set Venetian style—a page within a page—printed in two colors on fine, tinted book paper. Bound scrap-book style and tied with linen tape.

Examine it at our expense! The coupon entitles you to the special five-day examination—if you act at once. Just send off the coupon today, and the famous Elbert Hubbard Scrap Book will go forward to you promptly. When it arrives, glance through it. If you aren't inspired, enchanted—simply return the Scrap Book within the five-day period and the examination will have cost you nothing. Otherwise send only $2.90, plus few cents postage, in *full payment.*

We urge you to act now. We want you to *see* the Scrap Book, to judge it for yourself. Mail this coupon TODAY to Wm. H. Wise & Co., Roycroft Distributors, Dept. 3311, 50 West 47th Street, New York City.

Wm. H. Wise & Co., Roycroft Distributors,
Dept. 3311, 50 West 47th Street,
New York City.

You may send me for five days' free examination a copy of Elbert Hubbard's Scrap Book in cloth-lined butcher paper binding. Within the five-day period I will either return the Scrap Book without obligation, or keep it for my own and send only $2.90, plus few cents postage, in full payment.

The average reading time of this advertisement is only 33 seconds. Spend this fraction of a minute and save a life-time of regrets.

THE boy is fearfully reckless. He chases that bounding pigskin, regardless of reason or caution, into the path of grave danger.

But what of the driver who comes sailing along on a wet pavement? For all the care he takes, he might be alone on a dust dry road in the country.

What if his car won't stop in time? What if it keeps on skidding ahead? His four wheel brakes and balloon tires won't make the blow any softer if he bowls over the careless boy.

Use extra caution on skiddy days. Have WEED Chains on the tires to grip the road, and drive more carefully. Then you will reduce the likelihood of a heart breaking skid accident.

Be Prepared for Early Winter

Buy your WEED Chains now. Don't wait for the first sleet or snowstorm. Don't delay until one day when so many stand in line to get their WEEDS. Be prepared.

A PRODUCT OF THE AMERICAN CHAIN COMPANY, Inc. in business for *your* safety

Wet Rubber *Slips* — WEED CHAINS *Grip*

and real estate mortgages. It is due not to John Camlin alone, of course, but to him in part, and to men, like him, inspired by the adventure of creating and building and accomplishing, that Rockford to-day, aside from Chicago, is the greatest manufacturing city in Illinois.

Once or twice, John Camlin has quarreled with his ordered life. The Boer War broke out. "There was never a skirmish to windward," sings Kipling, "but the Leaderless Legion was there." Camlin, although a naturalized American citizen since 1887, and the owner of a prosperous business and much property, left things and went. He got only as far as Montreal, however, where he attempted to enlist.

"To my disgust," he said, "and to my wife's relief, they wouldn't take me. My left eye had been injured in a football scrimmage when I was a boy, and they claimed the vision was defective."

The "aching void" of his rover's heart, however, has been filled partially by occasional trips: to Europe, to South America, and by thousands of miles of travel over North America. Yes, though he stuck to Rockford, he has seen something of the world on four of its continents.

"WHY not be bold," asks Camlin; "that is, if you really *want* to win?

"Be cautious, of course, in arriving at your decisions, but bold in executing them. The willingness and courage to incur the obligation of debt in a worthy purpose are hallmarks of successful men.

"To be sure, there are debts and debts. There are men who borrow to buy luxuries, to pay unnecessary bills, to have an easier time. The kind of borrowing I mean is not of this sort, but has to do with well-thought-out plans, constructive undertakings; it is borrowing money to make money.

"Making money isn't a mere matter of luck. There are two ways of doing it. One way is to take a wild dash at some 'good thing'; that is, speculating. Some men make money this way, but far more fail. The second way is to figure out what you mean to do, and then stick to it, applying all the energy and intelligence and courage you've got. It takes will power to stick it."

"You," I suggested, "came into this country when it was new, rich with opportunities on every hand; but to-day—"

"Ah!" he cried; "opportunities! Do you know, the surface has scarcely been scratched. Where there was *one* opportunity when I came, now there are *ten*.

"Do you realize that in business to-day, if we need a good man in a hurry, usually we can't find him? There aren't enough to go around. That's because opportunities have multiplied so much faster than good men!"

ON TWENTY-FIVE DOLLARS a week, with a wife and two children to support, Archie Chadbourne, a truck driver, finds life has many compensations. Next month, in "Debt is the Only Adventure a Poor Man Can Count On," he gives a most interesting and intimate account of how he, as a member of that great class of respectable poor which survives by borrowing from Peter to pay Paul, lives, and gets a great deal of fun and happiness out of life.

Announcing the New

FRANKLIN

Airman *Series*

The most *comfortable* mile-a-minute car ever built

Airman Features

Air-cooling—the advanced scientific principle now so widely endorsed by Airmen

Acceleration—the swift-darting, quick maneuvering of the pursuit plane

Synchronized 4-wheel hydraulic brakes—just a touch and you get action

Speed of a new kind—distance speed—all-day speed—speed you use

Riding comfort—the swift, easy glide of the airplane

Larger motor—for any temperature, altitude or road condition, a wealth of power always available

Engine smoothness—the balanced purr of the turbine

7-passenger models—(128 inch wheelbase)—the up-to-date family cars—commodious and light weight

Advanced designs—having their counterpart in aeronautical engineering

New ways to do new things—that's the spirit of the Airman—dashing, daring, care-free—the automobile's nearest approach to flying.

Fresh from the triumph of the most remarkable endorsement ever accorded a motor car—the almost universal adoption of air-cooling by Airmen for their sensational distance flights—Franklin presents the new Airman Series. It is an achievement for which automotive science has been striving for years—fast travel—mile-a-minute and upward—*with absolute comfort and sure, quick control.*

With its highly efficient air-cooled motor larger by 24%, Franklin provides what Aircraft has demonstrated as so desirable for distance ability—power which is usable at constant high speed for hours on end.

The Franklin Airman substitutes for the common discomforts, strains and uncertainties of continued fast driving, new and unprecedented smoothness, amazing acceleration, and the unfailing safety of perfectly synchronized 4-wheel brakes.

The spirit of the Airman stands for a wholly new motoring experience in store for you—vivid, thrilling, indescribable—when you have your first ride in the Airman. Arrange it today. Representative showings of 7-passenger and 5-passenger types now—at all Franklin dealers.

FRANKLIN AUTOMOBILE CO., SYRACUSE

For the business manager . . . of your home

HER weekly budget; her careful record of daily expenses; the bills to be paid, letters to be written, recipes and lists to be filed. All this is as much a source of pride to the modern woman as are the records of any business to its chief executive.

Yet, for want of a better place to work, many women are forced to neglect this important task or to use makeshift methods such as a dining-room table. And their records are piled in confusion in a buffet or dresser drawer.

The Globe - Wernicke Home Desk makes this burdensome inefficiency a thing of the past. Its roomy flat top assures restful convenience in making daily records. Its large drawer is equipped with special filing compartments adapted to the needs of the home. Its small drawers are divided with removable partitions for cards, envelopes, recipes, booklets, etc. Finally, its beautiful mahogany, walnut, or modern lacquer finish harmonizes perfectly with the home interior.

Globe-Wernicke Home Desks are available in two sizes with either one or two rows of drawers—the desks being 36 and 48 inches in length, respectively. Antique brass drawer-knobs lend a charming contrast to either finish.

Make *your* gift a G-W Home Desk—for years of increasing pride and delight! Your nearest Globe-Wernicke Dealer can show you these desks at reasonable prices. He will gladly explain their many features in detail. Call on him today!

Globe-Wernicke Sectional Bookcases can be enlarged a section at a time—each section increasing the attractiveness and efficiency of home or office. May be obtained in the Chesterfield design to match your G-W Home Desk. Write for interesting booklet, "For Every Room in the Home."

For the man who takes work home

—G-W Home Desks are indispensable. Overtime work, like regular office duties, requires the convenience of a *flat top* desk, and deep, easy - sliding, partitioned drawers — outstanding advantages of the Globe-Wernicke Home Desk.

Growing

(*Continued from page 31*)

For an instant the girl among the flowers looked really young, friendly, almost happy.

"Yes, doesn't it?" she said and smiled.

It was in August and the wheat fields were full ripe when Sary Overhiser stopped Helga one day.

"Helga," she said, "I'll never speak to Charity Wheeler again to my dying day! *Charity*—that's a good name for her! Do you know what she done last night? She locked the doors on Bess 'n' Ed, just because they didn't get in early enough to suit her. She said midnight was late enough for any party that was respectable, and no son of hers was going to come home at two, and expect to get in. And they set out on the steps till five o'clock this morning! She told it herself, as if she was proud of it. And Bess is sick to-day—I s'pose Charity thinks it serves her right! I declare, Helga, I believe the woman is a little cracked."

Next day, when Helga saw Grandma Wheeler bearing down upon her, she looked straight ahead and clucked to the horse to hurry.

When she saw Ed in town, she said to him: "Bess doesn't look very well, Ed!"

Ed started anxiously.

"I know it," he said. "I'm worried over her. She's homesick . . . and she and Mother don't get on together. But I don't know what to do!"

"Well, Bess'll be more'n homesick if you don't do something soon," she said, a little impatiently. "I know it's your mother, Ed; but folks are talking about how she pecks away at Bess so much. It wears a body out more than hard work."

"I know!" Ed agreed miserably.

Helga let it go at that.

But she wondered, when she saw Bess at church next Sunday, if she shouldn't have said more. The girl's eyes frightened Helga. Once, when Helga had thought about a bitter, old trouble for many months, never talking of it to anyone, she had looked in the glass, and her own eyes had been like that.

"Wouldn't you think," she thought, "that a woman with children and grandchildren, a woman sixty years old and more, would break her heart over a hurt child like Bess?" As she looked at Grandma Wheeler the impressiveness of the heavy old woman seemed to fade, and she saw her as only cruel and hard and old and ungracious.

What if Bess didn't know how to make pies? What if she didn't know how to cut out baby clothes? What if she was a little wasteful in peeling potatoes? What if she did wear her hair short as a boy's?

Couldn't Grandma Wheeler see how she tried, see how wistful and lonely she was under her sophistication? Couldn't she see that a girl who could make that lovely garden, and have that beautiful baby, had some beauty within herself?

THREE weeks later it happened. Helga was out in the kitchen washing dishes when she looked up to see Ed and Bess and the baby in the doorway. She knew instantly that something was very

Ship-shape Condition

HE last cable is off—the whistle blows—and the great liner starts on another g voyage. As the shore line les away, veteran and inexperi-ced travellers alike, can only guess at the future holds store. But they ow that before the p sailed, every vital t was given pains-king inspection. our after hour oughout the voy-the same watch-ness will be con-ued. The captain ready to meet heavy s, for in fair weath-he has prepared for rms.

ch of us, during the tumn, bears a ange resemblance to ship leaving port. me, sturdy and nd and ready for at may come; ers weak and unfit a crisis; still others ding only a slight overhauling to alify them to meet the added hazards ich the winter months bring.

uary claims more deaths than Decem-, and February more than January. ar after year, the same thing occurs—cause men and women and children ve not fortified their bodies to meet rigors of the winter.

They do not get enough exercise, nor enough fresh air. Too heavy a diet and too little sleep make a bad foundation on which to build health and strength.

So now, during the crisp, autumn weather, exercise in the open whenever it is possible. And during the winter, if you have no time or opportunity for outdoor exercise, you will find that intelligent daily indoor exercise in a properly ventilated room is a fine substitute—a daily tonic.

But, first of all, have a thorough physical examination. If there are any defects which can be corrected see that they are given immediate attention.

It is a real cause for thanksgiving that this is only November and there is still plenty of time to make preparations to sail safely through the "danger month".

Then follows March—March called the "danger month" because it is then that neglected colds suddenly change from seemingly unimportant discomforts to deadly menaces. Tired hearts and racked lungs make only a feeble fight for life. The plain truth is that all too many people live an abnormal life in the winter time. They eat too much.

You who are wise will fit yourselves to meet the approaching winter months in ship-shape condition.

This chart is an average picture of the four years from May, 1923, to April, 1927. It illustrates graphically for you, month by month, the average deathrate from Pneumonia per 100,000 population from May to April.

Study the picture. Note carefully the rise and fall.

When you reach the dizzy pinnacle—the March Peak—you will see that the danger of death from all forms of Pneumonia is more than four times as great as in midsummer.

* * * *

Statistical records show that in November, 1926, 8,000 persons died of Pneumonia. In December 11,400 persons died from the same cause. In January, 1927, 16,200. In February 15,000. And in March 17,000.

March is also the peak month for colds and for deaths from heart disease and tuberculosis. More children die of measles in that month than in any other month of the year.

The Metropolitan Life Insurance Company has prepared a series of simple exercises aimed to develop the body and keep it in sound physical condition. An exercise chart and two valuable booklets, "Commonsense, in Exercise" and "The Prevention of Pneumonia" will be mailed free of charge to anyone who writes for them.

HALEY FISKE, *President.*

wrong. But Ed spoke quietly enough.

"You got a place to stow us away for the night, Helga?" he asked. "We're moving over to the old Wainwright tenant house to-morrow; but we can't get settled to-night."

"Why, of course! Come on in. Hello there, sweetheart—give Helga a kiss! My, isn't he fat?"

"Bess is awfully tired," Ed said then. "I wonder if she could get to bed right away?"

Helga took Bess up-stairs. In her own little bedroom, she said:

"What was it, Bess? Can you tell me?"

"It wasn't anything." Bess's voice was bewildered, like her eyes. "Not anything. There have been lots of worse things. It was so little. I hung up some of the baby's things, and she took them all down and wrung them out again. It wasn't anything—it wasn't anything at all—but I—I—"

Helga found her eyes were stinging with tears.

"Oh, *cruel!*" she said. "Well, get to bed and rest, you're tired to death!"

Not anything, not anything at all! Well, maybe not; but Helga could see the stern satisfaction in Charity Wheeler's eyes as she squeezed a few drops of water out of a baby's dress. Nothing at all! Maybe not, in itself, but a thousand little things like that would break one's heart.

Emanuel Lind lent Ed his horses to go to town after a few pieces of furniture, and the young Linds took care of the baby, and helped clean woodwork and cut grass. It was a shabby little place, the old tenant house on the Wainwright farm; but Helga said:

"I think you'll be awfully happy here!"

Bess gave her a queer look.

"I'm too tired to be happy," she said.

And Helga, startled, saw that it was true. Old Grandma Wheeler had crushed out of Bess the very power to rise to happiness. She had tired her very soul, till it was like a beaten, flogged thing. When Helga offered her hollyhock roots to set out along the side of the house, Bess said:

"I don't believe I'll fuss much with flowers here."

FOLKS up the Hollow knew about it all. Of course they did. Grandma Wheeler herself talked about it. She stopped Helga, against her will, one day.

"I know folks is talking, and sayin' I'm to blame for fussin' with Ed's wife," she said. "But I guess if they'd have had to live with her, month in, month out, it would 've been a different story! If a body ain't got strength in their bones to wring out a baby's petticoat, they ought to be thankful that somebody's willin' to do it after 'em, instead of goin' into hysterics. Drippin' wet, she hung things out! And just last week I only so much as said to her, where was her other slip for the wash, and, Helga, she acted like she was crazy. Now, wasn't it natural enough for me to say that, I want to know? Wouldn't anybody that was anyways clean have had two slips in the wash? She got awful impudent. And she left things around. . . . Land, you wouldn't believe it, Helga, but more'n once I've had to straighten up her bureau drawers for her, they was that cluttered!"

Helga's face was a little white, and she spoke more sharply than was her habit.

MR. CHARLES LE MAIRE, *New York City, at work on one of the costume designs for which he is famous*

"Long hours of exacting work had made me stale"

ABOVE

"FOR SEVERAL YEARS I had been troubled with constipation and headaches. I was skeptical when one of my friends advised me to use Fleischmann's Yeast. But finally I decided to try it. I took 3 cakes a day, one before each meal, dissolved in water. Now I feel like a new woman. I also gave Fleischmann's Yeast to my young son. He was always constipated, his skin full of pimples. I gave him one cake in the morning and one at night. Today my boy has a nice clear skin—thanks to Fleischmann's Yeast."

MRS. MARION DECLERCQ, Detroit, Mich.

RIGHT

"MY DIGESTION got in such a condition that I was no longer able to enjoy my hunting and fishing. Taking the advice of a friend, I tried Fleischmann's Yeast. It made a very great change in my health. Now I am again able to enjoy the outdoors. I recommend Fleischmann's Yeast to any one with indigestion."

A. J. JOHNSON, Dallas, Texas

New York City

"THE COSTUME DESIGNER is expected to create new ideas every day, oversee the making of his costumes to the minutest detail, and spend many evenings a week at the new plays and revues or at dress rehearsals.

"Continuing in this routine for a number of years, I gradually became run down. I would get up in the morning with a splitting headache. My work and my reputation were endangered.

"At a friend's suggestion, I ate Fleischmann's Yeast before meals—and often while at work. In a short time I found myself enthusiastic again about my work. I slept better. My appetite and digestion improved. Fleischmann's Yeast built up my system, recharged my creative energy."

Charles Le Maire

FLEISCHMANN'S YEAST is not a medicine. It is a food as fresh as any vegetable from the garden.

Fleischmann's Yeast cleanses the intestines of noxious wastes, brings about a healthful regularity and *completeness* in elimination. Your digestion is improved. Your complexion and color are better than ever. Your whole outlook on life becomes cheerier.

Buy two or three days' supply at a time from your grocer and keep it in any cool dry place. Write today for a free copy of the latest booklet on Yeast in the diet. Address Health Research Dept. J-46, The Fleischmann Company, 701 Washington St., New York City.

A simple means to rebuild health

Eat three cakes of Fleischmann's Yeast regularly every day, one cake before each meal or between meals. Eat it just plain, or dissolved in water—cold or hot—or any other way you like. For stubborn cases of constipation physicians say to drink one cake in a glass of hot water (not scalding) before each meal and at bedtime.

"Some folks would rather let bureau drawers *be* cluttered than meddle in other people's things!" she said. "Get along, Net!"

Yes, she'd better go before she said something terrible to the cruel old woman. She invited Ed and Bess to supper that night. It was not an especially happy supper. Bess did not talk or eat much.

"She can't wake up; Charity Wheeler's killed her," went through Helga's mind. It was Emanuel Lind who, after supper, sat on the porch and talked with Bess in his slow, friendly way. Helga left them alone, but as she went about her tasks she heard Bess say:

"But I don't feel right. I could be happy now—only I don't feel right inside, Mr. Lind! She's an old woman and Ed was her baby. I should have been able to stick it out, and I couldn't!"

Helga couldn't hear her father's answer, but she stood still beside the dishpan, strangely stirred. What sort of strength was this, that regretted leaving that cruel old woman? And how had her father, so still, and a stranger, been able to get past that reserve of Bess's? What did Bess mean? Why should she have been able to stick it out? How many people up the Hollow would have stuck by Grandma Wheeler this long? How many would have felt they were doing a wrong to themselves by leaving? Helga sensed here a standard high and inflexible, and she did it homage in her heart.

IT CAME to her sharply that perhaps she had done wrong to sympathize with Bess, or to show her scorn of Grandma Wheeler. It had seemed to her very important that Bess should have her physical freedom. Now, standing there by the sink, Helga wondered if that freedom were important at all. Nevertheless, the next day she couldn't bring herself to respond to Grandma's wave of greeting. She was hateful, Charity Wheeler.

Even one Sunday in church, when she saw Grandma Wheeler out in the vestibule with Ed's baby, the tears running down her proud old face and dropping on the baby's bright hair, even then Helga could not find it in her heart to forgive the old woman. There was even a sort of satisfied exultation in her as she thought, "*She misses them!*" And she didn't tell Bess what she had seen.

The neighbors let Charity Wheeler alone now. They all liked Bess. But, the pity was, Bess stayed thin and her eyes kept their still, inward-seeing look.

"She thinks she ought to go back!" Helga said resentfully, to Emanuel Lind.

"Well, shouldn't she?" said her father.
